

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, DC, 20503

July 17, 2001

CIRCULAR NO. A-11
Revised
Transmittal Memorandum No. 74

TO THE HEADS OF EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

SUBJECT: Preparing and Submitting Budget Estimates

OMB Circular No. A-11 tells you how to prepare your FY 2003 budget submission. The Circular has three parts:

- Part 1 covers your budget request and related materials.
- Part 2 covers your strategic plan, annual performance plan, and performance reports.
- Part 3 covers the acquisition of capital assets.

This Circular supersedes all previous versions. The summary of changes highlights the substantive changes made since last year.

Your proposals should reflect the policies of the President, including the government-wide initiatives and agency-specific management reform proposals identified in the President's Management Plan, which will be published as part of the Mid-Session Review of the 2002 Budget. Your proposals should also be consistent with guidance provided by the Office of Management and Budget (OMB), including that contained in OMB spring guidance memoranda.

Guide to the Circular		xv
Summary of changes		xix
PART 1—PREPARATION AND SUBMISSION OF BUDGET ESTIMATES		
<i>I. GENERAL INFORMATION ABOUT THE BUDGET</i>		
<i>Section 10—Overview of the budget process</i>		
What is the budget?	10.1	1
Why prepare a budget?	10.2	1
What kinds of information does the budget provide?	10.3	1
What agencies does the budget cover?	10.4	2
What happens during the Federal budget process and when?	10.5	2
<i>Section 15—Basic budget laws</i>		
What laws regulate the budget process?	15.1	7
Why is the Budget and Accounting Act important?	15.2	7
What does the Budget Enforcement Act of 1990 enforce?	15.3	8
What does the Government Performance and Results Act of 1993 require?	15.4	8
What do I need to know about the Federal Credit Reform Act of 1990?	15.5	8
What other laws should I know about?	15.6	8
<i>Section 20—Terms and concepts</i>		
What is the purpose of this section?	20.1	12
How do I use this section?	20.2	12
What special terms must I know?	20.3	12
What do I need to know about budget authority?	20.4	19
What do I need to know about obligations?	20.5	29
What do I need to know about outlays?	20.6	30
What do I need to know about receipts, offsetting collections, and offsetting receipts?	20.7	31
What do I need to know about cash-equivalent transactions?	20.8	39
What do I need to know about discretionary spending, mandatory spending, and PAYGO?	20.9	40
What do I need to know about refunds?	20.10	43
What do I need to know about fund types and associated accounts?	20.11	44
How do I record investment in securities and disinvestment?	20.12	48
<i>Section 25—Applicability, exceptions, and advance approval</i>		
Does this part apply to me?	25.1	55
How do I get an exception from the requirements in Part 1?	25.2	56
For what items do I need advance approval?	25.3	56

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
<i>Section 27—Submitting materials to OMB</i>		
What do I send to OMB and when (overview)?	27.1	57
What do I include in the initial submission?	27.2	57
What do I submit after passback?	27.3	59
II. GENERAL INFORMATION AND POLICIES RELATED TO DEVELOPING ESTIMATES AND PROPOSALS		
<i>Section 30—Basic policies and assumptions</i>		
What should be the basis for my proposals?	30.1	63
What is the scope of the policy estimates?	30.2	64
What economic assumptions should I use when I develop estimates?	30.3	64
What assumptions should I make about growth in agency workload?	30.4	65
How do I develop unit cost information?	30.5	65
<i>Section 31—Compliance with administration policies and other general requirements</i>		
Advance appropriations	31.1	67
Customer service	31.2	68
Equal opportunity	31.3	68
Full funding	31.4	68
Government perquisites	31.5	69
MAX electronic network	31.6	69
Multi-year appropriations	31.7	69
Performance indicators, performance goals, and management improvement	31.8	69
Performance of commercial activities	31.9	71
User charges	31.10	71
Workforce planning and restructuring	31.11	72
Section 32—Estimating employment levels, compensation, benefits, and related costs		
What terms do I need to know?	32.1	73
What should be the basis for my personnel estimates?	32.2	73
What do I need to know about FTE budgeted levels?	32.3	76
How do I treat agency benefit payments under the Federal Employee Compensation Act?	32.4	77
How do I estimate Federal employee pension and health benefit costs?	32.5	78
How do I reflect the effects of pay raises?	32.6	79
How do I budget for unemployment compensation?	32.7	80
Section 33—Estimates related to specific types of programs and expenditures		
Construction and design of Federal facilities	33.1	82
Construction in flood plains	33.2	82
Construction of federally-owned housing	33.3	82

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Leases of capital assets	33.4	84
Real property	33.5	84
Hospital care	33.6	84
Inpatient care facilities and medical care services	33.7	85
Aircraft	33.8	85
Motor vehicles	33.9	85
Advisory committees and interagency groups	33.10	85
Benefit payments	33.11	86
Coastal Barrier Resources Act	33.12	86
Contractor claims	33.13	86
Credit programs	33.14	87
Foreign currencies	33.15	87
Mail	33.16	87
National security crosscut	33.17	87
Radio spectrum-dependent communications-electronics systems . .	33.18	87
Records storage	33.19	88
Remedial environmental projects	33.20	88
Space and related requirements	33.21	88
Systems acquisitions	33.22	88
Taxes and tax expenditures	33.23	88
Tort claims	33.24	89
Travel	33.25	89
Water and sewer payments to the District of Columbia	33.26	89
Section 34—Proposals requiring coordination with other agencies		
Nuclear reactors	34.1	91
Public works in the District of Columbia and National Capital Area	34.2	91
Radio spectrum-dependent communications-electronics systems . .	34.3	91
Tax expenditures	34.4	91
Section 35—Reporting and estimating data		
Who reviews the status of over-expended or over-obligated		
accounts?	35.1	93
How do I develop past year estimates?	35.2	93
How do I develop current year estimates?	35.3	93
How do I report transfers between accounts?	35.4	94
How do I estimate collections?	35.5	94
How do I estimate outlays?	35.6	94
Do outlay rates for presidential policy and baseline have to be		
consistent?	35.7	95
Section 36—Communications with Congress and the public and		
clearance requirements		
Confidentiality of budget deliberations	36.1	97
Congressional testimony and communications	36.2	97
Clearance of materials for Congress and the media	36.3	98
Clearance of changes to the President's budget	36.4	99
Information available to the public	36.5	99

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
III. DEVELOPING THE INITIAL BUDGET SUBMISSION		
Section 50—Overview of requirements for the initial submission		
What materials do I include in the initial submission?	50.1	101
When do I submit these materials?	50.2	101
Section 51—Basic justification materials		
Summary and highlight statement	51.1	103
General requirements for justifying programs and financing	51.2	105
Analysis of resources	51.3	106
Relationship of justification to account structure	51.4	107
Agency restructuring or work process redesign	51.5	107
Information on grant programs and infrastructure investment	51.6	107
Performance indicators and performance goals	51.7	107
Other analytical information	51.8	108
Information on program evaluation	51.9	108
Explanations relating to supplemental appropriations requests	51.10	108
Relationship of programs to account structure	Ex-51	109
Section 52—Information on financial management		
What are the general reporting requirements?	52.1	111
What other reporting requirements does this fulfill?	52.2	111
Who must report financial management information and when is it due?	52.3	112
What materials are required in the budget justification and why?	52.4	112
What is the report on resources for financial management activities (exhibit 52) and why must I submit it?	52.5	114
What are the line descriptions and coding for exhibit 52?	52.6	115
How do I check my exhibit 52 data for consistency?	52.7	116
How do I submit exhibit 52 and when is it due?	52.8	117
Report on resources for financial management activities	Ex-52	118
Section 53—Information technology		
Why must I report on information technology?	53.1	119
What special terms must I know?	53.2	121
How do I determine whether I must report?	53.3	122
How do I submit exhibit 53 and when is it due?	53.4	122
If I submitted exhibit 53 last year, how do I revise it this year?	53.5	122
How is exhibit 53 organized?	53.6	122
How is exhibit 53 coded?	53.7	124
What are the steps to complete exhibit 53?	53.8	125
Agency information technology (IT) investment portfolio	Ex-53	127
Section 54—Rental payments for space and land		
Do I need to report on rental payments?	54.1	129
What materials must I provide?	54.2	129
What terms do I need to know?	54.3	130
How do I prepare the space budget justification?	54.4	130
What supporting information must I provide?	54.5	134
Space budget justification	Ex-54	135

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Section 55—Information on energy use, costs, and efficiency		
What is the purpose of this information?	55.1	137
How will this information be used?	55.2	137
Do I need to report on energy use, costs, and efficiency?	55.3	137
When and how do I report?	55.4	138
How do I prepare exhibit 55?	55.5	138
Annual energy management data report	Ex-55	143
Section 56—Drug control programs		
Do I need to submit information on drug control programs?	56.1	147
What materials must I provide?	56.2	147
Section 57—Information on erroneous payments		
What is an erroneous payment?	57.1	149
Who must report erroneous payment information and when is it due?	57.2	149
What material must I provide?	57.3	149
Programs for which erroneous payment information is requested . .	Ex-57	151
Section 58—Additional information due with the initial submission		
How do I explain major changes in receipts estimates?	58.1	153
What information must I provide on Inspectors General for Designated Federal Entities?	58.2	153
What information must I provide if I have unobligated balances in liquidating accounts?	58.3	153
IV. MATERIALS REQUIRED AFTER PASSBACK		
Section 70—Overview of requirements after passback		
What do I submit after passback?	70.1	155
At what level of detail do I report MAX data, proposed appropriations language, and narratives?	70.2	155
Section 71—Reporting by budget account		
How do budget accounts relate to Treasury accounts?	71.1	157
How do I align budget accounts with programs?	71.2	157
What do I need to know about changing account and budget structure?	71.3	158
How do I account for reimbursements?	71.4	158
How do I account for allocations?	71.5	158
When should I merge accounts?	71.6	159
When should I consolidate accounts?	71.7	159
What do I need to know about accounting adjustments under 31 U.S.C. 1534?	71.8	160

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Section 79—The budget data system		
What is the MAX system?	79.1	161
What should I know about account identification codes?	79.2	162
How do I establish new accounts?	79.3	164
How do I report data in MAX?	79.4	166
What do I need to know about MAX schedules and line numbers?	79.5	166
New MAX A-11 technical requirements for FY 2003 Budget	Ex-79A	173
Functional classification	Ex-79B	175
Section 80—Development of baseline estimates		
What are the basic requirements?	80.1	177
What general rules do I need to know?	80.2	177
What rules apply to discretionary spending and collections?	80.3	178
What rules apply to direct spending programs?	80.4	180
What rules apply to mandatory collections?	80.5	180
What rules apply to mandatory supplemental requests?	80.6	181
What rules apply to discretionary limitations on obligations?	80.7	181
Section 81—Policy and baseline estimates of budget authority, outlays, and receipts (schedules A, S, R, and K)		
What are the basic requirements?	81.1	183
What information is automatically calculated?	81.2	184
What data classifications do I use to report the data?	81.3	186
What line codes do I use for schedules A, S, R, and K?	81.4	192
Relationships between schedules A, K, P, R, and S	Ex-81A	200
Setting up outlay calculations	Ex-81B	201
Setting up outlay calculations—resource with multiple outlay rates	Ex-81C	202
Automatic generation of discretionary outlays in schedule A	Ex-81D	203
Section 82—Program and financing (schedule P)		
What is the purpose of the program and financing schedule and how is it organized?	82.1	206
How do I report obligations?	82.2	206
How do I report the budgetary resources available for obligation?	82.3	209
How do I report obligated balances?	82.4	222
How do I report outlays?	82.5	224
How do I show net budget authority and outlays?	82.6	225
What additional information must I report on schedule P?	82.7	227
How do I present enacted rescissions and reductions of budget authority?	82.8	228
How do I present rescission proposals?	82.9	229
How do I present supplemental appropriations requests and items proposed for later transmittal?	82.10	229
How do I present transfers of resources?	82.11	230
How do I present transfers in the estimates?	82.12	230
How do I present merged accounts and consolidated schedules?	82.13	231
How do I present annual limitations on trust or revolving funds?	82.14	231
How should I treat allocation accounts?	82.15	232
How do I present credit financing accounts?	82.16	232

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
What actuals in the P&F are imported from the actuals I reported to Treasury?	82.17	232
Do the actuals I report in the P&F need to tie to the actuals I reported to Treasury?	82.18	233
What do I do if I do not agree with the PY amount on line P 9000 “Outlays (net)?”	82.19	234
What do I do if I do not agree with other PY amounts imported from Treasury?	82.20	234
Relationships between selected program and financing lines (MAX schedule P)	Ex-82A	235
Automatic generation of MAX schedule P data	Ex-82B	236
Section 83—Object classification (MAX schedule O)		
What are object classes?	83.1	237
Why must I report object class information?	83.2	238
How do object classes compare to functional and character classes and program activity?	83.3	238
How does the object class schedule relate to the program and financing schedule?	83.4	239
How can I determine whether an obligation should be classified as direct or reimbursable?	83.5	239
How should I report obligations that are covered by statutory limitations?	83.6	240
What object class codes and definitions should I use?	83.7	240
What object classes are associated with civilian and military pay in the baseline?	83.8	257
How do I classify relocation expenses related to a permanent change of station (PCS)?	83.9	258
How do I classify purchases related to information technology (IT)?	83.10	258
How do I classify obligations for education and training?	83.11	259
How do I classify obligations for real property (space, land, and structures)?	83.12	259
How do I classify obligations for Federal civilian retirement under CSRS?	83.13	260
How do I classify obligations for military retirement?	83.14	261
How do I classify intragovernmental transactions?	83.15	262
How do I classify obligations under the Intergovernmental Personnel Act (IPA)?	83.16	263
How is object class information presented in MAX schedule O and the Appendix?	83.17	264
When I report data in MAX schedule O will it generate subtotals or totals?	83.18	265
Summary of object class codes and standard titles (MAX schedule O)	Ex-83A	267
Object classification—without allocation accounts	Ex-83B	268
Object classification—with allocation accounts	Ex-83C	269

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Section 84—Character classification (MAX schedule C)		
What is the purpose of the character classification system?	84.1	271
What terms do I need to know?	84.2	272
What do I need to know about reporting the data and and relationships with other data requirements?	84.3	273
How do I report character classification data in MAX?	84.4	275
Summary of character classification codes (MAX schedule C)	Ex-84A	285
Research and development character classification codes	Ex-84B	286
Section 85—Federal credit		
Does this section apply to me?	85.1	288
What background information must I know?	85.2	288
What special terms must I know?	85.3	290
How do I calculate the subsidy estimate?	85.4	298
How do I calculate reestimates?	85.5	300
How do I calculate and record modifications?	85.6	305
What must I know about the sale of delinquent loan assets?	85.7	310
What are the reporting requirements for credit accounts?	85.8	312
What do I report for program accounts?	85.9	313
What do I report for financing accounts?	85.10	319
What do I report for liquidating accounts?	85.11	328
What do I report for receipt accounts?	85.12	228
Program account, program and financing schedule (schedule P) . . .	Ex-85A	329
Program account, summary of loan levels and subsidy data (schedule U)	Ex-85B	330
Direct loan financing account, program and financing schedule (schedule P)	Ex-85C	331
Direct loan financing account, status of direct loans (schedule G) . .	Ex-85D	332
Direct loan financing account, balance sheet (schedule F)	Ex-85E	333
Guaranteed loan financing account, program and financing schedule (schedule P)	Ex-85F	334
Guaranteed loan financing account, status of guaranteed loans (schedule H)	Ex-85G	335
Guaranteed loan financing account, balance sheet (schedule F) . . .	Ex-85H	336
Liquidating account, program and financing schedule (schedule P) . .	Ex-85I	337
Liquidating account, status of direct loans (schedule G)	Ex-85J	338
Liquidating account, status of guaranteed loans (schedule H)	Ex-85K	339
Liquidating account, balance sheet (schedule F)	Ex-85L	340
Section 86—Other MAX data		
What do I need to know about the personnel summary (schedule Q)?	86.1	341
What do I need to know about financial statements schedules E and F)?	86.2	342
What do I need to know about budget plans (schedule D)?	86.3	351
What do I need to know about reporting budget year appropriations requests in thousands of dollars (schedule T)? . .	86.4	351
What do I need to know about the schedule on the status of funds (schedule J)?	86.5	352

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
What do I need to know about the schedule on unavailable collections (schedule N)?	86.6	357
What do I need to know about the schedule on the status of contract authority (schedule I)?	86.7	360
What do I need to know about the summary of budget authority and outlays?	86.8	361
Financial statements—statement of operations (MAX schedule E) . .	Ex-86A	363
Financial statements—balance sheet (MAX schedule F)	Ex-86B	364
Budget year appropriations request in thousands of dollars (MAX schedule T)	Ex-86C	365
Section 95—Budget Appendix and print materials		
What is the budget <i>Appendix</i> ?	95.1	367
How is the <i>Appendix</i> organized?	95.2	367
How is the “Detailed Budget Estimates” section organized?	95.3	368
What do I need to know about the print materials published in the <i>Appendix</i> ?	95.4	369
What is the process for getting print materials published in the <i>Appendix</i> ?	95.5	371
How do I revise galley proofs and submit new print materials? . . .	95.6	371
Revising galley proofs	Ex-95	374
Section 96—Appropriations language		
What do I need to know about appropriations language in general?	96.1	377
What format should I use when submitting appropriations language?	96.2	377
How do I make changes in language and amounts?	96.3	379
What supporting statutory references must I provide?	96.4	379
What are the special appropriations language requirements for credit programs?	96.5	380
What are the special language requirements for programs that disburse over a period longer than five fiscal years?	96.6	381
What do I need to know about explanations of appropriations language?	96.7	381
Appropriations language	Ex-96A	382
General provisions	Ex-96B	383
Section 97—Narrative statements, footnotes, and tables		
What is the purpose of narrative statements?	97.1	385
Must I prepare a narrative statement for every account?	97.2	385
How should I write the narrative statements?	97.3	385
What should narrative statements say about performance goals and indicators?	97.4	386
How do I get narrative statements into print?	97.5	386
Are there specific requirements for narrative statements in certain cases?	97.6	386
What do I need to know about footnotes and tables?	97.7	389
Analysis of programs financed by multiple budget accounts	Ex-97	391

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Section 100—Revised and additional information required after final budget decisions		
What information must I provide after final budget decisions?	100.1	393
What materials must I provide in support of baseline estimates? . . .	100.2	393
What information must I provide on grants to State and local governments?	100.3	394
What information must I provide on motor vehicles?	100.4	394
What information must I provide on relocation expenses?	100.5	396
What information must I provide on international travel?	100.6	397
V. ACTIONS FOLLOWING TRANSMITTAL OF THE BUDGET		
Section 110—Supplementals and amendments		
How does the President inform Congress of changes in budget policy in between his annual transmittals of the budget?	110.1	399
What are supplementals and amendments?	110.2	400
What do I need to send to OMB?	110.3	400
What do I need to send to Congress?	110.4	402
Supplemental requests—appropriations language	Ex-110A	403
Budget amendments—appropriations language	Ex-110B	405
Supplemental requests and budget amendments—program and financing schedule	Ex-110C	407
Section 111—Releases of contingent emergency funding		
What are releases of contingent emergency funding?	111.1	409
How do I request a release?	111.2	409
Releasing contingent emergency funding	Ex-111	410
Section 112—Other actions and requirements following budget transmittal		
What do I need to know about rescission proposals and deferrals? .	112.1	411
What do I need to know about Mid-Session Review?	112.2	411
What additional materials should I include in my congressional budget justifications?	112.3	411
APPENDICES		
Scorekeeping guidelines	Appendix A	413
Scoring lease-purchases and leases of capital assets	Appendix B	419
Listing of OMB agency/bureau and Treasury codes	Appendix C	429
Explanation of MAX edit checks	Appendix D	439
Diagnostic reports and MAX crosswalks	Appendix E	463
BEA questions and problems report (BEACK01)	Ex-E1	465
Total FTE employment: approved estimates vs. schedule Q (CKFTE)	Ex-E2	466
FTE employment: average salaries (CKFTEOBS)	Ex-E3	467
Suspected receipt estimating problems (CKRCPTS)	Ex-E4	468
Reconciliation of program and financing schedule transfers (TRANSFER)	Ex-E5	469

<i>Title</i>	<i>Sec./Ex. No.</i>	<i>Page</i>
Policy and baseline agency/category account detail	Ex-E6	470
report—mandatory estimates (BEACAT)	Ex-E7	471
Crosswalk between schedules P, N, and J		
Crosswalk among selected actuals reported on SF 133, schedule	Ex-E8	475
P, and Treasury Annual Report		
PART 2—PREPARATION AND SUBMISSION OF STRATEGIC PLANS, ANNUAL PERFORMANCE PLANS, AND ANNUAL PROGRAM PERFORMANCE REPORTS		
Section 200—Overview of strategic plans, annual performance plans, and annual program performance reports		
Overview	200.1	483
Definitions	200.2	484
Applicability	200.3	485
Section 210—Preparation and submission of strategic plans		
Introduction	210.1	487
Timing of strategic plan submissions	210.2	488
Time period covered by strategic plans	210.3	489
Relationship to submission of annual performance plans	210.4	490
Strategic plan features	210.5	490
Comprehensive mission statement	210.6	493
General goals and objectives	210.7	493
Description of how the general goals and objectives will be achieved . .	210.8	494
Relationship between goals in the annual performance plan and		
a strategic plan	210.9	495
Key factors affecting achievement of general goals and objectives	210.10	495
Program evaluations and strategic plans	210.11	497
Consultation	210.12	497
Transmittal of plans to Congress and OMB	210.13	498
Section 3 of the Government Performance and Results Act	Ex-210A	500
Various submission dates for the strategic plans and years covered	Ex-210B	501
Section 220—Preparation and submission of annual performance plans		
Introduction	220.1	503
Timing of plan submissions and submitting official	220.2	504
General rules governing development of annual performance plans	220.3	505
Single annual performance plan	220.4	505
Relationship to strategic plans	220.5	506
Elements of the annual performance plan	220.6	507
Format and additional content	220.7	509

GUIDE TO OMB CIRCULAR NO. A-11

What is the purpose of this Circular?

- Part 1: Covers development of the President's budget and tells you how to prepare and submit materials required for OMB and Presidential review of agency requests and for formulation of the FY 2003 Budget. A significant portion of this part focuses on the preparation of the budget *Appendix* and the related data base.
- Part 2: Describes requirements of the Government Performance and Results Act and tells you how to prepare and submit strategic plans, annual performance plans, and annual program performance reports.
- Part 3: Discusses planning, budgeting and acquisition of capital assets, and tells you how to prepare and submit information on new and past acquisitions.

Does this Circular apply to me?

This Circular applies to all executive departments and establishments. In addition, some of the requirements apply to the legislative and judicial branches, to the District of Columbia, and to Government-sponsored enterprises. See section 25.1 for more information.

When are the materials required by this Circular due?

Different materials are due on different dates. The initial submission of budget justification and other materials is due **September 10** for Cabinet agencies as well as other agencies subject to executive branch review. Section 27 provides additional information on due dates.

How is the Circular organized?

Part 1 presents requirements chronologically. General information about the budget and general policies related to developing the estimates and proposals is provided at the beginning of Part 1. Subsequent sections provide information on developing the initial submission, followed by materials required after passback and actions following transmittal of the budget. The sections on materials required after passback cover budget data structure and collection, publishing the budget *Appendix*, additional material required after passback, and, finally, updates to initial submission materials.

Parts 1 and 2 are divided into chapters. In some cases, the chapters are further divided into subchapters. The information in each chapter is organized into a series of sections that consist of consecutively numbered subsections. Sometimes, related sections are grouped together under unnumbered center headings to help you navigate through the Circular.

Section numbers are not repeated between parts. Part 1 includes sections numbered 10 through 112 and appendices A through E; Part 2 includes sections numbered 200 through 233; and Part 3 includes sections numbered 300 and appendices 300A through 300B. We reserved certain section numbers for future use, so there are some gaps in the numbering scheme.

How do I find information in the Circular?

At the beginning of the Circular, you will see a table of contents that identifies all the parts, chapters, sections and associated page numbers. There is also a table of contents at the beginning of each section that identifies the subsections and exhibits contained in that section. We summarize major changes in policies and requirements at the beginning of the Circular. In addition, we describe the changes that affect each section at the beginning of that section. At the end of the Circular, there is an index covering the three parts. Following the index, there is a list of OMB circulars, memoranda, and bulletins and Presidential Executive Orders referenced in A-11. OMB circulars, memoranda, and bulletins are available for viewing or downloading at the following Internet address:

www.whitehouse.gov/OMB

Presidential Executive Orders are available for viewing or downloading at the following Internet address:

www.nara.gov/fedreg/eo

What common conventions does this Circular use?

The term *schedule* refers to a set of data within the MAX budget database that is complete in itself and describes a view or slice of the President's budget. The data in many of these schedules is printed in the budget *Appendix*, in which case the data in a schedule for a budget account defines a printed table in the *Appendix*. Schedules are described in section 79.

When the Circular refers to a specific year, assume it is a calendar year unless otherwise noted. The following phrases and abbreviations are used to identify specific fiscal years:

Fiscal Year	Description
Past year - 1 (PY-1)	The fiscal year immediately preceding the past year.
Past year (PY)	The fiscal year immediately preceding the current year; the last completed fiscal year.
Current year (CY)	The fiscal year immediately preceding the budget year.
Budget year (BY)	The next fiscal year for which estimates are submitted.
Budget year + 1 (BY+1) <i>through</i> budget year + 9 (BY+9)	The fiscal year following the budget year <i>through</i> the ninth fiscal year following the budget year.

Special budget terms, such as budget authority, obligations, and outlays, are defined in section 20.

Who can answer questions about the Circular?

The following table lists OMB organizational units with primary responsibility for certain sections of the Circular. Direct general questions on the instructions and underlying concepts to these units. Direct agency-specific questions on the application of these instructions, as well as on sections not listed below, to your OMB program examiner or Resource Management Office.

LIST OF OMB CONTACTS FOR INFORMATION REQUIRED BY OMB CIRCULAR NO. A-11

Section No.	Description	OMB Contact	Telephone No.*
PART 1			
52.4	Financial management budget justification	Financial Standards Reporting and Management Integrity Branch, Office of Federal Financial Management	395-3993
52.5	Report on resources for financial management activities	Federal Financial Systems Branch, Office of Federal Financial Management	395-3993
53	Information technology	Information Policy and Technology Branch, Office of Information and Regulatory Affairs	395-3785
54	Rental payments for space and land	Justice/GSA Branch, Transportation, Commerce, Justice, and Services Division	395-3442
55	Information on energy use, costs, and efficiency	Energy Branch, Energy, Science, and Water Division	395-3164
56	Information on drug control programs	Transportation, Commerce, Justice, and Services Division	395-4892
57	Information on erroneous payments	Financial Standards Reporting and Management Integrity Branch, Office of Federal Financial Management	395-3993
58.2	Information on Inspectors General for Designated Federal Entities	Financial Standards Reporting and Management Integrity Branch, Office of Federal Financial Management	395-1040
58.3	Justification of unobligated balances in credit liquidating accounts	Budget Concepts Branch, Budget Review and Concepts Division	395-3172
84	Additional data on research and development	Science and Space Branch, Energy, Science, and Water Division	395-3935
100.3	Information on grants to State and local governments	Budget Analysis Branch, Budget Analysis and Systems Division	395-3945

SUMMARY OF CHANGES

Note: Vertical revision bars "|" are used in the margin of the Circular to highlight new requirements and significant changes.

Section No.	Change
20.4(c)	Explains that the Administration has proposed a change in the treatment of advance appropriations that would require budget authority to be scored in the fiscal year for which the appropriations bill is enacted.
20.7(d)	Provides examples of user fees for goods and services.
20.7(d)	Advises agencies that the Administration is reviewing the treatment of user fees and that revised guidance may be issued.
20.9(b)	Updates the description of BEA categories and the scoring of outlays from contingent emergency appropriations.
20.10	Modifies the guidance on refunds credited to expired accounts consistent with a change in presentation in schedule P (see section 82).
27	Requires the initial submission of budget justification and other materials by September 10, 2001.
30.1	Reminds agencies that budget proposals should reflect the President's Management Plan and guidance provided by OMB.
30.2	Emphasizes the longstanding policy that OMB will only consider supplemental requests for transmittal with the budget (as well as those for later transmittal) that meet certain criteria.
31.1	Revises guidance on requests for advance appropriations.
31.2	Calls for agencies to redistribute higher level positions to front-line, service-delivery positions.
31.8	Provides guidance on e-Government projects and refers to NARA records management guidance for agencies implementing electronic signature technologies.
31.8	Provides guidance on security.
31.9	Provides additional guidance on performing commercial activities.
31.10	Provides additional guidance on user fees.
31.11	Provides additional guidance on workforce restructuring.
32.5	Requires agencies to reflect the full Government share of pension and health benefit costs, including the post-retirement cost of health benefits for current employees.
33.18	Requires estimates for costs associated with relocating or modifying radio spectrum-dependent communications-electronics systems.
51.1	Requires the summary and highlight statement that covers agency budget submissions to relate policies, strategies, and resources requested to the President's management plan and to address outcomes and related outputs listed in OMB spring guidance memoranda.

Section No.	Change
51.7	Requires certain agencies to provide integrated budget and performance information for outcomes and related outputs listed in OMB spring guidance memoranda.
52.4	Provides specific guidance on materials requested for grants management and reminds agencies to include grants management systems in their agency information technology investment portfolio.
52.4	Requires agencies to include information on financial management performance measures and a discussion of the audit quality of non-Federal audits in their initial submission.
52.6	In reporting on financial management activities, requires agencies to report obligations for the prior year.
52.6	Adds new reporting categories for contractor accounting and reporting and for organization-wide financial statements.
Exhibit 52	Requires obligations for each category; includes a contractor break-out for accounting and reporting; includes a break-out for dollars spent on component and agency-wide audits; adds a column for prior year data.
53.1	Highlights the requirement that e-Government projects be prioritized and managed effectively, be citizen-centered, and include specific outcomes.
53.1	Provides detailed information on formulating life cycle costs.
53.2	Clarifies the definitions of financial and non-financial systems.
53.6	Adds a new grants management part to exhibit 53 and removes the resources summary part.
53.7	Revises the coding system for exhibit 53.
56.2	Drops the prescribed format for submission of material; leaves format for information on drug control programs to the agency's discretion.
57	Drops the requirement for information on programs funded by the Violent crime reduction trust fund;
57	Requires agencies to submit erroneous payment data, assessments, and action plans with their initial budget submissions
58	Drops the requirement for information related to the 2002 Winter Olympics; moves information related to privacy policies to sections 53 and 300.
79.3	Explains how account symbols in the 9xxx series are assigned.
80.4	Explains reclassification of changes under the BEA for direct spending programs.
81.2	Requires separate line entries when rescissions and reductions of unobligated balances have a different outlay rate than the new budget authority in an account.
81.2	Automatically generates discretionary offsetting collections in schedules A and S using the same across-the-board increases as other discretionary budget authority.

Section No.	Change
81.3	Changes the line coding in MAX for programs subject to special sequestration rules under the BEA.
81.3	Clarifies that civilian and military pay includes both compensation and benefits.
81.4(c)	Requires agencies to identify offsetting collections (cash) by source in MAX schedules A and S instead of aggregating the data in a single line entry.
81.4	Uses the memorandum entry for outlays from end of PY balances (line 9x22) to report the outlay impact of CY and BY balance transfers, rescissions, and adjustments.
82.3	Drops the distinction between definite and indefinite budget authority
82.3	Clarifies the treatment of transfers, rescissions, and reductions.
82.3, 82.4	Drops the requirement to distinguish between general and special fund amounts for selected lines using line serial numbers.
82.3, 82.6	Modifies the presentation of spending authority from offsetting collections and the calculation of net budget authority.
82.4	Simplifies the presentation of obligated balances.
83.7	Includes repayment of student loans as an example of recruitment and retention obligations under object class 12.1
84.3	Requires agencies to report budget authority and outlays in schedule C on a gross basis.
84.4	Deletes the crosscut for climate change technology and retitles the crosscut for high-performance computing and communications and information technology to networking and information technology R&D.
84.4	Classifies transactions related to credit liquidating accounts as non-investment activities.
85.5	Introduces the balances approach to calculate reestimates.
85.9	Requires agencies to report budget authority and outlays for reestimates on separate lines rather than aggregating them in schedule U, and changes the line coding system.
85.10	Revises the limitation lines in schedules G and H.
85.10	Automatically loads PY start of year balances of loans outstanding (line 1210 in schedule H and line 2210 in schedule G) from the end of year data reported in the previous year's budget.
85.10	Requires agencies to report net financing disbursements (line 6300 in schedules G, H, and Y) through BY+9 rather than BY+4.
86	Drops the requirement for schedule Z, related to budget execution information.
100.4, 100.5, 100.6	Allows agencies to enter data on motor vehicles, relocation expenses, and international travel directly into MAX.
112.3	Requires agencies to provide Congress with information to assess current and proposed capital projects that is consistent with the Administration's budget proposals.

Section No.	Change
Appendix B	Clarifies that the scoring rules for lease purchases capital leases do not apply to interagency leases.
Exhibit E8	Includes a crosswalk between the SF 133, program and financing schedule, and Treasury Annual Report.
210.2	Requires agencies to prepare an interim adjustment to their current strategic plan to incorporate the Administration's program and policy changes.
220.8	Covers the Administration's initiative to fully integrate performance and budget information; instructs agencies to complete the full alignment of resources with performance.
220.9	Includes coverage in an annual plan of the set of government-wide reforms, agency-specific management reforms, grant program administration, and workforce restructuring.
220.11	Includes coverage of management problems cited by the Inspector General, and of the agency's information security program as required by the FY 2001 Defense Authorization Act's amendments to the Paperwork Reduction Act of 1995.
220.12	Expands coverage of data reliability and quality to reflect provisions of the Reports Consolidation Act of 2000.
221	Expands the number of fiscal years covered by performance data in the FY 2003 performance plan to five (FY 1999-2003).
221	Describes the process of selecting outcomes/outputs that will be featured in the FY 2003 budget process, with performance goal target levels being passed back to the agencies, and outlines the initiative to calculate the full cost of programs and activities.
231, 232, 233	Incorporates numerous changes required by the Reports Consolidation Act of 2000 affecting both the content and submission date of annual program performance reports and the agency option of combining the annual program performance report with the agency accountability report.
232.9	Requires the FY 2001 performance report to include actual performance data for FY 1999 and FY 2000.
300.3, 300.5	Summarizes OMB's policy for planning, acquisition, and management of capital assets.
300.9	Provides instructions for electronic submission of exhibit 300.
Exhibit 300	Deletes old exhibit 300A and incorporates funding information (full or incremental) into new exhibit 300, Capital Asset Plan.
Exhibit 300	Adds a new section to part I, "Project Description" and expands part II to add privacy and the requirements of the Government Information Security Reform Act.

CIRCULAR NO. A-11
PART 1

**PREPARATION AND SUBMISSION
OF BUDGET ESTIMATES**

**EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
JULY 2001**

SECTION 10 – OVERVIEW OF THE BUDGET PROCESS**Table of Contents**

- 10.1 What is the budget?
- 10.2 Why prepare a budget?
- 10.3 What kinds of information does the budget provide?
- 10.4 What agencies does the budget cover?
- 10.5 What happens during the Federal budget process and when?

10.1 What is the budget?

In this Circular, the term *budget* means the President’s budget – *The Budget of the United States Government*. It consists of several volumes that set forth the President’s financial proposal with recommended priorities for allocating resources. The main *Budget* volume contains the President’s budget message and other broad statements of policy. The *Appendix* contains detailed information by agency, bureau or program group, budget accounts, programs, and activities. Other volumes, such as *Analytical Perspectives* and *Historical Data*, provide different views of the budget. Most of the information contained in the budget is, or is based on, information you submit for your agency and programs in response to this Circular.

The term budget can mean other things in other contexts. Some refer collectively to the budget resolution and revenue and spending bills that Congress passes, which we describe below, as the “congressional budget.” Ultimately, Congress and the President enact many laws that control the Government’s revenue and spending, which we sometimes refer to collectively as the budget, as in “executing the budget.”

This section provides a broad overview of the budget process. You can read more about the budget process in a chapter of the *Analytical Perspectives* volume of the most recent budget, “Budget System and Concepts and Glossary,” which is also available as a separate pamphlet. You can order budget documents, including the pamphlet, from the Government Printing Office, or you can view or download them at the following Internet address:

www.access.gpo.gov/usbudget

10.2 Why prepare a budget?

A law requires the President to submit a budget (see section 15.2). The President formally transmits his financial proposals to Congress through the budget. Congress considers the recommendations and uses the information included in the budget as it drafts and passes laws that affect spending and revenue. Through this process the Government decides how much money to spend, what to spend it on, and how to raise the money it has decided to spend.

10.3 What kinds of information does the budget provide?

The budget focuses primarily on the budget year — the upcoming fiscal year for which Congress needs to make appropriations. However, it includes data on and may propose changes for the current year. It also covers at least the four years following the budget year (outyears) in order to reflect the effect of budget

decisions over the longer term and includes data on the most recently completed fiscal year to permit comparisons of budget estimates to actual accounting data.

The budget provides actual data or estimates (in millions or billions of dollars, depending on the context) for the following:

- The amount that each agency may obligate the Government to pay (budget authority) and to actually pay (outlays) by account and for the agency in total;
- The amount of receipts each agency collects from various sources;
- Budget authority, outlays, and receipts by major function of Government (such as national defense); (This is why we assign each budget account a functional classification code(s).)
- Total budget authority, outlays, and receipts for the Government; and
- The amount of a surplus (when receipts exceed outlays) or a deficit (when outlays exceed receipts).

The budget divides the Government totals for budget authority, outlays, and receipts into “on-budget” amounts and “off-budget” amounts. The off-budget amounts include the transactions of the Social Security trust funds and the Postal Service, which are excluded from the budget totals by laws.

The budget arrays data in many different ways. For example, a part of the budget discusses current operating expenditures versus capital investment. Also, while the budget focuses primarily on dollars, it also includes data on other resources, such as Federal employment levels.

10.4 What agencies does the budget cover?

The budget covers the agencies of all three branches of government—Executive, Legislative, and Judicial—and provides information on Government-sponsored enterprises. In accordance with law or established practice, OMB includes information on agencies of the Legislative Branch, the Judicial Branch, and certain Executive Branch agencies as submitted by those agencies without change. By longstanding practice, the budget presents information for the Board of Governors of the Federal Reserve System, but doesn’t include amounts for the Board in the budget totals, even though it is a Government agency, because of the independent status of the System. The budget includes information about the Government-sponsored enterprises, such as the Federal National Mortgage Association (Fannie Mae), but doesn’t include them in the budget totals because they are privately owned. (Section 25 discusses the applicability of Part 1 of this Circular to various agencies.)

10.5 What happens during the Federal budget process and when?

The budget process occurs in three main phases:

- *Formulation.* During this phase, the Executive Branch prepares the President’s budget. OMB and the Federal agencies begin preparing the next budget almost as soon as the President has sent the last one to Congress. OMB normally starts the process officially by sending planning guidance to Executive Branch agencies sometime in the Spring. The President completes this phase by sending the budget to Congress, normally on the first Monday in February, as specified in law, although

occasionally Presidents have sent it later for various reasons. For example, in a year with a transition between outgoing and incoming Administrations, the timing of the President's budget transmittal changes. (President George W. Bush transmitted the 2002 budget in April 2001.)

- *Congressional.* This phase starts in late January or February, when Congress receives the President's budget. Congress doesn't vote on the President's budget itself, and it doesn't enact a budget of its own, as such. It considers the President's budget proposals, passes an overall revenue and spending plan called a "budget resolution," and enacts appropriations acts and other laws that control spending and receipts.
- *Execution.* This phase lasts for one fiscal year. It pertains to funds appropriated for that fiscal year, to balances of appropriations made in prior years that remain available for obligation, and to outlays from obligated balances carried over from the previous year. At the beginning of the fiscal year, and at such other times as necessary, OMB apportions funds – that is, specifies the amount of funds that an agency may use by time period, program, project, or activity – to Executive Branch agencies. Throughout the year, agencies hire people, enter into contracts, enter into grant agreements, etc. in order to carry out their programs, projects, and activities. These actions use up the available funds by obligating the Federal government to make outlays, immediately or in the future. See OMB Circular No. A-34, "Instructions on Budget Execution," for more information on this phase of the budget process. Circular No. A-34 is available at the following web site:

www.whitehouse.gov/OMB/circulars/index-budget.html

The following tables highlight the major events in each of the phases of the budget process. These tables show the planned timing or, when applicable, the timing specified in law. The actual timing may vary from this. For example, Congress frequently does not enact all appropriations acts by the start of the fiscal year, and on several occasions a President has submitted the budget later than specified for various reasons, including late enactment of appropriations for the previous fiscal year or a change in Administrations. Since budget cycles overlap, we must begin the next cycle before completing the last one.

MAJOR STEPS IN THE FORMULATION PHASE

What happens?	When?
<i>OMB issues Spring planning guidance to Executive Branch agencies for the upcoming budget.</i> The OMB Director issues a letter to the head of each agency providing policy guidance for the agency's budget request. Absent more specific guidance, the outyear estimates included in the previous budget serve as a starting point for the next budget. This begins the process of formulating the budget the President will submit the following February.	Spring
<i>OMB and the Executive Branch agencies discuss budget issues and options.</i> OMB works with the agencies to: <ul style="list-style-type: none"> • Identify major issues for the upcoming budget; • Develop and analyze options for the upcoming fall review; and • Plan for the analysis of issues that will need decisions in the future. 	Spring and Summer
<i>OMB issues Circular No. A-11 to all Federal agencies.</i> This Circular provides detailed instructions to the agencies for submitting budget data and materials.	July

SECTION 10 – OVERVIEW OF THE BUDGET PROCESS

What happens?	When?
<i>Executive Branch agencies (except those not subject to Executive Branch review) make initial budget submissions.</i> See section 25.1 and 27.1.	September 13
<i>Fiscal year begins.</i> The just completed budget cycle focused on this fiscal year. It was the “budget year” in that cycle and is the “current year” in this cycle.	October 1
<i>OMB conducts its Fall review.</i> The OMB staff analyzes agency budget proposals in the light of presidential priorities, program performance, and budget constraints. They raise issues and present options to the Director and other OMB policy officials for their decisions.	October — November
<i>OMB briefs the President and senior advisors on proposed budget policies.</i> The OMB Director recommends a complete set of budget proposals to the President after OMB has reviewed all agency requests and considered overall budget policies.	Late November
<i>“Passback.”</i> OMB usually informs all Executive Branch agencies at the same time about the decisions on their budget requests.	Late November
<i>All agencies enter MAX computer data and submit print materials and additional data.</i> This process begins immediately after passback and continues until OMB must “lock” agencies out of the database in order to meet the printing deadline. See section 27.1.	Late November to early January*
<i>Executive Branch agencies may appeal to OMB and the President.</i> An agency head may ask OMB to reverse or modify certain decisions. In most cases, OMB and the agency head resolve such issues and, if not, work together to present them to the President for a decision.	December *
<i>Agencies prepare and OMB reviews congressional budget justification materials.</i> Agencies prepare the budget justification materials they need to explain their budget requests to the responsible congressional subcommittees.	January
<i>President transmits the 2003 budget to Congress.</i>	First Monday in February

*OMB provides specific deadlines for this activity.

MAJOR STEPS IN THE CONGRESSIONAL PHASE

What happens?	When?
<i>Congressional Budget Office (CBO) reports to Budget Committees on the economic and budget outlook.</i>	January
<i>CBO reestimates the President’s budget based on their own economic and technical assumptions.</i>	February
<i>Other committees submit “views and estimates” to House and Senate Budget Committees.</i> Committees indicate their preferences regarding budgetary matters for which they are responsible.	Within 6 weeks of budget transmittal
<i>Congress completes action on the concurrent resolution on the budget.</i> Congress commits itself to broad spending and revenue levels by passing a budget resolution.	April 15

SECTION 10 -- OVERVIEW OF THE BUDGET PROCESS

What happens?	When?
<i>Congress needs to complete action on appropriations bill for the upcoming fiscal year.</i> Congress completes action on regular appropriations bills or provides a “continuing resolution” (a stop-gap appropriation law).	September 30

MAJOR STEPS IN THE EXECUTION PHASE

What happens?	When?
<i>Fiscal year begins.</i>	October 1
<i>OMB apportions funds made available in the budget process.</i> Agencies submit apportionment requests to OMB for each budget account, and OMB approves or modifies the apportionment, which specifies the amount of funds agencies may use by time period, program, project, or activity.	September 10 (or within 30 days after approval of a spending bill)
<i>Agencies incur obligations and make outlays to carry out the funded programs, projects, and activities.</i> Agencies hire people, enter into contracts, enter into grant agreements, etc. in order to carry out their programs, projects, and activities.	Throughout the fiscal year
<i>Fiscal year ends.</i>	September 30

SECTION 15 -- BASIC BUDGET LAWS**Table of Contents**

- 15.1 What laws regulate the budget process?
- 15.2 Why is the Budget and Accounting Act important?
- 15.3 What does the Budget Enforcement Act of 1990 enforce?
- 15.4 What does the Government Performance and Results Act of 1993 require?
- 15.5 What do I need to know about the Federal Credit Reform Act of 1990?
- 15.6 What other laws should I know about?

15.1 What laws regulate the budget process?

This Circular's requirements stem mainly from these four laws, which we summarize in separate subsections below:

- Budget and Accounting Act.
- Budget Enforcement Act.
- Government Performance and Results Act.
- Federal Credit Reform Act.

In addition, section 15.6 describes other laws that play an important part in the budget process.

15.2 Why is the Budget and Accounting Act important?

Before this law, Government agencies usually sent budget requests independently to congressional committees with no coordination of the various requests. The Budget and Accounting Act required the President to coordinate the budget requests for all Government agencies and to send a comprehensive budget to Congress. It created the Bureau of the Budget, now the Office of Management and Budget, to help the President implement these requirements. It also required the President to include certain information in the budget. Congress has amended the requirements many times since 1921 and has codified them as Chapter 11, Title 31, U.S. Code. These are some of the requirements:

- “On or after the first Monday in January but not later than the first Monday in February of each year, the President shall submit a budget of the United States Government for the following fiscal year.”
- “Each budget shall include a budget message and summary and supporting information. The President shall include in each budget the following....” The provision goes on to list about thirty items, such as expenditures and receipts for the past year through the fourth year following the budget year, information on debt, financial information, and information on employment levels.
- “Under regulations prescribed by the President, each agency shall provide information required by the President in carrying out this chapter. The President has access to, and may inspect, records of an agency to obtain information.”

- “Estimated expenditures and proposed appropriations for the legislative branch and the judicial branch...shall be submitted to the President before October 16 of each year and included in the budget by the President without change.”

15.3 What does the Budget Enforcement Act of 1990 enforce?

First enacted in 1990, Congress and the President designed the Budget Enforcement Act (BEA) to enforce the budget levels they agreed to for the fiscal years 1991 through 1995. The Act was extended in 1993 and 1997 to reflect budget agreements in those years. The current version of the Act applies to any law enacted through 2002 that would increase spending or decrease receipts. It applies to appropriations acts and other laws, so it affects almost every aspect of budgeting.

The BEA significantly amended existing laws pertaining to the budget process, including the Congressional Budget Act of 1974, the Balanced Budget and Emergency Deficit Control Act of 1985, and Chapter 11, Title 31, U.S. Code. Most of the BEA’s enforcement provisions are included in the Balanced Budget and Emergency Deficit Control Act of 1985 (described in section 15.6).

The BEA divides spending into two types:

- *Discretionary spending*, which means the budget authority controlled by annual appropriations acts and the outlays that result from the budget authority; and
- *Mandatory spending*, which means budget authority and outlays resulting from permanent laws.

The BEA applies one set of rules to discretionary spending and another to mandatory spending and receipts. It includes receipts under the same rules that apply to mandatory spending, because receipts are generally controlled by permanent laws. Section 20.9 explains these rules and BEA reporting requirements in detail.

15.4 What does the Government Performance and Results Act of 1993 require?

This law emphasizes managing for results – emphasizing what a program accomplishes and how well the accomplishments match with the program’s purpose and objectives. It requires agencies to prepare strategic plans, annual performance plans, and annual performance reports. Part 2 of this Circular addresses the requirements of this law.

15.5 What do I need to know about the Federal Credit Reform Act of 1990?

This law governs Federal credit programs – ones that make direct loans and loan guarantees. The Act prescribes a special budget treatment for direct loans and loan guarantees that measures their subsidy cost, rather than their cash flows. For most credit programs, Congress must provide budget authority equal to the subsidy cost in annual appropriations acts before the program can make direct loans or loan guarantees. Section 85 of this Circular addresses the requirements of this law, which was enacted as an amendment of Title V of the Congressional Budget Act of 1974.

15.6 What other laws should I know about?

Although they don’t directly affect the requirements of this Circular, these basic laws regulate the budget process in important ways:

- *U.S. Constitution.* Two provisions of the U.S. Constitution provide the underpinning for the budget process. Article 1, section 8, clause 1 empowers the Congress to collect taxes. Article 1, section 9, clause 7 requires appropriations in law before money may be spent from the Treasury. The term appropriation applies broadly to any law that permits a Government employee to spend money, not just the regular annual appropriations bills.
- *Congressional Budget Act of 1974 (Public Law 93-344), as amended.* This law governs the congressional budget process. It defines some key budget terms, such as budget authority, that are used in all phases of the budget process. It established the House and Senate Budget Committees and the Congressional Budget Office (CBO).
- *Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177), as amended.* This law prescribes rules and procedures (including “sequestration”) designed to constrain spending and receipts legislation. When originally enacted, the Act was commonly known as the Gramm-Rudman-Hollings Act. The Budget Enforcement Act (BEA) (described above) significantly amended this act, and many people refer to its requirements as the BEA requirements.
- *Chapters 13 and 15, Title 31, United States Code.* These chapters prescribe rules and procedures for budget execution. Many of the specific provisions were previously enacted as section 3679 of the Revised Statutes, also known as the “Antideficiency Act.” OMB Circular No. A-34, “Instructions on Budget Execution,” addresses the requirements of this law.
- *Impoundment Control Act of 1974 (Public Law 93-344), as amended.* Contained in the same act as the Congressional Budget Act, this law prescribes rules and procedures under which the President may withhold appropriated amounts from obligation. Circular No. A-34 addresses the requirements of this law. Circular No. A-11’s requirements related to rescissions (cancellations) and deferrals of budget authority stem from this law.

SECTION 20 -- TERMS AND CONCEPTS

Table of Contents

- 20.1 What is the purpose of this section?
- 20.2 How do I use this section?
- 20.3 What special terms must I know?
- 20.4 What do I need to know about budget authority?
 - (a) Definition of budget authority
 - (b) Forms of budget authority
 - (c) Determining the period of availability of budget authority
 - (d) Determining the amount of budget authority
 - (e) Discretionary or mandatory budget authority
 - (f) Unobligated balance of budget authority
 - (g) Balance of unpaid obligations and obligated balances
 - (h) Reappropriation
 - (i) Rescission
 - (j) Transfer
 - (k) Transfer in the estimates
 - (l) Allocation
- 20.5 What do I need to know about obligations?
- 20.6 What do I need to know about outlays?
- 20.7 What do I need to know about receipts, offsetting collections, and offsetting receipts?
 - (a) Overview
 - (b) Receipts
 - (c) Offsetting collections and offsetting receipts
 - (d) User fees
 - (e) Means of financing
- 20.8 What do I need to know about cash-equivalent transactions?
- 20.9 What do I need to know about discretionary spending, mandatory spending, and PAYGO?
- 20.10 What do I need to know about refunds?
- 20.11 What do I need to know about fund types and associated accounts?
- 20.12 How do I record investment in securities and disinvestment?

Summary of Changes

Explains that the Administration has proposed a change in the treatment of advance appropriations (section 20.4(c)).

Provides examples of user fees for goods and services (section 20.7(d)).

Advises that the Administration is reviewing the treatment of user fees and that revised guidance may be issued (section 20.7(d)).

Table of Contents -- Continued

Updates the description of BEA categories and the scoring of outlays from contingent emergency appropriations (section 20.9(b)).

Modifies the guidance on refunds credited to expired accounts (20.10)

20.1 What is the purpose of this section?

In this section we define budget terms – such as *budget authority*, *obligation*, and *outlay* – that you need to know in order to understand the budget process and this circular. We also explain certain of the terms in depth.

20.2 How do I use this section?

- Go to the next section (section 20.3) if you just need a brief definition of a term commonly used in the budget process. That section lists the terms in alphabetical order.
- Go to sections 20.4 - 20.11 if you need a fuller explanation of the terms and concepts listed in the section titles of the Table of Contents above.
- Go to section 20.12 if you need to know about investing fund balances in Treasury securities or other securities.
- Go to section 85, Federal Credit, if you need to know more about the credit terms defined in section 20.3.

20.3 What special terms must I know?

Advance appropriation means appropriations of new budget authority that become available one or more fiscal years beyond the fiscal year for which the appropriation act was passed. (See section 20.4(c).)

Advance funding means appropriations of budget authority provided in an appropriations act to be used, if necessary, to cover obligations incurred late in the fiscal year for benefit payments in excess of the amount specifically appropriated in the act for that year, where the budget authority is charged to the appropriation for the program for the fiscal year following the fiscal year for which the appropriations act is passed. (See section 20.4(c).)

Agency means a department or establishment of the Government for the purposes of this Circular. (Compare to *bureau*.)

Allowance means a lump-sum included in the budget to represent certain transactions that are expected to increase or decrease budget authority, outlays, or receipts but that are not, for various reasons, reflected in the program details. For example, the budget might include an allowance to show the effect on the budget totals of a proposal that would affect many accounts by relatively small amounts, in order to avoid

unnecessary detail in the presentations for the individual accounts. The President doesn't propose that Congress enact an allowance as such, but rather that it modify specific legislative measures as necessary to produce the increases or decreases represented by the allowance.

Appropriated entitlement – See *entitlement authority*.

Appropriation means a provision of law (not necessarily in an appropriations act) authorizing the expenditure of funds for a given purpose. Usually, but not always, an appropriation provides budget authority (see section 20.4).

Baseline means an estimate of the receipts, outlays, and deficit or surplus that would result from continuing current law through the period covered by the budget. (See section 80.)

BEA means the Budget Enforcement Act of 1990, as amended. (See section 15.3.)

Borrowing authority is a type of budget authority that permits obligations and outlays to be financed by borrowing. (See section 20.4.)

Budget means the *Budget of the United States Government*, which sets forth the President's comprehensive financial plan and indicates the President's priorities for the Federal Government. (See section 10.1.)

Budget account means a receipt account or an expenditure account established in the MAX database. Budget accounts are based on the accounts established by the Treasury Department, but budget accounts may encompass two or more Treasury accounts. (See section 71.)

Budget authority (BA) means the authority provided by law to incur financial obligations that will result in outlays. Specific forms of budget authority include appropriations, borrowing authority, contract authority, and spending authority from offsetting collections. (See section 20.4.)

Budgetary resource means an amount available to enter into obligations in a given year. The term comprises new budget authority for that year and unobligated balances of budget authority provided in previous years.

Budget totals means the totals included in the budget for budget authority, outlays, and receipts. Some presentations in the budget distinguish on-budget totals from off-budget totals. On-budget totals reflect the transactions of all Federal Government entities, except those excluded from the budget totals by law. Off-budget totals reflect the transactions of Government entities that laws exclude from the on-budget totals (those of the Social Security trust funds and the Postal Service). The budget presents combined on- and off-budget totals to derive totals for Federal activity, sometimes called the unified budget totals. For example, see the end of the chapter "Federal Programs by Agency and Account" in the *Analytical Perspectives* volume of the most recent budget.

Bureau means the principal subordinate organizational units of an agency.

Cap means the legal limits for each fiscal year on the budget authority or outlays for a category of discretionary spending. (See section 20.9.)

Cash equivalent transaction means a transaction in which the Government makes outlays or receives collections in a form other than cash or the cash does not accurately measure the cost of the transaction. (See section 20.8.)

Collection means money collected by the Government that the budget records as either a receipt, an offsetting collection, or an offsetting receipt. (See section 20.7.)

Contract authority is a type of budget authority that permits obligations to be incurred in advance of either (a) an appropriation of the cash or (b) receiving offsetting collections to make outlays to liquidate the obligations, depending on what is specified in the authorizing legislation. The appropriation of the cash to liquidate obligations of contract authority is not counted as budget authority. (See section 20.4.)

Cost means the cash value of the resources allocated to a particular program. When used in connection with Federal credit programs, the term means the estimated long-term cost to the Government of a direct loan or loan guarantee, calculated on a net present value basis, excluding administrative costs and any incidental effects on governmental receipts or outlays. (See section 85.)

Credit program account means an account into which an appropriation for the cost of a direct loan or loan guarantee program is made and from which such cost is disbursed to a financing account for the program. (See section 85.)

Current services estimates – See *baseline*.

Deficit means the amount by which outlays exceed receipts in a fiscal year. It may refer to the on-budget, off-budget, or unified budget deficit. (See *budget totals*.)

Deferral means any executive branch action or inaction that withholds, delays, or effectively precludes the obligation or expenditure of budgetary resources. The President proposes deferrals to Congress by special message. They are not identified separately in the budget. (See section 112.1.)

Deposit fund means an account established to record amounts held temporarily by the Government until ownership is determined (for example, earnest money paid by bidders for mineral leases) or held by the Government as an agent for others (for example, State and local income taxes withheld from Federal employees' salaries and not yet paid to the State or local government). Deposit fund transactions are excluded from the budget totals because the funds are not owned by the Government. Since increases in deposit fund balances reduce Treasury's need to borrow, they are a means of financing a deficit or a surplus.

Direct loan means a disbursement of funds by the Government to a non-Federal borrower under a contract that requires the repayment of such funds with or without interest. The term also includes certain other kinds of transactions that extend credit. (See section 85.) (Compare to *loan guarantee*.)

Direct spending – See *mandatory spending*.

Discretionary spending means budgetary resources (except those provided to fund mandatory spending programs) provided in appropriations acts. (See section 20.9.) (Compare to *mandatory spending*.)

Emergency appropriation means an appropriation that the President and the Congress have designated as an emergency requirement under the BEA. (See section 20.9.)

Entitlement authority means the authority to make payments (including loans and grants), the budget authority for which is not provided in advance by appropriations acts, to any person or government if, under the provisions of the law containing that authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by that law. Examples of entitlement authority include benefit payments for Social Security, medicare, and unemployment insurance. For the purposes of the congressional budget process, the Congressional Budget Act expressly includes the food stamp program under the definition of entitlement authority, even though the budget authority for this program is provided in advance by appropriations acts. The Budget Enforcement Act includes entitlement authority in its definition of *mandatory spending* (see below and section 20.9). The BEA also defines certain programs as entitlement authority, even though the budget authority for those programs is provided by appropriations acts. The BEA refers to these as *mandatory appropriations* or *appropriated entitlements* and defines them by referring to a list in the conference report on the Balanced Budget Act of 1997, which included the most recent amendments to the BEA. For example, veterans compensation is listed as an appropriated entitlement.

Expenditure transfer – See *transfers*.

Federal funds group refers to the moneys collected and spent by the Government through accounts other than those designated as trust funds. The Federal funds group includes general, special, public enterprise, and intragovernmental funds. (See section 20.11.) (Compare to *trust funds*.)

Financing account means the account that collects the cost payments from a credit program account and includes all cash flows to and from the Government resulting from direct loan obligations or loan guarantee commitments made on or after October 1, 1991. At least one financing account is associated with each credit program account. For programs with direct and guaranteed loans, there are separate financing accounts for direct loans and guaranteed loans. The transactions of the financing accounts, which are a *means of financing*, are not included in the budget totals. (See section 85.) (Compare to *liquidating account*.)

Fiscal year means the Government's accounting period. It begins on October 1 and ends on September 30, and is designated by the calendar year in which it ends.

Forward funding means appropriations of budget authority that become available for obligation in the last quarter of the fiscal year for the financing of ongoing grant programs during the next fiscal year. (See section 20.4(c).)

Full-time equivalent (FTE) employment is the basic measure of the levels of employment used in the budget. It is the total number of hours worked (or to be worked) divided by the number of compensable hours applicable to each fiscal year. (See section 32.1.)

Functional classification means the array of budget authority, outlays, and other budget data according to the major purpose served – for example, agriculture, national defense, and transportation. (See section 79.3.)

General fund means the accounts for receipts not earmarked by law for a specific purpose, the proceeds of general borrowing, and the expenditure of these moneys.

Liquidating account means an account for a credit program that includes all cash flows to and from the Government resulting from direct loan obligations and loan guarantee commitments made prior to October 1, 1991. Unlike financing accounts, these accounts are included in the budget totals. (See section 85.) (Compare to *financing account*.)

Loan guarantee means any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender. The term does not include the insurance of deposits, shares, or other withdrawable accounts in financial institutions. (See section 85.) (Compare to *direct loan*.)

Mandatory appropriation — See *entitlement authority*.

Mandatory spending means spending controlled by laws other than appropriation acts (including spending for entitlement programs) and spending for the food stamp program. Although the BEA uses the term *direct spending* to mean this, *mandatory spending* is commonly used instead. (See section 20.9.) (Compare to *discretionary spending*.)

Means of financing means borrowing, the change in cash balances, and certain other transactions that are used to finance a deficit or a surplus. By definition, the means of financing are not treated as receipts or outlays. (See section 20.7.)

Intragovernmental fund — See *revolving fund*.

Non-expenditure transfer — See *transfer*.

Obligated balance means the cumulative amount of budget authority that has been obligated but not yet outlayed. (See section 20.4(g).)

Obligation means a binding agreement that will result in outlays, immediately or in the future. Budgetary resources must be available before obligations can be incurred legally. (See section 20.5.)

Off-budget — See *budget totals*.

Offsetting collections mean collections that are deducted from gross budget authority and outlays, rather than added to receipts, and, by law, are credited directly to expenditure accounts. Usually, they are authorized to be spent for the purposes of the account without further annual action by Congress. They result from business-type or market-oriented activities with the public and other Government accounts. The authority to spend offsetting collections is a form of budget authority. (See sections 20.4(b) and 20.7.) (Compare to *receipts* and *offsetting receipts*.)

Offsetting receipts mean collections that are deducted from gross budget authority and outlays, rather than added to receipts, and that are not authorized to be credited to expenditure accounts. Instead of being credited to expenditure accounts, they are credited to offsetting receipt accounts. The legislation that authorizes the offsetting receipts may earmark them for a specific purpose and either appropriate them for expenditure for that purpose or require them to be appropriated in annual appropriations acts before they can be spent. Like offsetting collections, they result from business-type or market-oriented activities with the public and other Government accounts. (Compare to *receipts* and *offsetting collections*.)

On-budget — See *budget totals*.

Outlay means a payment to liquidate an obligation (other than the repayment of debt principal). Outlays are the measure of Government spending. As required by law, the budget presents some outlays as “on-budget” and some as “off-budget” (see *budget totals*). Total outlays for the Federal Government include both on-budget and off-budget outlays. Government-wide outlay totals are stated net of refunds, offsetting collections, and offsetting receipts. Function, subfunction, and agency outlay totals are stated net of related refunds, offsetting collections, and offsetting receipts for most budget presentations. (Offsetting receipts from a few sources do not offset any specific function, subfunction, or agency but only offset Government-wide outlay totals.) Outlay totals for accounts with offsetting collections are stated both gross and net of the offsetting collections credited to the account. However, the outlay totals for special and trust funds with offsetting receipts are not stated net of the offsetting receipts. Outlays generally are equal to cash disbursements but also are recorded for cash-equivalent transactions, such as the subsidy cost of direct loans and loan guarantees, and interest accrued on public issues of the public debt. (See section 20.6.)

Outyear means any fiscal year beyond the budget year. The database includes estimates of budget authority, outlays, and receipts for nine years beyond the budget year. However, most published budget tables present no more than four years beyond the budget year.

Pay-as-you-go (PAYGO) means the requirement in the BEA for a sequestration of mandatory accounts if the estimated combined result of legislation affecting mandatory spending and receipts is a net cost for a fiscal year. (See section 20.9.)

Public enterprise fund – See *revolving fund*.

Reappropriation means an extension in law of the availability of unobligated balances of budget authority that have expired or would otherwise expire. A reappropriation counts as budget authority in the year in which the balance becomes newly available for obligation. (See section 20.4(h).)

Receipts mean collections that result from the Government's exercise of its sovereign power to tax or otherwise compel payment, and gifts of money to the Government. They are compared to outlays in calculating a surplus or deficit. (See section 20.7.) (Compare to *offsetting collections* and *offsetting receipts*.)

Refund means the return of excess payments to or by the Government. (See section 20.10.)

Reimbursable obligation means an obligation financed by offsetting collections credited to an expenditure account in payment for goods and services provided by that account. (See section 20.5.)

Rescission means a legislative action that cancels new budget authority or the availability of unobligated balances of budget authority prior to the time the authority would otherwise have expired. (See section 20.4(i).)

Revolving fund means a fund that conducts continuing cycles of business-like activity, in which the fund charges for the sale of products or services and uses the proceeds to finance its spending, usually without requirement for annual appropriations. There are two types of revolving funds: Public enterprise funds, which conduct business-like operations mainly with the public, and intragovernmental revolving funds, which conduct business-like operations mainly within and between Government agencies. (See section 20.12.)

Scorekeeping means measuring the budget effects of legislation, generally in terms of budget authority, receipts, and outlays for purposes of the BEA. (See section 20.9.)

Sequestration means the cancellation of budgetary resources provided by discretionary appropriations or mandatory spending legislation, following procedures prescribed in the BEA. A sequestration may occur in response to an appropriation that causes discretionary spending to exceed the discretionary spending caps set by the BEA or in response to net costs resulting from the combined result of legislation affecting mandatory spending or receipts (referred to as a "pay-as-you-go" sequestration). (See section 20.9.)

Special fund means a Federal fund account for receipts and/or offsetting receipts earmarked for specific purposes and an account for the expenditure of these receipts. (See section 20.11.)

Spending authority from offsetting collections is a type of budget authority that permits obligations and outlays to be financed by offsetting collections (see section 20.4.)

Subsidy means the same as cost when it is used in connection with Federal credit programs. (See section 85.)

Surplus means the amount by which receipts exceed outlays in a fiscal year. It may refer to the on-budget, off-budget, or unified budget surplus. (See *budget totals*.)

Supplemental appropriation means an appropriation enacted subsequent to a regular annual appropriations act, when the need for funds is too urgent to be postponed until the next regular annual appropriations act.

Transfer means to move budgetary resources from one budget account to another. Depending on the circumstances, the budget may record a transfer as an expenditure transfer, which means a transfer that involves an outlay, or as a nonexpenditure transfer, which means a transfer that doesn't involve an outlay. (See section 20.4(j).)

Transfer in the estimates means a proposal to stop funding an activity through one budget account and begin funding it through another account. A transfer in the estimates doesn't involve a transfer of budgetary resources between the accounts. (See section 20.4(k).)

Trust fund means a type of account, designated by law as a trust fund, for receipts and/or offsetting receipts earmarked for specific purposes and for the expenditure of these receipts. Some revolving funds are designated as trust funds, and these are called *trust revolving funds*. (See section 20.11.) (Compare to *special funds* and *revolving funds*.)

Trust funds group refers to the moneys collected and spent by the Government through trust fund accounts. (See section 20.11.) (Compare to *Federal funds group*.)

Unobligated balance means the cumulative amount of budget authority that is not obligated and that remains available for obligation under law.

User charges are fees assessed for the provision of Government services and for the sale or use of Government goods or resources. The payers of the user charge must be limited in the authorizing legislation to those receiving special benefits from, or subject to regulation by, the program or activity beyond the benefits received by the general public or broad segments of the public (such as those who pay income taxes

or customs duties). User charges are defined and the policy regarding user charges is established in OMB Circular A-25, "User Charges" (July 8, 1993). The term encompasses proceeds from the sale or use of government goods and services, including the sale of natural resources (such as timber, oil, and minerals) and proceeds from asset sales (such as property, plant, and equipment). User fees (which are defined below) are a subset of user charges. (See section 31.10.)

User fees are a subset of user charges (as defined above) that are authorized to be utilized solely to support the program or activity for which they were levied. User fees are more limited in coverage than user charges and must be earmarked for the activity they finance by crediting them to special or trust receipts accounts (as receipts or offsetting receipts) or to expenditure accounts (as offsetting collections). User charges that are credited to the general fund of the Treasury are not user fees by definition, because they are not utilized solely to support the program or activity for which they were levied. (See section 20.7.)

20.4 What do I need to know about budget authority?

(a) *Definition of budget authority.*

Budget authority (BA) means the authority provided by law to incur financial obligations that will result in outlays. This definition is the same as the one contained in section 3(2) of the Congressional Budget and Impoundment Control Act of 1974, which Congress uses in the congressional budget process. You violate the law if you enter into contracts, issue purchase orders, hire employees, or otherwise obligate the Government to make a payment before a law has provided budget authority for that purpose.

(b) *Forms of budget authority.*

Most laws provide budget authority in the form of appropriations, but some laws provide budget authority in the form of contract authority, authority to borrow, or spending authority from offsetting collections. The following table summarizes the characteristics of each form of budget authority, and the text following the table discusses them in more depth.

FORMS OF BUDGET AUTHORITY

Form of budget authority	Summary of Characteristics
Appropriation	<ul style="list-style-type: none"> • Authorizes obligations and outlays using general funds, special funds, or trust funds. • Provided in appropriations acts and other laws. • Includes the authority to use the sale of loan assets with recourse. • May authorize the use of cash-equivalent payments. • Not all appropriations provide budget authority.
Contract authority	<ul style="list-style-type: none"> • Authorizes obligations but not outlays. • Typically provided in authorizing laws and requires a separate appropriation of liquidating cash in appropriations acts. • Occasionally authorizes obligations in advance of receiving offsetting collections.

Form of budget authority	Summary of Characteristics
Authority to borrow	<ul style="list-style-type: none"> • Authorizes obligations and outlays to be financed by borrowing, usually from Treasury. • Typically provided in laws that authorize business-like operations and require the borrowing to be repaid, with interest, out of the business proceeds.
Spending authority from offsetting collections.	<ul style="list-style-type: none"> • Authorizes obligations and outlays using offsetting collections. • Typically provided in authorizing laws. • Appropriations acts limit obligations in some cases. • Obligations may be incurred against accounts receivable and unpaid, unfilled orders from other Federal accounts, but not from the public.

- (1) *Appropriations*, as a type of budget authority, permit you to incur obligations and make outlays (payments). (Not all appropriations provide budget authority, as explained below.) Congress enacts appropriations in annual appropriations acts and other laws. An appropriation may make funds available from the general fund, special funds, or trust funds, or it may authorize the spending of offsetting collections, which are credited to expenditure accounts (including revolving funds). Because of the special nature of spending authority from offsetting collections, we discuss it below as a separate form of budget authority.

We treat the authority to use the proceeds from the sale of financial assets *with recourse* as an appropriation. For example, the authority to use the proceeds from the sale of a direct loan, where the Federal government guarantees repayment of principal and interest in the event of default, is an appropriation. (The proceeds are not offsetting collections.)

A law that authorizes you to incur obligations and liquidate them through cash-equivalent payments (see section 20.8) constitutes an appropriation of budget authority.

Some appropriations don't provide budget authority, because they don't provide authority to incur obligations. Amounts appropriated to liquidate contract authority, to liquidate deficiencies, or to repay debt provide the cash needed to liquidate obligations already incurred. Because they do not authorize you to incur new obligations, they are not appropriations of budget authority, and you do not record them as such. Although there are many variations in the language providing such appropriations, usually the appropriation heading for such appropriations includes a subheading such as "(Liquidation of Contract Authority)," and the language reads something like, "for payment of obligations...."

- (2) *Contract authority* permits you to incur obligations in advance of an appropriation of the cash to make outlays to liquidate the obligations. Typically, Congress provides contract authority in an authorizing law, and requires you to seek a subsequent appropriation of the liquidating cash. In a few cases, a law provides contract authority in order to allow you to incur obligations in anticipation of offsetting collections. When you receive the collections, you use them to liquidate the obligations. Congress provides contract authority as a matter of custom for some programs, such

as highway programs and airports and airways programs, but seldom uses this form of budget authority otherwise.

- (3) *Authority to borrow* permits you to incur obligations and authorizes you to borrow funds to liquidate the obligations. Usually, the law authorizing the borrowing specifies that you must borrow from the Treasury, but in a few cases it authorizes borrowing directly from the public. Laws usually authorize borrowing for business-like operations, such as the Tennessee Valley Authority, which generates and sells electrical power. Such laws require the program to repay the borrowing, with interest, out of business proceeds.
- (4) *Spending authority from offsetting collections* permits you to incur obligations and to make outlays using offsetting collections.

You record spending authority from offsetting collections and the offsetting collections in the program and financing schedule of an account (see sections 82.3 and 82.6). In the simplest case, you record gross budget authority (spending authority from offsetting collections) (entries 6800 and 6900) equal to the cash collections for the year and record the cash collections (entries 8800 - 8845 and 8896) as an offset to the budget authority. Net budget authority equals zero in such cases.

In other cases, you must adjust spending authority from cash collections to yield the amount available as budget authority. We describe these adjustments in section 82.3 (entries 6810 - 6885 and 6910 - 6985). We discuss two of them – changes in uncollected customer payments from Federal sources and amounts precluded from obligation – in more detail below, because questions about them come up so often.

Changes in uncollected customer payments from Federal sources. You need to adjust the spending authority from cash collections if the account is authorized to perform reimbursable work for another Federal account, and if you incur obligations against receivables from Federal sources and unfilled customer orders from Federal sources without an advance – that is, before receiving the cash. The law allows you to incur such obligations as long as the paying account is a Federal account and an obligation is recorded against resources available to the paying account. (You can't incur obligations against collections you haven't actually received from *non-Federal* sources, unless a law specifically allows it.) In these cases, you must add any net increase in such amounts for the year to the spending authority from cash collections, or subtract any net decrease in such amounts for the year from the spending authority from cash collections, to yield the gross budget authority available to the account from offsetting collections. You also add the same amount to offsetting collections (cash) to yield the amount of the offset applied to gross budget authority in calculating net budget authority (see section 82.6).

Amounts precluded from obligation. If a law precludes you from using some of the collections to incur obligations, you need to reduce the spending authority from cash collections by the precluded amount to determine the amount of budget authority that is available. For example, in some cases Congress enacts obligation limitations in appropriations acts that limit the authority to spend offsetting collections provided in authorizing laws. In other cases, the law authorizing the collection may itself limit the amount of obligations you may incur, such as through a benefit formula. The budget presents the unavailable amounts in an unavailable collections schedule (see section 86.6). You record budget authority in the year when the collections become available for obligation under the law. As a general rule, you must record obligations first against budget authority from

SECTION 20 -- TERMS AND CONCEPTS

collections in that year and against budget authority from previously unavailable balances only to the extent that budget authority from collections in that year are not adequate to cover obligations. You always deduct the full amount of offsetting collections (cash) in the year you collect them, even where a law precludes you from obligating all or a portion of the collections in that year. For this reason, an account can have negative net budget authority.

The following illustrates the effect of offsetting collections on budget authority, gross and net, for an account as it will appear in the Budget Appendix:

Appropriation	75
Spending authority from offsetting collections:	
Offsetting collections (cash)	27
Change in uncollected customer payments from Federal sources (unexpired)	2
Portion not available for obligation (limitation on obligations)	-4
Spending authority from offsetting collections (total)	25
Total new budget authority (gross)	100
Offsetting collections (cash) credited to the account in that year	-30
Change in uncollected customer payments from Federal sources (unexpired)	-2
Portion of offsetting collections (cash) credited to expired accounts	3
Budget authority (net)	71

The effect of offsetting collections on outlays is simpler. Only cash collections (unexpired and expired) are subtracted from gross outlays to yield net outlays.

The Congressional Budget Act defines offsetting receipts and collections as negative budget authority. In the congressional budget process, this subjects proposed provisions of law that affect offsetting receipts and collections to the rules that pertain to budget authority.

As explained earlier, we treat the authority to use the proceeds from the sale of financial assets (for example, Federal loan assets) with recourse as a form of appropriation, but we don't count the proceeds as offsetting collections (see section 20.4(b)(1)).

(c) *Determining the period of availability of budget authority.*

When a law appropriates budget authority, it sets the period during which you can use it to incur obligations. We call this the period of availability.

1. *One-year budget authority.* This term refers to budget authority that is available for obligation during only one fiscal year. One year is the default period of availability for annual appropriations acts, because a general provision in each of the acts specifies that the amounts provided in the act are available for one year, unless the act expressly provides otherwise. Even if there were not such a provision, the preamble of an appropriations act says that it is for a specific fiscal year. For example, the following language in an appropriation act would provide one-year budget authority: “For expenses of the Office of the Secretary, \$1,500,000.”
2. *Multi-year budget authority.* The language for a specific appropriation of budget authority in an appropriations act may make all or some portion of the amount available for obligation for a specified period of time in excess of one fiscal year. Usually, the period covers two or more whole fiscal years, but it may cover a period that includes part of a fiscal year. We refer to such budget authority as multi-year budget authority or, specifically, as two-year budget authority, three-year budget authority, etc. For example, if the following language appeared in an appropriations act for 2001, it would provide two-year budget authority: “For research and development, \$1,500,000, to remain available until September 30, 2002.”
3. *No-year budget authority.* The language for a specific appropriation of budget authority may make all or some portion of the amount available “until expended.” That means you can incur obligations against it indefinitely. We refer to this as no-year budget authority. For example, the following language provides no-year budget authority: “For construction, improvements, repair or replacement of physical facilities, \$1,500,000, to remain available until expended.” Authorizing laws that make appropriations seldom limit the period of availability, so most budget authority provided in authorizing laws is no-year budget authority.

Under a general law, annual and multi-year budget authority *expires* at the end of its period of availability. That means you may not incur new obligations against it. However, you may make adjustments to obligations that were made before the budget authority expired. For example, you could make an upward adjustment in previously recorded obligations for transportation charges, under an agreement to pay actual transportation charges, if they turned out to be greater than originally estimated. You may use expired authority to make adjustments to obligations or disbursements only during a five-year period, beginning with the first expired year. At the end of the fifth expired year, the authority is *canceled*, which means that you may not use it for *any* purpose. If you have a program with a legitimate need to disburse funds for more than five years after the authority expires – for example, to make disbursements over many years under direct loan contracts, to pay termination costs under some contracts, or to make payments under a lease – and your OMB representative approves, you may include specific waivers of these requirements in the pertinent appropriation language (see section 96.5). The OMB Circular No. A-34 guidance on SF 133s provides a fuller explanation of expired and canceled budget authority.

Usually an appropriations act makes budget authority available beginning on October 1 of the fiscal year for which the appropriation act is passed. However, there are three types of appropriations where that is not the case. They are described below, and the budget *Appendix* lists the accounts in the budget with such appropriations under the heading, “Advance Appropriations, Advance Funding, and Forward Funding.”

- *Advance appropriation* means appropriations of new budget authority that become available one or more fiscal years beyond the fiscal year for which the appropriation act was passed. For example, if the following language appeared in an appropriations act for fiscal year 2002, it would provide an advance appropriation for fiscal year 2003: "For operating expenses, \$1,500,000, to become available on October 1, 2002." Under current BEA scoring guidelines, new budget authority for advance appropriations is scored in the fiscal year in which the funds become available for obligation. In this example, you would record the budget authority in 2003. The Administration has proposed a change to the scorekeeping guideline that would require the budget authority to be scored in the fiscal year for which the appropriations bill is enacted. If Congress agrees to the change, revised guidance will be issue for the 2003 budget. (See section 31.1 for the Administration's policy regarding requests for advance appropriations.)
- *Advance funding* means appropriations of budget authority provided in an appropriations act to be used, if necessary, to cover obligations incurred late in the fiscal year for benefit payments in excess of the amount specifically appropriated in the act for that year, where the budget authority is charged to the appropriation for the program for the fiscal year following the fiscal year for which the appropriations act is passed. When such budget authority is used, the budget records an increase in the budget authority for the fiscal year in which it is used and a reduction in the budget authority for the following fiscal year. The following language, when added to regular appropriation language, provides advance funding: "...together with such sums as may be necessary to be charged to the subsequent year appropriation for the payment of compensation and other benefits for any period subsequent to August 15 of the current year."
- *Forward funding* means appropriations of budget authority that are made for obligation in the last quarter of the fiscal year for the financing of ongoing grant programs during the next fiscal year. The budget records the budget authority in the fiscal year in which is it appropriated. The following language, if it appeared in an appropriation act for 2002, would provide forward funding, which would be recorded in fiscal year 2002: "... of which \$2,000,000,000 shall become available on July 1, 2002 and shall remain available through September 30, 2003 for academic year 2002-2003."

(d) *Determining the amount of budget authority.*

If a law provides budget authority in a specific amount, we refer to it as *definite* budget authority. We consider the budget authority definite even if the language reads "not to exceed" a specified amount. You record the specified amount as budget authority. For example, this language would provided definite budget authority of \$100 million: "For salaries and expenses, not to exceed \$100,000,000."

If a law doesn't specify an amount of budget authority, but, instead, specifies a variable factor that determines the amount, we refer to the budget authority as *indefinite*. If the law provides "such sums as may be necessary" to cover the obligations resulting from an entitlement (such as unemployment insurance), record budget authority in the past year equal to the amount obligated and in other years equal to your estimate of obligations. If a law authorizes you to obligate all of the receipts from a specified source, record budget authority equal to the amount of receipts you collected in the past year and equal to amounts you estimate you will collect in other years. Record budget authority for the authority to use the proceeds from the sale of financial assets with recourse the same way, even though the proceeds aren't recorded as collections.

If a law appropriates a specific amount to be derived from receipts, it limits the amount of budget authority actually provided to the lower of the actual receipts or the amount specified. For example, if the language read, "...and, in addition, \$75,000,000 of the amounts collected under section 101 of the Authorization Act of 1995," you could obligate only the amount actually collected, up to \$75,000,000. Similarly, if a law appropriates an amount to be derived from a special or trust fund, it limits the amount of budget authority actually provided to the lower of the amount of the balances in the fund or the specified amount. For example, language that reads, "For necessary expenses, \$1,500,000, to be derived from the Land Restoration Trust Fund," allows you to obligate only the amount actually in the fund and no more than \$1,500,000. If a law authorizes you to obligate all of the receipts credited to a fund, record budget authority equal to the amount of receipts collected into the fund in the past year and equal to amounts you estimate you will collect in other years.

Some laws that provide authority to borrow limit the amount of debt that may be outstanding at any one time. This may limit your ability to incur obligations indirectly, because you must consider your ability to borrow the cash needed to liquidate the obligations that will become due, but it doesn't determine the level of obligations directly. In such cases, treat the budget authority as indefinite and record the amount that you obligated in the past year or estimate you will obligate in other years. Under the BEA scorekeeping guidelines, OMB will score legislation that imposes or changes a limit of this type only to the extent that we estimate that it will alter the amount of obligations that will be incurred (see Appendix A, scorekeeping guideline no. 16).

Most budget authority provided in appropriations acts is definite, and most budget authority provided in other laws is indefinite. Note: Until this year, we required definite and indefinite budget authority to be recorded on separate lines in the program and financing schedule. This requirement has been dropped (see section 82.3).

(e) Discretionary or mandatory budget authority.

The Budget Enforcement Act of 1990 (BEA) requires us to classify budget authority (and outlays) as either discretionary spending or mandatory spending, and applies a different set of rules to each type of spending. We explain this further in section 20.9.

(f) Unobligated balance of budget authority.

An unobligated balance consists of the cumulative amounts of budget authority that are not obligated and that remain available for obligation under law. Unobligated balances must meet *all* of the following conditions:

- They are balances of budget authority that has never been obligated or that has been obligated and deobligated.
- They are balances of budget authority that has not expired.
- You can quantify the amount by subtracting the obligations to date from the amount of budget authority provided. That is, the law providing the budget authority must have specified a definite amount or an indefinite amount based on the appropriation of collections from a specified source. You cannot quantify "such sums as may be necessary."

You shouldn't count unavailable offsetting receipts or collections as budget authority and, therefore, you shouldn't have any unobligated balances as a result of them. Report them in a schedule of unavailable collections (see section 86.6).

In budget schedules, such as the program and financing schedule, the unobligated balance at the end of a year includes available, unobligated balances of budget authority provided in that and previous years. The unobligated balance at the start of a year is equal to the unobligated balance at the end of the previous year.

The balances you report for the start and end of the past year must be consistent with the amounts reported in the Treasury Department's Annual Report. (See section 82.18.)

(g) *Obligated balance.*

An obligated balance consists of unpaid obligations net of uncollected customer payments from Federal sources. These uncollected payments consist of any –

- Accounts receivable from Federal sources, and
- Unpaid, unfilled orders from Federal sources.

Accounts receivable and unpaid, unfilled orders must represent a valid obligation against budgetary resources of the ordering Federal account (see section 20.7). Exclude orders for which subsequent cash collections will be credited to a receipt account rather than to the expenditure account. Also, in computing the obligated balances don't deduct receivables from the public, loans and other long-term receivables, amounts due at some future date under credit sales, and deferred charges from unpaid obligations.

Unpaid obligations and uncollected customer payments from Federal sources are included in the obligated balances and are not separately identified (see section 82.4). The balances you report for the start and end of the past year must be consistent with the amounts reported in the Treasury Department's Annual Report (see section 82.18).

(h) *Reappropriation.*

Reappropriation means an extension in law of the availability of budgetary resources (budget authority or unobligated balances) that have expired or otherwise would expire except for the extension. A reappropriation counts as budget authority in the year in which the reappropriated amount becomes newly available. The law may reappropriate a specific amount or all of the unobligated balance of a previous appropriation. For example, if an appropriation act for fiscal year 2001 provided budget authority with only one-year availability, the following language in a fiscal year 2002 appropriation act would result in a reappropriation: "Of the unobligated balances remaining available from appropriations made under this heading for fiscal year 2001, \$10,000,000 shall remain available for fiscal year 2002 for the same purposes as other sums provided under this heading." In this case, you would record all of the unobligated fiscal year 2001 amounts as expiring, including the \$10,000,000, and record \$10,000,000 as a reappropriation in fiscal year 2002. This would count as \$10,000,000 in new budget authority in 2002.

(i) *Rescission.*

Rescission means a cancellation in law of budgetary resources (budget authority or unobligated balances). You record a rescission as negative budget authority in the year it takes effect, regardless of whether it

cancels budget authority or unobligated balances. A law that precludes the obligation of budgetary resources in one year and authorizes their obligation in a subsequent year in which they were not available for obligation, makes a rescission and a reappropriation. In such cases, you record a rescission in the first year and a reappropriation in the second. Include enacted rescissions in the regular program and financing and other regular schedules. Proposed rescissions require separate budget schedules (see section 82.9).

Amounts rescinded from special fund accounts revert either to unavailable collections of the special fund or to the general fund of the Treasury, depending on the circumstances and the specific requirements of the law making the rescission. As a general rule, amounts rescinded from an annually appropriated special fund account revert to unavailable collections, which may be appropriated subsequently. However, if the rescinding law indicates that the rescinded amounts are *permanently* canceled, the amounts revert to the general fund and are not available for subsequent appropriation. A rescission of permanently appropriated special fund receipts reverts to the general fund of the Treasury, and the receipts are no longer available for appropriation as special fund receipts.

(j) *Transfer.*

- (1) *Definition.* Transfer means to reduce budgetary resources (budget authority and unobligated balances) in one account and increase them in another, by the same amount.
- (2) *Authority.* You can't make a transfer unless a law authorizes it. The law may specify a particular transfer or provide general transfer authority within specified limits.
- (3) *Expenditure transfer or nonexpenditure transfer.* You record a transfer as an *expenditure* transfer, one that involves an outlay, or as a *nonexpenditure* transfer, one that doesn't involve an outlay. Which you record usually depends on the purpose of the transfer, as explained in the following table.

If the transfer...	Record as...
(1) purchases goods or services for the transferring account (for example, a rental payment to GSA's Federal Buildings Fund) or otherwise benefits the transferring account...	an expenditure transfer.
(2) shifts budgetary resources between Federal funds (general, special, and revolving fund accounts) and trust funds (trust fund and trust revolving fund accounts), regardless of the purpose...	an expenditure transfer.
(3) reduces budgetary resources available for the activities of the transferring account and increases them for the activities of the receiving account (for example, a transfer of unobligated balances from the construction account to the salaries and expense account to fund pay raises) other than between Federal and trust funds...	a nonexpenditure transfer.
(4) corresponds to a transfer of an activity from one account to another (such as in a reorganization)...	a nonexpenditure transfer.

(4) *Recording transfers in the budget:*

- *Expenditure transfers.* Record an expenditure transfer as an obligation (against new budget authority or unobligated balances) and an outlay in the transferring account and as an offsetting collection or offsetting receipt in the receiving account (see section 20.7). If the receiving account is a general fund appropriation account or a revolving fund account, credit the amount as an offsetting collection to the appropriation or revolving fund account. If the receiving account is a special fund or trust fund account, credit the amount as an offsetting receipt to a receipt account of the fund.
- *Nonexpenditure transfers.* Don't record an obligation or an outlay or an offsetting collection or offsetting receipt. Record nonexpenditure transfers as either a reduction in budget authority or unobligated balances in the transferring account and as either an increase in budgetary authority or unobligated balances in the gaining account. Whether you record the reduction and increase as a change in budget authority or unobligated balances, depends on the circumstances, as described in the following table.

If you transfer...	And the transfer...	Record...
(1) unobligated balances	results from a transfer specified in law that changes the purpose for which the funds will be used	a reduction of budget authority in the transferring account and an increase in budget authority in the gaining account.
(2) unobligated balances	<ul style="list-style-type: none"> • results from general transfer authority, or • corresponds to a transfer of an activity such that the purpose does not change 	a reduction of unobligated balances in the transferring account and an increase in unobligated balances in the gaining account.
(3) budget authority in the year it becomes available	is for any purpose	a reduction of budget authority in the transferring account and an increase in budget authority in the gaining account.

(k) *Transfer in the estimates.*

A transfer in the estimates means the budget proposes to stop funding an activity under one budget account and start funding the activity under another budget account, beginning in the budget year. This doesn't involve a transfer of budgetary resources, like that discussed in subsection (j). You simply stop showing budget authority in the one account and start showing it in the other. A transfer in the estimates usually reflects a proposal to do one of the following in the budget year:

- Transfer the funding of an activity from one account to another.
- Consolidate funding for related activities from two or more accounts into a single account.
- Disaggregate the funding for an activity from one account between two or more accounts.

You must indicate a transfer in the estimates by footnoting the program and financing schedules of the transferring and receiving accounts (see section 82.12).

(l) *Allocation.*

Allocation means a delegation, authorized in law, by one agency of its authority to obligate budget authority and outlay funds to another agency. When an agency makes such a delegation, the Treasury Department establishes a subsidiary account called a “transfer appropriation account,” and the receiving agency may obligate up to the amount included in the account. The budget doesn’t show the transfer appropriation account separately. The budget schedules for the parent account include the obligations by the other agency against the subsidiary account without separate identification, except in the object class schedule (see section 83.17). Allocations are appropriate where the receiving agency is acting as the agent for the allocating agency. Where the receiving account is simply providing goods or services on a reimbursable basis, such as transactions under the Economy Act, record an expenditure transfer (see section 20.4(j)). See OMB Circular No. A-34 for a further explanation of allocations.

20.5 What do I need to know about obligations?

Obligation means a legally binding agreement that will result in outlays, immediately or in the future. When you place an order, award a contract, purchase a service, or take other actions that require the Government to make payments to the public or from one Government account to another, you incur an obligation. The budget presents the obligations you incurred in the past year and expect to incur in other years in the program activity section of the program and financing schedule and the object classification schedule for the account. Obligations reflect the level of program activity. Of course, the account must have budgetary resources sufficient to cover the total of such obligations. The obligations you include in the budget must conform with applicable provisions of law, and you must be able to support the amounts reported by the documentary evidence required by 31 U.S.C. 1501. For some purposes, agencies need to track commitments at a pre-obligations stage. Don’t record such commitments as obligations. Transfers within the same account do not constitute obligations of the account. See OMB Circular No. A-34 for more information on this aspect of obligations.

Reimbursable obligations mean those financed by spending authority from offsetting collections in payment for goods and services provided by the account. Reimbursable obligations also include those for jointly-funded projects to carry out grant programs or other projects of common interest that are supported by more than one Federal agency. The following provides more specific guidance on reimbursable and nonreimbursable obligations. Also, see section 83.5 of this Circular.

More specifically, reimbursable obligations include:

- Obligations financed by offsetting collections from Federal or non-Federal sources for goods and services; and
- All revolving fund obligations, regardless of how they are financed.

They don't include:

- Obligations of credit program and liquidating accounts;
- Obligations financed by budget authority from sources other than offsetting collections;
- Obligations financed by spending authority from loan principal repayments or proceeds of asset sales;
- Obligations financed by certain offsetting collections including:
 - ▶ Interest on Federal securities;
 - ▶ Interest on uninvested funds;
 - ▶ Offsetting governmental collections (see section 20.7); and
 - ▶ Expenditure transfers from Federal accounts that are not payments for goods and services, such as legislated transfers of budget authority between Federal and trust fund accounts.

20.6 What do I need to know about outlays?

Outlay means a payment to liquidate an obligation (other than the repayment of debt principal). Outlays are the measure of Government spending. As required by law, the budget presents some outlays as “on-budget” and some as “off-budget.” Total outlays for the Federal Government include both on-budget and off-budget outlays. Government-wide outlay totals are stated net of refunds, offsetting collections, and offsetting receipts. Function, subfunction, and agency outlay totals are stated net of related refunds, offsetting collections, and offsetting receipts for most budget presentations. (Offsetting receipts from a few sources do not offset any specific function, subfunction, or agency.) Outlay totals for accounts with offsetting collections are stated both gross and net of the offsetting collections credited to the account. However, the outlay totals for special and trust funds with offsetting receipts are not stated net of the offsetting receipts.

The Government usually makes payments in the form of cash (currency, checks, or electronic fund transfers), and you normally record outlays equal to the disbursement at the time of the disbursement. Normally the amount of cash disbursed appropriately measures the value of the transaction. In other cases, however, the cash disbursed does not accurately measure the cost of the transactions. In these cases, we require you to record the cash-equivalent value of the transactions (see section 20.8).

Not every disbursement is an outlay, because not every disbursement liquidates an obligation. You don't record outlays for the following:

- Repayment of debt principal, because we treat borrowing and the repayment of debt principal as a means of financing.
- Disbursements to the public by Federal credit programs for direct loan obligations and loan guarantee commitments made in fiscal year 1992 or later (and those made prior to that year if they have been modified), because we treat the cash flows to and from the Government for credit programs as a means of financing. We record outlays equal to the subsidy cost of direct loans and

loan guarantees when the underlying direct or guaranteed loans are disbursed. Disbursements from liquidating accounts for direct loan obligations and loan guarantee commitments made prior to fiscal year 1992 are treated as outlays (see section 85).

- Disbursements from deposit funds, because these funds are on deposit with the Government but are not owned by the Government and are therefore excluded from the budget (see section 20.7).
- Refunds of receipts that result from overpayments, because they are recorded as reductions of receipts, rather than as outlays (see section 20.10).

The timing for recording outlays for interest payments varies. Treasury records outlays for the interest on the public issues of Treasury debt securities as the interest accrues, not when it pays the cash. However, most Treasury debt securities held by Government accounts are in the Government account series. Treasury normally records the interest payments on these securities when it pays the cash. (And you normally record an offsetting collection or receipt on a cash basis.) Two trust funds in the Department of Defense, the Military retirement trust fund and the Education benefits trust fund, routinely have relatively large differences between purchase price and par. For these funds, we've instructed the Department to record the holdings of debt at par but record the differences between purchase price and par as adjustments to the assets of the funds that are amortized over the life of the security. The Department records interest as the amortization occurs. We discuss the budget treatment of investment transactions in section 20.12.

Outlays during a fiscal year may liquidate obligations incurred in the same year or in prior years. Obligations, in turn, may be incurred against budget authority provided in the same year or against unobligated balances of budget authority provided in prior years. Outlays, therefore, flow in part from budget authority provided for the year in which the money is spent and in part from budget authority provided in prior years. The ratio of the outlays resulting from budget authority enacted in any year to the amount of that budget authority is referred to as the spendout rate for that year.

Outlays for the past year must agree with amounts reported in the Department of the Treasury's Annual Report unless OMB approves an exception.

20.7 What do I need to know about receipts, offsetting collections, and offsetting receipts?

(a) Overview.

The budget records money collected by Government agencies two different ways. Depending on the nature of the activity generating the collection, they are recorded as either–

- *receipts*, which are compared in total to outlays (net of offsetting collections and offsetting receipts) in calculating the surplus or deficit (see section (b)); or
- *offsetting collections* or *offsetting receipts*, which are deducted from gross outlays to produce net outlays (see section (c)).

The Government normally receives collections in the form of cash, and you normally record receipts, offsetting collections, or offsetting receipts equal to the amount received at the time of the collection. Normally the amount of cash collected appropriately measures the value of the transaction. In other cases,

however, the cash collected does not accurately measure the cost of the transactions. In these cases, you record the cash-equivalent value of the transactions (see section 20.8).

The table below summarizes the distinction between receipts, offsetting collections, and offsetting receipts. We discuss them in more depth in the following sections.

For budget accounting purposes, user fees are not a separate category. They can be either receipts, offsetting collections, or offsetting receipts. However, user fees are often discussed in the budget as a separate category. We discuss them below in section (d).

We don't record some monies received by the Government in the budget totals at all, because they are not income. For example, the proceeds of borrowing are not income. We refer to the proceeds of borrowing and certain other transactions as *means of financing*, because they are a means of financing outlays when there is a deficit. We discuss means of financing in section (e).

SUMMARY EXPLANATION OF COLLECTIONS

Type of collection	What kind of transactions produce these collections?	How do these collections affect the surplus or deficit?	What are some examples?
Receipts	<ul style="list-style-type: none"> The exercise of the Government's sovereign or governmental powers. Gifts from the public. 	The difference between receipts and outlays (net of offsetting collections and offsetting receipts) determines the surplus or deficit.	<ul style="list-style-type: none"> Individual income taxes. Corporation income taxes. Social insurance and retirement receipts (on-budget and off-budget). Excise taxes. Estate and gift taxes. Customs duties. Fines and penalties.
Offsetting collections and offsetting receipts (see the following tables for categories)	<ul style="list-style-type: none"> Business-like or market oriented activities with the public. Intragovernmental transactions (collections of payments from one Government account to another). 	Offsetting collections and offsetting receipts are deducted from gross outlays to produce net outlays. The difference between net outlays and receipts determines the surplus or deficit.	<ul style="list-style-type: none"> Proceeds from the sale of postage stamps. Fees charged for admittance to recreation areas. Proceeds from the sale of Government owned land. Rent collected by GSA from other agencies for office space.

(b) Receipts.

These are collections from the public that result primarily from the Government's exercise of its sovereign or governmental powers to compel payment. They consist mostly of individual and corporation income taxes and social insurance taxes, but also include excise taxes, compulsory user charges, customs duties, court fines, certain license fees, and deposits of earnings by the Federal Reserve System. They also include gifts and donations. Total receipts for the Federal Government include both on-budget and off-budget receipts.

A general law requires you to credit receipts to the general fund of the Treasury. However, other laws override this requirement for specified receipts, requiring separate accounting for them and designating them to be used for a specified purpose. We call this “earmarking” and establish a special fund or, if the law requires, a trust fund for that purpose. Earmarking receipts doesn’t affect their classification as receipts or offsetting receipts. Also, the authority to earmark receipts, by itself, does not provide budget authority. As a separate matter, the authorizing language will indicate whether the receipts are available for obligation and expenditure without further appropriation or are available only to the extent provided in annual appropriations acts.

Certain provisions of law require us to treat some receipts that are governmental in nature as offsetting collections or offsetting receipts. We designate these as “offsetting governmental collections” or “offsetting governmental receipts” (see below).

(c) Offsetting collections and offsetting receipts.

The budget records offsetting collections and offsetting receipts as offsets to budget authority and outlays, rather than as receipts. The difference between offsetting collections and offsetting receipts is the way we account for them under the laws that authorize them. The following two tables summarize the various categories of offsetting collections and offsetting receipts and their treatment in the budget. The text following the table discusses offsetting collections and offsetting receipts in more depth.

CATEGORIES OF OFFSETTING COLLECTIONS

Type of offsetting collection	What kind of transactions produce these collections?	How are they recorded in the budget?	What are some examples?
Offsetting collections from Federal sources	Collections of payments from one Government account to another.	In the program and financing schedule for the expenditure account as offsets to gross budget authority and outlays.	Rent collected by GSA from other agencies for office space.
Interest on U.S. securities	Investing balances in Federal securities as provided in law.	In the program and financing schedule for the expenditure account as offsets to gross budget authority and outlays.	Interest received on investments in Federal securities by a revolving fund.

SECTION 20 -- TERMS AND CONCEPTS

Type of offsetting collection	What kind of transactions produce these collections?	How are they recorded in the budget?	What are some examples?
Interest on uninvested funds	Maintaining uninvested balances on which Treasury pays interest as provided in law.	In the program and financing schedule for the expenditure account as offsets to gross budget authority and outlays.	Interest paid to all credit program financing accounts.
Offsetting collections from non-Federal sources	Business-like or market oriented activities with the public.	In the program and financing schedule for the expenditure account as offsets to gross budget authority and outlays.	Proceeds from the sale of postage stamps.
Offsetting governmental collections	Collections that are governmental in nature but required by law to be treated as offsetting collections.	In the program and financing schedule for the expenditure account as offsets to gross budget authority and outlays.	Regulatory fees required by law to be treated as offsetting collections.

CATEGORIES OF OFFSETTING RECEIPTS

Type of offsetting receipt	What kind of transactions produce these receipts?	How are they recorded in the budget?	What are some examples?
Proprietary receipts from the public	Business-like or market oriented activities with the public.	In receipt accounts, the amounts of which are normally deducted from gross budget authority and outlays at the subfunction and agency levels. ¹	Fees charged for admittance to recreation areas.
Intragovernmental transactions	Collections of payments from one Government account to another.	In receipt accounts, the amounts of which are normally deducted from gross budget authority and outlays at the subfunction and agency levels. ¹	See examples under "Interfund receipts" and "Intrafund receipts."
<ul style="list-style-type: none"> Interfund receipts 	Collections of payments by Federal funds to trust funds and vice versa.	In addition to offsetting budget authority and outlays at the subfunction and agency level, interfund receipts credited to Federal funds offset the Federal funds	<ul style="list-style-type: none"> Federal agency contributions to employee insurance and retirement trust funds.

Type of offsetting receipt	What kind of transactions produce these receipts?	How are they recorded in the budget?	What are some examples?
<ul style="list-style-type: none"> Intrafund receipts 	Collections of payments by Federal funds to other Federal funds and by trust funds to other trust funds.	<p>totals for budget authority and outlays, and interfund receipts credited to trust funds offset the trust funds totals for budget authority and outlays.</p> <p>In addition to offsetting budget authority and outlays at the subfunction and agency level, intrafund receipts credited to Federal funds offset the Federal funds totals for budget authority and outlays, and intrafund receipts credited to trust funds offset the trust funds totals for budget authority and outlays.</p>	<ul style="list-style-type: none"> Trust fund earnings on investments in Treasury securities. Special fund earnings on investments in Treasury securities. Railroad retirement trust fund collections of Social Security equivalent payments from Social Security trust funds.
Offsetting governmental receipts	Collections that are governmental in nature but required by law to be treated as offsetting receipts.	They are recorded in receipt accounts, which are deducted from gross budget authority and outlays at the subfunction and agency levels.	Regulatory fees required by law to be treated as offsetting receipts.

¹ OMB designates most offsetting receipts as “distributed,” meaning they offset budget authority and outlays at the subfunction and agency level (and, in turn, the Government-wide budget authority and outlay totals), but designates offsetting receipts from certain sources as “undistributed,” meaning they offset the Government-wide budget authority and outlay totals only.

Offsetting collections and offsetting receipts result from either of two kinds of transactions:

1. *Business-like or market-oriented activities with the public.* If you sell a product or service to the public, you record the proceeds as offsetting collections or offsetting receipts. For example, the U.S. Postal Service records the proceeds from the sale of postage stamps as offsetting collections. You should treat the proceeds from the sale of assets *without* recourse (that is, the Federal government doesn’t guarantee repayment of principal and interest in the event of default) as offsetting collections or offsetting receipts. In the budget, we deduct such offsetting collections and offsetting receipts from gross budget authority and outlays, rather than add them to governmental receipts. We do this so that the budget totals for receipts, budget authority, and outlays will represent only governmental, rather than market activity.
2. *Intragovernmental transactions.* You also record collections you receive from another Government account as offsetting collections or offsetting receipts. For example, the General Services Administration records payments it receives from other Government agencies for the rent of office space as offsetting collections in the Federal Buildings Fund. You may treat orders on hand from

another Federal account as offsetting collections, even though you haven't received the cash payment, if the paying account has recorded an obligation in that amount. (This does not apply to orders from non-Federal entities.) In the budget, we deduct intragovernmental offsetting collections and offsetting receipts from gross budget authority and outlays so that the budget totals measure the transactions of the Government with the public.

We use the term *offsetting collections* to refer to amounts credited to expenditure accounts and the term *offsetting receipts* to refer to amounts credited to receipt accounts. The way we record them depends on what the law requires. The following sections explain the differences in accounting for such collections.

- (1) *Offsetting collections.* Some laws authorize agencies to credit collections directly to the account from which they will be spent and, usually, to be spent for the purpose of the account without further action by Congress. Most revolving funds operate with such authority. For example, a permanent law authorizes the Postal Service to use collections from the sale of stamps to finance its operations without a requirement for annual appropriations. The Postal Service records these collections in the Postal Service fund (a revolving fund) and records budget authority in an amount equal to the collections. As another example, GSA records the intragovernmental collections of the Federal Buildings Fund in the same manner as the Postal Service fund. In some cases, laws authorize agencies to charge fees and use them to defray a portion of costs mostly financed by appropriations from the general fund. In such cases, the agency records the offsetting collections and resulting budget authority in the general fund expenditure account. The authority to incur obligations against offsetting collections credited to an account is a form of budget authority (see section 20.4).

While most offsetting collections result from business-like activity or are collected from other Government accounts, some are governmental in nature but are required by law to be treated as offsetting. The budget labels these "offsetting governmental collections."

- (2) *Offsetting receipts.* If the law doesn't authorize you to credit offsetting collections to an expenditure account, you must record them in a receipt account. Absent authority to earmark them, you credit them to the general fund receipt account designated by Treasury and OMB. If the law requires earmarking, you credit them to the special fund or trust fund receipt account established by Treasury and OMB. In the budget, we deduct offsetting receipts from budget authority and outlays in arriving at total budget authority and outlays. Unlike offsetting collections, offsetting receipts don't offset budget authority and outlays at the account level. The budget normally records the offset at the subfunction and agency levels. In a few cases we record the offset at the government-wide level to avoid distorting the budget authority and outlays totals for an agency or function.

We further subdivide offsetting receipts for purposes of budget accounting. When OMB, working with Treasury, establishes an account for the receipts from a particular source, we will designate each receipt account as one of these receipt types (see section 79.3):

- *Proprietary receipts from the public.* These offsetting receipts result from the business-type or market-oriented activities of the Government with the public. In the budget, we deduct most proprietary receipts from the budget authority and outlay totals of the agency that conducts the activity generating the receipt and of the subfunction to which we have assigned the activity. For example, we deduct fees for using National Parks from the totals for the Department of the Interior and the recreational resources subfunction. In a few cases, we don't offset proprietary receipts against any specific agency or function. We

classify them as undistributed offsetting receipts and deduct them from Government-wide totals for budget authority and outlays. For example, the collections of rents and royalties from outer continental shelf lands are undistributed because the amounts are large and for the most part are not related to the spending of the agency that administers the transactions and the subfunction that records the administrative expenses.

- *Intragovernmental transactions.* These are collections of payments from expenditure accounts that are deposited into receipt accounts. In the budget, we deduct most intragovernmental transactions from the budget authority and outlays of the agency that conducts the activity generating the receipts and of the subfunction to which we have assigned the activity. In two cases, however, we present intragovernmental transactions in the budget as deductions in computing total budget authority and outlays for the Government as a whole rather than as offsets at the agency level – agencies' payments as employers into employee retirement trust funds and interest received by trust funds. The special treatment for these receipts is necessary because the amounts are large and would distort the agency totals, as measures of the agency's activities, if they were attributed to the agency. We further divide intragovernmental transactions into two subcategories:
 - ▶ Interfund receipts that are derived from payments between Federal and trust funds.
 - ▶ Intrafund receipts that are derived from payments within the same fund group (that is, within the Federal fund group or within the trust fund group).
- *Offsetting governmental receipts.* These are collections that are governmental in nature but that laws require us to treat as offsetting receipts.

(d) *User fees.*

User fee means a fee, charge, or assessment the Government levies on a class directly benefitting from, or subject to regulation by, a Government program or activity, to be utilized solely to support the program or activity. We record user fees as receipts, offsetting collections, or offsetting receipts using the criteria described above. The authorizing law must limit the payers of the fee to those benefitting from, or subject to regulation by, the program or activity. The group of payers may not be so broad as to consist of the general public or a broad segment of the public. The law must limit the charging agency's use of the fee to funding the specified programs or activities for which the agency may charge the fee, including directly associated agency functions. The fee may not be used for unrelated programs or activities or for the broad purposes of the agency or the Government as a whole.

User fees include:

- Collections from non-Federal sources for goods and services provided (for example, the proceeds from the sale of goods by defense commissaries, electricity by power marketing administrations, and stamps by the Postal Service; fees charged to enter national parks; and premiums charged for flood and health insurance);
- Voluntary payments to social insurance programs, such as Medicare Part B insurance premiums;

SECTION 20 -- TERMS AND CONCEPTS

- Miscellaneous customs fees (for example, United States Customs Service merchandise processing fees);
- Many fees for permits, and regulatory and judicial services; and
- Specific taxes and duties on an exception basis.

User fees do not include:

- Collections from other Federal accounts;
- Collections deposited in general fund receipt accounts;
- Collections associated with credit programs;
- Realizations upon loans and investments;
- Interest, dividends, and other earnings;
- Payments to social insurance programs required by law;
- Excise taxes;
- Customs duties;
- Fines, penalties, and forfeitures;
- Cost-sharing contributions;
- Proceeds from asset sales (property, plant, and equipment);
- Proceeds from the sale of natural resources (such as timber, oil, and minerals);
- Outer Continental Shelf receipts;
- Spectrum auction proceeds; or
- Federal Reserve System deposits of earnings.

The Administration is reviewing the treatment of user fees, and additional guidance may be issued (see section 31.10.)

(e) Means of financing.

These are monies received or paid by the Government that are not counted in the budget totals as either income (receipts, offsetting collections, or offsetting receipts) or outgo (outlays). Borrowing and the repayment of debt are the primary means of financing. Others are listed below. These monies finance outlays when there is a deficit – that is, when outlays (net of offsetting collections and offsetting receipts) exceed receipts. When there is a surplus – that is, when receipts exceed outlays (net of offsetting collections and offsetting receipts) – they may be used, together with the surplus receipts, to retire debt. Under some circumstances, one means of financing will require financing by the others. For example, if the disbursements from credit financing accounts exceed their collections, the difference must be financed by receipts or the other means of financing. The means of financing other than borrowing and repayment of debt include:

- Net financing disbursements by direct loan and guaranteed loan financing accounts.
- Seigniorage (the profit from coining money) and profits on the sale of gold (a monetary asset).
- Certain exchanges of cash, such as deposits by the U.S. in the International Monetary Fund.
- Changes in Treasury's operating cash balance, deposit fund balances, and checks outstanding.
- Treasury debt buyback premiums and discounts (see section 20.12).

20.8 What do I need to know about cash-equivalent transactions?

Normally the amount of cash disbursed or collected is the appropriate measure of the value of the transaction, and you record outlays or collections equal to the cash that changes hands. In other cases, however, the cash disbursed or collected doesn't accurately measure the cost of the transactions. In these cases, you should record the cash-equivalent value of the transactions in the budget. The following are some examples of cash-equivalent transactions:

- *Federal employee salaries.* You record an outlay for the full amount of an employee's salary, even though the cash disbursement is net of Federal and state income taxes, retirement contributions, life and health insurance premiums, and other deductions. We record collections for the deductions that are payments to the Government.
- *Debt instruments.* When the Government receives or makes payments in the form of debt instruments (such as bonds, debentures, monetary credits, or notes) in lieu of cash, we record collections or outlays in the budget on a cash-equivalent basis. The Government can borrow from the public to raise cash and then outlay the cash proceeds to liquidate an obligation, or, if authorized in law, it may liquidate the obligation by issuing securities in lieu of the cash. The latter method combines two transactions into one – borrowing and an outlay. Combining these transactions into one does not change the nature of the transactions. Since the two methods of payment are equivalent, we require you to record the same amount of outlays for both cases. Similarly, when the Government accepts securities in lieu of cash from the public in payment of an obligation owed to the Government, we record collections. In one program, for example, a Government agency may choose whether to pay default claims against it in cash or by issuing debentures in lieu of cash; the agency records the same amount of outlays in either case. In turn, a recipient of these debentures may choose to pay the fees that it owes to the Government either in cash or by returning debentures of equivalent value that it holds. The agency records the same amount of collections in either case.
- *Lease-purchases.* We require you to record an outlay for the acquisition of physical assets through certain types of lease-purchase arrangements as though the transaction was an outright purchase. Lease-purchase transactions in which the Government assumes substantial risk are equivalent to the Government raising cash by borrowing from the public and purchasing the asset directly by disbursing the cash proceeds. So, we require you to report outlays over the period that the contractor constructs, manufactures, or purchases the asset that will be leased to the Government, not when the Government disburses cash to the developer for lease payments. Because the Government pays no cash up front to the nominal owner of the asset, the transaction creates a Government debt. In such cases, we treat the subsequent cash lease payments as the equivalent of interest outlays on that debt and principal repayments. (See Appendix B).

The scorekeeping effect of cash-equivalent transactions applies to budget authority, as well as to outlays and collections. You record the authority to incur obligations that will be liquidated through cash-equivalent payments as budget authority.

The use of cash-equivalents often results in an increase or decrease in Federal debt. In the previous example of the Government using debentures to pay claims, we record the issuance of a debenture as an increase in debt, and we record the Government's acceptance of a debenture for payment of fees as a reduction in debt. We also record an increase in debt as the means of financing the cash-equivalent outlays of lease-purchase arrangements in which the Government assumes substantial risk.

20.9 What do I need to know about discretionary spending, mandatory spending, and PAYGO?

(a) *Overview.*

The Budget Enforcement Act of 1990 (BEA) (see section 15.3) divides spending into two types:

1. *Discretionary spending* means the budget authority controlled by annual appropriations acts and the outlays that result from that budget authority. For example, the budget authority and outlays for the salaries and other operating expenses of Government agencies are usually controlled by annual appropriations acts and, therefore, are usually discretionary.
2. *Mandatory spending* means budget authority and outlays resulting from permanent laws. For example, permanent laws authorize payments for Medicare and Medicaid, unemployment insurance benefits, and farm price supports, so the budget authority and outlays for these programs are mandatory. In addition, the BEA defines several programs as “appropriated entitlements and mandates” and classifies their spending as mandatory spending. In these cases, appropriations acts nominally provide the budget authority but don’t actually control it, because the authorizing law creates an entitlement. Also, the BEA specifically defines funding for the Food Stamp program as mandatory spending, even though annual appropriations acts provide funding for the program and the authorizing legislation doesn’t create an entitlement. Mandatory spending is the term commonly used for this kind of spending, although the BEA calls it “direct spending.”

The Joint Explanatory Statement of the Committee of Conference for the Balanced Budget Act of 1997 (Public Law 105-33), which most recently amended the BEA, listed all accounts under the Appropriations Committees’ jurisdiction at the time. It classified accounts as discretionary by category or as appropriated entitlements and mandates. The “scorekeepers” (House and Senate Budget Committees, CBO, and OMB) consult on the classification of new accounts and may reclassify an existing account. OMB indicates the BEA classification for an account when it is established in the MAX database (see section 81.3). While mandatory and discretionary classifications are used for measuring compliance with the BEA, they do not determine whether a program provides legal entitlement to a payment or benefit. You should address questions about BEA classifications and legal entitlements to your OMB representative.

The BEA applies one set of rules to discretionary spending and another to mandatory spending and receipts. The BEA applies the same rules to receipts as apply to mandatory spending, because receipts are generally controlled by permanent laws. The BEA refers to the rules that apply to mandatory receipts and spending as “pay-as-you-go” (PAYGO) requirements. The BEA itself sets the basic rules, but the Explanatory Statement referred to in the previous paragraph provided scorekeeping guidelines that the scorekeepers must use in interpreting the rules. The BEA authorizes the scorekeepers to revise the guidelines if all agree on the revision. Appendix A contains the current guidelines.

The BEA expires after fiscal year 2002. However, the Administration has proposed that it be extended and Congress has indicated that is likely to do so.

(b) *Discretionary spending caps.*

The BEA defined categories of discretionary spending that have varied from year to year. For 2001 they are highways, mass transit, and all other discretionary spending. The Interior appropriations act for 2001 added the conservation spending category to the existing categories beginning in 2002. This category is divided into six subcategories: Federal and State Land and Water Conservation Fund; State and Other Conservation;

Urban and Historic Preservation; Payments in Lieu of Taxes; Federal Deferred Maintenance; and Coastal Assistance. The BEA specifies caps through 2003 for the highways and mass transit categories and through 2006 for the conservation spending category, although the discretionary spending provisions of the BEA will expire after 2002 if not extended by law. In some earlier years there were separate categories for defense and for violent crime reduction. The BEA caps both budget authority and outlays for each fiscal year for the conservation spending and other discretionary categories, but it caps only outlays for each fiscal year for highways and mass transit.

The BEA requires OMB to adjust the caps upward for appropriations for emergencies – any appropriation designated as emergency spending by both the Congress and the President – and appropriations for certain specified purposes, such as continuing disability reviews by the Social Security Administration. Thus, these appropriations cannot trigger a sequestration. The BEA also requires OMB, in consultation with Congress, to adjust the caps for the effects of conceptual changes.

If the Congress and the President designate an appropriation as an emergency requirement, we score the appropriations act for the budget authority and estimated outlays when it is enacted, and we increase the discretionary caps by the same amounts in the next sequestration report. This is the case even if the language makes the appropriation contingent on the President’s notifying Congress that he is making the appropriation available for emergency spending. (This is a change for contingent emergency appropriations. Prior to the 2001 budget we did not score budget authority or outlays until the President notified Congress. For the 2001 budget, we scored budget authority when the appropriation was enacted, but did not score outlays until the President notified Congress.)

The BEA requires special cap adjustments for the highways and mass transit categories to align the cap levels with highway receipts. It also requires a special cap adjustment for the conservation spending category. If appropriations in this category are less than the levels specified, the caps for the following year are adjusted upward by the amount of the shortfall. In addition, the BEA specifies minimum levels of spending for six subcategories of conservation spending. If appropriations for a subcategory for a fiscal year are less than the amount specified, the minimum level for the following year is adjusted upward by the amount of the shortfall. The subcategory levels are not caps. That is, appropriations in excess of a subcategory level would not necessarily trigger a sequestration. A sequestration would be triggered only if the aggregate of amounts appropriated for conservation spending exceeded the overall cap for the conservation spending category.

In general, Appropriations Committee actions are discretionary. The BEA requires that substantive changes to or restrictions on entitlement law or other mandatory spending law in appropriations laws (including changes in offsetting receipts or collections) be treated as changes in discretionary spending for the purposes of scoring those appropriations laws. However, in the subsequent budget, OMB may decide to reclassify such changes, especially in accounts that are generally mandatory, and make a compensating adjustment to the discretionary caps. This is sometimes referred to as “rebasing.”

Where obligation limitations set in appropriations acts limit permanent budget authority, except trust fund accounts in the Department of Transportation, we redefine the budget authority for the account as discretionary in an amount equal to the limit. For Transportation trust funds, the budget authority remains mandatory, although the funds’ outlays are discretionary.

If the amount of budget authority provided in appropriations acts for the year exceeds the cap on budget authority for a category, or if OMB estimates of the amount of outlays for the year resulting from all discretionary budget authority exceed the cap on outlays for a category, the BEA specifies a procedure, called sequestration, for reducing the spending in that category. The BEA requires the President to issue a

sequestration order reducing most programs in the category by a uniform percentage. Special rules apply in reducing some programs, and the BEA exempts some programs from sequestration.

The BEA's sequestration rules cover supplemental appropriations enacted during the fiscal year. From the end of a session of Congress through the following June 30th, discretionary sequestrations take place whenever an appropriations act for the current fiscal year breaches a cap. Because a sequestration in the last quarter of a fiscal year might disproportionately disrupt Government operations, the BEA requires OMB to reduce the applicable cap for the next fiscal year, in lieu of a sequestration in the fourth quarter.

(c) *PAYGO requirements.*

The BEA doesn't cap mandatory spending. Instead, it requires all laws enacted through 2002 that affect mandatory spending or receipts to be enacted on a "pay-as-you-go" basis. That means that if a provision of law increases the deficit or decreases the surplus in the budget year or any of the four following years, another provision of law (in the same or another law) must offset the increase with a reduction in spending or increase in receipts in each affected year. A provision that increases benefit payments, for example, would have to be offset by a provision reducing other mandatory spending or increasing receipts. Otherwise, the BEA requires the President to issue a sequestration order at the end of the session of Congress in the fiscal year in which the deficit is increased. (Note: Although the BEA requires estimates of the effects of legislation for the budget year and the four following years, OMB requires budget policy estimates for 9 years beyond the budget year (see section 30.2.)

The BEA sequestration procedures require a uniform reduction of mandatory spending programs that are neither exempt nor subject to special rules. The BEA exempts Social Security, interest on the public debt, Federal employee retirement, Medicaid, most means-tested entitlements, deposit insurance, other prior legal obligations, and most unemployment benefits from sequestration. A special rule limits the sequester of Medicare spending to no more than 4 percent, and special rules for some other programs limit the size of a sequestration for those programs. As a result of exemptions and special rules, only about 3 percent of all mandatory spending is subject to sequestration, including the maximum amounts allowed under the special rules.

The PAYGO rules don't apply to increases in mandatory spending or decreases in receipts that don't result from new laws. For example, mandatory spending for benefit programs, such as unemployment insurance, rises when the population of eligible beneficiaries rises, and many benefit payments are automatically increased for inflation under existing laws. Likewise, tax receipts decrease when the profits of private businesses decline as the result of economic conditions.

If both the Congress and the President designate a provision of mandatory spending or receipts legislation as an emergency requirement, we don't score the effect of the provision on the surplus or deficit.

(d) *OMB and CBO estimates.*

The BEA requires OMB, using the methods prescribed by the BEA, to make the estimates and calculations that determine whether there is to be a sequestration and report them to the President and Congress. The President's sequestration order may not change any of the particulars of the OMB report. The BEA requires the Congressional Budget Office (CBO) to make the same estimates and calculations, and requires OMB to explain any differences between the OMB and CBO estimates. Congress uses the CBO estimates for enforcing constraints during the congressional budget process.

(e) *Reporting requirements.*

The BEA requires OMB to issue five different kinds of reports to the President and the Congress, which the following table describes. The BEA requires CBO to issue like reports, with its estimates, 5 days earlier than the OMB reports.

BEA REPORTS

What OMB reports...	When...
<i>Preview report.</i> This report discusses the status of discretionary and PAYGO sequestration based on current law. It also explains OMB adjustments to the discretionary caps, under the BEA's adjustment provisions, and publishes the revised caps. By custom, OMB publishes its report as a chapter of the <i>Analytical Perspectives</i> volume of the budget.	With the President's budget
<i>7-day after reports.</i> As part of enforcing the discretionary spending caps, OMB must issue a report for each appropriation act (including a supplemental appropriations act) estimating the amount of new budget authority and outlays provided by the act for the current year and budget year. As part of enforcing the PAYGO rules, OMB must also issue a report for each authorizing act that changes receipts or outlays.	7 days after enactment of a bill
<i>Update report.</i> This report revises the preview report estimates to reflect the effects of newly enacted discretionary and PAYGO legislation.	August 20
<i>Final report.</i> This report also revises the preview report estimates, this time to reflect the effects of legislation enacted through the end of the session of Congress. The estimates in this report determine whether the President must issue a sequestration order.	15 days after the end of a session of Congress (usually in the fall of each year)
<i>Within-session report.</i> The BEA requires OMB to report if an appropriation for a fiscal year in progress is enacted before July 1 that breaches a cap. The report triggers a sequestration order. (If an appropriation is enacted after July 1 that breaches a cap, the BEA requires OMB to reduce the cap for the following year.)	Between the end of a session of Congress and July 1

20.10 What do I need to know about refunds?

You might think that you should record refunds received as collections and refunds paid as outlays, but that isn't always the case. The following table explains how to record refunds *received*. (We cover refunds paid after the table.)

If you...	And the appropriation against which the obligation was incurred...	You...
(1) receive a refund of funds that were obligated and outlayed in that year	remains available (usually the case)	reduce the total amount of obligations and outlays recorded for the year in the budget schedules.

SECTION 20 -- TERMS AND CONCEPTS

If you...	And the appropriation against which the obligation was incurred...	You...
(2) receive a refund of funds that were obligated in a previous year	remains available for new obligations	record the refund as an offsetting collection, increasing spending authority from offsetting collections.
(3) receive a refund of funds that were obligated in a previous year	has expired but is not yet canceled	record the refund as an offsetting collection and as a portion of cash collections credited to expired accounts (line 8896 of the P&F schedule). These offsetting collections are not reported as spending authority from offsetting collections (part of gross budget authority), and the amount on line 8896 reduces the offset applied to gross budget authority.
(4) receive a refund of funds that were obligated in a previous year	has been canceled	credit the refund to miscellaneous receipts of the Treasury.

Record refunds *paid* as follows:

- Record refunds paid by an expenditure account as an obligation and an outlay of the account.
- Record refunds of receipts that result from overpayments (such as income taxes withheld in excess of a taxpayer's income tax liability) as reductions of receipts, rather than as outlays. This does not include payments to a taxpayer for credits (such as an earned income tax credit) that exceed the taxpayer's income tax liability. Record these as outlays, not as refunds.

20.11 What do I need to know about fund types and associated accounts?

(a) *Overview.*

Agency activities are financed through general funds, special funds, and revolving funds (public enterprise revolving funds and intragovernmental revolving funds), which constitute the Federal funds group, and trust funds and trust revolving funds, which constitute the trust funds group. In a few cases, agencies account for amounts that are not Government funds in deposit funds. The following table summarizes the characteristics of these funds. The text following the table discusses the types of funds in more depth.

CHARACTERISTICS OF FUND TYPES AND THEIR ACCOUNTS

Fund Type/Account	What is the purpose of the account?	Are receipt accounts and expenditure accounts linked?	Are these funds included in the budget?
Federal funds:			
General fund receipt accounts	Record unearmarked receipts.	No.	Yes.
General fund expenditure accounts	Record budget authority, obligations, and outlays of general fund receipts and borrowing.	No, general fund appropriations draw from general fund receipts collectively.	Yes.
Special fund receipt accounts	Record receipts earmarked by law for a specific purpose.	Yes.	Yes.
Special fund expenditure accounts	Record budget authority, obligations, and outlays of special fund receipts.	Yes.	Yes.
Public enterprise revolving funds	Record offsetting collections earmarked by law for a specific purpose and associated budget authority, obligations, and outlays for a business-like activity conducted primarily with the public.	Not applicable. Collections are credited to the expenditure account.	Yes. ¹
Intragovernmental revolving funds	Record offsetting collections earmarked by law for a specific purpose and associated budget authority, obligations, and outlays for a business-like activity conducted primarily within the Government.	Not applicable. Collections credited to the expenditure account.	Yes.
Trust funds:			
Trust fund receipt accounts	Record receipts earmarked by law for a specific purpose (other than a business-like activity).	Yes.	Yes. ¹
Trust fund expenditure accounts	Record budget authority, obligations, and outlays of trust fund receipts.	Yes.	Yes. ¹

SECTION 20 -- TERMS AND CONCEPTS

Fund Type/Account	What is the purpose of the account?	Are receipt accounts and expenditure accounts linked?	Are these funds included in the budget?
Trust revolving funds	Record offsetting collections earmarked by law for a specific purpose and associated budget authority, obligations, and outlays for a business-like activity conducted primarily with the public.	Not applicable. Collections credited to the expenditure account.	Yes.
Deposit funds	Record deposits and disbursements of monies not owned by the Government.	Not applicable. Deposits and disbursements are recorded in the same account.	No.

¹ By law, the budget authority and the outlays (net of offsetting collections) of the Postal Service Fund (a revolving fund), and the receipts, budget authority, and outlays of the two social security trust funds (the Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund) are excluded from the budget totals. The budget documents present these amounts as “off-budget” and adds them to the budget totals to show totals for the Federal Government (sometimes called unified budget totals).

(b) *Federal funds.*

Federal funds comprise several types of accounts or funds. A *general fund receipt account* records receipts not earmarked by law for a specific purpose, such as individual income tax receipts. A *general fund expenditure account* records appropriations from the general fund and the associated transactions, such as obligations and outlays. General fund appropriations draw from general fund receipts collectively and, therefore, are not specifically linked to receipt accounts.

The Federal funds group also includes *special funds* and *revolving funds*, both of which earmark collections for spending on specific purposes. We establish a special fund where the law requires us to earmark collections from a specified source to finance a particular program, and the law neither authorizes the fund to conduct a cycle of business-type operations (making it a revolving fund) nor designates it as a trust fund. For example, a law established the Land and water conservation fund, earmarking a portion of rents and royalties from Outer Continental Shelf lands and other receipts to be used for land acquisition, conservation, and recreation programs. The receipts earmarked to a fund are recorded in one or more *special fund receipt accounts*. More than one receipt account may be necessary to distinguish different types of receipts (governmental, proprietary, etc.) and receipts from significantly different types of transactions (registration fees vs. fines and penalties, for example). The fund’s appropriations and associated transactions are recorded in a *special fund expenditure* account. Most funds have only one expenditure account, even if there are multiple receipt accounts. However, a large fund, especially one with appropriations to more than one agency (such as the Land and water conservation fund), may have more than one expenditure account. The majority of special fund collections are derived from the Government’s power to impose taxes, fines, and other compulsory payments, and they must be appropriated before they can be obligated and spent.

Revolving funds conduct continuing cycles of business-like activity. They charge for the sale of products or services and use the proceeds to finance their spending. Instead of recording the collections in receipt accounts (as offsetting receipts), the budget records the collections and the outlays of revolving funds in the same account. The laws that establish revolving funds authorize the collections to be obligated and outlayed

for the purposes of the fund without further appropriation. The law of supply and demand is expected to regulate such funds. However, in some cases, Congress enacts obligation limitations on the funds in appropriations acts as a way of controlling their expenditures (for example, a limitation on administrative expenses). There are two classes of revolving funds. *Public enterprise funds*, such as the Postal Service Fund, conduct business-like operations mainly with the public. *Intragovernmental funds*, such as the Federal Buildings Fund, conduct business-like operations mainly within and between Government agencies.

(c) *Trust funds.*

Trust funds account for the receipt and expenditure of monies by the Government for carrying out specific purposes and programs in accordance with the terms of a statute that designates the fund as a trust fund (such as the Highway Trust Fund) or for carrying out the stipulations of a trust agreement where the Nation is the beneficiary (such as any of several trust funds for gifts and donations for specific purposes). Like special funds and revolving funds, trust funds earmark collections for spending on specific purposes. Many of the larger trust funds finance social insurance payments for individuals, such as Social Security, Medicare, and unemployment compensation. Other major trust funds finance military and Federal civilian employees' retirement, highway and mass transit construction, and airport and airway development.

A trust fund normally consists of one or more receipt accounts to record receipts and an expenditure account to record the appropriation of the receipts and associated transactions. Some trust funds have multiple receipt accounts for the same reasons that special funds have them. Also, like special funds, large trust funds (such as the Highway Trust Fund) may have multiple expenditure accounts. A few trust funds, such as the Veterans Special Life Insurance fund, are established by law as revolving funds. These funds operate the same way as revolving funds in the Federal funds group, and we call them *trust revolving funds*. They conduct a cycle of business-type operations. The collections are credited to the expenditure account as offsetting collections and their outlays are displayed net of collections in a single expenditure account.

The Federal budget meaning of the term “trust,” as applied to trust fund accounts, differs significantly from its private sector usage. In the private sector, the beneficiary of a trust usually owns the trust's assets, which are managed by a trustee who must follow the stipulations of the trust. In contrast, the Federal Government owns the assets of most Federal trust funds, and it can raise or lower future trust fund collections and payments, or change the purposes for which the collections are used, by changing existing laws. There is no substantive difference between a trust fund and a special fund or between a trust revolving fund and a public enterprise revolving fund. Whether a particular fund is designated in law as a trust fund is, in many cases, arbitrary. For example, the National Service Life Insurance Fund is a trust fund, but the Servicemen's Group Life Insurance Fund is a Federal fund, even though both are financed by earmarked fees paid by veterans and both provide life insurance payments to veterans' beneficiaries. The Government does act as a true trustee for some funds. For example, it maintains accounts on behalf of individual Federal employees in the Thrift Savings Fund, investing them as directed by the individual employee. The Government accounts for such funds in deposit funds (see the next section).

(d) *Deposit funds.*

You use deposit funds to account for monies held temporarily by the Government until ownership is determined (such as earnest money paid by bidders for mineral leases) or held by the Government as an agent for others (such as State and local income taxes withheld from Federal employees' salaries and not yet paid to the State or local government). We exclude deposit fund transactions, as such, from the budget totals because the funds are not owned by the Government. Therefore, the budget records transactions between deposit funds and budgetary accounts as transactions with the public. For example, when the mineral leasing process has been completed, the winning bidder's earnest money is transferred from the deposit fund to the

appropriate receipt account and the budget records a receipt. Similarly, outlays are recorded in an agency's salaries and expense account when a Federal employee is paid, even though some of the amount is transferred to a deposit fund for State and local income taxes withheld and paid later to the State and local government. Deposits and associated disbursements are recorded in the same account.

You may not use deposit funds to hold monies if you know they belong to the Government but have not determined the specific receipt account to credit them to. The Treasury Department provides *clearing accounts* to be used for that purpose.

20.12 How do I record investment in securities and disinvestment?

(a) Overview.

You may only invest funds in securities if you are authorized to do so by law. Authorizing laws usually specify investment in Federal securities; they rarely authorize investment in non-Federal securities (see the definitions below). The budget treatment of investment in non-Federal securities, described in subsection (c), differs from that of Federal securities, described in subsection (d).

The guidance in this section regarding purchase premiums and discounts doesn't apply to the Treasury Department's purchases of marketable Treasury securities from the public prior to their maturity (often referred to as "debt buyback"). The budget records buyback premiums and discounts as means of financing a surplus or deficit, rather than as outlays or offsetting collections or receipts. The buyback premium or discount is the difference between the purchase price of a security and its book value. The book value can be expected to differ from the par value (face value) of the security. (See Chapter 24, "Budget System and Concepts and Glossary," pages 457-58, of the *Analytical Perspectives* volume of the 2001 budget for an explanation of the reason for this treatment.)

(b) Special terms for investment defined.

- (1) *Accrued interest purchase* means payments to the seller of a security, when a security is purchased, for interest that has accrued to the seller but that will be paid to the purchaser.
- (2) *Amortization* means to record a portion of any purchase discount or purchase premium in each reporting period over the life of a security, or it means the amount so recorded.
- (3) *Book value* means the *par value* of a security minus the amount of any unamortized discounts or plus the amount of any unamortized premiums.
- (4) *Earnings* refers collectively to some or all of these components: interest, accrued interest purchases, the amortization of purchase premiums and discounts, and sales gains and losses.
- (5) *Federal securities* consist of securities issued by Federal agencies, including nonmarketable par value Treasury securities, market-based Treasury securities, marketable Treasury securities, and securities issued by other Federal agencies. (Compare this to *non-federal securities*.)
- (6) *Interest* means the nominal interest or stated amount of interest received on a security.

- (7) *Marketable Treasury securities*, including Treasury bills, notes, and bonds, are types of securities that Treasury initially issues by sale to the marketplace and that can be bought and sold on securities exchange markets.
- (8) *Market-based Treasury securities* are special series debt securities that the U.S. Treasury issues to Federal entities without statutorily determined interest rates. These securities are not offered to the market place and cannot be bought and sold on exchange markets, but Treasury sets their terms (prices and interest rates) to mirror the terms of marketable Treasury securities. Because they mirror market terms, the purchase price may reflect a premium or discount.
- (9) *Net value*, for the purpose of budget schedules, means the par value of a security reduced by the amount of any purchase discount on a cash basis. This definition differs from the definition of “Treasury securities, net” as reported in balance sheets under section 86.2 (see *Differences between amounts recorded in budget schedules and financial statements* in subsection (d)).
- (10) *Nonmarketable par value Treasury securities* are special series debt securities that the U.S. Treasury issues to federal entities at par value. These securities are not offered to the market place and cannot be bought and sold on exchange markets. As required by the authorizing laws, Treasury sets the interest rate on such securities taking into consideration current market yields on outstanding marketable Treasury securities of specified maturity. Because these securities are sold at par value, there is no purchase premium or discount.
- (11) *Non-Federal securities* consist of securities issued by a non-Federal entity, including State and local governments, private corporations, and Government-sponsored enterprises, regardless of whether the securities are federally guaranteed.
- (12) *Par value* is the amount of principal a security pays at maturity. It is the amount printed on the face of a Treasury security, which is why it is sometimes referred to as the face value, or the equivalent book-entry amount.
- (13) *Purchase discount* means the excess of a security’s par value over its purchase price.
- (14) *Purchase premium* means the excess of a security’s purchase price over its par value.
- (15) *Sales gain* means the excess of the sales price over the purchase price of the security.
- (16) *Sales loss* means the excess of the purchase price over the sales price at the time of the sale.

(c) *Non-Federal securities*

The budget treats an investment in a non-Federal security (equity or debt security) as a purchase of an asset, recording an obligation and an outlay in an amount equal to the purchase price in the year of the purchase. You cannot incur such an obligation unless budget authority (or unobligated balances of budget authority) is available for the purpose. If a law clearly requires such investment without requiring further action by Congress, we will generally construe that law as providing budget authority for the purpose.

Investment in non-Federal securities consumes budgetary resources, unlike investment in Federal securities. The purchase of non-Federal securities using unobligated balances reduces the balances. The balance doesn’t include the value of non-Federal securities because the funds have been spent for the purchase of the assets.

SECTION 20 -- TERMS AND CONCEPTS

When such securities are sold or redeemed at maturity, the budget records the proceeds as offsetting collections or receipts, which adds to the balances of the account.

You record interest and other earnings on such investments as described for earnings on Federal securities in the next subsection, except that you must account for such earnings separately from earnings on investments in Federal securities. You record earnings credited to a general fund appropriation account or revolving fund account as offsetting collections on line 8840, Non-Federal sources, of the program and financing statement. You record earnings credited to a special or trust fund account as proprietary receipts in a separate receipt account for this purpose.

(d) *Federal securities.*

Because Federal securities are the equivalent of cash for budget purposes, we treat investment in them as a change in the mix of assets held, rather than as a purchase of assets. The following bullets describe the treatment in general terms, and the following table explains how to record specific transactions in the budget. The purchase, sale, or redemption of an asset, or the earnings in a year, may combine several transactions.

- *Principal.* The investment reduces the cash balances by the purchase price and increases balances of Federal securities. How you report balances of Federal securities depends on which budget schedule you are working with.
 - ▶ *Unavailable collections schedule (schedule N).* This schedule doesn't divide the unavailable balances into cash and Federal securities. It presents the balances as a single amount (unless the balances are divided for other reasons). The amount equals the uninvested cash balance, plus the *net value* (as defined in subsection (b)) of Federal securities held. MAX generates schedule N automatically. (See section 86.6.)
 - ▶ *Program and financing schedule (schedule P).* This schedule doesn't divide balances (unobligated or obligated balances) into cash and Federal securities. It presents the balances as a single amount (unless the balances are divided for other reasons). The amount equals the uninvested cash balance, plus the *net value* (as defined in subsection (b)) of Federal securities held. Enter the end of year unobligated and obligated balances in MAX as you would normally. In addition, you must enter memorandum entries for total investments at *par value* at the start and end of each year. (See section 82.7 for MAX.)
 - ▶ *Status of funds schedule (schedule J).* We require this schedule for certain accounts listed by agency in section 86.5. For unexpended balances at the start of the year and at the end of the year, the schedule presents separate amounts for the cash balance, the balance of Federal securities at *par value*, and unrealized purchase discounts. The MAX database generates schedule J automatically, except that it does not divide balances into amounts for cash, Federal securities at par value, or unrealized purchase discounts. You must enter these amounts. (See section 86.5.)
- *Earnings.* You record all earnings as net interest. Some components may be positive (such as interest and realized purchase discounts) and others negative (such as an accrued interest purchases and purchase premiums). Record each component as an increase or decrease in the net interest for the year in which the transaction occurs. For investments from a general fund appropriation account or revolving fund account (including a trust revolving fund account), record interest as an offsetting collection credited to the account (line 8820 Interest on Federal securities) of the P&F schedule. For

investments from a special or trust fund account (non-revolving), record interest in a receipt account for interest (usually one ending with the suffix .20). The Status of Funds schedule, if one is required for the account, records earnings on lines that correspond to the entries for offsetting collections in the P&F schedule or the receipts credited to receipt accounts, as appropriate.

We may specify an alternative treatment for certain accounts where these rules may result in significant distortions of amounts presented in the budget.

The following table lists the transactions associated with investments in Federal securities in the first column and explains how to record them in the budget schedules in columns 2 through 4. Please note these features of the table:

- The second column contains instructions for recording transactions in the P&F schedule. The instructions for recording principal transactions apply to all accounts investing or disinvesting in securities. The instructions for recording earnings apply only to investments from general fund appropriation accounts or revolving fund accounts (including trust revolving funds).
- The third column contains instructions for recording earnings in special and trust fund (except trust revolving fund) receipt accounts for interest.
- The fourth column contains instructions for recording transactions – both principal transactions and earnings transactions – in the Status of Funds schedule required for certain accounts listed in section 86.6.
- Although the instructions on balances specify end of year balances, they apply equally to start of year balances, because end of year balances are carried forward and become the start of year balances for the next year. MAX automatically generates the start of year balances in the Unavailable Collections schedule (MAX schedule N), the P&F schedule (MAX schedule P), and the Status of Funds schedule (MAX schedule J), except that you must break out the amounts for cash, Federal securities at par value, and unrealized purchase discounts in the Status of Funds schedule.
- A negative sign “(-)” at the end of a stub label means that you normally report negative amounts on this line. A direction to increase the amount reported means you should report a larger negative amount, and a direction to decrease the amount means you should report a smaller negative amount. The absence of a sign means you normally report positive amounts on this line. It is possible for negative earnings (such as a sales loss) for an account for a year to produce a positive amount for offsetting collections, or a negative amount for receipts, if the amounts reported for other transactions during the year are not sufficient to offset the negative earnings. (No signs appear in the stub labels printed in the budget.)

SECTION 20 -- TERMS AND CONCEPTS

If the transaction is...	In the P&F schedule...	Or, in the special or trust fund receipt account for interest (usually suffix .20) ...	And, in the Status of Funds schedule...
(1) <i>Principal, upon investment.</i>	Increase the amount reported on line 9202, "Total investments, end of year; Federal securities: Par value," by the par value in the purchase year.	Not applicable.	(a) Decrease the amount reported on line 0700, "Uninvested balance," by the purchase price in the purchase year. (b) Increase the amount reported on line 0701, "Federal securities: Par value," by the par value in the purchase year.
(2) <i>Purchase discount – the excess of a security's par value over the purchase price.</i>	Not applicable.	Not applicable.	(a) In the year of the purchase, increase the amount reported on line 0702, "Unamortized purchase discounts (-)," by the discount amount. (b) When the security matures: (1) Decrease the amount reported on line 0702, "Purchase discounts (-)," by the amount of the purchase discount; and (2) increase the amount reported on the line corresponding to the offsetting collection or receipt, as appropriate, by the amount of the purchase discount.
(3) <i>Purchase premium – the excess of a security's purchase price over its par value.</i>	Decrease the amount reported on line 8820, "Interest on Federal securities (-)," by the premium amount in the year of the purchase.	Decrease the amount reported as interest by the premium amount in the year of the purchase.	Decrease the amount reported on the line corresponding to the offsetting collection or receipt, as appropriate, by the amount of the purchase premium in the year of the purchase.
(4) <i>Accrued interest purchase – a payment to the seller of a security, when a security is purchased, for interest that has accrued to the</i>	Decrease the amount reported on line 8820, "Interest on Federal securities (-)," by the amount of the accrued interest purchase in the	Decrease the amount reported as interest by the amount of the accrued interest purchase in the year of the purchase. seller but that will be paid to the purchaser.	year of purchase.		interest purchase in the year of purchase.
(5) <i>Interest</i> – the nominal or stated amount of interest received.	Increase the amount reported on line 8820 “Interest on Federal securities (-),” by the amount of interest received each year.	Increase the amount reported for interest by the amount of interest received each year.	Increase the amount reported on the line corresponding to the offsetting collection or receipt, as appropriate, by the amount of interest received each year.
(6) <i>Principal, upon redemption at maturity.</i>	Decrease the amount reported on line 9202, “Total investments, end of year; Federal securities: Par value,” by the par value in the year of redemption.	Not applicable.	(a) Increase the amount reported on line 0700, “Uninvested balance,” by the par value in the year of redemption. (b) Decrease the amount reported on line 0701, “Federal securities: Par value” by the par value in the year of redemption.
(7) <i>Principal, upon sale before maturity.</i>	Decrease the amount reported on line 9202, “Total investments, end of year; Federal securities: Par value,” by the par value in the year of sale.	Not applicable.	In the year of the sale: (a) Increase the amount reported on line 0700, “Uninvested balance” by the sales price. (b) Decrease the amount reported on line 0701, “Federal securities: Par value” by the par value. (c) Decrease the amount reported on line 0702, “Purchase discounts (-),” if the security was purchased at a discount.
(8) <i>Sales gain</i> – the excess of the sales price over the purchase price.	Increase the amount reported on line 8820, “Interest on Federal securities (-),” by the amount of the gain in the year of the sale.	Increase the amount reported for interest by the amount of the gain in the year of the sale.	Increase the amount reported on the line corresponding to the offsetting collection or receipt, as appropriate, by the amount of the gain in the year of the sale.

SECTION 20 -- TERMS AND CONCEPTS

If the transaction is...	In the P&F schedule...	Or, in the special or trust fund receipt account for interest (usually suffix .20) ...	And, in the Status of Funds schedule...
(9) <i>Sales loss</i> – the excess of the purchase price over the sales price.	Decrease the amount reported on line 8820 “Interest on Federal securities (-),” by the amount of the loss in the year of the sale.	Decrease the amount reported for interest by the amount of the loss in the year of the sale.	Decrease the amount reported on the line corresponding to the offsetting collection or receipt, as appropriate, by the amount of the loss in the year of the sale.

Differences between amounts recorded in budget schedules and financial statements.

- *Purchase discounts.* Budget schedules record them when the security matures. In most cases, financial statements amortize them over the term of the security.
- *Purchase premiums.* Budget schedules record them at purchase. In most cases, financial statements amortize them over the term of the security.
- *Net value.* For budget schedules, the term means the par value of a security minus the amount of any purchase discount on a cash basis. Don’t confuse it with the term *Treasury securities, net* used in financial statements, which means the par value of a security minus the amount of any unamortized discounts or plus the amount of any unamortized premiums.
- *Signs.* Earnings reported as offsetting collections in the program and financing schedule carry the opposite sign from income reported in financial statements. In the program and financing statement, increases in income are reported as negative amounts and decreases are reported as positive amounts.

Differences between amounts recorded by Treasury and the budget. You will encounter differences between Treasury records and the budget if a law authorizes you to invest special or trust funds in Federal securities but requires appropriations acts to determine the amount of receipts available to incur obligations. Treasury treats the authority to invest the receipts as an appropriation, recording the receipts as appropriated in the year received and subsequently as unexpended balances of appropriations (combined unobligated and obligated balances). Since such appropriations do not provide budget authority, do not record budget authority in the program and financing schedule. The MAX database will report these amounts, along with the other amounts reported as unavailable collections, in the special schedule required under section 86.7 (without separate identification for the invested portion of the balances).

SECTION 25 -- APPLICABILITY, EXCEPTIONS, AND ADVANCE APPROVAL

Table of Contents

- 25.1 Does this part apply to me?
- 25.2 How do I get an exception from the requirements in Part 1?
- 25.3 For what items do I need advance approval?

25.1 Does this part apply to me?

By law (31 U.S.C. 1104), the President's budget must include information on all agencies of all three branches of the Federal government. Therefore, the instructions in Part 1 generally apply to all government agencies. In addition, these instructions apply to the District of Columbia, which must submit information in support of Federal payments to the District. OMB includes the information submitted by certain agencies in the budget without change (see below). In addition, Government-sponsored enterprises submit some of the information required of Government agencies on a comparable basis, and OMB includes it in the budget for information purposes (see section 27).

If your agency appears in the following list, it isn't subject to executive branch review by law or custom. That means that the requirements for justification materials (see section 27.2) don't apply to you. However, you do need to submit the information required for inclusion in the budget database and documents (see section 27.3), which OMB includes in the budget without revision.

- Legislative Branch agencies.
- Judicial Branch agencies.
- Executive Branch agencies, as follows:
 - ▶ Milk Market Assessment Fund, USDA.
 - ▶ International Trade Commission.
 - ▶ Board of Governors of the Federal Reserve System.
- Government-sponsored enterprises, as follows:
 - ▶ Student Loan Marketing Association.
 - ▶ Federal National Mortgage Association.
 - ▶ Federal Home Loan Mortgage Corporation.
 - ▶ Banks for cooperatives.
 - ▶ Agriculture credit banks.
 - ▶ Farm credit banks.
 - ▶ Federal Agricultural Mortgage Corporation.
 - ▶ Federal home loan banks.
 - ▶ Financing Corporation.
 - ▶ Resolution Funding Corporation.

Contact your OMB representative if you have questions about the applicability of these instructions.

25.2 How do I get an exception from the requirements in Part 1?

For the sake of comparability among the budget data and presentations, OMB doesn't grant many exceptions to the specific requirements in this part. However, if you believe special circumstances warrant an exception in your case, submit a written request detailing the circumstances and the specific exception needed to your OMB representative by August 1. If OMB approves the exception, it is valid only for one budget.

25.3 For what items do I need advance approval?

You must get advance approval from your OMB representative for the items shown in the table below. See the cited section for specific guidance.

Item	See section...	Timing
(1) Form and content of justification materials.	51.2	Prior to initial submission.
(2) Program activity structure in the program and financing schedule.	82.2	By October 1.
(3) Changes in functional classifications.	71.3, 79.1, 79.3	By October 1.
(4) Changes in receipt account classification.	71.3, 79.1, 79.3	By October 1.
(5) Changes in budget account structure (new accounts, merged accounts, changes in account titles, etc.)	71.3, 79.1, 79.3	Prior to October 1, or as soon as possible thereafter for changes dependent on congressional action or other circumstances beyond agency control.

SECTION 27 -- SUBMITTING MATERIALS TO OMB

Table of Contents

- 27.1 What do I send to OMB and when (overview)?
- 27.2 What do I include in the initial submission?
- 27.3 What do I submit after passback?

27.1 What do I send to OMB and when (overview)?

You generally submit information in two stages, although your OMB representative will work with you to determine specific timing requirements:

(1) *As part of your initial budget submission*, submitted by September 10, 2001. This stage includes information and materials supporting your budget request.

(2) *After passback*, by deadlines provided by your OMB representative. Usually beginning in late November, this stage includes MAX computer data, print materials, and additional information used to prepare the budget documents and supporting database. Also, you may need to revise and resubmit some materials included in the initial submission to reflect the effects of final decisions.

In the following sections, we tell you more about each stage, including the timing of your submissions, the items required, the criteria for determining whether the item applies to your agency, and where in this Circular to find more detailed guidance on the item.

Agencies that are not subject to Executive Branch review (see section 25.1) don't make initial submissions. They do need to submit information to be included in the budget documents and the budget database. Your OMB representative will work with you to determine the timing of your submissions.

27.2 What do I include in the initial submission?

Include the budget justification and other materials described below in Table 1. This applies to all agencies (except as noted).

If the criterion listed in the first column of Table 2 applies to you, include the information described in the second column.

The right-hand column of both tables tells you where in this Circular to find more detailed guidance on the requirement. In addition to the information specified in the tables, your OMB representative may require you to include other materials in your initial submission (for example, information about your budget request by account and by Budget Enforcement Act category).

TABLE 1: CONTENTS OF INITIAL SUBMISSION – ALL AGENCIES¹

Include these items...	See section...
Summary and highlight statement	51.1
Justification materials	51.2-51.10

¹Excluding agencies not subject to Executive Branch review (see section 25.1).

TABLE 2: CONTENTS OF INITIAL SUBMISSION – CERTAIN AGENCIES¹

If your agency...	Then include this...	See section...
is covered by the Chief Financial Officers Act	<ul style="list-style-type: none"> financial management budget justification; and report on resources for financial management activities ² 	52
is not covered by the Chief Financial Officers Act	<ul style="list-style-type: none"> brief summary of your financial management plan 	
is requesting IT funding via a Capital Asset Plan or has budget authority of \$500,000 or more for financial management systems	report on information technology ²	53
has rental payments greater than \$5 million	information on rental payments for space and land	54
controls its Federally-owned building space or directly pays the utilities on its leased space	information on energy use, costs, and efficiency ²	55
has budget authority or outlays for drug programs greater than \$500,000 in any year	information on drug control programs ²	56
is listed in exhibit 57	<ul style="list-style-type: none"> information on erroneous payments; and an assessment of the efficacy of agency efforts to minimize erroneous payments 	57
has receipts	information on receipts estimates	58.1
has an Office of Inspector General under the Inspector General Act Amendments of 1988	information on Inspectors General for designated Federal entities	58.2

TABLE 2: CONTENTS OF INITIAL SUBMISSION – CERTAIN AGENCIES¹

If your agency...	Then include this...	See section...
has credit liquidating accounts with unobligated balances that carry over into the current year	justification of unobligated balances in liquidating accounts	58.3, 85.3
is subject to GPRA requirements	initial annual performance plan	Part 2
has major capital acquisitions	capital asset plan ²	Part 3

¹Excluding agencies not subject to Executive Branch review (see section 25.1).

² If final decisions require changes to this information, revised materials must be submitted (see section 100.1).

27.3 What do I submit after passback?

(a) Overview.

You submit three types of information after passback, as explained in more detail in the following sections:

- *MAX computer data*, submitted through the MAX budget data system (see sections 79-86).
- *Print materials*, which OMB uses to prepare parts of the budget *Appendix* (see sections 95-97).
- *Additional information*, which OMB uses for special purposes (see section 100).

This Circular doesn't address the process by which you appeal passback decisions. We issue separate guidance on the appeals process at the time of passback.

(b) Timing.

Passback usually occurs around the end of November. At that time, your OMB representative will give you deadlines for providing the information described below. These deadlines are based on the very tight schedule that OMB must maintain in order to transmit the budget on time. In order to meet the deadlines, you must begin providing the required information based on passback decisions. Don't wait until you've resolved appeals. Appeals generally affect very little of the information you submit, and you will have an opportunity to change the information as necessary to reflect the appeal resolution. Unless your OMB representative agrees, don't submit information that assumes an appeal resolution different from passback. When an appeal results in changes to passback decisions, the changes often differ from the agency proposal.

(c) MAX computer data.

You must submit the MAX computer data described below in the Table 3 for each applicable budget account. In addition, if the criterion listed in the first column of Table 4 applies to you, submit the data described in the second column for each applicable budget account. In both tables, we indicate the MAX data section or sections involved and tell you where in Part 1 to find guidance on the requirement.

TABLE 3: MAX COMPUTER DATA – ALL AGENCIES *

Submit for each applicable account...	MAX data schedule...	See section...
estimates of budget authority and outlays	A, S	81
program and financing schedules	P	82
object classification schedules	O	83
personnel summary	Q	86.1
character classification data, including R&D data (such as, crosscuts, technology transfers)	C	84

* Including agencies not subject to Executive Branch review. Federal Reserve Board submits data for sections A, P, and O only. Nothing in this table applies to GSEs.

unavailable special or trust fund receipts or offsetting collections	data on unavailable collections	N	86.6
contract authority	status of contract authority	I	86.7

¹ Including agencies not subject to Executive Branch review. GSEs submit data for schedules E, F, G, H only. Nothing in this table applies to the Federal Reserve Board.

² DOD-Military submits budget plan (MAX schedule D), see section 86.3.

(d) *Print materials.*

Print materials include these items printed in the *Budget Appendix*:

- *Appropriations language.* You must submit language for each account for which appropriations or limitation language was enacted in the CY or is proposed in the CY or BY, including supplemental

appropriations requests. You must also submit any general provisions that pertain to you (see section 96).

- *Narrative statements, footnotes, and tables.* You must provide a narrative statement for each account with activity in the current or budget year, and separate statements for supplemental requests, rescission proposals, and items proposed for later transmittal. You may be required to provide tables and footnotes that aren't generated by MAX under certain circumstances (see section 97).

(e) *Additional materials.*

If the criterion listed in the first column of Table 5 applies to you, submit the additional materials described in the second column. The right-hand column tells you where in Part 1 to find guidance on the requirement.

TABLE 5: ADDITIONAL MATERIALS – CERTAIN AGENCIES

If your agency...	Then submit this...	See section...
has credit programs	development of risk categories	85.3
has budget authority or outlay differences of \$50 million or more between current year and budget year baseline estimates	materials in support of baseline estimates	100.2
has a Federal formula grants program to State or local governments	information on grants to State and local governments	100.3
operates at least 300 motor vehicles	information on motor vehicles	100.4
has obligations for relocation expenses for PY through BY	information on relocation expenses	100.5
had expenditures for official international travel in the PY	information on international travel	100.6

SECTION 30 -- BASIC POLICIES AND ASSUMPTIONS

Table of Contents

- 30.1 What should be the basis for my proposals?
- 30.2 What is the scope of the policy estimates?
- 30.3 What economic assumptions should I use when I develop estimates?
- 30.4 What assumptions should I make about growth in agency workload?
- 30.5 How do I develop unit cost information?

Summary of Changes

Reminds agencies that budget proposals should reflect the President's Management Plan and guidance provided by OMB (section 30.1).

Emphasizes the longstanding policy that OMB will only consider supplemental requests for transmittal with the budget (as well as those for later transmittal) that meet certain criteria (section 30.2).

30.1 What should be the basis for my proposals?

Your proposals should result from a comprehensive system that integrates analysis, planning, evaluation, and budgeting. They should reflect:

- The policies of the President, including the President's Management Plan to be published as part of the Mid-Session Review of the 2002 Budget;
- Guidance provided by OMB, including that contained in spring guidance memoranda sent to the heads of agencies in May and June 2001. These letters, which reflect the results of OMB Spring Review, include guidance on:
 - ▶ The President's Management Plan;
 - ▶ Agency-specific management reforms;
 - ▶ Integrating performance measures (specific outcomes and objectives) in the budget process;
 - ▶ Funding guidance (the 2003 amount included in the President's budget for 2002); and
- The judgment of the agency head regarding the scope, content, performance, and quality of programs and activities proposed to meet the agency's missions, goals, and objectives.

In developing the estimates, consider the effect that demographic, economic, or other changes can have on program levels beyond the budget year. Be prepared to discuss the impact that program levels and changes in methods of program delivery, including advances in technology, will have on program operations and administration. Also consider the appropriate roles for Federal, State, and local governments, as well as the private sector, in conducting the covered activities. Involve State and local officials in the development of policy and budget priorities and programs with significant State and local impact. Make sure your estimates are consistent with strategic and annual performance plans.

30.2 What is the scope of the policy estimates?

(a) *Presidential policy estimates for CY and BY.*

(1) *Regular annual estimates.* Your regular annual estimates must reflect all requirements anticipated at the time of budget submission, and should cover:

- Continuing activities, including those that must be reauthorized for the budget year;
- Authorized activities that are proposed for the budget year;
- Amounts necessary to meet specific financial liabilities imposed by law; and
- Decreases for activities proposed for termination.

(2) *Legislative proposals.* If you and your OMB representative determine that proposals for new legislation require a further budget request or result in a change in revenues or outlays, you must separately identify and provide a tentative forecast of the estimate in your submission. These proposals must be consistent with the items that appear in your legislative program, as required by OMB Circular No. A-19.

(3) *Supplemental proposals.* You should make every effort to conduct your programs within the amounts appropriated for the current year and to postpone actions that require supplemental appropriations. OMB will only consider supplemental requests that meet the criteria provided in section 110. Supplemental requests that are known at the time the budget is prepared and approved are normally transmitted to Congress with the budget, rather than later as separate transmittals. However, each case will be decided separately after OMB receives the agency's initial submission (see section 51.10). OMB representatives will tell you which supplementals will be transmitted with the budget so you can submit the necessary information.

(b) *Presidential policy outyear estimates.*

Policy estimates for the nine years following the budget year (BY+1 through BY+9) enable the President to present the long-term consequences of proposed program or tax policy initiatives. (Baseline estimates, described in section 80, provide a basis for assessing alternatives, including Presidential policy estimates.) OMB may centrally calculate outyear policy estimates for discretionary programs with some exceptions. In this case, you may be asked to identify and justify any deviations from these estimates, by program or activity, that you believe are warranted.

When you develop outyear policy estimates, they should be consistent with the general policies and information required for the budget year and indicate the degree to which specific policy decisions made for the budget year or any subsequent year affect budget authority, outlay, and receipt outyear levels. Take into consideration changes in spending trends, economic assumptions, and other actions or events when you prepare estimates of budget authority, outlays, and receipts for BY+1 through BY+9.

30.3 What economic assumptions should I use when I develop estimates?

All budget materials, including those for the outyear policy and baseline estimates, must be consistent with the economic assumptions provided by OMB. The specific guidance below applies to outyear policy estimates.

OMB policy permits *consideration* of price changes for goods and services as a factor in developing estimates. However, this does not mean that you should automatically include an allowance for the full rate of anticipated inflation in your request.

For *mandatory programs*, reflect the full inflation rate where such an allowance is required by law and there has been no decision to propose less than required. For *discretionary programs*, you may include an allowance for less than the full rate of anticipated inflation or even no allowance for inflation. In many cases, you must make trade-offs between budgeting increases for inflation versus other increases for programmatic purposes. Unless OMB determines otherwise, you must prepare your budget requests to OMB within the budget planning guidance levels provided to you, regardless of the effect of inflation.

Economic assumptions may be revised shortly before final budget decisions are made. These revisions will not usually result in changes to the previous budget guidance on your agency totals.

Reflect Federal pay raises in your estimates of personnel compensation and benefits (see section 32.2(b)(1)).

You must identify the anticipated price level changes reflected in the financial resources required to finance each program level in your justification materials (see section 51.3).

30.4 What assumptions should I make about growth in agency workload?

Assume that growth in your agency workload will be offset by productivity increases so that related employment does not increase. Use personnel currently funded to the maximum extent in staffing new programs and expansions of existing programs. Plan to reduce personnel levels where workload is stable.

30.5 How do I develop unit cost information?

Base your estimates on the most economical and efficient manner of carrying on the work of your agency. For this purpose, develop unit (average) cost information to permit cost comparison and analysis to determine whether program costs are minimal. Where possible, separate costs into fixed and variable components so that marginal costs can be derived in addition to unit costs. Such information will also provide a credible base for projections of future costs and the need for budgetary resources. Upon request, you must provide both unit cost and marginal cost information to OMB.

SECTION 31 -- COMPLIANCE WITH ADMINISTRATION POLICIES AND OTHER GENERAL REQUIREMENTS

Table of Contents

- 31.1 Advance appropriations
- 31.2 Customer service
- 31.3 Equal opportunity
- 31.4 Full funding
- 31.5 Government perquisites
- 31.6 MAX electronic network
- 31.7 Multi-year appropriations
- 31.8 Performance indicators, performance goals, and management improvement
- 31.9 Performance of commercial activities
- 31.10 User charges
- 31.11 Workforce planning and restructuring

Summary of Changes

Revises guidance on requests for advance appropriations (section 31.1).

Calls for agencies to redistribute higher-level positions to front-line, service-delivery positions (section 31.2).

Provides guidance on e-Government projects and refers to NARA records management guidance for agencies implementing electronic signature technologies (section 31.8).

Revises guidance on security (section 31.8).

Provides additional guidance on performing commercial activities (section 31.9).

Provides additional guidance on user fees (section 31.10).

Provides additional guidance on workforce restructuring (section 31.11).

31.1 Advance appropriations.

Do not request advance appropriations if the only purpose is to shift budget authority for a program that would normally be provided in the budget year. For example, if you would normally request budget authority in the budget year to cover a cohort of obligations for a grant program, even though some the obligations will not be incurred until the following fiscal year, you may not request an advance appropriation of budget authority to cover the obligations expected to be incurred in the following fiscal year.

31.2 Customer service.

Your estimates should reflect the Administration's commitment to providing the highest quality service possible to the American people. Executive Order 12862 established the Administration's goal to make all aspects of the Executive Branch's management practices and operations equal to or better than the best service in the private sector.

Consider ways to enhance customer service both to Federal and non-Federal clients, based on information obtained from customer service surveys and other sources. Your estimates should also reflect implementation of customer service plans, including training and information collection needed to achieve customer service standards.

The Administration wants the government to be citizen-centered and to ensure that there is as little distance as possible between citizens and decision-makers. Toward that end, you should be developing workforce restructuring plans to reduce the number of managers, reduce the time it takes to make decisions, increase span of control, and redirect positions within the agency to ensure that the largest number of employees possible are in direct service delivery positions that interact with citizens (see section 31.11).

31.3 Equal opportunity.

Your estimates should reflect the Administration's commitment to programs designed to ensure or promote equal opportunity regardless of race, color, religion, national origin, sex, disability, or age. These civil rights activities include the following:

- Implementation of statutes or regulations requiring fair housing.
- Nondiscrimination in federally assisted or conducted programs.
- Equal credit opportunity.
- Full voting rights.
- Civil and Constitutional rights.
- Equal employment opportunity (including nondiscrimination by Federal agencies).
- Efforts to increase Federal contracting and subcontracting opportunities for minorities, women, and disadvantaged entrepreneurs.

31.4 Full funding.

Requests for acquisition of capital assets must propose full funding to cover the full costs of the project or a useful segment of the project, consistent with the policy stated in section 300.6(b). Specifically, requests for procurement programs must provide for full funding of the entire cost. In addition, requests for construction programs must provide for full funding of the complete cost of construction. You should not submit estimates for construction funds for major construction projects unless planning will reach a point by the end of the current year that will ensure that a contract for construction could be awarded during the

budget year. Remember that Administration policy and the Antideficiency Act require you to have sufficient budget authority or other budgetary resources to cover the full amount of unconditional obligations under any contract.

For policies related to leases of capital assets and lease-purchases, see section 33.4 and Appendix B. For guidance on budget submissions for capital asset acquisitions, see Part 3 of this Circular. For guidance on principles and techniques of planning, budgeting, procurement, and management of capital assets, see the supplement to this Circular, the *Capital Programming Guide*, which is published separately.

31.5 Government perquisites.

Your estimates should reflect Administration policy to limit the use of government vehicles, government aircraft, first class air travel, executive dining facilities, and conferences, in accordance with Presidential memoranda, dated February 10, 1993.

31.6 MAX electronic network.

For the purpose of cost distribution specified in OMB Circular No. A-130, OMB is the user of MAX. Accordingly, you are not required to pay for use of the MAX electronic network required by this Circular.

31.7 Multi-year appropriations.

Consider whether it is appropriate to request appropriations with multi-year availability, particularly for buildings, equipment, and other types of fixed capital assets, including major ADP and telecommunications systems, with long acquisition cycles. Where multi-year appropriations requests are appropriate, you should match the period of availability to the expected length of the acquisition cycle.

31.8 Performance indicators, performance goals, and management improvement.

Your estimates should reflect the Administration's commitment to improve program performance, e-government, management integrity and controls, program delivery, and financial management.

- *Performance indicators and performance goals.* Your estimates should reflect the performance goals and indicators, including target levels for these goals and indicators, as set out in your agency's annual performance plan. In particular, they should reflect any specific guidance on outcomes and related outputs provided in OMB's spring guidance memorandum to your agency (see section 51.7 and Part 2).
- *Capital planning and investment control.* Your estimates should reflect the Administration's commitment to IT investments that directly support agency strategic missions, employ an integrated planning, budgeting, procurement process, are citizen-centered, and are consistent with the Clinger Cohen Act of 1996, the Paperwork Reduction Act, the Federal Acquisition Streamlining Act, and OMB Circular A-130, Management of Federal Information Resources (see also Section 53 and Part 3, where applicable).
- *Electronic transactions and electronic recordkeeping.* Your estimates should prioritize and manage e-Government projects effectively through your agency's capital planning process and enterprise

architecture. Initiatives should create a citizen-centered electronic presence (maximizing use of the Internet) and advance an e-Government strategy that includes specific outcomes to be achieved. Your estimates should reflect the requirements of the Government Paperwork Elimination Act (GPEA) and OMB's guidance. Under GPEA, all transactions should have an electronic option and associated electronic recordkeeping by October 2003 if practicable. The National Archives and Records Administration has issued records management guidance for agencies implementing electronic signature technologies. The guidance can be found at the following Internet address:

www.nara.gov/records/policy/gpea.html

- *Security.* Your estimates should reflect a comprehensive understanding of OMB security policies and NIST guidance, including compliance with the Government Information Security Reform Act, and OMB Memorandum No. M-01-08, "Guidance on Implementing the Government Information Security Reform Act, by:
 - ▶ Demonstrating that the costs of security controls are understood and are explicitly incorporated in the life-cycle planning of the overall system, including the additional costs of employing standards and guidance more stringent than those issued by NIST;
 - ▶ Demonstrating how the agency ensures that risks are understood and continually assessed;
 - ▶ Demonstrating how the agency ensures that the security controls are commensurate with the risk and magnitude of harm;
 - ▶ Identifying additional security controls for systems that promote or permit public access, other externally accessible systems, and those that are interconnected with systems over which program officials have little or no control;
 - ▶ Demonstrating how the agency ensures the effective use of security controls and authentication tools to protect privacy for those systems that promote or permit public access; and
 - ▶ Demonstrating how the agency ensures that the handling of personal information is consistent with relevant government-wide and agency policies.
- *Privacy.* Your estimates should reflect the Administration's commitment to privacy and should include a description of your privacy practices and steps taken to ensure compliance with all OMB privacy policies.
- *Financial systems.* Your estimates should reflect plans to achieve a single, agency-wide, integrated financial management system and CFO plan initiatives. The scope of agency financial systems activities will include the following:
 - ▶ Core financial systems, as described in the JFMIP Core Financial System Requirements Document.
 - ▶ Financial and mixed systems critical to effective agency-wide financial management, financial reporting, or financial control.

Sections 52 and 53 describe the materials that must be submitted for agency financial management systems.

31.9 Performance of commercial activities.

Your estimates should reflect the probable results generated by cost comparisons or other performance conversions authorized by OMB Circular No. A-76 and its Revised Supplemental Handbook (March 1996), including potential savings that may result from actions taken as a result of the annual review of the commercial activities inventory required by the Federal Activities Inventory Reform Act (P.L. 105-270). For activities that assume additional FTE or dollar resources to provide a product or service, submit a full justification, including a possible recompetition, waiver justification, or determination of workload increase, as appropriate. To the extent possible, offset additional resource requirements to meet mission or administrative requirements for in-house performance through savings from these and other efforts to reduce costs, including savings from conducting cost comparisons on other existing in-house activities, reinvention savings, privatization, or attrition.

Under the requirements of the Revised Supplemental Handbook, you must justify the following types of requests for in-house government resources:

- To begin, expand, or enlarge, a government operated activity.
- To convert a contracted activity to in-house performance.
- To provide new or expanded services to another agency on a reimbursable basis.

Except where specifically exempted, all commercial activities are subject to the cost comparison requirements of Circular No. A-76 and its Supplemental Handbook. This includes the purchase and use of government aircraft and motor vehicle fleets.

In accordance with the requirements of OMB Circular No. A-97, you must justify in advance and obtain the required certification before providing commercial support services to State and local governments.

Performance of commercial activities should be fully consistent with actions taken by the agency to implement other management reform initiatives, including those addressed in OMB Memorandum M-01-15, "Performance Goals and Management Initiatives for the FY 2002 Budget":

- Making greater use of performance-based contracts;
- Expanding the application of on-line procurement;
- Expanding A-76 competitions; and
- Increasing the accuracy of FAIR Act inventories.

Also, the performance of commercial activities should be consistent with your agency's five-year workforce restructuring plan (see section 31.11).

31.10 User charges and user fees.

Under OMB Circular No. A-25, you must review user charges for your programs at least once every two years, and you must report the result of the review and any resultant proposals in the Chief Financial Officers Annual Report required by the Chief Financial Officers Act of 1990 (see section 8(e) of OMB Circular No. A-25). Develop your estimates in accordance with the full cost recovery policy for user charges set forth in

SECTION 31 – COMPLIANCE WITH ADMINISTRATION POLICIES AND OTHER GENERAL REQUIREMENTS

that Circular. User charges normally should recover the full cost of providing goods or services to the public. The exception to this rule is when the Government provides goods or services under business-type conditions, including amounts collected for the use or sale of natural resources; in such cases, the user charge should be set at the market price.

When you determine full cost recovery, reflect the retirement costs associated with providing the goods or services. For the Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS), estimate costs as specified in section 32.5.

User fees, which are reported in MAX, are a subset of user charges. There has been a growth in user fees, and some have been classified by law as offsetting collections or offsetting receipts when they more appropriately should have been classified as governmental receipts. Only user fees that arise from business-type transactions should be classified as offsetting collections or offsetting receipts. The Administration plans to monitor and review the classification of user fees and other types of collections. User fees and user charges are discussed further in section 20.

If you propose new user fees that require authorizing legislation, provide a clear explanation of the new user fee and the legislation that will be required to authorize it. Include a detailed discussion of plans for achieving enactment of the legislation and the administrative actions planned for collecting the fees if the legislation is enacted. Assess the proposal's chances of enactment, taking into account the likely reaction to the proposal by Congress and the users. Describe the basis for your assessment in detail. If you believe that the proposal will lack support, explain why you believe the President should propose it in the budget anyway.

31.11 Workforce planning and restructuring

As specified in OMB Bulletin 01-07 on “Workforce Planning and Restructuring,” you must identify the specific organizational changes the agency is proposing to reduce the number of managers, reduce organizational layers, reduce the time it takes to make decisions, increase the span of control, and redirect positions within the agency to ensure that the largest number of employees possible are in direct service delivery positions that interact with citizens and retrain and/or redeploy employees as part of restructuring efforts. Your budget submission and performance plan must also identify the specific human resources management and development objectives and associated resources that support agency accomplishment of programmatic goals.

SECTION 32 -- ESTIMATING EMPLOYMENT LEVELS, COMPENSATION, BENEFITS, AND RELATED COSTS

Table of Contents

Reporting Employment Levels

- 32.1 What terms do I need to know?
- 32.2 What should be the basis for my personnel estimates?
- 32.3 What do I need to know about FTE budgeted levels?

Reporting Personnel Compensation and Related Costs

- 32.4 How do I treat agency benefit payments under the Federal Employee Compensation Act?
- 32.5 How do I estimate Federal employee pension and health benefit costs?
- 32.6 How do I reflect the effects of pay raises?
- 32.7 How do I budget for unemployment compensation?

Summary of Changes

Requires agency submissions to reflect the full Government share of pension and health benefit costs, including the post-retirement cost of health benefits for current employees (section 32.5).

32.1 What terms do I need to know?

Employee, as defined in 5 U.S.C. 2105, means an officer or individual who is appointed under a delegated authority, is engaged in the performance of a Federal function, and is subject to the supervision of an officer or employee of the Federal Government.

Full-time equivalent (FTE) employment means the total number of regular straight-time hours (i.e., not including overtime or holiday hours) worked by employees divided by the number of compensable hours applicable to each fiscal year. Annual leave, sick leave, compensatory time off and other approved leave categories are considered "hours worked" for purposes of defining full-time equivalent employment that is reported in the personnel summary (see section 86.1). This definition is consistent with guidance provided by the Office of Personnel Management (OPM) in connection with reporting FTE data as part of the SF 113G reporting system. A list of compensable days (with associated hours) for fiscal years 2001 through 2007 is provided in section 32.3(b).

32.2 What should be the basis for my personnel estimates?

(a) *Personnel.*

(1) *Staffing requirements.* Base estimates for staffing requirements on the assumption that improvements in skills, organization, procedures, and supervision will produce a steady increase in productivity. Personnel should be reassigned, to the maximum extent, to meet new program requirements. Reductions generally should be planned where the workload is stable. Where information technology systems are installed or enhanced, gains in productivity should result in lower personnel requirements after the first year.

Where appropriate, use calculations converting workload to required personnel that include an estimate of available workhours per employee. Exclude annual leave, sick leave, administrative leave, training, and other non-work time in these calculations. Base estimates of available time on current data, reflect steps taken to improve the ratio of available time to total time, and recognize differences in available time by organization, location, or activity. Base exclusions for annual and sick leave on current experience of actual leave taken rather than leave earned. Employment levels should reflect budget proposals and assumptions with regard to workload, efficiency, proposed legislation, interagency reimbursable arrangements, and other special staffing methods. Employment intended for proposed legislation, or for carrying out proposed supplemental appropriations, cannot begin until the additional funds become available by congressional action. Employment proposed for activation of new facilities or start-up of new programs cannot begin until the new activity begins. Employment under estimated reimbursable arrangements also cannot begin until such arrangements have been negotiated and justified.

(2) *Personnel resources.* Just as estimates of employment are based on workyears/person hours, you should base estimates of personnel resources on the total number of regularly scheduled straight-time hours (worked or to be worked) in the fiscal year (see section 32.3(b)). Note that, although budgetary resources must be sufficient to cover any extra compensable days in a fiscal year, some of the corresponding outlays may not occur until the following year.

(3) *Requirement for data in terms of FTEs.* Wherever entries in schedules or materials required by this Circular pertain to personnel requirements or total employment levels, state such entries for all years in terms of FTEs, as defined in section 32.1, unless another measure is explicitly required.

(b) *Personnel compensation.*

(1) *Pay scales.* Unless instructed otherwise by OMB, base estimates on compensation scales in effect at the time of submission of the estimates, adjusted for pay raises contained in the Mid-Session Review economic assumptions.

The Mid-Session Review pay raise assumptions will apply to the statutory pay systems (General Schedule, Foreign Service, and Veterans Health Administration), the Executive Schedule, the Senior Executive Service (SES), and wage grade employees. The pay raises encompass both the Employment Cost Index (ECI)-based national schedule adjustment and locality pay without assumption as to how the total increase will be distributed between the two. Use pay scales that reflect the most recent locality pay rates in preparing your estimates.

You may need to adjust your estimates when final pay assumptions for the budget are released. You should be prepared to provide supporting detail on calculating pay costs, including separate identification of the pre-pay raise wage base reflected in the submission. You must explicitly justify any increases in average compensation for the budget year, other than those due to changes in pay scales.

(2) *Hourly rates.* Base compensation for all employees (as defined in 5 U.S.C. 5504(b)) on hourly rates of compensation determined by dividing the annual rate of basic pay by 2,087, in accordance with section 15203(a) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Public Law 99-272).

(3) *Within-grade increases.* Additional resources for within-grade increases are normally not allowed. Offset the net cost, if any, of within-grade salary increases (i.e., costs after turnover, downgrades, and

other grade or step reducing events are taken into account) by savings due to greater productivity and efficiency.

(4) *Vacancies*. Base estimates related to vacancies expected to be filled in the budget year on the entrance salary for the vacancies involved.

(5) *Savings in personnel compensation*. Give full consideration to savings in personnel compensation due to personnel reductions, delay in filling vacant positions, leave without pay, lag in recruitment for new positions, filling vacancies at lower rates of pay, part-time employment, and grade reduction actions. Identify terminal leave payments, including those for SES, as offsets against such savings.

(6) *Positions above grade GS/GM-15*. Reflect these positions, including SES, only to the extent that positions have been authorized in those grades by OPM or other authority, or are specifically authorized in substantive law.

(7) *Awards*. Estimates should include amounts for all cash incentive awards. Upon request by OMB, be prepared to provide detailed information on your cash incentive awards program, including a narrative explanation of the basis on which your agency distributes awards and how that relates to its overall performance management program.

(8) *Executive selection and development programs*. Include in your estimates provisions for reasonable amounts for such programs, as required under Title IV of the Civil Service Reform Act of 1978 and by implementing guidelines issued by the Office of Personnel Management.

(9) *Premium pay and overtime*. Fully justify increases over amounts for the preceding year for premium pay. In preparing estimates for overtime, you should analyze the use of overtime to ensure that it is used in a prudent and efficient manner; explore all reasonable alternatives to overtime (such as improved scheduling); and ensure that adequate approval, monitoring, and audit procedures are in place to avoid overtime abuses.

(10) *Special rates for experts and consultants*. Authority to pay special rates for experts and consultants may be requested only when your agency demonstrates that the type and caliber of services required cannot be obtained at the maximum daily rate payable for grade GS-15 under the Classification Act. When such authority is justified and specifically authorized, special rates may not exceed the maximum rate for senior level positions under 5 U.S.C. 5376.

(11) *Severance pay*. Estimate severance pay at the amount needed for the fiscal year. However, obligations will be incurred on a pay-period by pay-period basis, notwithstanding the fact that a liability arises at the time of an employee's separation. Your estimates must include changes in severance pay and personnel compensation that would occur upon the application of instructions covered in OMB Circular No. A-76.

(12) *Physicians comparability allowance*. Reflect in your estimates approved plans to pay bonuses to physicians in accordance with the Federal Physicians Comparability Allowance Amendments of 1987 (Public Law 100-140) and the Federal Employees Health Care Protection Act of 1998 (Public Law 105-266). Instructions for reporting on the physicians comparability allowance program are issued separately.

**SECTION 32 -- ESTIMATING EMPLOYMENT LEVELS,
COMPENSATION, BENEFITS, AND RELATED COSTS**

(13) *Bonuses and allowances.* Reflect in your estimates approved agency plans for paying recruitment and relocation bonuses and retention allowances. You should be prepared to supply information on planned and actual expenditures upon request by OMB.

(14) *Retirement costs.* Reflect in your estimates the cost effects of changes in the distribution of employees between the Civil Service Retirement System (CSRS) and the Federal Employees' Retirement System (FERS). (See section 32.5 for retirement cost factors.)

32.3 What do I need to know about FTE budgeted levels?

(a) *Policy.*

Consistent with the general policy of making the most effective use of Government resources, each agency head will ensure close management of budgeted FTE levels for his or her agency. Agencies should not convert the work of their employees to contractors unless they first undertake cost comparisons which demonstrate that such a conversion is of financial advantage to the Government.

(b) *Determining FTE usage.*

You must prepare budget estimates relating to personnel requirements in terms of FTE employment, as specified in this Circular.

To determine FTE employment, divide the total number of regular hours (worked or to be worked) by the number of compensable hours applicable to each fiscal year. This calculation standardizes the FTE work year for purposes of setting total FTE estimates, so that the resulting FTE figure will be consistently measured by OPM's SF 113G reporting mechanism. The following list of compensable days and hours for fiscal years 2001 through 2007 should be used to compute FTE employment.

COMPENSABLE DAYS AND HOURS FOR FISCAL YEARS 2001-2007

Year	Days	Hours
2001.....	260	2,080
2002.....	261	2,088
2003.....	261	2,088
2004.....	262	2,096
2005.....	261	2,088
2006.....	260	2,080
2007.....	260	2,080

FTE employment levels apply to straight time hours only. Department of Defense indirect hire employees are not included in FTE employment totals. FTEs funded by allocations from other agencies will be included with the performing agency where the employees work and are payrolled.

Be sure to include in FTE employment estimates all Federal employees, including persons appointed under the Worker Trainee Opportunity Program, Federal Cooperative Education Program, summer aids, Stay-in-School Program, and the Federal Junior Fellowship Program. You are encouraged to participate fully in the student employment and other special employment programs and to ensure that these programs are not disproportionately reduced when agency-wide reductions are required.

The FTE estimates must take into account both seasonal variations in personnel requirements and employment trends (increasing or decreasing personnel levels) for each agency. Therefore, these levels will be related to, but not identical with, end-of-year data in the Monthly Report of Federal Civilian Employment, which is reported to OPM on the SF 113A and reflects a headcount of employees. Measure current year FTE estimates using information compiled from the SF 113G reports submitted to OPM.

(c) Justification of FTE usage.

The FTE estimates for each agency are determined at the time of the annual budget review, for the fiscal year in progress and for the succeeding fiscal year. You must ensure that the FTE estimates are consistent with all applicable laws. In particular, some statutes providing agencies with authority to use voluntary separation incentive proposals or buy-outs stipulate that agency-wide FTE levels must be reduced one-for-one for each buy-out. Further, FTE estimates must represent an effective and efficient use of resources to meet program requirements (see section 51.3).

Actual FTE usage reported in the PY column of the budget must equal the year-end FTE usage reported on the SF 113G to OPM.

Current year FTE estimates should be consistent with PY actuals, should be fully funded, and should be very close to the actual usage reported at the end of the fiscal year. For example, the 2002 estimate in the FY 2003 Budget should be very close to the 2002 actual to be published in the 2004 Budget.

(d) FTE transfers between agencies.

Prior to entering into new or expanded agreements to perform work for other agencies on a reimbursable basis, you must prepare a cost justification in accordance with OMB Circular No. A-76. As part of this agreement, you may transfer FTEs on a one-for-one basis, provided that you notify OMB prior to making such a transfer. You may proceed with the FTE transfer fifteen days after notification to OMB unless OMB objects.

(e) Adjustment requests.

Send all requests for adjustments in employment levels, including agreements to transfer FTEs between agencies, to the Director of the Office of Management and Budget.

32.4 How do I treat agency benefit payments under the Federal Employee Compensation Act?

For accounts subject to appropriations action, include in your budget year estimates the amount billed by the Employment Standards Administration of the Department of Labor for benefits paid on behalf of employees of your agency in the past year under the Federal Employee Compensation Act.

For accounts not subject to appropriations action, you must pay the bill in the current year.

32.5 How do I estimate Federal employee pension and health benefit costs?

Your estimates should reflect the pension costs for Federal employees under the Civil Service Retirement System (CSRS), the Federal Employees' Retirement System (FERS), the Foreign Service Retirement and Disability System (FSRDS), and the Central Intelligence Agency Retirement and Disability System (CIRDS), as well as active and retiree health benefit costs under the Federal Employees Health Benefits Program (FEHB). Basic pay, as used below, is defined at 5 U.S.C. 8331(3). Estimates should also reflect pension and health benefits costs of the Military and Commissioned Corps systems.

- *For CSRS*, your agency's cost is 8.51 percent of basic pay through FY 2002, except for law enforcement officers, firefighters, certain judges, congressional staff, and Members of Congress, as noted in 5 U.S.C. 8334(a). Under current law, the agency contribution rate will revert to 7.5 percent for the first quarter of FY 2003, and to seven percent thereafter. However, the Administration has proposed legislation to require agencies, beginning in FY 2003, to contribute the agency share of the full actuarial cost of retirement for CSRS employees, and you should reflect this full cost in your submission. You will need to be prepared to separately identify the increment associated with this proposal and report on what the costs in FY 2003 would be if FY 2002 contribution rates were to remain in effect. In addition, you should be prepared to provide estimates of what your FY 2002 costs would have been had the legislative proposal been in effect.

Based on the current actuarial valuations by the Board of Actuaries of the Civil Service Retirement System, your agency's cost, as a percent of basic pay, is shown in the following table. The Board periodically revises its valuations. Should this occur, the Office of Personnel Management will notify your agency.

Category of CSRS Employee	Agency Contribution Rate
Regular	17.2%
Regular offset	18.5%*
Law enforcement officers	32.5%
Law enforcement officers offset	34.9%*
Air traffic controllers	24.9%
Air traffic controllers offset	27.4%*
Members of Congress	21.3%
Members of Congress offset	25.2%*
Congressional employees	25.0%
Congressional employees offset	26.5%*

* Rate applicable up to the maximum social security wage base. Because the employee contribution increases by 6.2% for basic pay above the maximum social security wage base, there is an offsetting 6.2% reduction in the agency contribution for basic pay above that amount.

- *For FERS*, your agency's cost is comprised of the costs for the FERS basic benefit, social security, and the thrift savings plan (TSP). The FERS basic benefit is 10.7 percent of basic pay, except for law enforcement officers, firefighters, air traffic controllers, certain CIA employees, congressional employees, and Members of Congress. For these employees, use the normal cost percentage provided in the *Federal Register* of April 18, 1997, and reduce it by the employee contribution of 1.3 percent. Base your TSP estimates on your agency's actual experience, which should fall between one and five percent of the FERS basic payroll.
- *For FSRDS and CIARDS*, the Administration's legislative proposal would also require that the agency's contribution pay the agency share of the full actuarial cost of retirement for employees covered by these systems. The contribution rate for these systems will be provided in subsequent guidance.
- *For Commissioned Corps Systems*, the Administration is proposing similar legislation to cover the accruing costs of retirement and health benefits for members of the three Commissioned Corps (Coast Guard, Public Health Service, and the National Oceanic and Atmospheric Administration). The contribution rate for these systems will be provided in subsequent guidance.
- *For FEHB*, under current law, your agency pays the Government contribution for active employees while funds appropriated out of the General Fund of the Treasury pay the Government contribution for annuitants (5 U.S.C. 8906). The Administration has proposed legislation to require the FEHB program, beginning in FY 2003, to charge agencies for their portion of the Government's share of post-retirement health benefits costs. As a result, in addition to your agency's cost for current year health insurance premiums, you should include in your submission a separate and additional amount to reflect the post-retirement cost of health benefits for your current employees. Additional guidance containing the cost factors you should use to calculate the additional accrual amount will be provided separately.
- *For Uniformed Services Post-Retirement Medical Care*. Medical care for "Medicare-eligible" members or former members of the uniformed services entitled to retired or retainer pay and dependents will be funded on an accrual basis under a recently enacted law beginning in FY 2003. The Administration is proposing legislation that would extend this accrual funding to all members or former members entitled to retired or retainer pay and their dependents – not just those who are Medicare-eligible.

32.6 How do I reflect the effects of pay raises?

For the following three types of budget accounts, reflect the effects of the increased agency contribution to employee retirement and of civilian and military pay raises using the pay raise assumptions specified for these accounts in the Mid-Session Review:

- Governmental receipt accounts containing Federal employee contributions to Federal employee retirement.
- Offsetting receipt accounts (employer share, employee retirement) containing employing agency contributions to Federal employee retirement.
- General fund contributions to Federal employee retirement.

Major agencies with accounts in these categories include DOD, State, Treasury, and OPM.

32.7 How do I budget for unemployment compensation?

In general, you should not budget for the costs of unemployment compensation for former Federal civilian and military personnel. The congressional intent is that such unemployment compensation be paid from appropriations available to the employing agencies. The liable agencies must absorb these reimbursements when they are required to be paid.

If you do not employ large numbers of temporary employees or other personnel expected to lead to significant unemployment compensation claims, your estimates for the current and budget year will not contain any special provisions for the costs of reimbursing the unemployment trust fund for such payments.

If you employ large numbers of temporary employees to meet part-year workload, you may request approval from OMB to budget for unemployment compensation costs for your temporary employees. OMB will consider such requests if you can demonstrate that you have a sound administrative control system for unemployment compensation claims.

**SECTION 33 -- ESTIMATES RELATED TO SPECIFIC TYPES OF PROGRAMS AND
EXPENDITURES**

Table of Contents

Acquisition of Real Property, Construction, and Leases of Capital Assets

- 33.1 Construction and design of Federal facilities
- 33.2 Construction in flood plains
- 33.3 Construction of federally-owned housing
- 33.4 Leases of capital assets
- 33.5 Real property

Medical and Hospital Care

- 33.6 Hospital care
- 33.7 Inpatient care facilities and medical care services

Motor Vehicles and Aircraft

- 33.8 Aircraft
- 33.9 Motor vehicles

Estimates Relating to Other Types of Programs and Expenditures

- 33.10 Advisory committees and interagency groups
- 33.11 Benefit payments
- 33.12 Coastal Barrier Resources Act
- 33.13 Contractor claims
- 33.14 Credit programs
- 33.15 Foreign currencies
- 33.16 Mail
- 33.17 National security crosscut
- 33.18 Radio spectrum-dependent communications-electronics systems
- 33.19 Records storage
- 33.20 Remedial environmental projects
- 33.21 Space and related requirements
- 33.22 Systems acquisitions
- 33.23 Taxes and tax expenditures
- 33.24 Tort claims
- 33.25 Travel
- 33.26 Water and sewer payments to the District of Columbia

Summary of Changes

Requires estimates for costs associated with relocating or modifying radio spectrum-dependent communications-electronics systems (section 33.18).

33.1 Construction and design of Federal facilities.

(a) *Pollution control standards compliance.*

Prepare your estimates in accordance with Executive Order No. 12088, which requires compliance with pollution control standards.

(b) *Safe workplaces.*

In your estimates for the design and construction of Federal facilities, capital investment, and the purchase of equipment, include the amounts required to ensure that existing facilities provide safe and healthful workplaces for Federal employees consistent with the standards promulgated under section 19 of the Occupational Safety and Health Act of 1970, the provisions of Executive Order No. 12196, and the related Safety and Health Provisions for Federal Employees of the Secretary of Labor (29 CFR, Chapter XVII, Part 1960).

(c) *Structural barriers in Federal buildings.*

Prepare your estimates for the construction and renovation of Federal facilities consistent with requirements of the Architectural Barriers Act of 1968 to eliminate structural barriers impeding the mobility of individuals with disabilities.

(d) *Scientific laboratory facilities.*

If your submission proposes additional or replacement scientific laboratory facilities, you must include evidence that your agency has reviewed the GSA inventory of Federal laboratories and indicate the reasons you want to acquire new space instead of using existing laboratories that have sufficient space available, according to the GSA inventory.

33.2 Construction in flood plains.

Under Executive Order Nos. 11988 and 11990, you must develop estimates for the construction of buildings, structures, roads, or other facilities -- whether financed directly by Federal funds or through grant, loan, or mortgage insurance programs -- that are based on land utilization plans that preclude the uneconomic, hazardous, or unnecessary use of flood plains or wetlands. Indicate whether the proposed activities will be located in a flood plain or wetland and, if so, whether the activities are in accordance with the Executive Orders.

33.3 Construction of federally-owned housing.

(a) *General.*

Make sure that your estimates for construction of family housing for civilian and military personnel (either rental housing or public quarters) are consistent with the guidelines provided below. These guidelines apply to construction of family housing (including conversions of structures for dwelling purposes), both within

the continental United States and overseas, except for construction of military barracks. (OMB Circular No. A-45 provides additional guidance on standards applicable to construction of federally-owned housing.)

Do not include estimated funding for construction of housing for civilian employees, except where necessary to maintain continuity and efficiency of service. You should not include funding estimates for construction of family housing for civilian or military personnel if private capital can be found to do the financing. Unless OMB determines otherwise, you must justify your estimates for construction of housing under one or more of the following conditions:

- The construction is for *public quarters* (that is, where the law authorizes the provision of housing without charge, such as for military public quarters).
- The construction is necessary to meet *requirements for service or protection*.
- There is a *lack of available housing*.

Where seasonal demands of the agency's program or remoteness of the station would make housing and transportation costs together unreasonably high, and where such conditions jeopardize the agency's ability to maintain a qualified staff, you may submit a request for an exception to these guidelines.

(b) *Requirements for service or protection.*

You may justify construction of housing when the agency head determines that necessary service cannot be rendered, or United States property cannot be adequately protected, unless certain employees are required to live in government quarters at the station. In such cases, you must demonstrate that requirements for service or protection cannot be met if personnel are permitted to live away from the station.

(c) *Lack of available housing.*

You may justify construction of housing at remote stations, at foreign service posts, or under other circumstances when the agency head determines that necessary service cannot otherwise be rendered. You must base this determination on a supportable finding that the available supply -- present and prospective -- of government and private housing within reasonable commuting distance will not meet the necessary housing requirements. In determining the adequacy of the available supply, consider any additional private housing that can reasonably be expected to be constructed or otherwise become available.

(1) *Available housing* usually includes both housing for sale and for rent, except where rotation of personnel between stations occurs at intervals of approximately three years. In those cases, only rental housing should be considered available.

(2) *Reasonable commuting distance* is, as a general rule, a distance requiring travel time of not more than two hours per round trip by automobile or public transportation, or resulting in expenses per person of not more than \$5.00 per round trip by public transportation (except in metropolitan areas). You may make exceptions to this rule under the following conditions:

- For military necessity.

- For requirements of service or protection.

(3) *Insufficiency or inadequacy of the housing supply* can be demonstrated by showing that one or more of the following conditions exist and are likely to be of extended duration:

- Housing cannot be located through realtors or advertisement.
- Available housing is substandard by reasons of design, construction, or location.
- Because of size, it is considerably more costly than employees can afford.
- Employees subject to rotation cannot obtain leases permitting them to vacate on thirty days notice, at prevailing rental rates.

33.4 Leases of capital assets.

You must justify that leases of capital assets are preferable to direct government purchase and ownership in accordance with the policies contained in OMB Circular No. A-94.

Lease-purchases and capital leases will be scored consistent with the scorekeeping rules developed under the Budget Enforcement Act of 1990, as revised pursuant to the Balanced Budget Act of 1997 (see Appendix A). For all lease-purchases and leases of capital assets, you must have sufficient budgetary resources up-front to cover the present value of the lease payments discounted using Treasury interest rates.

For lease-purchases in which the government assumes substantial risk, report outlays over the period during which the contractor constructs, manufactures, or purchases the asset. For capital leases or lease-purchases in which the private sector retains substantial risk, report outlays over the lease period, equal to the annual payments under the lease. The explicit or implicit obligation of the Federal Government to make payments is the most important financial characteristic OMB will review to determine the level of risk involved. OMB will also consider other characteristics in evaluating the level of private sector risk in a project.

You will find detailed instructions on scoring lease-purchases and leases of capital assets in Appendix B.

33.5 Real property.

If you plan to acquire real property, you must include estimates for these acquisitions in your budget submission. The estimates should be consistent with the policies set forth by the Administrator of GSA, as provided by Executive Order No. 12512. Estimates for acquisition of real property under contract must be consistent with obligations reported in object class 32.

33.6 Hospital care.

When you develop estimates for hospital costs, use data based on the use of resources allocated by diagnosis-related groups. Compare these data with payment rates of other payers using similar groupings.

Clearly indicate whether or not capital and depreciation costs are contained. Your estimates should be accompanied by a description of the cost allocation method underlying the data.

If you provide hospital care on a reimbursable basis, you must identify the amount of reimbursement collected from third parties and Federal agencies. Base your estimates of reimbursements and other income from charges for such care on such per diem rates as may be established by the agencies specifically authorized to establish such rates for the particular class of patient and type of care involved, unless different rates or charges are established by or pursuant to a specific requirement of law.

33.7 Inpatient care facilities and medical care services.

In your estimates for capital improvement of Federal inpatient care facilities and plans for provision of major new care services, reflect the results of (or information from) review by State and appropriate area-wide agencies in accordance with Executive Order No. 12372.

33.8 Aircraft.

Reflect the policies on agency aircraft programs and the results of periodic reviews of these programs in accordance with OMB Circulars Nos. A-126 and A-76 (see sections 31.4 and 31.8).

33.9 Motor vehicles.

(a) Alternative-fueled vehicles.

Your estimates must reflect the Administration's commitment to comply with the requirements of sections 303 and 304 of the Energy Policy Act of 1992 (EP Act), which mandates that, subject to some conditions and exemptions, 75 percent of vehicles acquired by Federal agencies in FY 1999 and subsequent years should be alternative-fueled vehicles (AFVs). As specified in Executive Order No. 13149 and OMB Memorandum M-97-04, incorporate plans for acquiring AFVs in your vehicle ordering plans for the current, budget, and future years. You must report annually on compliance with sections 303 and 304 of the EP Act (see section 55).

(b) Other requirements.

Base your estimates for sedans and station wagons on the requirements of GSA's Federal Property Management Regulations and Federal Standard No. 122. Do not exceed price limitations in effect for the current year plus the estimated cost of additional systems and equipment justified to GSA, unless otherwise provided by law. Make provisions for replacement of motor vehicles and related equipment in accordance with GSA replacement standards.

33.10 Advisory committees and interagency groups.

Your estimates should reflect the results of the committee reviews required by Executive Order No. 12838, which requires agencies to reduce the number and cost of non-statutory advisory committees. The reduction required by the Executive Order and the agency advisory committee ceilings established by OMB Circular No. A-135 remain in effect. You should consider the continued reduced number and cost of advisory committees in your budget planning. Separately identify the costs of advisory committees established by statute that you are proposing for termination.

You are prohibited from financing *interagency groups* (including boards [except Federal Executive Boards],

commissions, councils, committees, and similar groups) by contributions from member agencies' appropriations by a government-wide general provision unless such financing is specifically authorized by statute. Therefore, you must propose financing for such groups in the budget in one of the following forms:

- Appropriations specifically for the interagency group.
- Specific language authorizing interagency funding.

Consider the expenses of advisory committees in your estimates using the policies and provisions contained in GSA's Interim Rule on Federal Advisory Committee Management (Federal Register, Vol. 48, No. 83, April 28, 1983, p. 19326) and any related instructions.

33.11 Benefit payments.

(a) Unemployment insurance benefits.

Calculate unemployment insurance benefits estimates consistent with the aggregate unemployment rate assumptions supplied by OMB.

(b) Medicare and Medicaid.

Base Medicare and Medicaid estimates on the Department of Health and Human Services forecasts and the latest actual information available. Assumptions on medical care prices related to the consumer price index, utilization rates, number of beneficiaries, and other factors affecting the estimates will be developed jointly by the agency and OMB.

(c) Other benefit payments.

Calculate other benefit payment program estimates (including old-age, survivors, and disability insurance; railroad retirement; civilian and uniformed services retirement; supplemental security income; and veterans' compensation, pensions, and readjustment benefits) by multiplying the expected number of beneficiaries in each future year by average benefit payments per beneficiary for each future year. Determine the average benefit payments by identifying changes in the earnings base, as applicable, on which the benefit is computed, unless existing law or Administration-supported legislation provides otherwise. When existing or proposed legislation provides for automatic cost-of-living adjustments, multiply the result by a cost-of-living or other adjustment factor to be supplied by OMB.

33.12 Coastal Barrier Resources Act.

Do not include any new Federal expenditures or financial assistance prohibited by the Coastal Barrier Resources Act (Public Law 97-348).

33.13 Contractor claims.

Include amounts for reimbursement of the Claims and judgment fund for the full amount paid from the fund on behalf of an agency for contractor claims during the past year.

33.14 Credit programs.

Prepare estimates for all direct and guaranteed lending programs in accordance with OMB requirements (see section 85, OMB Circular No. A-129 “Managing Federal Credit Programs,” and the OMB Credit Subsidy Calculator and accompanying documentation).

Guarantees of timely payment of 100 percent of loan principal and interest against all risk create the equivalent of Federal direct loans. As specified in OMB Circular No. A-129, the Federal Financing Bank (FFB) generally finances these guarantees by borrowing from the Treasury under the authority of the Federal Credit Reform Act of 1990 (FCRA). The budget treats these guarantees as direct loans. Therefore, if you propose legislation to create a new, or renew an existing, credit program that does not require substantial risk sharing, provide for direct loans rather than loan guarantees.

33.15 Foreign currencies.

Where applicable, refer to Department of Treasury and Department of State guidelines on the use of foreign currencies. Detailed instructions are set forth in the Treasury Financial Manual (chapters 3200 and 9000) and the Department of State Foreign Affairs Manual (Volume 4, Chapter 360). In addition, OMB periodically issues guidance on excess and near excess foreign currencies. You should consult with the Department of Treasury, International Trade Office, the Department of State's Office of Financial Operations, Banking and Foreign Currency staff, or your OMB representative on questions not addressed by these instructions.

33.16 Mail.

In your estimates for official use of the United States mail, package delivery, and/or private carrier service, include a sufficient amount to pay postage due, in accordance with the Postal Service regulations, vendor requirements, and GSA government-wide mail management instructions in effect at the time estimates are prepared. Take into consideration changes in program requirements. Assume maximum use of available postage discounts.

33.17 National security crosscut.

OMB requires information about programs to counter unconventional threats such as combating terrorism, weapons of mass destruction preparedness, critical infrastructure protection, and continuity of operations to conduct an interagency review process that coordinates government-wide funding and implementation of these programs. Detailed instructions about this requirement and the associated electronic reporting format have been issued and are available from your OMB representative. This information is not collected in MAX. Data on enacted funding levels are due in July; on requested levels in October; and on final levels included in the Budget in January.

33.18 Radio spectrum-dependent communications-electronics systems.

The National Defense Authorization Act of 1999 (P.L. 105-261) requires the private sector to reimburse Federal agencies for costs associated with relocating or modifying systems to make spectrum available to new commercial licensees. The Act requires you to submit cost estimates to OMB for such relocations or modifications of radio spectrum-dependent communications-electronics systems anticipated under section

113 of the National Telecommunications Information Administration Organization Act (47 U.S.C. 923). These estimates will form the basis for estimates that must be provided to the Commerce Department's National Telecommunications and Information Administration in advance of an auction of the spectrum that has been reallocated for commercial use. OMB will issue separate instructions regarding this requirement.

33.19 Records storage.

You must budget for the costs of storing and servicing your temporary and inactive records. You will reimburse the National Archives and Records Administration for these costs through individually-executed interagency memoranda of agreements. Agencies should avoid retention of duplicate and inappropriate Federal records.

33.20 Remedial environmental projects.

Prepare estimates of the cost of the design, construction, management, operation, and maintenance of remedial environmental projects at Federal facilities consistent with policies set forth in Executive Order No. 12088.

33.21 Space and related requirements.

Include payments required for space, structures and facilities, land, and building services provided by GSA and by others. In addition, provide supporting materials indicating the total amounts for these charges to be paid to GSA and the basis for distributing these amounts by appropriation to OMB if agency rental payments exceed \$5 million in PY, CY or BY (see section 54). Where you are experiencing employment reductions, plan corresponding reductions in space requirements and associated costs.

33.22 Systems acquisitions.

You should develop your estimates for acquisition of major systems, including information technology systems, consistent with guidance in the *Capital Programming Guide*, the requirements of Title V of the Federal Acquisition Streamlining Act of 1994 (FASA), and the Clinger Cohen Act of 1996 (ITMRA). Reflect the Administration's commitment to thorough capital planning to define requirements and establish realistic cost, schedule, and performance goals for new acquisitions. Where appropriate, and in accordance with Federal Acquisition Regulations, make your estimates for major information systems projects as narrow in scope and as brief in duration as practical in order to reduce risk, promote flexibility and interoperability, increase accountability, and better match mission need with current technology and market conditions. See Part 3 for reporting requirements related to FASA and the Clinger Cohen Act.

You should ensure electronic and information technology acquisitions meet the requirements of section 508 of the Rehabilitation Act of 1973, as amended and upon becoming effective to allow individuals with disabilities comparable access to and use of data as allowed individuals without disabilities, unless providing such accessibility would impose an undue burden on your agency.

33.23 Taxes and tax expenditures.

Reflect full and explicit consideration of the resources made available by the Federal Government through tax expenditures and other tax incentives. *Tax expenditures* are attributable to provisions of the Federal

income tax laws that allow a special exclusion, exemption, or deduction from gross income or that provide a special credit, rate of tax, or deferral of tax (2 U.S.C. 622). Tax expenditures include subsidies provided through the income tax system.

You must consult with the Office of Tax Analysis, Department of Treasury on all proposals for new or modifications of existing taxes whether or not the modification results in a tax expenditure (see section 34.4). After consulting with the Office of Tax Analysis submit a justification of the proposal to OMB. The justification should include the views of the Office of Tax Analysis and address the following items:

- The nature and extent of the problem addressed by the proposal.
- The reason a subsidy is needed.
- The non-tax alternatives.
- The reason a tax change is preferable to the non-tax alternatives.

In addition, you should be prepared to submit justifications for continuing or reenacting existing taxes and tax expenditures in the program areas for which you have primary responsibility. Such justifications will contain the information described above.

In general, tax expenditures are subject to the same degree of performance evaluation as spending and regulatory programs. Tax expenditures often complement or substitute for agencies' spending or regulatory programs, and the resources and incentives provided through tax expenditures can be substantial. Work with the Office of Tax Analysis, which has lead responsibility for tax policy and analysis of tax expenditures, to develop data and methods to evaluate the effects of tax expenditures that affect (or are directed at the same goals as) your programs. You should be prepared to furnish, upon request, problem analyses, estimates of economic effects, and other materials that will provide explicit quantitative information on the relationship of existing or proposed tax expenditures to proposed budget expenditures. See Part 2 for guidance on inclusion of tax expenditure data in annual performance plans.

33.24 Tort claims.

Do not include amounts for payment of tort claims in your estimates, except where a substantial volume of claims is presented regularly.

33.25 Travel.

Make every effort to minimize official travel. Use established sources for official travel, such as the General Services Administration's Travel Management Centers, negotiated hotel rates, city-pair airline contracts, etc. Reflect the allowances authorized under the Federal Travel Regulations issued by GSA or comparable regulations issued by the Department of Defense for travel of military personnel and by the Department of State for foreign service personnel. Take into account changes in prices for travel by commercial modes.

33.26 Water and sewer payments to the District of Columbia.

Include amounts for payment to the government of the District of Columbia for water and sewer services.

SECTION 34 -- PROPOSALS REQUIRING COORDINATION WITH OTHER AGENCIES

Table of Contents

- 34.1 Nuclear reactors
- 34.2 Public works in the District of Columbia and National Capital area
- 34.3 Radio spectrum-dependent communications-electronics systems
- 34.4 Tax expenditures

34.1 Nuclear reactors.

You must obtain a letter setting forth the recommendations of the Department of Energy before you submit estimates for construction of nuclear research and test reactors.

34.2 Public works in the District of Columbia and National Capital area.

(a) District of Columbia.

You must consult the Commission of Fine Arts regarding plans for the construction of buildings and other structures in the District of Columbia that may affect in any important way the appearance of the city, and other questions involving artistic considerations with which the Federal Government is concerned.

(b) National Capital area.

You must consult the National Capital Planning Commission regarding construction of public works in the National Capital area.

34.3 Radio spectrum-dependent communications-electronics systems.

You must obtain a certification by the National Telecommunications and Information Administration, Department of Commerce that the radio frequency required can be made available before you submit estimates for the development or procurement of major radio spectrum-dependent communication-electronics systems (including all systems employing space satellite techniques). (See section 33.18.)

34.4 Tax expenditures.

You must consult with the Office of Tax Analysis, Department of Treasury on all proposals for new or modifications of existing taxes whether or not the modification results in a tax expenditure (see section 33.23).

SECTION 35 -- REPORTING AND ESTIMATING

Table of Contents

Responsibilities in Reporting

- 35.1 Who reviews the status of over-expended or over-obligated accounts?
- 35.2 How do I develop past year estimates?
- 34.3 How do I develop current year estimates?
- 35.4 How do I report transfers between accounts?

Estimating Collections and Outlays

- 35.5 How do I estimate collections?
- 35.6 How do I estimate outlays?
- 35.7 Do outlay rates for presidential policy and baseline have to be consistent?

35.1 Who reviews the status of over-expended or over-obligated accounts?

The primary responsibility for reviewing the status of accounts rests with the agency managing the appropriation or fund account. The reports required by the Department of the Treasury form the basis for compiling and publishing data on *over-expended* or *over-obligated* appropriations or fund accounts resulting from agency operations that may be in violation of the Antideficiency Act (31 U.S.C. 1341). Disposition of over-expended or over-obligated amounts is the sole responsibility of the agency managing the appropriation or fund.

35.2 How do I develop past year estimates?

Obligations for the past year must have firm accounting support and be consistent with laws, regulations, and any reports made to Congress (31 U.S.C. 3512(b)(4)). Agency budget officers must ensure that offsetting collections, appropriations, transfers, outlays, and balances agree with the corresponding amounts reported in the final SF 133 Report on Budget Execution and Budgetary Resources and to the Department of the Treasury on the FMS 2108 Year-end Closing Statement (one of the primary sources for the Treasury Annual Report).

Agency budget and accounting offices should review and reconcile differences in data, to the extent possible, prior to reporting year-end data to the Department of the Treasury and to OMB and should pay particular attention to resolving differences in past year outlays and receipts. (Sections 82.18 through 82.20 contain requirements related to reporting past year amounts in the program and financing schedule.)

Past year FTE data must be consistent with data reported to the Office of Personnel Management (OPM). Actual FTE usage reported in the past year column of the budget should equal year-end FTE usage reported on the SF 113G to OPM (see section 32.3).

35.3 How do I develop current year estimates?

You should estimate the current year's transactions as accurately as possible within the limits of funds presently available or expected to become available during the year.

35.4 How do I report transfers between accounts?

Section 20.4 describes the various types of transfers between accounts. Responsibilities of the paying or administering agency and the receiving agencies or accounts for estimating and reporting charges and credits between accounts are discussed below.

(a) *Where allocations are used.*

The agency administering the parent account will compile and submit all necessary material, obtaining whatever information it needs for this purpose from the receiving agencies except FTEs funded by allocations will be reported in the receiving account (see sections 71.5, 82.16, 83.15, and 86.1).

(b) *Where payments are made to other appropriations, to revolving funds, to management funds, and to trust funds (expenditure transfers).*

The paying agency will include obligations in the amount of the payment in its schedules. The receiving agency will report such amounts as spending authority from offsetting collections.

(c) *Adjustments of appropriations and balances (non-expenditure transfers).*

Where there are authorized transfers between accounts that represent adjustments in the amounts appropriated or in balances previously appropriated, both the paying and receiving agencies are responsible for ensuring that the amounts are identical in the schedules of both the losing and gaining accounts.

35.5 How do I estimate collections?

Make your estimates of collections consistent with economic assumptions provided by OMB. Include amounts to be received under proposed legislation, separately identified, as well as under existing legislation. Base your estimates of collections resulting from charges for government services and property on the policies included in OMB Circulars No. A-25, A-45, and A-130, as applicable.

For *offsetting and governmental receipts*, report amounts that include all collections credited to your receipt accounts and exclude collections credited to receipt accounts of other agencies (except amounts credited to certain Treasury Department accounts, as explained in section 58.1). Report receipts on the basis of collections credited to receipt accounts during the year, plus or minus adjustments. For indefinite appropriations of receipts, be sure that the budget authority estimate equals the amount of estimated collections, except where amounts are precluded from obligation by provisions of law, such as a limitation on obligations or a benefit formula.

Report amounts for investment receipt accounts in accordance with the instructions in section 20.12. Report earned discounts, sales premiums, and purchase premiums to the interest receipt account (usually, suffix .20).

35.6 How do I estimate outlays?

You have primary responsibility for accurate outlay estimation. Take full account of time lags between the incurring of obligations and the receipt of, and payment for, goods and services. Take into consideration the viability of obligations (that is, the likelihood that unliquidated obligations will have to be paid) and make realistic estimates of outlays. Outlays are directly involved in determining the size of the surplus or deficit

and thus in determining overall budget policy. Further, outlay estimation has taken on increasing importance under the Budget Enforcement Act. Outlay estimates should represent the best estimate for a given level of program activity.

Your methods for estimating outlays should be consistent with the policies and guidance contained in OMB Circular No. A-34.

35.7 Do outlay rates for presidential policy and baseline have to be consistent?

Outlay rates (i.e., the amount of outlays from new budgetary resources made available in that year compared to the amount of such new budgetary resources, expressed as a percentage) for presidential policy and baseline estimates should be generally consistent for each budget account. Outlays from prior year balances for presidential policy and baseline estimates should be the same, except where policy proposals restrict or accelerate spending from balances.

If outlay rates differ between presidential policy and baseline estimates (e.g., due to a shift in programs within an account), be prepared to explain the differences.

SECTION 36-- COMMUNICATIONS WITH CONGRESS AND THE PUBLIC AND CLEARANCE REQUIREMENTS

Table of Contents

- 36.1 Confidentiality of budget deliberations
- 36.2 Congressional testimony and communications
- 36.3 Clearance of materials for Congress and the media
- 36.4 Clearance of changes to the President's budget
- 36.5 Information available to the public

36.1 Confidentiality of budget deliberations.

The nature and amounts of the President's decisions and the underlying materials are confidential. Do not release them outside of your agency until the budget is transmitted to Congress. Presidential decisions on current and budget year estimates (other than forecasts of items that will be transmitted formally later), both in total and in detail, become the "proposed appropriations" as that term is used in the Budget and Accounting Act of 1921, as amended, and must be justified by your agency. Do not release agency justifications provided to OMB and any agency future year plans or long-range estimates to anyone outside the executive branch, except in accordance with this section.

36.2 Congressional testimony and communications.

The Executive Branch communications that led to the President's budget decisions will not be disclosed either by the agencies or by those who have prepared the budget. In addition, agency justifications provided to OMB and any agency future year plans or long-range estimates will not be furnished to anyone outside the executive branch, except in accordance with this section.

When furnishing information on appropriations and budgetary matters, you (and your agency representatives) should be aware of the following limitation on communications:

"... An officer or employee of an agency may submit to Congress or a committee of Congress an appropriations estimate or request, a request for an increase in that estimate or request, or a recommendation on meeting the financial needs of the government only when requested by either House of Congress." (31 U.S.C. 1108)

You should also be aware of restrictions on communications to influence legislation that are not conducted through proper official channels (18 U.S.C. 1913).

After formal transmittal of the budget, an amendment, or a supplemental appropriation request, the following policies apply when testifying before any congressional committee or communicating with Members of Congress:

- Witnesses will give frank and complete answers to all questions.

- Witnesses will avoid volunteering personal opinions that reflect positions inconsistent with the President's program or appropriation request.
- If statutory provisions exist for the direct submission of the agency budget request to Congress, OMB may provide you additional materials supporting the President's budget request that you will forward to Congress with the agency testimony. Witnesses will be prepared to explain the agency submission, the request in the President's budget, and any justification material.
- When responding to specific questions on program and appropriations requests, witnesses will not provide the agency request to OMB or plans for the use of appropriations that exceed the President's request. Typically, witnesses are responsible for one or a few programs, whereas the President is responsible for all the needs of the Federal Government given the revenues available. Where appropriate, witnesses should explain this difference in perspective and that it is therefore not appropriate for them to support appropriations above the President's request.
- When asked to provide a written response that involves a statement of opinion on program and appropriations requests, witnesses will provide a reply through the agency head.
- Do not let your communications be perceived as an "appropriations estimate or request ... or an increase in that estimate or request" (31 U.S.C. 1108). You are expected to support the President's budgetary decisions and seek adjustments to those decisions only through established procedures if your agency head determines such action is necessary.

36.3 Clearance of materials for Congress and the media.

Policy consistency between the President's budget and the budget-related materials prepared for Congress and the media is essential. To ensure this consistency, you are required to submit budget-related materials to OMB for clearance prior to transmittal to congressional committees or individual Members of Congress or their staff. Unless a specific exemption is approved by OMB, materials subject to OMB clearance include:

- All budget justifications and budget-related oversight materials;
- Testimony before and letters to congressional committees;
- Written responses to congressional inquiries or other materials for record;
- Materials responding to committee and subcommittee reporting requirements;
- Capability statements;
- Appeals letters;
- Reprogramming requests;
- Related cost information;

- Financial management documents addressing budget and policy issues (e.g., some accountability reports or transmittal documents for audited financial statements); and
- Proposed press releases relating to the President's budget.

Provide this information to OMB five working days in advance to allow adequate review time. OMB review of reprogramming requests may take longer in some circumstances (e.g., if the request has not been coordinated or if supporting materials have not been provided concurrently). In exceptional circumstances, where the response time is very short, agencies may request oral clearance or make other arrangements for expedited review. Immediately after the budget transmittal and after subsequent transmittals, provide OMB with a schedule of anticipated congressional reviews that require agency oral and written participation. Revise this schedule as appropriate.

Address any questions you have about this subsection to the OMB representatives who you normally consult on budget-related matters.

36.4 Clearance of changes to the President's budget.

If you want to propose changes to the President's budget (e.g., appropriations language, limitations, business-type statements required by the Government Corporation Control Act, and dollar amounts), you must follow the confidentiality and clearance guidance provided in this section and submit a written request as described in section 110. OMB will notify you whether a formal transmittal of the change will be made.

When it is possible to reduce the amount of an appropriations request before action has been taken by the Appropriations Committee of either House, the head of your agency should inform OMB promptly. Before your agency head decides to request restoration of a reduction, the reasons for the reduction, the circumstances under which it was made, and its significance to the President's program should be carefully considered.

36.5 Information available to the public.

Many agency budget documents that are subject to the Freedom of Information Act (FOIA) are exempt from mandatory release pursuant to 5 U.S.C. 552(b)(5). Depending on the nature of the record requested, other FOIA exemptions may apply. When deciding whether to withhold a budget document that is exempt from mandatory release, follow the FOIA memoranda issued by the President and the Attorney General on October 4, 1993, which establish a presumption in favor of disclosure. Whether a document concerns a future, current, or past fiscal year is a significant factor in deciding whether it should be withheld under FOIA Exemption 5; the release of budget or current year information is more likely to harm the budget process than release of previous fiscal year information. Agency heads are responsible for determining the propriety of record releases under FOIA.

Certain agencies headed by a collegial body may be required to hold their meetings open to public observation unless the agency properly determines that the matter to be discussed warrants the closing of those meetings for reasons enumerated in the Government in the Sunshine Act (Public Law 94-409). Some meetings covered by that Act may pertain to budgetary information discussed in this Circular. Although, as with the FOIA, it is not possible to determine merely by the generic category of such information whether

**SECTION 36 -- COMMUNICATIONS WITH CONGRESS AND
THE PUBLIC AND CLEARANCE REQUIREMENTS**

such an agency would be authorized to close a particular meeting covered by the Government in the Sunshine Act, the premature disclosure of budgetary information may “be likely to significantly frustrate implementation of a proposed agency action” (5 U.S.C. 552b(c)(9)(B)). Furthermore, other exemptions from the open meeting requirements of the Act may apply. Such agencies are responsible for the propriety of determinations that would lead to the disclosure of this budgetary information.

SECTION 50 -- OVERVIEW OF REQUIREMENTS FOR THE INITIAL SUBMISSION

Table of Contents

- 50.1 What materials do I include in the initial submission?
- 50.2 When do I submit these materials?

50.1 What materials do I include in the initial submission?

The term *initial submission* refers to the budget justification and other materials you normally submit to OMB in September, at the beginning of the OMB/Presidential decision-making process. Sections 51 through 58 describe the information you must provide as part of the initial submission, as well as other materials that are not technically part of the initial submission but are due before passback.

The initial submission consists of the following:

- Basic justification materials (section 51).
- Information on financial management (section 52).
- Reports on information technology investments (section 53).
- Information on rental payments for space and land (section 54).
- Information on energy use, costs, and efficiency (section 55).
- Information on drug control programs (section 56).
- Information on erroneous payments (section 57).
- Information on receipts estimates (section 58.1).
- Information on Inspectors General for designated Federal entities (section 58.2).
- Justifications of unobligated balances in liquidating accounts (section 58.3).
- Initial annual performance plan (Part 2).
- Capital asset plan (Part 3).

Section 27.2 summarizes these requirements and indicates who must provide them.

50.2 When do I submit these materials?

Executive branch agencies subject to executive branch review (section 25.1) and the District of Columbia must provide their budget justifications and other initial submission materials to OMB by September 10th. Agencies not subject to executive branch review do not make initial submissions.

SECTION 51 -- BASIC JUSTIFICATION MATERIALS

Table of Contents

- 51.1 Summary and highlight statement
- 51.2 General requirements for justifying programs and financing
- 51.3 Analysis of resources
- 51.4 Relationship of justification to account structure
- 51.5 Agency restructuring or work process redesign
- 51.6 Information on grant programs and infrastructure investment
- 51.7 Performance indicators and performance goals
- 51.8 Other analytical information
- 51.9 Information on program evaluation
- 51.10 Explanations relating to supplemental appropriations requests

Ex-51 Relationship of Programs to Account Structure

Summary of Changes

Requires the summary and highlight statement to relate policies, strategies, and resources requested to the President's management plan and to address outcomes and related outputs listed in OMB spring guidance memoranda (section 51.1).

Requires certain agencies to provide integrated budget and performance information for outcomes and related outputs listed in OMB spring guidance memoranda (section 51.7)

51.1 Summary and highlight statement.*(a) Required information.*

You must prepare a summary and highlight statement (in the form of a transmittal letter from the head of the agency) that covers the budget submission of your agency. Summarize in this narrative the highlights of your agency's budget and related major legislative proposals. Identify the following:

- The broad policies and strategies proposed and the total amounts of discretionary and mandatory budgetary resources and FTE requested.
- The relationship of the policies, strategies, and resources requested to the implementation of the President's Management Plan, including a summary of the specific organizational changes the agency is proposing to:
 - ▶ Reduce the number of managers;
 - ▶ Reduce organizational layers;
 - ▶ Reduce the time it takes to make decisions;

- ▶ Increase span of control;
 - ▶ Redirect positions within the agency to ensure that the largest number of employees possible are in direct service delivery positions that interact with citizens; and
 - ▶ Retrain and/or redeploy employees as part of restructuring efforts.
- The relationship of the policies, strategies, and resources requested to the planning guidance for budgetary resources and for FTE provided by OMB.
 - Significant proposed differences, if any, from current Administration policies.
 - The most important program performance indicators and performance goals, including those that are positive and negative with respect to performance and that are the basis for the major proposed policies. If OMB's spring guidance memorandum listed outcomes and related outputs for your agency, the letter should address them (see section 51.7).
 - The major management initiatives that will be used to monitor and evaluate program efficiency and effectiveness.
 - Any significant proposals for changes in the current year budget, and the relationship of such changes to the budget year and outyear requests.
 - Any significant proposals or changes in spending patterns for the five to ten year period beyond the budget year, and their relationship to outyear planning guidance and the policies proposed for the current and budget year.

You must also include a listing of the budget authority and outlays and FTE requested through BY+4. Itemize this list by account showing proposed supplementals, pending supplementals, rescission proposals, and legislative proposals separately. Deduct offsetting receipts to arrive at the net amount of the agency request. In addition, include an analysis of outlay estimates reflected in your agency budget request, with the form and level of detail to be determined in consultation with the OMB representative.

Refer to sections 30 through 35 for general information and policies related to developing estimates and proposals and responsibilities in reporting data. Remember that development of your budget request and annual performance plan should be coordinated. (See section 220.8 of Part 2 of this Circular.)

(b) Certification of obligations.

31 U.S.C. 1108(c) requires the head of each Federal agency, in connection with submission of all requests for proposed appropriations to OMB, to certify that any statement of obligations furnished consists of valid obligations, as defined in 31 U.S.C. 1501(a). The certification may be in the form of the following paragraph:

"As required by section 1108(c) of Title 31, United States Code, I am reporting that all statements of obligations furnished to the Office of Management and Budget in connection with the [name of agency] requests for proposed appropriations for the fiscal year 20[BY] consist of valid obligations as defined in section 1501(a) of that title."

You must furnish this certification no later than November 20th. You may include it in the summary and highlight statement or transmit it separately at a later date.

51.2 General requirements for justifying programs and financing.

You must provide a written justification for each budget submission. You should determine specific informational requirements and formats in consultation with your OMB representative. You should reach agreement with your OMB representative on the form and specific content of the budget submission in the spring and summer preceding the budget submission.

Your request should be consistent with the funding levels included in policy guidance. If the request is not consistent with policy guidance, you must provide a summary display of what your budget request would be at the policy guidance levels and the reasons why a budget request consistent with the guidance is not appropriate. In addition, you may be asked by your OMB representative to identify and discuss the implications of other funding levels.

Prepare your justification in concise, specific terms and cover all programs and activities of your agency. Use tables, charts, and graphs in lieu of or to supplement text. Prepare materials in a manner designed to provide all of the information that the you and OMB have agreed is necessary for OMB to understand and evaluate your agency's request and make its determinations.

You must identify the anticipated price level changes reflected in the financial resources required to finance each program level in your justification materials.

If you have funding requests for major capital asset acquisitions, follow the guidance in Part 3 of this Circular. Additional guidance appears in the *Capital Programming Guide*, which is published separately.

You are required to provide the following with the justification materials:

- An analysis of resources (see section 51.3).
- Information on the relationship of the justification material to account structure (see section 51.4).
- Information on agency restructuring activities (see section 51.5).
- Information on grant programs and infrastructure investment (see section 51.6).
- Information on performance indicators and performance goals (see section 51.7).
- Information on program evaluation (see section 51.9).

At the discretion of OMB, you should include the following information for legislative proposals:

- Your estimates of the costs of implementing or administering proposed legislation.
- The assumptions underlying your estimates, including new work years, program outputs, and costs of inputs such as materials, contract costs or personnel costs. You should also include a discussion of alternative implementation strategies considered (e.g., contracting out versus in-house), and a discussion of any models used to develop your estimates.
- The budget category for the cost of implementation and administration of the legislative proposal along with a written justification for your selection.

- Productivity savings and/or offsets for these costs. You should also provide a discussion of the methods and assumptions underlying your estimates for productivity savings and offsets.

You should also include the following:

- A comparison of total program benefits and total program costs, using quantitative, objective data to the maximum extent possible, as well as qualitative or judgmental material.
- A comparison of the marginal benefits and the marginal costs associated with the additional funds or reduced funding proposed.
- Supporting information that takes into account agency and outside (e.g., think tanks, GAO, CBO, universities, interest groups) program evaluations and related analytic studies, whether or not they agree with the proposed policy.

At the discretion of your OMB representative, these requirements may be modified or alternative justification materials specified. It should be emphasized that late decisions on proposed law provisions for the budget will require flexibility in this process. Other materials also may be requested by your OMB representative.

51.3 Analysis of resources.

Use a tabular presentation to identify the financial and personnel resources required at the program levels under consideration.

Present resources required for PY and CY, as well as the estimated requirements for each funding option for BY through BY+4. If current year rescissions, deferrals, or supplementals are pending or proposed, identify these separately. A subsidiary breakdown of such items as personnel compensation, capital outlay, or other categories of special concern would be useful.

Generally, present financial data in terms of new budget authority and outlays. However, your OMB representative may require additional measures, such as unobligated balances and offsetting collections.

Express personnel requirements in terms of full-time equivalents (see section 32.1). You must demonstrate that requests for FTE levels:

- Are an effective and efficient use of resources to meet program requirements;
- Are consistent with Administration policy;
- Are consistent with proposed funding levels;
- Can be justified in conjunction with requests for other resources;
- Comply with applicable laws (e.g., buyout offset requirements); and
- Are realistic in light of past, actual FTE usage.

Fully justify changes to the FTE levels in any year in terms of program management requirements. If you request an increase, prepare an analysis of agency-wide FTE that fully documents why FTE cannot be moved from another function to meet the identified need.

Describe budgetary resources and FTE requests in the context of your management plan for the programs and activities. Explain the analysis used to determine the resources needed to accomplish program and

Administration goals, and demonstrate that all opportunities for making more efficient and effective use of resources have been explored.

51.4 Relationship of justification to account structure.

Where the major programs in your justification materials do not coincide with the budget account structure, prepare a table to show the relationship. Arrange this table by program, with all relevant accounts and parts of accounts listed, showing budgetary resources (usually budget authority and outlays) in millions of dollars and FTE. Report programs that are mainly grants, contracts or other transfers of funds to entities other than your agency, related salaries and expenses accounts and parts of accounts, including allocations of overhead amounts. Use the format illustrated in exhibit 51 unless an alternate format is agreed upon by you and your OMB representative. Where it is helpful to explain the coverage of the table or the relationship among accounts, prepare a short narrative to accompany the table. This requirement only applies to major programs and activities. You should consult your OMB representative to ensure that you provide tables for appropriate activities and that you avoid unnecessary paperwork.

51.5 Agency restructuring or work process redesign.

You should identify restructuring or process reengineering activities resulting from proposed and current investments in information technology that yield budgetary savings. Indicate how these activities allow your agency to utilize existing resources better while improving program management and service delivery.

51.6 Information on grant programs and infrastructure investment.

Include copies of systematic economic analyses of expected benefits and costs completed in accordance with Executive Order 12893. OMB Bulletin No. 94-16 provides additional guidance on this Executive Order, including a listing of the accounts covered by the Order.

51.7 Performance indicators and performance goals.

Your annual performance plan includes the performance goals and indicators for the fiscal year covered by your budget justification (see section 220 of Part 2 of this Circular). Cabinet departments and selected major agencies have received spring guidance memoranda from OMB that include a list of several outcomes with related outputs. In their initial FY 2003 performance plan, these departments and agencies should provide integrated budget and performance information for the listed outcomes and outputs in sufficient detail to allow OMB to pass back both budget and performance levels. In addition, you may include in your budget justification additional relevant performance information to explain major program issues or resource requirements. Any additional performance information that you include in your justification materials must be consistent with the performance information in your agency's annual performance plan.

In addition, if you prepare annual financial statements, you should confirm, for the budget year, continuing use of the program performance indicators used in previous years' statements, and identify any new indicators you plan to use in these statements.

51.8 Other analytical information.

Additional information may be required in budget justifications on the following:

- Workload analyses.
- Unit costs.
- Productivity trends.
- Impact of capital investment proposals on productivity.

Use productivity measurement, unit costs, and organizational performance standards to the maximum extent possible in justifying staffing and other requirements.

Include as a specific element in productivity improvement for activities of Federal staff the gains planned or being realized from streamlining, including reduction of unnecessary overhead, creative use of technology, and elimination of low priority tasks and programs.

You should also be prepared to provide information on the basis for distributing funds (e.g., formulas or principles for allocation, matching, policies regarding the awarding of loans, grants or contracts, etc.) and data on resulting geographic distribution (e.g., by State, etc.), with identification of any issues.

51.9 Information on program evaluation.

Program evaluation is an important aspect of program planning and monitoring, assessing program results, and determining future funding levels. A program evaluation schedule, including the evaluation methodology to be used and the issues to be addressed, is included in your strategic plan. Changes to this schedule are included in an interim adjustment to your strategic plan. The interim adjustments to your strategic plan are appended to your annual performance plan. You should consult with your OMB representative as you develop your multi-year evaluation plans and agenda. (See section 210.11 on program evaluation in strategic plans, and section 220.5(f) on program evaluations as part of an interim adjustment to a strategic plan.) Your annual program performance report includes a summary of any program evaluations completed during the past fiscal year (see section 232.2(a)).

51.10 Explanations relating to supplemental appropriations requests.

When you forecast the need for a program supplemental appropriation (see section 30.2), you must prepare justification material in accordance with this section. Provide information indicating why the request was not included in the regular estimates for the period concerned and the reasons why it is considered essential that the additional appropriation be granted during the year. Submit proposals for offsets to be made elsewhere in your agency for both mandatory and discretionary resources along with your requests for supplementals, and indicate related FTE savings or requirements and appropriate financing changes. If the estimate is approved for later transmittal (rather than in the budget), you will be required to submit further justification of the supplemental estimate to OMB (see section 110). Show the effect of requested supplementals in the appropriate portions of the justification material for the program elements affected.

DEPARTMENT OF GOVERNMENT (in millions of dollars)		
Program by Bureau and Account	BY Estimate	
	BA	Outlays
<p>For the account ID, use the 2-digit Treasury agency code and 4-digit account symbol, transmittal code, fund type and subfunction code (see section 79).</p> <p>Budget request for the program.</p>		
BUREAU OF HOSPITAL CARE		
Mental health (16-2361-0-1-531):

Total, Salaries and expenses.....	3	3

These amounts represent the budget request for the account and the estimated outlays.

SECTION 52 -- INFORMATION ON FINANCIAL MANAGEMENT

Table of Contents

- 52.1 What are the general reporting requirements?
- 52.2 What other reporting requirements does this fulfill?
- 52.3 Who must report financial management information and when is it due?
- 52.4 What materials are required in the budget justification and why?
- 52.5 What is the report on resources for financial management activities (exhibit 52) and why must I submit it?
- 52.6 What are the line descriptions and coding for exhibit 52?
- 52.7 How do I check my exhibit 52 data for consistency?
- 52.8 How do I submit exhibit 52 and when is it due?

Ex-52 Report on Resources for Financial Management Activities

Summary of Changes

Provides specific guidance on materials requested for grants management and reminds agencies to include grants management systems in their agency information technology investment portfolio (section 52.4).

Requires agencies to include information on financial management performance measures and a discussion of the audit quality of non-Federal audits in their initial submission (section 52.4).

Requires agencies to report obligations for the prior year (section 52.6).

Adds new reporting categories for contractor accounting and reporting and organization-wide financial statements (section 52.6).

52.1 What are the general reporting requirements?

You are required to provide two reports on financial management:

- Financial management budget justification materials (including agency financial management plans); and
- Report on resources for financial management activities (exhibit 52).

52.2 What other reporting requirements does this fulfill?

For the twenty-four agencies covered by the Chief Financial Officers Act of 1990 (CFO), the materials required in this section fulfill the following requirements:

- The Chief Financial Officers Act of 1990: Each agency CFO must prepare a financial management plan to implement the Government-wide financial management five-year plan.

- The Federal Financial Management Improvement Act of 1996 (FFMIA): Requires each agency head to determine **substantial** compliance with the Act. When a determination is made of non-compliance to the Act, the agency is required to submit a remediation plan with the agency's budget justifications materials. The FFMIA requires OMB to include information about remediation plans in the annual report to the Congress.
- OMB Circular A-127, Financial Management Systems: Each agency is required to develop, prepare, and maintain financial management systems plans. Guidance for the financial management systems plans are provided by the OMB Circular A-11 annually. Information in the financial management systems plans requires verification for consistency against the resource management plans submitted to OMB required under Circular No. A-130.

The FFMIA mandates that agencies implement and maintain financial management systems that comply substantially with Federal financial management systems requirements, applicable Federal accounting standards, and the Standard General Ledger (SGL) at the transaction level. When your agency head determines that the agency's financial management systems do not comply with FFMIA, the Act requires the agency to submit a remediation plan with your agency's budget justification materials. The remediation plan identifies how the agency intends to bring the agency's financial management systems into substantial compliance with FFMIA. The plan described in this section fulfills this requirement.

52.3 Who must report financial management information and when is it due?

CFO Agencies. All CFO agencies must submit the materials prescribed by section 52.4. Materials are due with your initial submission. Section 205 of P.L. 101-576, the Chief Financial Officers Act of 1990, states that the CFO of an agency is responsible for preparing and revising the agency's financial management plan and developing the agency's financial management budget.

Non-CFO Agencies: Non-CFO agencies must include a brief summary of their financial management plans in their initial budget submission to ensure sound financial management practices.

52.4 What materials are required in the budget justification and why?

Budget justifications should include results-oriented information on financial management operations and improvement initiatives in the context of the agency's mission and programs. This discussion should include plans for financial management throughout your agency and financial management performance measures related to financial management activities, as well as, financial performance of the agency. The information presented should represent an integrated discussion of financial management planning and associated resources. In addition, include information on what the agency is doing to ensure audit quality of non-Federal audits. (Selected information on financial management resources for agencies covered by the CFO Act of 1990 is required by Sections 52.5 and 53).

The content of your budget justification should be consistent with the Government-wide strategies and initiatives discussed in the most recent Federal Financial Management Report (see CFO Annual Report, 2000) issued jointly by OMB and the CFO Council; agency performance plans (e.g., GPRA); business plans; information technology plans, and/or agency capital asset plans. To be consistent with the CFO Council's proposal to streamline reporting, agencies may want to discuss with their OMB representatives how to integrate financial management planning and performance information into their budget justifications.

Provide the following information in your budget justification materials:

(a) *Goals and strategies.* Briefly discuss how you will achieve the goals and strategies for implementing Government-wide financial management improvements that are associated with the 2000 Federal Financial Management Report. Include plans to achieve substantial compliance with the FFMIA (remediation plans). The discussion should focus on the goals and strategies that you determine to be priorities and should include examples of ongoing and proposed initiatives. Include sufficient, not detailed, information on the status of financial management activities to provide a context for your plans and resources request. Agency accountability reports and/or the GPRA performance reports should contain a detailed status on financial management activities. Agencies may want to cite references to other pertinent documents or sources.

(b) *Audited financial statements.* All CFO Act agencies must briefly discuss any impediments to the submission of unqualified and timely annual audited financial statements and plans to overcome the impediments.

(c) *Financial management systems structure.* Present an overview of your current and targeted financial management systems structure and plans for moving to your targeted systems structure. The scope of the financial management systems discussion should cover, at a minimum:

- Core financial management systems, as described in the JFMIP Core Financial Management Systems Requirements Document; and
- Financial and mixed systems critical to effective agency-wide financial management, financial reporting, or financial control (see section 53.2).

The financial systems discussion should include the following information:

- A brief description of baseline financial and mixed systems, including a narrative assessment of major problems with current systems (e.g., audit findings which indicate substantial non-compliance with the FFMIA or other material problems). Agencies should also prepare an updated financial systems inventory of the systems described above. (Guidance and instructions for the systems inventory update will be distributed to Deputy CFOs through a separate memorandum.) This inventory should be consistent with systems included in the information technology exhibit (exhibit 53).
- A brief description of the target structure for financial and mixed systems, including a discussion of the agency's financial management systems strategy.
- A synopsis of critical projects that you are currently undertaking or planning to accomplish with the target structure above. If your agency is not in compliance with the FFMIA, remediation activities planned and underway should be prominently identified as such. You must include, either in this synopsis or by referencing other documents or budget exhibits, the resources, remedies, interim target dates, and officials responsible for bringing your systems into substantial compliance with the FFMIA. The target date for systems compliance must be within three years of the date from which your system was determined not in substantial compliance.

(d) *Grants management.* Present a discussion of how your agency ensures policy consistency across grant programs. This should include not only implementation of OMB Circulars and other government-wide requirements but also how program-specific requirements (e.g., application forms, financial reports, and award conditions) are reviewed to ensure consistent treatment of grantees. Also provide a discussion of how your agency works to coordinate these policies with other agencies that administer grant programs. Your discussion should specifically address the following:

- Identify the five largest grant programs administered by your agency (based on total dollars awarded) and explain how agency-wide grant administration policy is implemented at the program level.
- Provide recommendations for changes in law to improve the effectiveness, performance, coordination, and accountability of Federal financial assistance programs. These recommendations should focus on changes to program-specific statutes, such as those that authorize a program or appropriate its funding.
- Describe efforts to ensure quality of audits performed by non-Federal auditors in accordance with the Single Audit Act Amendments of 1996 and OMB Circular A-133. Information should be included for the prior, current, and budget years, addressing the number of audit quality control reviews, FTE for audit quality efforts, results of the audit quality efforts, actions taken or planned to improve quality of non-Federal audits, and other relevant information to assess your agency's reliance on audits under Circular A-133 in grant management.
- Identify efforts of planning, development, enhancement, or implementation of an agency system that will either be a discrete grants management system or be part of an agency's financial management or program system. Over the course of the next few years, agencies that are working under the streamlining activities of P.L. 106-107 need to consider identifying and highlighting grants management system development and implementation. In doing so, agencies need to consider the business implications of a grants system upon daily operations.

Agencies that are planning, developing, enhancing, or implementing a grants management system, or portion thereof, need to include the system, when necessary, in the agency's information technology (IT) portfolio (see Section 53). Agencies should highlight any grants systems initiatives as defined by Section 53. To highlight a system that is not defined as major/critical, agencies should consider identifying the grants system as "significant" or "small/other" (see Section 53).

52.5 What is the report on resources for financial management activities (exhibit 52) and why must I submit it?

Each agency covered by the CFOs Act must report budget authority and full-time equivalent (FTE) employment data for CY and BY for each of the following categories of financial management activities:

- Asset management;
- Accounting and reporting;
- Audits of financial statements; and
- Financial management systems.

In addition, in-house and contract data are required on the audits of financial statements. Resources for both the CFO organization and other agency components that are involved in financial management activities should be included, but without separate identification. This report is necessary for the oversight and review of agency resources devoted to these activities. The information also assists OMB in preparing the Government-wide five-year financial management plan, as required by the CFOs Act. This information is reviewed and discussed in connection with other agencies' financial management submissions.

52.6 What are the line descriptions and coding for exhibit 52?

Report budget authority and obligations in millions of dollars and FTE employment data for the entries described below. Enter obligations data for prior year (PY) only. Enter budget authority data for current year (CY) and budget year (BY). Resource estimates for financial management systems should be consistent with information technology data submitted in exhibit 53 and capital asset plans provided in exhibit 300. Resource information not based on other requirements of this Circular or on other easily-identifiable information should represent the agency's best estimate of salaries, contracts, or other major expenses to be reported. Allocation of overhead expenses is not required.

REPORT ON RESOURCES FOR FINANCIAL MANAGEMENT ACTIVITIES

Entry		Description
Line coding		Use the first three digits of the line number to identify the financial management activities to be reported (e.g., asset management); and the fourth digit to distinguish FTE (e.g., 1001) from obligation and budget authority (e.g., 1002) data.
100x	Asset management	Include in-house resources for administrative expenses for credit program accounts under credit reform (i.e., amounts requested as a separate appropriation for administrative expenses in credit program accounts); resources devoted to debt collection for non-credit receivables; resources devoted to cash management; and resources devoted to property and inventory management and control.
200x	Accounting and reporting	Include resources for processing, recording, and reporting of revenues, receipts, appropriations, apportionments, allotments, obligations, outlays, expenditures, assets, liabilities, and other financial transactions; reconciliation of asset and liability accounts, such as accounts or loans receivable, with subsidiary records and with external data, such as Treasury cash records; funds control; and preparation of financial statements.
2102	Contractor Accounting and Reporting	Include resources for contracts to perform accounting and reporting activities. <i>Report PY obligations and budget authority only.</i>
300x	Audits of financial statements	Include resources for performing audits of financial statements, with separate identification for contract and in-house costs, as detailed in exhibit 52. Do not include resources for preparation of financial statements.
400x	Financial management systems	Include resources for financial management systems, which consist of financial systems and financial portions of mixed systems necessary to

SECTION 52 – INFORMATION ON FINANCIAL MANAGEMENT

Entry		Description
		support financial management. (See definitions of financial management systems in section 53.2.) Include in this category grants management systems as either a financial or mixed system (see Section 53.2). Data reported should be consistent with information reported as the estimated percentage of total system BA associated with financial components in exhibit 53.
500x	Subtotal	The sum of corresponding amounts reported on lines 100x through 400x.
600x	Adjustments (-)	Include adjustments to eliminate double counting (a minus entry). For example, costs for a loan system reported under the "asset management" category may also be reported under the "financial management systems" category. A list of the adjustments should be prepared, reviewed by the agency CFO, and provided as hard copy to OMB when requested.
700x	Total, net	Equals the total of corresponding amounts on lines 500x and 600x.
8102	Audits of financial statements, contract costs	Include resources for contracts to perform audits of financial statements. <i>Report PY obligations and budget authority only.</i>
820x	Audits of financial statements, in-house costs	Include resources to perform audits of financial statements in-house.
9102	Organization-wide financial statements, contract costs	Include resources for contracts to perform organization-wide audits of financial statements. <i>Report PY obligations and budget authority only.</i>
920x	Organization-wide financial statements, in-house costs	Include resources for performing organization-wide audits of financial statements in-house.
940x	Total, all reporting entities	For total FTE (line 9401), report the sum of lines 8201 and 9201. This total must be equal to line 3001. For total budget authority (line 9402), report the sum of lines 8102, 8202, 9102, and 9202. This total must equal line 3002.
9998	Agency contact	Include the name of the individual responsible for answering the above questions.
9999	Telephone number	Include telephone number of agency contact.

52.7 How do I check my exhibit 52 data for consistency?

Verify that your data meets the following error and consistency checks:

- Amounts reported for financial management systems on line 4002 must be consistent with the percentage of budget authority for financial management components reported in exhibit 53.
- If any adjustments are reported on lines 6001-6002, a hard copy list should describe the adjustments made and available to OMB upon request.
- Do not include preparation costs on lines 8102-9402.

- Lines 9401 and 9402 should equal the corresponding entries reported for lines 3001 and 3002.

52.8 How do I submit exhibit 52 and when is it due?

Exhibit 52 is collected separate from, and in advance of, data entered for other MAX schedules supporting the Budget Appendix (e.g., schedules P, O, etc.). Your exhibit 52 should be reviewed by your agency CFO before submission to OMB. E-mail this information using the spreadsheet provided at www.cio.gov. This spreadsheet is formatted to meet all the reporting requirements of exhibit 52. Send the completed spreadsheet to exhibit52@omb.eop.gov. Before sending the completed spreadsheet, verify that the subject line has the three-digit OMB agency code (see Appendix C) and the full agency name.

Submit exhibit 52 electronically via e-mail at the same time you submit your initial budget submission. You will be required to update the data, as necessary, to reflect final budget decisions after those decisions are made (see section 27.3).

Report on Resources for Financial Management Activities

Department of Government (in millions of dollars)		PY	CY	BY	Report Obligations for PY and Budget Authority for CY and BY, except where noted.
Asset Management					
1001	No. of FTE.....		40	40	
1002	Obligations/Budget Authority.....	2,350	2,480	2,600

Ex-53 Agency Information Technology (IT) Investment Portfolio

Summary of Changes

Highlights the requirement that e-Government projects be prioritized and managed effectively, be citizen-centered, and include specific outcomes (section 53.1).

Provides detailed information on formulating life cycle costs (section 53.1).

Clarifies the definitions of financial and non-financial systems (section 53.2).

Adds a new grants management part to exhibit 53 and removes the resources summary part (section 53.6).

Revises the coding system for exhibit 53 (section 53.7).

53.1 Why must I report on information technology?

This information helps OMB:

- Identify large IT investments for possible review during the budget process;
- Ensure that spending on IT supports an agency's mission;
- Identify investments in agency infrastructure and office automation;
- Identify investments that support agency enterprise architecture development, business process re-engineering (BPR), IT policy development, and acquisition management;
- Understand the amounts being spent on development and modernization of IT versus the amount being spent on operating and maintaining the status quo for IT;

- Understand an agency's capital planning and investment control processes for the portfolio of IT investments;
- Identify the funding sources for agency IT investments;
- Identify investments for IT security as part of agency life-cycle costs for specific investments and IT security that is crosscutting or infrastructure related;
- Ensure that life cycle costs for specific investments reflect compliance with OMB and agency privacy policies;
- Provide a full and accurate accounting of IT expenditures as required by the Paperwork Reduction Act of 1995 and the Clinger-Cohen Act of 1996;
- Ensure that spending on IT supports agency compliance with the requirements of Section 508 of the Rehabilitation Act Amendments of 1998 (Electronic and Information Technology Accessibility) and Section 504 of the Rehabilitation Act of 1973 (Reasonable Accommodation);
- Ensure that spending on IT prioritizes and manages e-Government projects effectively through your agency's capital planning process and enterprise architecture. Ensure that initiatives create a citizen-centered electronic presence and advance an e-Government strategy that includes specific outcomes to be achieved;
- Review requests for agency financial management systems;
- Review requests for agency grant management systems; and
- Prepare the Government-wide five-year plan required by the Chief Financial Officers (CFOs) Act of 1990.

You must provide this information using the Agency IT Investment Portfolio (exhibit 53) reporting format. This format was developed jointly by OMB and the Chief Information Officers' Council and provides basic information your agency needs to link its internal planning, budgeting, acquisition, and management of IT resources (i.e., the capital programming process). In addition, as an output of your agency's internal capital programming process, your budget justification for IT must provide results oriented information on IT operations and improvement initiatives in the context of the agency's missions and operations. Your budget justification, including the status and plans for information systems, should be consistent with your agency's submissions on financial management activities required by section 52 and the applicable guidance in Part 3 of this Circular.

Total investments costs must cover the life of each system and include all funding sources (direct appropriation, working capital fund, revolving funds, etc.). OMB no longer requires submission of the detailed funding source and appropriation breakout on the exhibit 53. However, this information must be available at the agency in case it is needed during budget reviews. Life cycle costs should also be risk adjusted to include any risks addressed on the Capital Asset Plan (if applicable). Examples of areas that may cause the adjustment of life-cycle costs would be strategic risks, technological risks, human capital issues, acquisition strategy, IT security and privacy risks, enterprise architecture, and any other issues identified on the capital asset plan. These total investment costs must be formulated and reported in order for OMB to meet the Clinger-Cohen Act's requirement that "at the same time that the President submits the budget for

a fiscal year to Congress under section 1105(a) of title 31, United States Code, the Director shall submit to Congress a report on the net program performance benefits achieved as a result of major capital investments made by executive agencies in information systems and how the benefits relate to the accomplishment of the goals of the executive agencies.”

53.2 What special terms must I know?

Information technology, as defined by the Clinger-Cohen Act of 1996, sections 5002, 5141, and 5142, means any equipment or interconnected system or subsystem of equipment that is used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information. For purposes of this definition, equipment is “used” by an agency whether the agency uses the equipment directly or it is used by a contractor under a contract with the agency that (1) requires the use of such equipment or (2) requires the use, to a significant extent, of such equipment in the performance of a service or the furnishing of a product. Information technology includes computers, ancillary equipment, software, firmware and similar procedures, services (including support services), and related resources. It does not include any equipment that is acquired by a Federal contractor incidental to a Federal contract.

Information system means a discrete set of information technology, data, and related resources, such as personnel, hardware, software, and associated information technology services organized for the collection, processing, maintenance, use, sharing, dissemination or disposition of information.

Financial management systems are financial systems and the financial portion of mixed systems (see definitions below) that support the interrelationships and interdependencies between budget, cost and management functions, and the information associated with business activities.

Financial systems are comprised of one or more applications that are used for any of the following:

- Collecting, processing, maintaining, transmitting, and reporting data about financial events;
- Supporting financial planning or budgeting activities;
- Accumulating and reporting cost information; or
- Supporting the preparation of financial statements.

A financial system supports the processes necessary to record the financial consequences of events that occur as a result of business activities. Such events include information related to the receipt of appropriations or resources; acquisition of goods or services; payment or collections; recognition of guarantees, benefits to be provided, or other potential liabilities or other reportable activities.

Mixed system means an information system that supports both financial and non-financial functions of the Federal Government or components thereof.

Non-financial system means a system that supports management functions of the Federal Government or components thereof and does not record financial events or report financial information.

Major IT system means a system that requires special management attention because of its importance to an agency mission; its high development, operating, or maintenance costs; or its significant role in the administration of agency programs, finances, property, or other resources. Large infrastructure investments (e.g., major purchases of personal computers or local area network improvements) should also be evaluated

against these criteria. Your agency Capital Planning and Investment Control Process may also define a “major system.” All major systems must be reported on exhibit 53. In addition, a “major” IT system is one reported on your “Capital Asset Plan and Justification,” exhibit 300 (see Part 3 of this Circular). For the financial management mission area, “major” is any system that costs more than \$500,000. If you are unsure about what systems to consider as “major,” consult your agency budget officer or OMB representative. Systems not considered “major” are either “significant” or “small/other.”

Significant project means an information technology project or investment that is significant to the business of the agency, may require greater visibility, and does not meet the requirements of “major” identified above.

Small/Other means all other small or individual projects that do not meet the criteria for “major” or “significant” but is part of the agency’s overall IT portfolio.

53.3 How do I determine whether I must report?

Submit an agency IT investment portfolio (exhibit 53) to OMB if either of the following are true:

- Your agency is requesting funding for IT investments via a Capital Asset Plan (see section 300). If you are unsure whether your agency will submit exhibit 300, consult your OMB representative.
- Your financial management system BA is above \$500,000.

53.4 How do I submit exhibit 53 and when is it due?

You must submit exhibit 53 in an electronic format either by e-mailing a spreadsheet version of exhibit 53 or, if your agency uses I-TIPS, by submitting it directly from I-TIPS. If you choose to e-mail exhibit 53, use the spreadsheet provided at www.cio.gov. This spreadsheet is formatted to meet all the reporting requirements of the exhibit 53. Send the completed spreadsheet to exhibit53@omb.eop.gov. The subject line must have the three digit OMB agency code (see Appendix C) and the full agency name.

Your exhibit 53 is due to OMB by September 10th. In addition, you must update each exhibit 53 you submitted in September to reflect any changes due to final budget decisions (see section 27.3).

53.5 If I submitted exhibit 53 last year, how do I revise it this year?

If your agency provided an exhibit 53 for the FY 2001 Budget, you may choose to update the file that is located at www.cio.gov for your agency. If this is your first time reporting, use the Excel formatted version at the same web-site entitled Agency5303.xls.

53.6 How is exhibit 53 organized?

(a) *Overview.*

As a general rule, exhibit 53 covers IT for your agency as a whole. However, in some cases, OMB might require you to prepare the exhibit at the bureau level. Provide investment amounts in millions PY through BY. Information reported here must be consistent with data you report in schedule O, object classification (specifically, object classes 11.1 through 12.2, 23.1, 23.2, 25.2, 25.3, 25.7, 26.0, 31.0, and 41.0). Include all major IT systems, including financial management systems, reported in exhibit 300.

Exhibit 53 has four major parts:

- Part 1. IT systems by mission area.
- Part 2. IT infrastructure and office automation.
- Part 3. Enterprise architecture and planning.
- Part 4. Grants management.

All parts use the following common data elements:

- **Title** means a definitive title that explains what the project or investment is entitled.
- **Development/modernization/enhancement** means the program cost for new systems, changes or modifications to existing systems that improve capability or performance, changes mandated by Congress or agency leadership, personnel costs for project management, and direct support. This amount equals the sum of amounts reported for planning and full acquisition of that system in exhibit 300 and is required for “major” systems only.
- **Steady state** means maintenance and operation costs at current capability and performance level including costs for personnel, maintenance of existing information systems, corrective software maintenance, voice and data communications maintenance, and replacement of broken IT equipment. This amount equals amounts reported for maintenance of that system in exhibit 300 and is required for “major” systems only.
- **Percentage financial** means an estimated percentage of the total system budget authority associated with the financial components. See the financial system definition for a description of financial functions.
- **Percentage IT security** means an estimated percentage of the total investment for budget year associated with IT security for a specific project.

(b) *Part 1. IT systems by mission area.*

Consistent with your agency’s strategic and annual performance plan, report amounts for IT investments that directly support an agency-designated mission area (e.g., human resource management, financial management, command and control). Report each mission area in which IT systems, programs, projects, or initiatives are funded. For each mission area, itemize each “major” and each “significant” IT system by name and the total cost of all “small/other” systems. To determine how many systems should be listed as either “major” or “significant” in each mission area, use the rule that the greater percent of your IT expenditures should be identified within the combined listing of the two categories. For FY 2002, agencies identified an average of 76 percent of their total IT investments as either “major” or “significant.” This is the performance goal to focus on achieving and increasing as agencies use capital planning and investment control processes to better manage information technology. Therefore, your exhibit 53 should focus on achieving at least this level of visibility for your “major” and “significant” projects. At a minimum, all major and significant projects that were part of the FY2002 exhibit 53 reported as part of the President’s Budget (www.cio.gov), should be reported as part of the portfolio throughout its life-cycle (initial concept to retirement).

You must have a mission area titled “Financial Management,” and it must be reported as the first mission area. Some systems support financial functions in addition to other functions. If a system supports financial functions, you must include an estimated percentage of the total system obligations associated with the financial components. See the financial system definition for a description of financial functions. Systems that predominately support financial functions should be included in the first mission area, “Financial Management.” If the project reported is 100 percent financial, indicate 100 percent in the column. For mixed systems or projects, indicate the appropriate percentage that is financial. For those projects that are fully non-financial, enter zero.

(c) *Part 2. IT infrastructure and office automation.*

Report amounts for IT investments that support common user systems, communications, and computing infrastructure. These investments usually involve multiple mission areas and might include general LAN/WAN, desktops, data centers, cross-cutting issues such as shared IT security initiatives, and telecommunications. Report each “major” and each “significant” IT infrastructure system, program, project, or initiative separately. Report your IT security initiatives and projects that are not directly tied to a mission area or project on a separate line with a descriptive title for what the line includes.

(d) *Part 3. Enterprise architecture and planning.*

Report amounts for IT investments that support strategic management of IT operations (e.g., business process redesign, enterprise architecture development, IT investment planning, procurement management, and IT policy development and implementation).

(e) *Part 4. Grants management.*

Report amounts for IT investments that represent planning, developing, enhancing or implementing a grants management system or portion thereof. Highlight any grants systems initiatives as defined by this section. To highlight a system, which is not defined as major/critical, agencies should consider identifying the grants system as significant.

53.7 How is exhibit 53 coded?

Use the following 17 digit line number coding system to update or complete your exhibit 53:

Entry:	Description:
XXX-xx-xx-xx-xx-xxxx- xx	The first three digits are your agency code (see Appendix C).
xxx-XX-xx-xx-xx-xxxx-xx	The next two digits are your bureau code (see Appendix C). If this is a department only reporting, use 00 as your bureau code.
xxx-xx-XX-xx-xx-xxxx-xx	These two digits indicate the four parts of exhibit 53: <ul style="list-style-type: none"> ▶ 01 = Part 1. IT Systems by Mission Area ▶ 02 = Part 2. IT Infrastructure and Office Automation ▶ 03 = Part 3. Enterprise Architecture and Planning ▶ 04 = Part 4. Grants Management
xxx-xx-xx-XX-xx-xxxx-xx	These two digits indicate the mission area. Assign a unique code for each mission area reported.

Entry:	Description:
xxx-xx-xx-xx-XX-xxxx-xx	These two digits indicate your agency's type of investment. Select one of the following two digit codes according to the type of investment you are reporting: <ul style="list-style-type: none"> ▸ 01 = Major investments ▸ 02 = Significant investments ▸ 03 = Small/Other investments
xxx-xx-xx-xx-xx-XXXX-xx	This is a four digit identification number that identifies a specific investment or project. If a new project is added to exhibit 53, locate the area of exhibit 53 where you are going to report the project and use the next sequential number as your four digit identification number.
xxx-xx-xx-xx-xx-xxxx-XX	The final two digits identify the status of the investment you are reporting. Select one of the following two digit codes according to what you report on the title line: <ul style="list-style-type: none"> ▸ 00 = Total project investment title line, or the first time the agency is reporting this particular investment ▸ If the project was reported and approved by OMB during previous budget cycles, these two digits represent the first year the project was baselined by OMB (e.g. 02 means the project was baselined in the FY02 budget process)

53.8 What are the steps to complete exhibit 53?

The following provides step-by-step instructions to complete each part of exhibit 53. See section 53.2 and 53.6 for definitions.

AGENCY IT INVESTMENT PORTFOLIO

Entry	Description
Part 1. IT Systems by Mission Area	<p>Report amounts for IT investments that directly support an agency-designated mission area. Report each mission area in which IT systems, programs, projects, or initiatives are funded. This information should map directly to your agency's strategic and annual performance plan. For IT applications that cover more than one agency, report in the mission area with oversight of the project. Mission area 01 is reserved for your "financial management" projects and activities.</p> <p>Step 1: For each mission area, list each major IT system or project and the corresponding investment costs. For BY only, if financial or mixed, identify what percentage is financial. For BY only, if IT security costs are included, identify what percentage of the total investment is IT security. Provide the development/modernization/ enhancement and steady state costs.</p> <p>Step 2: For each mission area, list each significant project total and a summary total for small/other projects. If either of these has financial, mixed, or IT security, identify the appropriate percentages.</p>
Part 2. IT Infrastructure and Office Automation	Report amounts for IT investments that are common user systems, communications, shared IT security initiatives, and computing infrastructure. Investments listed will usually support multiple mission areas (e.g., general LAN/WAN, desktops, data centers, telecommunications). Report each major IT infrastructure system, program, project, or initiative and each significant system separately. Sum the costs of

SECTION 53 – INFORMATION TECHNOLOGY

Entry	Description
	small/other projects.
	Follow the step-by-step instructions outlined in Part 1.
Part 3. Enterprise Architecture and Planning	Report amounts for IT investments that support strategic management of IT operations (e.g., business process redesign, enterprise architecture development, IT investment planning, procurement management, and IT policy development and implementation).
	Follow the step-by-step instructions outlined in Part 1.
Part 4. Grants Management	Report amounts for IT investments that support grants management operations. See classification instructions in section 53.6 under Grants Management.

123-00-04-00-01-1010-00	major project title and total investment	X	X	X	X	X	X	X	X	X	X	X
123-45-04-01-02-1010-00	significant project and total investment	X	X	X	X	X						
123-45-04-01-03-0000-00	small/other projects and total investment	X	X	X	X	X						

X in any position above indicates it is required for that type of investment.

SECTION 54 -- RENTAL PAYMENTS FOR SPACE AND LAND

Table of Contents

- 54.1 Do I need to report on rental payments?
- 54.2 What materials must I provide?
- 54.3 What terms do I need to know?
- 54.4 How do I prepare the space budget justification?
- 54.5 What supporting information must I provide?

Ex-54 Space Budget Justification

54.1 Do I need to report on rental payments?

If your agency obligates more than \$5 million annually for rental payments to GSA or to others (e.g., other Federal agencies or commercial landlords) for rental of space, structures and facilities, and land and building services, you must submit a space budget justification in the format of exhibit 54. OMB uses this information to evaluate your budget request for rent in the context of personnel and program changes (e.g., downsizing). The General Services Administration (GSA) uses this information to refine its estimates of rental costs. You should use this information to analyze your space requirements and rental costs.

For reporting purposes, *include* amounts for the services covered by the basic rental charge assessed by GSA as obligations for rental payments to GSA, but *exclude* amounts above standard services, such as overtime utility services. From GSA's monthly bill, use line D, "Total Annual Rental" plus line 14a "Billing Adjustments and Corrections, Current Year" to calculate the amount on the line "GSA rent estimate" of exhibit 54. These amounts are already *net* of obligations for operations delegations (see line 8 on the monthly GSA bill and on the GSA budget estimate). Operations delegations should be budgeted in the appropriate object classes, such as 25.4, operations and maintenance of facilities. Therefore, if you have facilities delegated from GSA, you do not need to reduce bill amounts or budget estimates on exhibit 54.

Make your obligations for rental payments to GSA (Part 1 of exhibit 54) and your obligations for other space services paid to non-GSA entities (Part 2) consistent with data reported as rental payments under the appropriate object classes (see section 54.4).

54.2 What materials must I provide?

You must submit an overall summary report in the format of exhibit 54 for the agency as a whole. This report provides a justification of your agency's budget request for rent. In addition, you must submit a separate report for each bureau or subordinate organization that makes rental payments. Submit a single agency-wide summary report if these costs are paid for centrally from one account.

You must complete exhibit 54 using an electronic spreadsheet (Excel or Lotus) available from GSA (phone: 202-219-0370 or <http://hydra.gsa.gov/exhibit54>). The spreadsheet format includes inflation factors to calculate outyear estimates automatically and it generates total obligations for rental costs and funding sources.

The report contains information for PY through BY+1 on:

- Rental payments to GSA, which reconciles the GSA rent estimate with actual, planned, and requested changes in inventory.
- Funding sources for these rental payments to GSA.
- Rental payments to others, both non-Federal and Federal sources.
- Supporting detail on all changes from the GSA rent bill or GSA estimates of rental costs (see section 54.5).

Your submission must support your budget year request and list all applicable appropriations and/or other funding sources by account.

Report space requirements to the nearest square foot; state obligations in thousands of dollars and round to the nearest thousand. Where an amount falls exactly halfway in between, round to the nearest even figure (for example, both \$11,500 and \$12,500 round to \$12.) Do not identify amounts of \$500 or less.

Provide copies of these materials to GSA (attention: PBS, Director of Revenue Division (PHR), 1800 F Street, NW, Washington, D.C. 20405) at the same time you submit them to OMB.

54.3 What terms do I need to know?

Agency means departments and establishments of the Government, and **bureau** means the principal subordinate organizational units of an agency.

GSA bureau code means the agency/bureau code(s) recorded on the GSA rent bills or GSA budget estimates for each bureau making rental payments. (This number is *not* the same as the 3-digit OMB bureau code described in section 79.2 and Appendix C.)

GSA rent estimate means a document developed by GSA and sent to customer agencies once a year. This document provides budget year data on estimated assigned space and the associated costs of that space. It is used by GSA's customers for planning and budgeting purposes. You should use this year's GSA budget estimate (available this summer) to report the GSA rent estimate for the CY and BY.

OMB-approved inflation factor means the inflation factor used in the GSA budget estimate. Mid-Session Review inflation factors will be used for CY through BY+1. The electronic spreadsheet format provided to you will use these factors to automatically inflate certain outyear estimates.

Chargeback (or adjustments to the bill) means the process by which GSA's customers contest a GSA billing. If you claim a chargeback, you are required to complete a Standard Form 238, "SIBAC Adjustment Voucher For Chargeback" and provide supporting chargeback data justifying your claim.

54.4 How do I prepare the space budget justification?

The following table explains the information needed to prepare the space budget justification (see exhibit 54). Exhibit 54 illustrates the summary page of the submission. There are five worksheets that contain the

detail for the chargebacks, planned changes to inventory and the requested program changes. One worksheet is for the chargebacks, and there is one for each year in which to detail planned changes to inventory and the requested program changes (i.e., PY, CY, BY and BY+1). The summary justification consists of two parts:

- Rental payments to GSA (Part 1). (With the exception of the lines “Other adjustments,” “Statutorily-imposed rent caps,” and “Funding sources for Rental Payments to GSA,” data in this part is derived by formula from five back-up worksheets); and
- Rental payments to others (Part 2).

Subtotals, totals, and certain other entries indicated in **boldface** will be automatically calculated (see exhibit 54).

INFORMATION REQUIRED FOR THE SPACE BUDGET JUSTIFICATION

Entry	Description
	Report in dollars and to the nearest square foot on the individual worksheets. The totals will be automatically calculated for the summary page, with obligations rounded to the nearest thousand.
	Report net estimates of rental costs and square feet (i.e., net of any adjustments within the relevant category being reported).
PART 1. RENTAL PAYMENTS TO GSA	In Part 1, include information on rental payments to GSA only. Report data on rental payments to others in Part 2.
GSA rent estimate	<p>For the chargeback and PY worksheets, report amount of the annual (i.e., full year) rental cost. To calculate the annual rental cost, use the monthly GSA bill with the same date as the date on the GSA rent estimate and multiply the rent estimate for the current month by the number of months remaining in the fiscal year and add this amount to the year-to-date rent estimate on the monthly bill.</p> <p>Report the total square feet in the monthly GSA rent bill with the same date as the date on the GSA rent estimate for the BY. (The monthly GSA bill reflects total square feet billed for the month.)</p> <p>For the CY worksheet, report the square feet and rent estimate reflected in the CY column of GSA rent estimate for the BY.</p> <p>For the BY worksheet, report the square feet and rent estimate reflected in the GSA rent estimate for the BY.</p> <p><i>Note: GSA will provide agencies with the supporting documentation for the BY rent estimate, as required.</i></p> <p>The electronic spreadsheet will calculate rent estimates for BY+1 automatically, using OMB-approved inflation factors. Estimates of square feet will be generated by the spreadsheet for BY+1 at the BY level.</p>

SECTION 54 -- RENTAL PAYMENTS FOR SPACE AND LAND

Entry	Description
Actual adjustments to the bill <i>Enter PY only</i>	Report the net amount of any chargeback (resolved or unresolved) and actual changes in the inventory for the PY that has not been reflected in the monthly rent bill used above and the associated net square feet. This may include disputes over rates, space classifications, and current space requirements.
PY Worksheet planned changes in inventory <i>Enter the inventory changes for the remainder of the year</i>	For the PY worksheet, report the net amount of approved and planned changes in the inventory and adjustments from the base month (as reflected in the GSA rent estimate) to the end of the fiscal year. Adjustments may be an increase or decrease from the monthly rent bill used above for PY. Enter the square feet and the estimated annual rent under the "Agency Information" columns. Enter the effective date of the project. The annual change and the part-year change for rent are automatically calculated.
CY, BY and BY+1 worksheets	For the CY, BY, and BY+1 worksheets, include the approved and planned changes in inventory and associated adjustments that are not reflected in GSA rent estimates, including projects in the pipeline. Enter the changes in the worksheet for the year in which the change will first occur. The worksheet will automatically generate outyear estimates.
Requested program changes in inventory	For CY, BY, and BY+1 worksheets, report inventory changes that will result from changes in programs that have been enacted by law, are reflected in the President's budget, and/or are included in your BY request to OMB. Enter the CY, BY, and BY+1 requested program changes in each corresponding worksheet. The worksheet will automatically generate outyear estimates.
Space budget justification – the summary worksheet	
Other adjustments	Use this space to enter any other adjustments that are not included in the individual worksheets. Include an explanation of these items.
Statutorily-imposed rent caps	Report only on those rental payments to GSA that you consider constrained for legal reasons. Include as a footnote the legal reference (i.e., public law citation). Supporting detail must be provided, as described in section 54.5.
Total, net rental payments to GSA	The Space Budget Justification worksheet will automatically generate these totals.
FUNDING SOURCES FOR RENTAL PAYMENTS TO GSA	
Funded by direct appropriations:	List each direct appropriation that funds rental payments to GSA, by account title and identification (ID) code. Use a 9-digit ID code, that includes the OMB agency/bureau code, followed by the 4-digit basic
Account title and ID code	

SECTION 54 -- RENTAL PAYMENTS FOR SPACE AND LAND

Entry	Description
	<p>account symbol assigned by Treasury (xxx-xx-xxxx) (see section 79.2).</p> <p>For PY-BY+1, include the amount of obligations for rental payments to GSA that are funded from annual appropriations and permanent appropriations to general, special, and trust funds.</p> <p><i>If there are more than three accounts listed, change the electronic spreadsheet to add rows, as needed.</i></p>
Subtotal, direct appropriation	Report the sum of amounts of direct appropriations for a year for accounts listed. <i>If more than 3 accounts are listed, change the spreadsheet formula to calculate the amount funded by direct appropriations.</i>
Funded by other sources:	List all other sources of funding for rental payments to GSA (i.e., other than direct appropriation) by account title and ID code (described above).
Account title and ID code	<p>Include additional information on the line stub to identify the source of funding, as necessary.</p> <p>For PY-BY+1, include the amount of obligations for rental payments to GSA that are funded from reimbursements, other offsetting collections, and allocations.</p> <p><i>If there are more than three accounts listed, change the electronic spreadsheet to add rows, as needed.</i></p>
Subtotal, other funding sources	Report the sum of amounts for other funding sources for a year for accounts listed. <i>If more than 3 accounts are listed, change the spreadsheet formula to calculate the amount funded by other sources.</i>
Total, net rental payments to GSA (object class 23.1)	Report the sum of amounts paid to the GSA Federal building fund for all funding sources (direct appropriations plus other funding sources) for a year for accounts listed. Report amounts that are consistent with obligations classified as "Rental payments to GSA" (object class 23.1). Make the totals for each year equal to the corresponding "Total, net rental payments to GSA" reported above (see exhibit 54).
PART 2. RENTAL PAYMENTS TO OTHERS	In Part 2, report information on rental payments to Federal agencies other than GSA and to entities outside the Federal Government. Exclude data on rental payments to GSA, which are reported in Part 1.
Non-Federal sources (object class 23.2)	<p>Include obligations for possession and use of space, land, and structures leased from non-Federal sources (i.e., commercial landlords).</p> <p>Report amounts consistent with obligations classified as "Rental payments to others" (object class 23.2).</p>
Federal sources other than GSA (object class 25.3)	<p>Include obligations for payments to Federal agencies other than GSA for space, land, and structures that are subleased or occupied by permits, regardless of whether the space is owned or leased.</p> <p><i>Note:</i> Typically, with the approval of the Administrator of GSA, you may sublease your GSA-assigned space to another agency or bureau. In such</p>

SECTION 54 -- RENTAL PAYMENTS FOR SPACE AND LAND

Entry	Description
	cases, if you are the agency assigned the space by GSA, report rental payments for this space in Part 1 as "Rental payments to GSA". If you are the agency or bureau subleasing space from another agency or bureau, report payments for the sublease in Part 2 as "Federal sources other than GSA."
	Report amounts consistent with obligations for rental payments to Federal sources reported as "Purchases of goods and services from Government accounts" (object class 25.3).
Total, rental payments to others	Report the sum of amounts as rental payments to non-Federal sources and to Federal sources other than GSA. Make the totals consistent with rental obligations classified in object classes 23.2 and 25.3.

54.5 What supporting information must I provide?

Complete and submit all six worksheets of exhibit 54 that support the Space Budget summary page. For each change, include the GSA bureau code, the GSA building number (if known), city and State, type of action, effective date, square feet, and rent on the appropriate worksheet. For any program changes requested, provide supporting information that identifies the program initiatives related to the requested changes. In addition, provide a list that identifies major acquisitions, renovations, or consolidations required to implement agency planned space changes, as well as the timing, amount of work space, and cost of each action.

Space Budget Justification

Agency _____
 Bureau _____
 GSA Bureau Code _____

Shaded entries are
 automatically generated
 by the electronic
 spreadsheet.

Note: The PY GSA RENT estimate is
 based on the monthly rent bill with
 "date of inventory" that matches the
 GSA budget estimate for BY. CY
 and BY rent estimates are taken from
 the GSA budget estimates for the BY.

Round dollars to the nearest
 thousand, as required by section
 54.2. Report space requirements to
 the nearest square foot.

Subtotal, other funding sources.....

Total, net payments to GSA (object class 23.1)..... \$398,000 \$422,700 \$439,555 \$450,860

PART 2: RENTAL PAYMENTS TO OTHERS

Non-Federal sources (object class 23.2)..... 24,000,000 \$290,000 25,000,000 \$300,000 22,900,000 \$275,000 22,900,000 \$275,000

Federal sources (object class 25.3)..... 150,000 \$1,800 150,000 \$1,800 150,000 \$2,000 150,000 \$2,000

Total, rental payments to others..... 24,150,000 \$291,800 25,150,000 \$301,800 23,050,000 \$277,000 23,050,000 \$277,000

Dollar amounts for "Total, net rental payments to GSA" above should equal the corresponding entries at the end of Part 1. Supporting detail is required on each actual, planned, and requested change in inventory (see section 54.5).

Pursuant to section 83.11, only payments made directly to the GSA Federal buildings fund should be classified as object class 23.1. All other rental payments should be classified as object class 23.2 or object class 25.3.

SECTION 55 – ENERGY USE, COSTS, AND EFFICIENCY**Table of Contents**

- 55.1 What is the purpose of this information?
- 55.2 How will this information be used?
- 55.3 Do I need to report on energy use, costs, and efficiency?
- 55.4 When and how do I report?
- 55.5 How do I prepare exhibit 55?

Ex-55 Annual Energy Management Data Report

55.1 What is the purpose of this information?

Executive Order 13123 requires agencies to track and reduce their energy use in buildings and facilities. The Energy Policy Act of 1992 (EPAct) required agencies to reduce their energy use per square foot of office space by 20 percent, relative to use in 1985, by the year 2000. E.O. 13123 extends those goals for office buildings to a 30 percent reduction by 2005 and 35 percent by 2010, relative to 1985. E.O. 13123 also requires improvements in industrial and laboratory facilities: 20 percent (relative to 1990) by 2005 and 25 percent by 2010. Part 3 of E.O. 13123 requires agencies to include budgetary information on energy use and efficiency in their budgets and sets out requirements for an annual report to the President on progress toward the energy efficiency goals.

55.2 How will this information be used?

OMB will review the resources your agency has requested for energy-efficiency improvements in the context of the requirements of E.O. 13123. The Department of Energy (DOE) will review and aggregate the numerical data and other information included in the report to the President to ensure the progress of each agency and to provide a government-wide picture of progress toward the mandated goals.

55.3 Do I need to report on energy use, costs, and efficiency?

If your agency controls its Federally-owned building space or directly pays the utilities in its leased space, then you must report your agency's aggregate energy consumption for each of the fuel types listed below. Reporting on leased buildings may pose some difficulty depending on the nature of the lease (partially serviced, fully serviced). If your agency leases space from the General Services Administration, GSA is responsible for reporting energy data for that space. If all of your space is leased from GSA, and if you do not pay any energy surcharges, then you do not have to report any data in this section.

If your agency has been delegated responsibility by GSA for operation and maintenance of the buildings you occupy, then you are required to report energy consumption for these buildings for any years in which the buildings are under your control.

You must provide data for three years:

- Final data for the previous year.

- Estimates for the current year.
- Estimates for the budget year for which you are planning.

55.4 When and how do I report?

Two data submissions are required. You must complete exhibit 55 with estimates for the past year, the current year, and the budget year, and submit it in September with your agency's budget submission to OMB. You should submit a revised exhibit 55 for *all three years*, with final data for the previous year, as part of your annual report to the President by January 1, 2002.

Submit the information to your agency's OMB representative, with copies to:

Agency Report Coordinator
Federal Energy Management Program (FEMP)
U.S. Department of Energy, EE-90
1000 Independence Ave., SW
Washington, DC 20585-0121
Phone: (202) 586-8287
Fax: (202) 585-3000
Email: rick.klimkos@hq.doe.gov

and

Energy Efficiency Examiner
Office of Management and Budget
NEOB Room 8025
725 17th St. NW
Washington, DC 20503
Phone: (202) 395-4573
Fax: (202) 395-1086
Email: Robert_Sandoli@omb.eop.gov

We encourage you to download the report format from the Internet (www.eren.doe.gov/femp/aboutfemp/report_guid.html) and complete the report electronically.

55.5 How do I prepare exhibit 55?

You must complete the applicable twelve tables shown in exhibit 55. Part 1 consists of six tables concerning energy consumption and cost data. Part 2 consists of six tables concerning energy efficiency improvements.

The Department of Energy Federal Energy Management Program (FEMP) issues annual guidance on agency reports to FEMP and to the President. Because the FEMP reporting requirements include most of the information requested here, plus additional narrative information, you may want to refer to FEMP's reporting guidance for more details and background on the energy data we are requesting. The reporting forms here and in the FEMP guidance require the same information, except for the "Identification of Funding" section included here. You can use the forms in this section for your annual report to FEMP and the President.

If your energy or water bills have different units of measurement from the ones required here, you must convert the data. For conversion units not given in the explanations for individual sections, refer to the detailed FEMP reporting guidance, which includes conversion tables.

You may adjust the 1985 baseline data if GSA has recently delegated responsibility for some buildings to your agency; however, you should discuss any changes to your baseline information with DOE's Federal Energy Management Program before making them. FEMP's annual reporting guidance document discusses specific cases in more detail, but in general, you should not make changes to your baseline.

(a) *Tables 1-1 and 1-2.*

For each category of buildings and facilities (standard, industrial, and exempt), report how much of each of the following types of energy your agency used, or how much you spent for that type of energy. If you know both the amount consumed and its cost, report both numbers. If you know only one, report that and the Department of Energy will estimate the other value based on the average national cost of each form of energy. You must submit all data in the reporting units shown below for each energy type. For each quantity of energy consumed, round to the nearest tenth of an integer, (i.e., 1,289.3 megawatt hours). For cost data, enter the annual cost for each energy type in thousands of dollars, rounded to the nearest tenth of an integer, (e.g., \$77.4 for \$77,358).

<i>Energy type</i>	<i>Reporting unit</i>
Electricity	(megawatt hours)
Fuel oil	(thousands of gallons)
Natural gas	(thousand cubic feet)
LPG/propane	(thousands of gallons)
Coal	(short ton)
Purchased steam	(billion BTU)
Other	(billion BTU)

If you were able to enter cost data for all types of energy you used, then total the annual costs and enter that number, in thousands of dollars, in the space provided.

Report the gross square footage of the standard buildings and facilities in your agency's inventory for each reporting year. Enter this number in thousands of square feet, rounded to the nearest tenth of an integer.

1. *Standard building or facility.* This category includes office and administrative buildings and any other building that does not specifically fit the criteria for an "industrial, laboratory, research, or other energy-intensive facility" or for an exempt facility. Refer to the DOE document, *Criteria for Exempting Facilities from the Goals of Executive Order 13123 and Guidance for Reporting Exemptions* for additional information.
2. *Industrial, laboratory, research, or other energy-intensive facilities.* This category includes data on buildings and facilities that by their nature have much higher energy consumption than standard office buildings. You can choose what measure of output or activity to use as a basis for computing energy efficiency. Your agency has the option of meeting the E.O. 13123 energy reduction goals in these facilities in terms of energy use per square foot like standard buildings, or in terms of some other performance ratio, such as energy use per ton of material handled, per flight prepared, or per some

other measure of productivity. Refer to section 203, *Performance Goals for Industrial, Laboratory, Research, and Other Energy-Intensive Facilities*, (www.eren.doe.gov/femp/resources/indust.html).

In tables 1-1 and 1-2, indicate the total cost for the optional unit of measure you have chosen, if any, in addition to the total consumption of each type of fuel and the total gross square feet of industrial/energy-intensive facilities.

(b) *Table 1-3. Facilities exempt from meeting the E.O. 13123 goals.*

You should refer to the DOE document, *Criteria for Exempting Facilities from the Goals of Executive Order 13123 and Guidance for Reporting Exemptions* (www.eren.doe.gov/femp/resources/criteria.html) to decide which facilities are exempt from the E.O. 13123 energy-efficiency improvement goals. Although these exempt buildings are not subject to the requirements of Sections 202 and 203 of E.O. 13123, you should still report energy consumption and cost data for them under the reporting category of “Exempt buildings,” using the same method as for the standard buildings/facilities category.

(c) *Table 1-4. Tactical vehicles and other equipment.*

Table 1-4 includes information on the fuel use of non-passenger vehicles and non-vehicle engines like mobile generators. For all liquid engine fuels, report your agency’s total use in thousands of gallons of each type of fuel listed in exhibit 55. If you used significant quantities of a fuel not listed, report its use in billions of BTU. (See the detailed FEMP reporting guidance for conversion tables if necessary.) Also report the actual or estimated total cost to your agency of each type of fuel for each of the reporting years.

(d) *Table 1-5. Water consumption and cost.*

If your water bills have different units of measurement from the ones required here, you must convert the data. For conversion units, refer to the detailed FEMP reporting guidance which includes conversion tables.

(e) *Table 1-6. Renewable (“green”) energy purchases.*

With the advent of retail competition, Federal agencies have opportunities to purchase electricity in the competitive market from a retail supplier other than their local electric utility. In addition, Federal agencies have opportunities to purchase renewable energy from utilities as part of “green power” pricing programs. Your agency will get credit toward meeting the goals of E.O. 13123 by distinguishing “green energy” contracts from other power contracts, and reporting the portion of power attributable to renewable sources.

- (1) *Purchases of renewable electricity.* Report the amount of renewable electricity you purchased from suppliers whose energy products are partially or completely derived from renewable sources. Your utility suppliers can tell you what percentage of the power is derived from renewables. Apply that percentage to both the gross usage and cost data to complete the table. For example, if you purchased 5000 MWH under a “green energy” contract where 10% of the power is from renewables, you would report 50 MWH and 10% of the total cost.

- (2) *Purchased biomass or landfill gas (renewable energy sources).* For competitive purchases of natural gas from renewable energy sources, provide the annual usage (in thousands of cubic feet) and the cost. Generally this would be purchased separately from other gas, so the renewable fraction is 100 percent. But if you purchased this gas in a mix with conventional natural gas, use the percentage mix to calculate and report the amount that is actually “renewable.”
- (3) *Purchased thermal energy from renewable energy sources.* For purchases of any form of thermal energy from renewable energy sources, provide the annual usage (in billion BTU) and the cost.
- (4) *Average annual incremental costs.* In the last line of the table, estimate the incremental (extra) cost you paid for renewable energy by multiplying the renewable quantity times the difference in unit price between conventional energy and your renewable energy contract.

(f) *Table 2-1. Direct agency obligations.*

These are obligations for energy or water efficiency incurred from appropriated funds, revolving fund accounts, or other accounts that belong to your agency; for example, obligations for purchases of compact fluorescent lights to replace incandescent bulbs, or replacement chillers paid for directly by your agency rather than through an energy savings performance contract. They do not include anything to be paid for or financed by a third party (e.g., a utility or energy-savings performance contractor). Report training data separately in table 2-5.

Provide information on the funds your agency obligated or plans to obligate for each reporting year. Enter amounts in thousands of dollars rounded to the nearest tenth of an integer.

(g) *Table 2-2. Energy savings performance contracts.*

Energy-savings performance contracts (ESPCs) are contracts that allow a private-sector energy service company (ESCO) to perform energy-efficiency improvements at a government facility using third-party financing, rather than the government paying for the work directly. The ESP contracts provide that the contractor guarantees a certain minimum level of energy savings, and based on that guarantee, the government will pay the contractor some or all of the guaranteed savings until the improvements have been paid off, including interest and maintenance. ESPCs allow agencies to undertake more and larger efficiency improvements than their budgets might otherwise allow and OMB encourages their use.

The first line of table 2-2 will show the total number of new ESPCs awarded by your agency in each reporting year. Report only new ESPCs signed during that year, in the “number/thou \$” column. On the same line, in the “MMBTU” column, enter the average *annual* energy savings anticipated from the ESP contracts awarded in each year, in millions of BTU. On the second line, enter the total value of new ESPCs signed during each reporting year. The third and fourth lines show how the estimated life-cycle cost savings of all of the ESPCs you reported on the first two lines are to be split between contractor payments and savings retained by your agency. Each ESPC has a schedule of payments, and you can ask your sites to aggregate their total expected contractor payments and retained savings. Note that the data represent multi-year totals, but you report only how the savings will be split in new ESPCs signed during the reporting years. The last line is an annual figure – the total amount your agency paid or will pay to ESP contractors during each reporting year.

(h) *Table 2-3. Utility energy services contracts.*

Utility Energy Services Contracts (UESCs) are similar to ESPCs, except that the work is performed by the utilities serving your agency’s sites under an “area-wide agreement,” usually negotiated by GSA.

The first line of this table will include the total number of new UESCs awarded by your agency in each reporting year. Report only new UESCs signed during that year, in the “number/thou \$” column. On the same line, in the “MMBTU” column, enter the average *annual* energy savings anticipated from UES contracts awarded in each year, in millions of BTU. The second line will show the total value of new UESCs signed during each reporting year. The third and fourth lines show how the estimated life-cycle cost savings of all of the UESCs you reported on the first two lines are to be split between contractor payments and savings retained by your agency. Each UESC has a schedule of payments, and you can ask your sites to aggregate their total expected contractor payments and retained savings. Note that these amounts are multi-year totals, but you report only how the savings will be split in new UESCs signed during the reporting years. The last line is an annual figure – the total amount your agency paid or will pay to UES contractors during each reporting year.

(i) *Table 2-4. Utility incentives or rebates.*

Beginning with EPCa, agencies were authorized and encouraged to participate in demand-side management (DSM) incentive programs offered by their servicing utilities (or by Administrators of public purpose programs in states that have restructured). You should report incentives received for projects accomplished in each year.

On the first line of table 2-4, enter in thousands of dollars the total amount of financial incentives received in each year from either your servicing utility(ies) or the Administrator of a public purpose program. On the same line, enter the estimated amount of energy (in millions of BTU) that will be saved annually by the projects for which you received rebates. On the second line, enter the amount of funds your agency expended on projects that received incentive payments (i.e., the expenditures that were necessary in order to receive the incentives). These funds may include direct expenditures reported in the direct expenditures table and/or savings paid to ESP or utility energy service contractors reported in previous tables.

(j) *Table 2-5. Training.*

Enter the number of Federal personnel or on-site contractors in your agency who received or are expected to receive energy management training in each year, and also enter your expenditures (or budget) during each of those years for energy management training. When counting the number of people who received training, include only people who received organized instruction, not those who received general-information items like flyers reminding people to turn out lights and turn off computers. The cost of such general information items intended to raise energy awareness among all employees can be included in the training budget entries, however.

(k) *Table 2-6. Identification of funds.*

For the budget year only, identify funds requested for the efficiency activities listed.

SECTION 56 -- DRUG CONTROL PROGRAMS**Table of Contents**

- 56.1 Do I need to submit information on drug control programs?
- 56.2 What materials must I provide?

Summary of Changes

Drops the prescribed format for submission of material; leaves format to the agency's discretion.

56.1 Do I need to submit information on drug control programs?

You must submit information on drug control programs if your budget authority or outlays for drug control programs exceeds \$500,000 in any of the years PY through BY+4. OMB uses this information for oversight and review of your request, for Government-wide resource allocation, and for meeting statutorily-mandated reporting requirements. Drug control programs involve activities directed toward reducing the demand for and supply of drugs. They include programs that:

- Enforce drug control laws, and prosecute and incarcerate individuals involved in the illegal distribution of drugs;
- Discourage the use of drugs; or
- Treat individuals for substance abuse.

56.2 What materials must I provide?

For each bureau in your agency that requests funding for drug control activities, you must report the amount of budget authority requested for the budget year, in millions of dollars and tenths of millions. There is no prescribed format for this submission, a simple table clearly displaying the requested information will suffice. Your submission to OMB must be consistent with your submission to the Office of National Drug Control Policy (ONDCP). If you wish, you may submit a copy of the "Resource Summary Table" prepared by your agency for The Office of National Drug Control Policy (ONDCP), as required by that Office's May 5, 1999 Circular, "Budget Instructions and Certification Procedures."

You must submit revised materials, reflecting final budget decisions, promptly after such decisions have been made (see section 100.1).

Include the date of preparation and the name and telephone number of an individual responsible for answering questions on the information provided. OMB may also require additional information, such as the effects of actions by the House and Senate Appropriations Committees and Subcommittees.

SECTION 57--INFORMATION ON ERRONEOUS PAYMENTS

Table of Contents

- 57.1 What is an erroneous payment?
- 57.2 Who must report erroneous payment information and when is it due?
- 57.3 What materials must I provide?

Ex- 57 Programs for Which Erroneous Payment Information is Requested

Summary of Changes

Requires agencies to submit erroneous payment data, assessments, and action plans with their initial budget submissions.

Drops the requirement, previously included in this section, for information on programs funded by the Violent crime reduction trust fund.

57.1 What is an erroneous payment?

“Erroneous payments” are payments made under the programs listed in Exhibit 57 that should not have been made or were made for an incorrect amount. In this context, “payments” include the provision of benefits that do not necessarily involve cash disbursements (e.g., loan guarantees). Examples of erroneous payments include payments to ineligible persons or the wrong organizations, payments in the wrong amount, payments for ineligible services, duplicate or other overpayments, and payments for services never received. Erroneous payments may be due to procedural or administrative errors made by the payor (e.g., providing incorrect account numbers in payment instructions) or errors or fraud by payees or claimants (e.g., under reporting of income by beneficiary). Covered payments include overpayments and underpayments made by the Federal Government, its direct contractors, and by States or other grant recipients administering Federal programs.

57.2 Who must report erroneous payment information and when is it due?

Agencies listed in Exhibit 57 must report erroneous payment information for the programs shown.

This information is due with your initial budget submission.

57.3 What materials must I provide?

(a) *Erroneous payments data.*

For (1) all direct programs (programs listed in Exhibit 57 administered directly by the Federal government or its direct contractors) and (2) indirect programs (programs listed in Exhibit 57 administered by or with States or other organizations) where erroneous payment rates are currently being estimated, submit the following data:

SECTION 57 – INFORMATION ON ERRONEOUS PAYMENTS

- Estimated erroneous payment rates (number of estimated erroneous payments/total number of payments and dollar value of estimated erroneous payments/dollar value of total payments) projected for FY 2001.
- Actual rates for FYs 1999 and 2000, if available.
- Target rates (goals) for FYs 2002 and 2003.

Discuss the types and causes of erroneous payments and variances from targets or goals that were established. Also provide a description and assessment of the current methods for measuring the rate of erroneous payments and the quality of data resulting from these methods.

For indirect programs listed in Exhibit 57 where erroneous payment rates are *not* currently estimated, submit an analysis and description of whether and how erroneous payments could be estimated. Include an analysis of the costs and benefits of collecting new or additional data. Your analysis should consider programmatic and legal obstacles to collecting additional data or establishing estimation procedures.

(b) Assessment and action plan.

For all programs listed in Exhibit 57, provide an assessment of the efficacy of current agency efforts to minimize erroneous payments, including an analysis of the rate (where available) to determine causes and corrective actions. Describe additional actions your agency could take to *prevent* erroneous payments and to *correct* erroneous payments made (i.e., recovering overpayments and making up underpayments). Evaluate the costs and benefits of implementing these corrective actions and describe programmatic and legal considerations. Indicate whether and to what extent undertaking these actions would hinder the achievement of major program objectives.

OMB will review your assessment and coordinate with you to develop detailed action plans on a program-by-program basis.

(c) Agency contact point.

Include the name(s) and telephone number(s) of the preparer(s) for the information for each program.

PROGRAMS FOR WHICH ERRONEOUS PAYMENT INFORMATION IS REQUESTED

Erroneous payment information is requested for the following:

Department of Agriculture	Highway Planning and Construction
Food Stamps	Federal Transit - Capital Investment Grants
Commodity Loan Program	Federal Transit - Formula Grants
National School Lunch and Breakfast	
Women, Infants, and Children	Department of Veterans Affairs
	Compensation
Department of Defense	Dependency and Indemnity Compensation
Military Retirement	Pension
Military Health Benefits	Insurance Programs
Department of Education	Agency for International Development
Student Financial Assistance	
Title I	Environmental Protection Agency
Special Education - Grants to States	Clean Water State Revolving Funds
Vocational Rehabilitation Grants to States	Drinking Water State Revolving Funds
Department of Health and Human Services	National Science Foundation
Head Start	Research and Education Grants and
Medicare	Cooperative Agreements
Medicaid	
TANF	Office of Personnel Management
Foster Care-Title IV-E	Retirement Program (CSRS and FERS)
Child Support Enforcement	Federal Employees Health Benefits Program
State Children's Insurance Program	(FEHBP)
Child Care and Development Fund	Federal Employees' Group Life Insurance
	(FEGLI)
Department of Housing and Urban Development	Railroad Retirement Board
Low Income Public Housing	Retirement and Survivors Benefits
Section 8 Tenant-Based	Railroad Unemployment Insurance Benefits
Section 8 Project Based	
Community Development Block Grants	
(Entitlement Grants, States/Small Cities)	
Department of Labor	Small Business Administration
Unemployment Insurance	(7a) Business Loan Program
Federal Employee Compensation Act	(504) Certified Development Companies
Workforce Investment Act	Disaster Assistance
	Small Business Investment Companies
Department of Treasury	Social Security Administration
Earned Income Tax Credit	Old Age and Survivors' Insurance
	Disability Insurance
	Supplemental Security Income Program
Department of Transportation	
Airport Improvement Program	

SECTION 58 -- ADDITIONAL INFORMATION DUE WITH THE INITIAL SUBMISSION

Table of Contents

- 58.1 How do I explain major changes in receipts estimates?
- 58.2 What information must I provide on Inspectors General for Designated Federal Entities?
- 58.3 What information must I provide if I have unobligated balances in liquidating accounts?

Summary of Changes

Drops the requirement for information related to the 2002 Winter Olympics (old section 58.4).

Moves information on privacy policies to sections 31.8, 53.1, and 300.9 (old section 58.5).

58.1 How do I explain major changes in receipts estimates?

Provide narrative explanations for major changes from one fiscal year to the next in the amounts of receipts reported for any account, trends in receipt estimates that differ from outlay trends for the related programs, and any other unusual circumstances relating to the estimates.

Advise OMB of increases in amounts reported to the Treasury Department accounts 1435.00 (General fund proprietary interest receipts, not otherwise classified) and 3220.00 (All other general fund proprietary receipts) when you expect that the amounts collected from a single source will exceed \$10 million in any year or when legislation is proposed that will affect any receipts reported to those accounts.

Make your explanations of legislative proposals consistent with your legislative program and outyear policy estimates (see section 30.2). Cover the expected timing of enactment and the annual level of receipts anticipated.

58.2 What information must I provide on Inspectors General for Designated Federal Entities?

You must submit the following information for your Office of Inspector General if the Inspector General Act Amendments of 1988 designated your agency to establish an Office of Inspector General:

- Budget authority in thousands of dollars.
- FTE levels for PY through BY.
- A concise narrative justifying the funding levels.

58.3 What information must I provide if I have unobligated balances in liquidating accounts?

You must submit information justifying any unobligated balances you expect to carry forward into the current year (see section 85.3).

SECTION 70 -- OVERVIEW OF REQUIREMENTS AFTER PASSBACK**Table of Contents**

- 70.1 What do I submit after passback?
- 70.2 At what level of detail do I report MAX data, proposed appropriations language, and narratives?

70.1 What do I submit after passback?

After the President has considered the estimates and made his decisions, you will be notified. You must ensure that the materials submitted after passback reflect these decisions. You need specific approval from OMB before you may submit materials on a different basis. If the decisions affect other budget accounts (such as the amount of transfers), coordinate these changes with whomever is responsible for the budget submission of those other accounts. When you are informed of the President's decisions, your agency head will determine the best and most appropriate distribution of amounts that have been left flexible. After passback, you must provide the following:

- Computer materials updating the MAX budget system (see sections 79-86).
- Proposed appropriations language (see section 96).
- Narrative descriptions of programs (see section 97).

OMB uses this information to prepare the *Budget Appendix* and other budget documents (see sections 10 and 95).

You must also submit the following additional information, as well as updates to materials provided with the initial submission, which OMB will use for analytical and other special purposes:

- Updates to information provided in the initial submission (see section 100.1).
- Materials in support of baseline estimates (see section 100.2).
- Information on grants to State and local governments (see section 100.3).
- Information on motor vehicles (see section 100.4).
- Information on relocation expenses (see section 100.5).
- Information on international travel (see section 100.6).

Section 27.3 summarizes the materials required after passback and indicates who must provide them. Your OMB representative will specify when this information is due. You will have an opportunity to update the information if the outcome of an appeal changes passback decisions.

70.2 At what level of detail do I report MAX data, proposed appropriations language, and narratives?

Appropriation or fund accounts are the basic building blocks of the President's budget. You report data at the account level in the MAX budget system. Budget information is presented at the account level in the *Budget Appendix* and aggregated to provide the totals in the President's budget. In addition, accounts are the basis for congressional action on the budget. Section 79 contains more information about account structure and types of accounts. Receipt accounts are also included in the budget database and used to derive budget totals. Receipt data are printed in the *Budget Appendix* and reflected in printed budget summary tables.

SECTION 70 -- OVERVIEW OF REQUIREMENTS AFTER PASSBACK

You must update all the data in the MAX budget system and provide print materials for each budget account (see section 71.1). Section 79.5 lists and describes the various MAX budget schedules, and section 95.4 lists the materials that will be printed in the detailed budget estimates by agency portion of the *Budget Appendix*.

SECTION 71 -- REPORTING BY BUDGET ACCOUNT

Table of Contents

71.1	How do budget accounts relate to Treasury accounts?
71.2	How do I align budget accounts with programs?
71.3	What do I need to know about changing account and budget structure?
71.4	How do I account for reimbursements?
71.5	How do I account for allocations?
71.6	When should I merge accounts?
71.7	When should I consolidate accounts?
71.8	What do I need to know about accounting adjustments under 31 U.S.C. 1534?

71.1 How do budget accounts relate to Treasury accounts?

When Congress provides budget authority for a particular purpose or under a particular title, it also provides a specific period for which the budget authority is available for obligation. This availability may be annual, multi-year, or no-year. Treasury establishes appropriations and fund accounts based on the availability of the resources in the account. Treasury establishes separate accounts for each annual, multi-year, or no-year amount appropriated.

For the reporting requirements of this Circular and presentation of information in the budget, appropriations and other types of budget authority provided to an account with the same or similar titles for the years covered by the budget are considered to be a single account under a single title (see the definition of budget account in section 20.3). In addition, two or more Treasury accounts may be merged or consolidated for budget presentation purposes into a single budget account (see sections 71.6 and 71.7). Note that this differs from budget execution requirements, where you must report data for each separate appropriation or fund account established by Treasury.

71.2 How do I align budget accounts with programs?

Budget accounts should provide the basis for effective control over agency programs and should facilitate the presentation of information for the congressional and the executive branch budget processes. You should include proposed programs that are closely related to existing appropriation accounts in those accounts. You should include major new programs that are significantly different from others in substance or in type in separate budget accounts.

Review your budget account structure and propose changes that would align budget accounts providing resources for a program with program results. In particular, keep in mind the link between resources and results when:

- Proposing budget account changes in response to legislative and conceptual changes;
- Considering changes to GPRA activity structure in annual performance plans (see section 220.8 in Part 2);

- Developing budget requests for acquiring capital assets (see Part 3); and
- Reviewing small accounts that provide partial financing for a program financed mostly by another account; to the extent possible, consolidate or merge such accounts with the primary account supporting the program.

When goods and services financed by one budget account are used to achieve performance results for a program in another budget account, consider charging the program for those goods and services through a reimbursable agreement or permitting the program to purchase them competitively.

71.3 What do I need to know about changing account and budget structure?

You must obtain approval from OMB if you want to propose changes in account or organizational structure. These changes include the following:

- Establishment of new accounts (see section 79.3);
- Changes in account titles;
- Account mergers (see section 71.6);
- Account consolidations (see section 71.7);
- Changes in the presentation sequence of existing accounts (see section 95.3);
- New methods of financing programs;
- Changes in the activity structure used for the program and financing schedule (see section 82);
- Changes in functional, subfunctional, and receipt classifications; and
- Reorganizations.

Until requests are approved, base budget materials on the existing structure. If changes are approved, you must revise budget schedules and other materials accordingly.

You should request approval for changes in budget structure by October 1, unless OMB specifies an earlier due date. If a change is dependent on pending decisions or results from late congressional action or other circumstances beyond your control, submit the request as soon as possible after October 1. If prospective internal reorganizations are likely to require budget structure changes, obtain OMB approval prior to implementing the reorganization.

71.4 How do I account for reimbursements?

Include advances or reimbursements lawfully credited to expenditure accounts (including advances received under the authority of the Economy Act (31 U.S.C. 1535 and 1536)) as spending authority from offsetting collections in the budget schedules of the receiving account. If the payments are from other government accounts, the paying account will include obligations in the amount of the payment in its schedules.

71.5 How do I account for allocations?

Allocations are the amounts of budget authority and other resources transferred to other agencies or bureaus to carry out the purposes of the parent account that are placed in separate Treasury transfer appropriation accounts (see section 20.4(1)). For the purposes of budget presentation, the budget schedules of the parent

account will reflect these transactions as part of that account's regular activities. However, FTEs funded by allocations will be reported in the receiving account, not the parent account. Object class schedules and personnel summaries will identify allocations separately (see section 86.1 and exhibit 83A).

71.6 When should I merge accounts?

Sometimes, amounts from several accounts may be merged into a single account for budget presentation purposes:

- When two or more appropriation accounts are replaced by a single appropriation, amounts in the old accounts will be merged into the schedules for the single account.
- When it is desirable to merge several appropriations into a single account and to request budget year appropriations on that basis. The objective of account mergers is to permit flexibility in achieving program goals by managing and budgeting at a higher level of aggregation. However, this objective must be balanced against other needs, including the need for public disclosure and review and control by the President and Congress.
- Revolving fund feeder accounts, which are appropriation accounts whose budgetary resources are available only for transfer to specified revolving fund accounts, will be merged into the revolving funds to which they relate. Do not separately identify the amounts included in the feeder accounts.

You must obtain approval from OMB for account mergers and ensure that the mergers are reflected correctly on the Budget Account Title file (see section 79.1).

71.7 When should I consolidate accounts?

You should consider consolidating accounts and submitting a single set of schedules for two or more accounts of a bureau (or an agency, when appropriations are not made by bureaus) for:

- Federal fund accounts for which no budget authority is anticipated after the past year;
- Permanent general and special fund appropriations that are used for similar purposes or where accounts contain small sums that have no direct bearing on programs financed by current appropriations; and
- Small trust fund accounts.

You should also consolidate below threshold accounts (that is, accounts with amounts of \$500,000 or less) with larger accounts. For this purpose, below threshold trust fund accounts may be consolidated with general fund accounts.

You must obtain approval from OMB for account consolidations and ensure that the consolidations are reflected correctly on the Budget Account Title file (see section 79.1).

71.8 What do I need to know about accounting adjustments under 31 U.S.C. 1534?

When an appropriation is available to an agency to pay a cost that benefits another appropriation that is also available to pay the cost, 31 U.S.C. 1534 permits the first appropriation to be charged initially as long as the charge is moved to the appropriation benefitted before the end of the fiscal year. Do not report the initial charge and succeeding adjustment.

SECTION 79 -- THE BUDGET DATA SYSTEM

Table of Contents

- 79.1 What is the MAX system?
- 79.2 What should I know about account identification codes?
- 79.3 How do I establish new accounts?
- 79.4 How do I report data in MAX?
- 79.5 What do I need to know about MAX schedules and line numbers?

Ex-79A New MAX A-11 Technical Requirements for FY 2003 Budget

Ex-79B Functional Classification

79.1 What is the MAX system?

The MAX budget system (MAX) is a computer system used to collect and process most of the information required for preparing the budget. MAX consists of a series of schedules that are sets of data within the MAX data base. Each schedule is complete in itself and describes a view or slice of the President's budget. (See exhibit 79A for a description of the hardware and software required to support the MAX system.)

The system controls data entry through expenditure and receipt account titles and classifications that are assigned at the account level (see section 71). The Budget Account Title (BAT) file controls accounts for which data may be entered into MAX. Among other things, the BAT contains information on:

- The account title, as it will be printed in the budget;
- The Treasury and OMB identification codes;
- Subfunction classification;
- Budget Enforcement Act (BEA) category;
- Congressional subcommittee assignment;
- Type of account (e.g., trust, special, revolving);
- Whether the account collects user fees;
- Whether the account will finance payments to individuals;
- Whether the account is sequestrable or exempt;
- Whether the account has obligation limitations;
- For receipt accounts, the receipt type; and for offsetting receipts, character classification; and
- Where the account will be placed in the budget (see section 95.2).

If you need to establish a new account or make changes to an existing account, coordinate with your agency's OMB budget representative. OMB will make all changes or additions centrally. Use the information in section 79.3 to ensure the information in the BAT file is complete and accurate.

Enter your budget data into the MAX schedules by account. An overview of all the schedules and their respective line numbers, with references to additional sections, is provided at section 79.5. With the exception of MAX schedule T, enter data in MAX in millions of dollars, rounded to the nearest million (see section 95.6). Do not identify amounts of \$500,000 or less.

MAX contains numerous crosschecks or error messages ("edit checks") to help ensure consistency of the data. Appendix D provides an explanation of the basic principles underlying MAX edit checks. In addition, Appendix E describes a number of diagnostic reports produced by OMB to ensure the data reported in the data base are consistent both within and between schedules and comply with standard budget concepts. Appendix E also includes several crosswalks that describe the relationships between entries in various MAX schedules.

The MAX A-11 User's Guide is a comprehensive reference document that provides information on how to use MAX. It is available, upon request, from the Budget Analysis and Systems Division, OMB (phone: 202-395-6934 or 395-7517) or electronically from the MAX web site (see exhibit 79A). MAX training is also available upon request.

You will find up-to-date information on the MAX home page at the following Internet address:

www.whitehouse.gov/WH/EOP/OMB/MAX

This page is accessible to MAX users and requires both a user name and password as follows:

username: ombmax
password: omb2000

This web site will include instructions for revising reprinted galleys (see section 95), as well as a listing of accounts with past year data loaded from the FACTS II reporting system (see section 82.17).

79.2 What should I know about account identification codes?

OMB, in consultation with the Department of Treasury, assigns account identification codes. These codes are used to store and access data in MAX, run computer reports, and identify accounts in OMB and Treasury documents and MAX computer reports. While you can access your accounts in MAX without knowing the account number, you are required to perform several steps that can be eliminated if you know the account number. Each account can be identified in several ways. For example, you can access your accounts in MAX by entering either the "OMB account number" or the "Treasury account number," but when you want to find your account in the Treasury Annual Report Appendix, you must use the "Treasury account number" or the name of the account within the agency listing. Regardless of which number you use, familiarity with the following coding options is helpful.

- OMB agency code – Each department or independent agency has a unique three digit number assigned by OMB (see Appendix C for list).
- OMB bureau code – Each bureau within each department or major agency has an agency-unique two digit number assigned by OMB. Agencies that do not have distinct bureaus have a bureau code of "00" (see Appendix C for list). Most receipt accounts do not have a distinct bureau and have a bureau code of "00".
- Treasury agency code – Each agency also has a two digit number assigned by Treasury (see Appendix C for list).

- Account symbol – Each account has an agency-unique number assigned by Treasury or, in the case of merged or consolidated accounts, by OMB that corresponds to the fund type (e.g., general, special). For expenditure accounts this number is four digits, unless subaccount information is being reported (requires prior OMB approval); for receipt accounts this number is six digits. Section 79.3(b) lists the types of funds and coding.
- Transmittal code - Each account in MAX has a one digit code that identifies the nature or timing of the associated schedules as described below.
 - ▶ 0—Regular budget schedules.
 - ▶ 1—Supplemental.
 - ▶ 2—Legislative proposal, not subject to PAYGO. Use for legislative proposals requiring authorizing legislation that are not subject to PAYGO. Do not use for routine reauthorization of agency programs.
 - ▶ 3—Appropriations language to be transmitted later. Use only with prior approval of OMB when language for a significant policy proposal cannot be transmitted in the budget.
 - ▶ 4—Legislative proposal, subject to PAYGO. Use for legislative proposals requiring authorizing legislation that have a PAYGO effect. Do not use for routine reauthorization of ongoing programs.
 - ▶ 5—Rescission proposal.

Also, certain footnotes used in the printed “Federal Programs by Agency and Account” listing in the budget are based on the transmittal code (i.e., 1 = A, 2 = J, 3 = I, 4 = B, 5 = H).

- Fund code – Section 79.3(b) explains fund codes.
- Subfunction code – OMB assigns each account a three digit code that corresponds to the account’s subfunctional classification (e.g., national defense, income security, agriculture). (See section 79.3(d) and exhibit 79B for listing.)

The following example illustrates the various account code combinations for the Salaries and expenses account of the National Telecommunications and Information Administration of the Department of Commerce:

▶ **OMB account number**

► **Treasury account number**

► **Account identification code as shown in Budget Appendix**

► **Account identification code as shown at top of MAX data entry screen**

79.3 How do I establish new accounts?

(a) *General.*

To request the establishment of a new account, provide your OMB representative with the information listed in section 79.1. For new expenditure and receipt accounts proposed for the budget year, OMB will notify you of the account symbol to be used when the change is approved. For supplementals or rescission proposals for existing accounts, use the basic account symbol assigned to the existing account. For supplementals where there is no existing account, a new account must be established.

(b) *Fund type and code.*

OMB and the Department of account identification codes based on the type of fund involved and other characteristics of the proposed new account. The account symbol is assigned, based on the fund type.

FUND TYPES AND CODES

Account symbol	Type of fund	Fund Code
0000-3899	General fund	1
5000-5999	Special fund	2
4000-4499	Public enterprise revolving fund	3
4500-4999	Intragovernmental revolving fund	4
3900-3999	Management fund	4
8000-8399 and 8500-8999	Trust non-revolving fund	7
8400-8499	Trust revolving fund	8
90xx	Assigned by OMB to designate allowances	
991x-998x	Assigned by OMB to designate consolidated accounts	

In MAX data entry, the account symbol can be used to identify fund type. For allowances, "90" is used for the 1st and 2nd positions. In cases where two or more accounts with different account symbols are included in a consolidated schedule (see section 71.7), "99" is used for the 1st and 2nd positions, the 3rd position designates the fund type, and the 4th position uniquely identifies the consolidated schedules. OMB will assign the account symbols for allowances and consolidated accounts.

(c) *BEA category.*

For each expenditure or receipt account, OMB assigns a BEA category (e.g., discretionary, mandatory) that designates how the budgetary resources of the account will be classified for BEA purposes (see section 81.3). In cases where the account will contain resources classified in more than one BEA category, OMB will identify the account as a "split" account.

(d) *Functional and subfunctional classification.*

OMB normally assigns each new expenditure and offsetting receipt account a single subfunction code (see exhibit 79B). In rare cases, an appropriation account may be split between two or more subfunctions. If the subfunctions are in the same function, the code of the function is used (e.g., 500, 550, etc.). If two or more functions are involved, the code "999" is used. Annually, OMB consults with CBO and other relevant budget and appropriation committee staff members regarding functional and subfunctional classification. This process, which is required by statute, typically occurs during October through December (see section 25.3).

(e) *User fee classification.*

You must indicate whether any collections related to the account are user fees, as defined in section 20.7. Receipts, offsetting receipts, and offsetting collections may be classified as user fees (see section 81.3). MAX edit checks ensure that accounts classified as having user fees identify those amounts as user fees. The user fee classification applies to all user fees, not only proposed new user fees or changes to levels of existing user fees.

(f) *Receipt type.*

Receipt accounts are classified either as receipts or offsetting receipts (see section 20.7). The classification takes into account:

- The source of the receipt;
- The authority for the collection and the nature of the transaction; and
- Whether the receipt offsets agency or government-wide totals.

Each receipt account is assigned one of the receipt types listed below (see section 20.7 for definitions of receipts). If the receipts associated with a particular program have more than one classification, separate receipt accounts must be established for each classification.

RECEIPT TYPES

Receipt classification	Budget treatment
Receipts	Compared with outlays in calculating surplus or deficit.
Offsetting receipts:	Consists of governmental, proprietary, and intragovernmental receipts, which offset budget authority and outlays totals, as indicated below.
<ul style="list-style-type: none"> • Offsetting governmental: <ul style="list-style-type: none"> ▸ Distributed ▸ Undistributed 	<ul style="list-style-type: none"> Offsets agency budget authority and outlays. Offsets government-wide totals rather than agency budget authority and outlays.
<ul style="list-style-type: none"> • Proprietary: <ul style="list-style-type: none"> ▸ Distributed ▸ Undistributed 	<ul style="list-style-type: none"> Offsets agency budget authority and outlays totals. Offsets government-wide totals rather than agency budget authority and outlays.
<ul style="list-style-type: none"> • Intragovernmental: <ul style="list-style-type: none"> ▸ Interfund: <ul style="list-style-type: none"> ▸ Distributed ▸ Undistributed ▸ Intrafund: <ul style="list-style-type: none"> ▸ Federal funds ▸ Trust funds 	<ul style="list-style-type: none"> Offsets agency budget authority and outlays totals. Offsets government-wide totals rather than agency budget authority and outlays. Offsets agency budget authority and outlays totals. Offsets agency budget authority and outlays totals.

79.4 How do I report data in MAX?

If you have computer access to MAX, you must use the system to submit your budget data. If data has already been entered for a particular account and transmittal code, you can retrieve and change the data using MAX. For a new account or transmittal code, you must create new MAX schedules before you can enter data. The User's Guide provides detailed instructions on how to create and edit MAX schedules. You can also use MAX to generate several diagnostic computer reports (see Appendix E).

If you do not have computer access to MAX, your agency's OMB representative will provide you copies of MAX reports containing the budget schedules. Write the revised data directly on these reports.

79.5 What do I need to know about MAX schedules and line numbers?*(a) MAX schedules and line numbers.*

The following table lists the range of MAX schedules and line numbers that appear in the MAX computer reports and on the MAX computer screen:

MAX SCHEDULES AND LINE NUMBERS

MAX schedule and line number	Description	A-11 section number
SCHEDULE A	POLICY ESTIMATES OF BUDGET AUTHORITY AND OUTLAYS	81
For PY-BY+9:		
4300-5590	Discretionary budget authority	
6250-6790	Mandatory budget authority	
6890	Discretionary spending authority from offsetting collections	
6990	Mandatory spending authority from offsetting collections	
7xxx	Limitations (memorandum entry)	
8800-8896, 8890	Offsets	
91xx	Outlays (except outlays from offsetting collections and limitations)	
93xx	Outlays from offsetting collections	
97xx-98xx	Outlays from limitations	
Notes:		
<ul style="list-style-type: none"> MAX generates budgetary resources for discretionary programs for BY+5 through BY+9; MAX generates outlays for discretionary programs for CY-BY+9 from data input by agencies. Not required for credit financing accounts. Provide memorandum entries for outlays from end of PY balances of discretionary budget authority (lines 9122, 9322, and 9822). 		
SCHEDULE C	CHARACTER CLASSIFICATION	84
For PY-BY:		
13xx-xx - 15xx-xx	Investment activities	
20xx-xx	Non-investment activities	
Notes:		
<ul style="list-style-type: none"> MAX generates outyear data for grants to State and local governments through BY+9. MAX generates outyear data for direct Federal programs through BY+4. Not required for credit financing accounts. 		
SCHEDULE D	BUDGET PLAN*	86.3
For PY-BY:		
06xx-0893	Direct and reimbursable budget plan obligations	
Note: Only applies to DOD-Military.		
SCHEDULE E	STATEMENT OF OPERATIONS	86.2
For PY-1-BY:		
01x1	Revenue	
01x2	Expense	
01x5	Net income or loss	
01x8	Other comprehensive income	
01x9	Total comprehensive income	
Note: Not required for credit financing accounts.		

SECTION 79 -- THE BUDGET DATA SYSTEM

MAX schedule and line number	Description	A-11 section number
SCHEDULE F	BALANCE SHEET	86.2
For PY-1-BY:		
1101-1999	Assets	
2101-2999	Liabilities	
3100-3999	Net position	
4999	Total liabilities and net position	
SCHEDULE G	STATUS OF DIRECT LOANS, PRESIDENTIAL POLICY	85.10
For PY-BY+4:		
11xx-12xx	Direct loan data (liquidating and financing accounts)	
33xx	Agency debt held by the FFB	
For PY-BY+9:		
6300	Net financing disbursements (financing accounts only)	
SCHEDULE H	STATUS OF GUARANTEED LOANS, PRESIDENTIAL POLICY	85.10
For PY-BY+4:		
21xx-23xx	Guaranteed loan data (liquidating and financing accounts)	
For PY-BY+9:		
6300	Net financing disbursements (financing accounts only)	
SCHEDULE I	STATUS OF CONTRACT AUTHORITY*	86.7
For PY-BY:		
0100	Balance, start of year	
02xx	New contract authority	
03xx	Rescissions, transfers, and other adjustments	
0400	Appropriation to liquidate contract authority	
0405	Application of surplus liquidating cash provided in previous years	
0500	Offsetting collections applied to liquidate contract authority	
0600	Balance of contract authority withdrawn	
0700	Balance, end of year	
0705	Surplus liquidating cash, end of year	
<i>Note: MAX generates this schedule automatically from data entered in MAX schedule P and schedule I line 0405.</i>		
SCHEDULE J	STATUS OF FUNDS	86.5
For PY-BY:		
01xx	Unexpended balance, start of year	
12xx-3299	Cash income during the year	
45xx-6599	Cash outgo during the year	
76xx0-7699	Adjustments	
87xx-8799	Unexpended balance, end of year	
9801-9900	Commitments against unexpended balance	
<i>Note: MAX generates schedule J from data entered in MAX schedules A, N, P, and R, and some lines of J.</i>		

MAX schedule and line number	Description	A-11 section number
SCHEDULE K	RECEIPTS, BASELINE ESTIMATES	81
For CY-BY+9:		
0000-00	Receipts	
13xx-03	Offsetting receipts from sales of commodities, property, or assets	
1512-03	Offsetting receipts from education and training	
2004-03	All other offsetting receipts	
SCHEDULE N	DATA ON UNAVAILABLE COLLECTIONS	86.6
For PY-BY:		
0199	Balance, start of year	
0200-0279	Receipts and offsetting receipts	
0280-0289	Offsetting collections	
0299	Total receipts and collections	
0400	Total: Balances and collections	
05xx	Appropriations	
0610	Unobligated balance returned to receipts	
0620	Reduction pursuant to Public Law xxx-xxx	
0799	Balance, end of year	
<i>Note: MAX generates this schedule from data entered in MAX schedules P and R and information entered by OMB.</i>		
SCHEDULE O	OBJECT CLASSIFICATION*	83
For PY-BY:		
x111-x130	Personal services and benefits	
x210-x260	Contractual services and supplies	
x310-x330	Acquisition of assets	
x410-x440	Grants and fixed charges	
x910-x930	Other	
9995	Below reporting threshold	
9999	Total new obligations	
<i>Note: Not required for credit financing accounts.</i>		
SCHEDULE P	PROGRAM AND FINANCING*	82
For PY-BY:		
00xx-1000	Obligations by program activity	
2140-2499	Budgetary resources available for obligation	
4000-7000	New budget authority (gross), detail	
7240-7502	Change in obligated balances	
8690-8700	Outlays (gross) detail	
8800-8896	Offsets	
8900-9000	Net budget authority and outlays	
9110-9202	Memorandum entries	

SECTION 79 -- THE BUDGET DATA SYSTEM

MAX schedule and line number	Description	A-11 section number
SCHEDULE Q	PERSONNEL SUMMARY*	86.1
For PY-BY: xx01	Full-time equivalent employment	
SCHEDULE R	RECEIPTS, PRESIDENTIAL POLICY	81
For PY-BY+9: 0000-00 13xx-03 1512-03 2004-03	Receipts Offsetting receipts from sales of commodities, property, or assets Offsetting receipts from education and training All other offsetting receipts	
SCHEDULE S	BASELINE ESTIMATES OF BUDGET AUTHORITY AND OUTLAYS	81
For CY-BY+1: 2199 9994	Unobligated balances (defense only) Outlays from sequestrable unobligated balances	
For CY-BY+9: 4300-5590 6250-6790 6890 6990 7xxx 8800-8896, 8890 9993 91xx 93xx 97xx-98xx	Discretionary budget authority Mandatory budget authority Discretionary spending authority from offsetting collections Mandatory spending authority from offsetting collections Limitations (memorandum entry) Offsets Number of beneficiaries (memorandum entry) (<u>Use only with OMB approval.</u> Applicable only to four accounts with social insurance administrative expenses.) Outlays (except outlays from offsetting collections and limitations) Outlays from offsetting collections Outlays from limitations	
<i>Notes:</i> <ul style="list-style-type: none"> • MAX generates budgetary resources for discretionary programs automatically for BY through BY+9 and outlays for CY-BY+9 from data input by agencies. • Not required for credit financing accounts. • Provide memorandum entries on outlays from end of PY balances (lines 9122, 9322, and 9822). 		
SCHEDULE T	BUDGET YEAR REQUESTS IN THOUSANDS OF DOLLARS	86.4
For BY: 1000	Net amount of budget year budgetary resources	
SCHEDULE U	LOAN LEVELS AND SUBSIDY DATA, PRESIDENTIAL POLICY	85.9
For PY-BY: 11xx 13xx 21xx 23xx	Direct loan levels Direct loan subsidy data Guaranteed loan levels Guaranteed loan subsidy data Administrative expense data	

MAX schedule and line number	Description	A-11 section number
35xx		
<i>Note: Required for program accounts only.</i>		
SCHEDULE W	GENERAL FUND CREDIT RECEIPT ACCOUNTS	
0101-01xx	Receipts	95.4
SCHEDULE Y	FEDERAL CREDIT DATA, BASELINE ESTIMATES	85.10
For CY-BY+4: 33xx	Agency debt held by the FFB	
For PY-BY+9: 6300	Net financing disbursement (financing accounts only)	

*Defense agencies must also report on BY+1 in the years they are required to submit a biennial budget request.

(b) *Summary of MAX line code and other changes.*

The following table list changes that will affect the FY 2003 Budget:

MAX LINE CODE CHANGES

MAX schedule, line code, and title		Change
<i>Analysis of Budget Authority and Outlays (A and S)</i>		
8800	Federal sources	New
8820	Interest on Federal securities	New
8825	Interest on uninvested funds	New
8840	Non-Federal sources	New
8845	Offsetting governmental collections	New
8895	Change in uncollected customer payments from Federal sources (unexpired)	Modify
8896	Portion of offsetting collections (cash) credited to expired accounts . .	Modify
<i>Character Classification (C)</i>		
1441-01	Direct costs to colleges and universities	Modify title
1442-01	Indirect costs to colleges and universities	Modify title
1461-xx	Climate change technology initiative	Delete
1464-xx	Networking and information technology R&D	Modify title
<i>Status of Direct Loans (G)</i>		
1112	Unobligated direct loan limitation (-)	Delete
1121	Limitation available from carry-forward	New
1142	Unobligated direct loan limitation (-)	New

SECTION 79 -- THE BUDGET DATA SYSTEM

MAX schedule, line code, and title		Change
1143	Unobligated limitation carried forward (P.L. xx) (-)	New
<i>Status of Guaranteed Loans (H)</i>		
2112	Uncommitted loan guarantee limitation	Delete
2121	Limitation available from carry-forward	New
2142	Uncommitted loan guarantee limitation	New
2143	Uncommitted limitation carried forward (P.L. xx) (-)	New
<i>Program and Financing (P)</i>		
4005, 6005	Appropriations (indefinite)	Delete
4025, 6025	Appropriations (special fund, indefinite)	Delete
4027, 6027	Appropriations (trust fund, indefinite)	Delete
4705, 6715	Borrowing authority (indefinite)	Delete
4905, 6615	Contract authority (indefinite)	Delete
5005, 6305	Reappropriation (indefinite)	Delete
5505, 6505	Advanced appropriations (indefinite)	Delete
6800, 6900	Spending authority from offsetting collections	Modify
6810, 6910	Change in uncollected customer payments from Federal sources (unexpired)	Modify
6815, 6915	Adjustment to uncollected customer payments from Federal sources . .	Delete
6854, 6954	Portion credited to expired accounts	Delete
6855, 6955	Portion of change in uncollected customer payments from Federal sources in expired accounts	Delete
7240, 7440	Obligated balance	Modify
7295, 7495	Uncollected customer payments from Federal sources	Delete
7299, 7499	Obligated balance	Delete
7400	Change in uncollected customer payments from Federal sources (unexpired)	Modify
7410	Change in uncollected customer payments from Federal sources (expired)	New
8895	Change in uncollected customer payments from Federal sources (unexpired)	Modify
8896	Portion of offsetting collections (cash) credited to expired accounts . .	Modify
<i>Note: Lines 4000-4300; 6000-6250; 4700-4790; 6710-6790; 4900-4990; 6610-6690; 5000-5300; 6300-6390; 5500-5590 and 6500-6590 will include both definite and indefinite amounts.</i>		
<i>Loan Levels and Subsidy Data, Presidential Policy (U)</i>		
1350, 2350	Upward reestimate subsidy budget authority	New
1359, 2359	Total upward reestimate budget authority	New
1360, 2360	Upward reestimate subsidy outlays	New
1369, 2369	Total upward reestimate subsidy outlays	New
1370, 2370	Downward reestimate subsidy budget authority	New
1379, 2379	Total downward reestimate budget authority	New
1380, 2380	Downward reestimate subsidy outlays	New
1389, 2389	Total downward reestimate subsidy outlays	New
<i>Information on Accounts that Submit Budget Execution Reports (Z)</i>		
Schedule Z is no longer required.		

NEW MAX A-11 TECHNICAL REQUIREMENTS FOR FY 2003 BUDGET (Fall 2001)

The following recommendations represent the minimum requirements for the upcoming Budget Season:

Windows 98	Windows NT 4.0	Windows 2000 Professional & Windows ME
<ul style="list-style-type: none"> • Year 2000 tested 486DX/66 MHz or higher Processor • 24 MB RAM; more memory improves performance • 12MB Free Hard Disk • 3.5" 1.44MB Floppy Disk or CD-ROM Drive • Your Agency's Internet capability (<i>Telnet</i> to the Internet <i>or</i> dial-up to a third-party Internet provider) 	<ul style="list-style-type: none"> • Year 2000 tested Pentium Processor • 16MB Minimum - 32MB is recommended • 12MB Free Hard Disk • 3.5" 1.44MB Floppy Disk or CD-ROM Drive • Your Agency's Internet capability (<i>Telnet</i> to the Internet <i>or</i> dial-up to a third-party Internet provider) 	<ul style="list-style-type: none"> • 133Mhz or higher Pentium-compatible Processor • 64MB RAM Minimum (2000 Professional) • 32MB RAM Minimum (Windows ME) • 12MB Free Hard Disk • 3.5" 1.44MB Floppy Disk or CD-ROM Drive • Your Agency's Internet capability (<i>Telnet</i> to the Internet <i>or</i> dial-up to a third-party Internet provider)

Getting the Software:

The MAX A-11 Software for FY 2003 will be available for download and installation from the MAX A-11 Web Site:

<http://www.whitehouse.gov/WH/EOP/OMB/MAX>

*Note that the site address is case sensitive. Please enter it exactly as shown into your Web browser.

The web site also contains general information regarding the status of the MAX system, an on-line MAX A-11 User's Guide, the hours of operation, who to call for help, schedules of classes, and scheduled deadlines as well as other pertinent MAX information and documents. If you do not have access to the Internet, you will be able to request a copy of the software on CD or diskette. More information regarding "how to get the software" will be forthcoming. Watch for details!

About Your Password:

When you log-on for FY 2003 President Budget, you will be required to set a new password. You must select a new password after 90 days and you may not repeat a previously used password. In order to set a new password, you must remember your old one! If you have forgotten your old one, you must call the EOP Computer Support office at the previously noted number for assistance.

About Your SecurID Card:

Please check the expiration date of your SecurID card. It is etched on the back of the card under the serial number. If that date is less than three months from now, and you have not received a letter asking for renewal information, please call the EOP Computer Support office at (202) 395-7370. Be prepared to give your FULL address, including mail stop information, room/suite numbers, and valid phone number where you can be reached.

About Who to Call:

Please keep the EOP Computer Support number handy! Those individuals serve as our front line support team and will refer your problem or question to the appropriate person. If you have questions specifically regarding the Technical Requirements for the upcoming Budget Season, please call EOP Computer Support, report your question and give a valid phone number where you or your Technical Support Staff can be reached.

(202) 395-7370

- 80.7 What rules apply to discretionary limitations on obligations?

Summary of Changes

Explains reclassification of changes under the BEA for direct spending programs (section 80.4).

80.1 What are the basic requirements?

OMB must produce baseline estimates by following the rules in section 257 of the Budget Enforcement Act of 1990 (BEA). These estimates are used for sequestration reporting purposes. Each agency, including the legislative and judicial branches, must submit estimates of budgetary resources, outlays, and receipts that project the CY levels into BY through BY+9, except as noted below. Government-sponsored enterprises do not have to submit baseline estimates.

Sections 80.2 through 80.7 describe the guidelines for the development of baseline estimates. You must provide baseline estimates for all programs conducted under current law. Report baseline data in the following MAX schedules:

- Schedule S (CY through BY+9) for data on budgetary resources and outlays (see section 81).
- Schedule Y (CY through BY+4) for credit liquidating and financing accounts (see section 85.10).
- Schedule K (CY through BY+9) for receipts data (see section 81).

The law provides explicit instructions on how to develop the baseline estimates. Some apply to all baseline estimates. However, most rules are specific to two categories of collections and spending:

- Those that are controlled through annual appropriations acts (discretionary spending); and
- Those that are controlled through authorizing legislation (direct spending and receipts).

The classification of collections and spending follow the criteria specified in the BEA. Consult your OMB representative if you have questions concerning BEA classification.

80.2 What general rules do I need to know?

The baseline is a projection of the current year (CY) levels of budgetary resources, outlays, and receipts into the outyears based on laws already enacted. The following rules apply to all baseline estimates:

- *Legislative proposals.* Legislative proposals are considered to be changes from current law. Do not reflect their budgetary effects in the baseline estimates.
- *Supplementals.* Include only supplementals associated with mandatory programs in the baseline.
- *Regulations, management initiatives, and administrative actions.* Include the effect of these, including planned regulations that are not final, in the baseline estimates, as long as they can be implemented without further legislation.
- *Reductions pursuant to a sequester order.* Reflect CY reductions resulting from sequestration in the baseline estimates without separate identification.
- *Credit programs.* Base the estimates for credit programs on enacted appropriations of subsidy budget authority for direct loans and guaranteed loan commitments (see section 85).

80.3 What rules apply to discretionary spending and collections?

The BEA requires the baseline estimates for discretionary spending and collections to be based on the levels provided in the most recent appropriations act or full-year continuing resolution (CR). If a part-year CR is in effect, base the estimates on the annualized level of the CR. Except for advance appropriations, the most recent appropriations act or full-year CR is normally for the current year. The BEA provides special rules for estimating the baseline for BY through BY+9, when no appropriations have been enacted.

(a) *Current year base.*

Estimates will equal the enacted current year amounts reported in MAX schedules A and R for accounts under transmittal code 0. Exclude proposed supplementals from the estimates. Consistent with the BEA scoring rules (see Appendix A), include the effects of enacted rescissions and transfers in the current year estimates. Score the rescission or transfer of unobligated balances to another account as a reduction in current year budget authority. Score transfers of unobligated balances into an account as increases in budget authority in the receiving account. You must separate budgetary resources into sequestrable and exempt (from sequester) components. You must then separate each of these components, except those related to spending authority from offsetting collections, into pay-related and non-pay portions. (See sections 81.3 and 83.8 for pay and non-pay definitions)

(b) *BY through BY+9 baseline estimates.*

In most cases, baseline estimates of budgetary resources equal the most recent full year appropriation (generally the CY level), adjusted for anticipated inflation using factors supplied by OMB.

You must make special adjustments for assumptions about expiring housing contracts and social insurance administrative expenses. For the four BEA-specified accounts with social insurance administrative expenses (the Federal hospital insurance trust fund, the supplementary medical insurance trust fund, the unemployment trust fund, and the rail industry pension fund), report estimates of the beneficiary population in MAX schedule S on line 9993. Affected agencies should contact their OMB representative for guidance in developing estimates for expiring housing contracts.

Use the instructions in subsections (c) and (e) below for accounts with advance appropriations and for offsetting collections.

Outlays from budgetary resources provided prior to the budget year should be the same in the baseline and in the Presidential policy estimates, unless policy proposals restrict or accelerate spending from such balances. New budgetary resources generally should outlay at a rate that is consistent with Presidential policy spendout rates.

MAX will automatically calculate the baseline estimates for discretionary budgetary resources and outlays (including outlays financed by offsetting collections) in MAX schedule S based on:

- The level of CY budgetary resources entered into MAX by agencies;
- Outlays from end of PY balances entered into MAX by agencies;
- CY and BY spendout rates entered into MAX by agencies; and
- Pay-related and non-pay deflators entered into MAX by OMB.

Section 81.2 and exhibits 81B and 81C explain how to enter information on outlays from end of PY balances and spendout rates into MAX.

(c) Advance appropriations.

If an account is completely funded through advance appropriations, the baseline estimate of new budgetary resources should equal the advance appropriation, not the CY inflated level. The last year of the advance appropriation becomes the base for calculating the baseline estimate for the remaining years, using the rules described in (b) above.

If an account is funded with both current and advance appropriations, inflate the current appropriation as described in (b) above; for the advance appropriation, follow the guidance in the paragraph above.

(d) Discretionary credit accounts.

The OMB subsidy model inflates CY subsidy budget authority using the annual adjustment factor for non-pay costs from the economic assumptions for the budget. The model derives subsidy outlays from the subsidy budget authority. The estimated subsidy rate for the BY should be a separate and distinct calculation from that done for the CY. The OMB subsidy model computes the subsidy rate using the economic assumptions for the budget. (See section 85.4 for instructions on calculating baseline subsidy estimates, including programs with negative subsidies.) We do not collect baseline direct loan obligations and guarantee commitments.

(e) Discretionary offsetting collections and receipts.

The baseline estimates should be consistent with the levels of budgetary resources assumed for the account conducting the activity that generates the collections. When the level of collections is independent of the appropriated level, reflect the level of activity anticipated under current law.

(f) *Multi-account appropriations.*

If an appropriation covers more than one account and does not specify the amount provided for each account, such as the limitation on administrative expenses for the Social Security Act, the distribution of the budget authority by account in the CY is the base for subsequent years. Inflate the CY amount by account to derive the budget authority for BY through BY+9.

(g) *Accounts with negative budget authority in the CY.*

If the budget authority for an account is negative in the CY, estimate the budget authority for BY through BY+9 as zero. If the account has negative budget authority in the CY because it is credited with discretionary offsetting collections and the collections exceed the discretionary appropriation provided to the account, assume the net budget authority of zero for BY through BY+9 will be composed of the "best guess" of offsetting collections under current law and an equal amount of new discretionary budget authority. Net outlays will equal the outlays estimated to result from the total spending authority for the account offset by any anticipated collections.

80.4 What rules apply to direct spending programs?

The BEA requires the estimates for budgetary resources provided in authorizing law and for appropriated entitlements to reflect the level of activity anticipated under current law, using the same economic and technical assumptions that are used for the Presidential policy estimates. Include the effect of changes to programs and activities directed by already enacted legislation (such as a change in a benefit formula that becomes effective in BY+2) in the year that the changes become effective. The following special rules apply:

- *Expiring authorizations.* Assume that programs that would expire under current law will expire, with one exception. If CY outlays are greater than \$50 million, assume the program will continue at current levels. However, assume an expiring provision of law (in contrast to the entire program) will expire if that assumption does not have the effect of terminating the basic program.
- *Veterans' compensation cost-of-living-adjustment (COLA).* Assume enactment of a COLA for veterans' compensation that is equal to the COLA required by law for veterans' pensions.

Affected agencies should contact their OMB representative for guidance.

The BEA requires that substantive changes to or restrictions on entitlement law or other mandatory spending law in appropriations laws (including changes in offsetting receipts or collections) be treated as changes in discretionary spending for the purposes of scoring those appropriations laws (see Appendix A). However, in the subsequent budget, OMB may decide to reclassify such changes, especially in accounts that are generally mandatory. If advised by OMB to reclassify the change, the mandatory spending entries for the account should reflect the change made in appropriations law. OMB will make a compensating adjustment to the discretionary caps.

80.5 What rules apply to mandatory collections?

Base estimates of mandatory receipts, offsetting receipts, and offsetting collections on current law. Also base collections affected by Federal pay rates on rates used for Presidential policy, not on the levels of

compensation assumed in the baseline for the pay portion of discretionary accounts. The estimates should assume that expiring provisions of law will expire, except that provisions providing for excise taxes dedicated to a trust fund will be assumed to continue at current levels.

80.6 What rules apply to mandatory supplemental requests?

Baseline estimates for mandatory supplemental requests will reflect *current year* baseline estimates of budget authority and the related outlays. Budget authority estimates for BY through BY+9 will be zero. However, you should reflect the spendout of current year budget authority, as appropriate, over the period BY through BY+9.

80.7 What rules apply to discretionary limitations on obligations?

Where limitations are established, including those established to report the effect of reductions pursuant to the G-R-H law, as amended (see section 81.4), provide baseline estimates of limitations for CY through BY+9. You do not have to provide baseline estimates for credit limitations because these limitations are not sequestrable.

Ex-81B Setting Up Outlay Calculations

Ex-81C Setting Up Outlay Calculations – Resource with Multiple Outlay Rates

Ex-81D Automatic Generation of Discretionary Outlays in Schedule A

Summary of Changes

Reminds agencies to use separate line entries when enacted rescissions and reductions of unobligated balances have a different outlay rate than the new budget authority in an account (section 81.2).

Automatically generates discretionary offsetting collections entries (lines 6890 and 8800 through 8845) using the same across-the-board increases as other budget authority. Users may overwrite these amounts as necessary (section 81.2).

Changes the line coding in MAX for programs subject to special sequestration rules under the BEA (section 81.3).

Clarifies that civilian and military pay includes both compensation and benefits (section 81.3).

Requires agencies to identify offsetting collections by source (e.g., Federal sources, interest, non-Federal sources), instead of aggregating (section 81.4).

Reminds agencies to use the entry for outlays from end of PY balances (line 9x22) to report the outlay impact of CY and BY balance transfers and adjustments (section 81.4).

81.1 What are the basic requirements?

MAX contains detailed information on budgetary resources, outlays, and receipts for *presidential policy* (schedules A and R) and *baseline* (schedules S and K).

SECTION 81 -- POLICY AND BASELINE ESTIMATES OF BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS

- Presidential policy data covers the period PY through BY+9.
- Baseline data covers the period CY through BY+9.
- Schedules A and S are used to report on budget authority and outlays.
- Schedules R and K are used to report on receipts.

OMB uses this information to prepare the budget documents. The baseline estimates are also used for scoring PAYGO legislation under the Budget Enforcement Act (BEA).

You must submit policy data for all accounts except credit financing accounts and Government-sponsored enterprises. You must submit baseline data for the regular budget schedule (transmittal code "0") of all accounts except for credit financing accounts and Government-sponsored enterprises. You must also submit baseline data for supplemental requests (transmittal code "1") that are classified as *mandatory* (such as *payments under entitlement programs*). Do not provide baseline estimates for other transmittals (codes "2", "3", "4", "5"), unless specifically requested by OMB.

Use the guidance in section 30.2 and 35 to develop the policy estimates. Use the guidance in section 80 to develop the baseline estimates. Sections 81.3 and 81.4 explain how you report data in schedules A, S, R and K.

81.2 What information is automatically calculated?

Exhibit 81A describes the relationships between schedules A, K, P, R, and S and indicates which data MAX automatically generates.

(a) *Automatic calculations and data loaded from Treasury.*

(1) *Outlays.* MAX automatically calculates *discretionary outlays (policy and baseline)* in schedules A and S for CY through BY+9 based on:

- The levels of budgetary resources reported;
- Outlay rates; and
- Outlays from end of PY balances.

You input outlays from end of PY balances as memorandum entries in schedule S and report outlay rates in schedules A and S using the separate MAX drop-down menu that is accessible for each budgetary resource, as described in the MAX A-11 User's Guide (see exhibits 81B and 81C). MAX uses this information to automatically generate the outlays from balances that are reported on line 9x21 of MAX schedules A and S. To support the automatic outlay generation feature in MAX, you must enter information developed using the method of calculation (i.e., the waterfall method) that is specified in this Circular and the MAX A-11 User's Guide (see exhibit 81D). As a general rule, you cannot override automatically generated discretionary outlay amounts. If you need to reflect separate outlay rates (e.g., for enacted rescissions and reductions of unobligated balances, pay/non-pay) within an account, report the budget authority and corresponding outlays from end of PY balances using a line sequence number in the range 01-39.

You can also use MAX's automatic outlay generation feature to calculate *mandatory outlays*. If you enter outlay rates in schedule S for mandatory resources, MAX will automatically generate the outlays in schedule S (baseline) and copy them to schedule A (policy). Remember to include information on outlays from end of PY balances if you use the automatic feature. You can override the automatically generated mandatory outlay amounts in schedule S.

If you want to generate separate discretionary outlays for certain programs within an account, report the budget authority and corresponding outlays from end of PY balances using a line sequence number in the range 40-79, as explained in the MAX A-11 User's Guide.

(2) *Budget authority and offsetting collections.*

- As a general rule, MAX automatically calculates *discretionary policy budget authority and offsetting collections entries* in schedule A through BY+9 for the years that are subject to across-the-board rules.
- MAX also automatically calculates *discretionary baseline budget authority and offsetting collections entries* in schedule S for BY through BY+9 based on the CY budgetary resources entered by the agency and inflation factors entered by OMB.
- For discretionary offsetting collections entries (lines 6890, 8800-8845), you may overwrite these amounts, if necessary, in schedules A and S.

(3) *Receipts.* Past year data will be loaded into schedule R from Treasury data. These amounts cannot be overridden.

(b) *Data copied by MAX from one schedule to another.*

(1) *From schedule S to schedule A.* MAX automatically copies the following data from schedule S (baseline) to schedule A (policy):

- Mandatory budgetary resources (budget authority and limitations) for CY through BY+9.
- Mandatory outlays for CY through BY+9.
- Memorandum information on outlays from end of PY balances (lines 9x22).

To change the policy estimates for these entries, you must revise the baseline estimates. Because of the automatic copy feature, you may wish to enter or revise data in MAX by updating schedule S before updating schedule A.

(2) *From schedule K to schedule R.* MAX automatically copies the mandatory baseline receipts data (offsetting and governmental) you enter in schedule K to schedule R. To change the policy estimates, you must revise the baseline estimates. Because of the automatic copy feature, you should update schedule K before schedule R.

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

(3) *From schedule A to schedule P.* MAX aggregates gross outlay data from schedule A and copies it to lines 86xx in the program and financing schedule (see section 82.6 and exhibit 82B). To change amounts on lines 86xx in schedule P, you must change the outlay data in schedule A. Because of the automatic copy feature, schedule A must be updated before you can complete schedule P.

81.3 What data classifications do I use to report the data?

In schedules A, S, R, and K, you report data through BY+9 using the data classifications specified below. Multiple entries are required when more than one classification applies to a budgetary resource, limitation, offset, or outlay. When inserting or revising data, you choose the appropriate line number, BEA category, and other classifications from a list provided on the MAX screen. In schedules A and S, you may make non-print notations on stub entries to document information reported (e.g., to clarify the nature of data entered when multiple lines of the same type are used). See the MAX A-11 User's Guide for details.

DATA CLASSIFICATIONS FOR SCHEDULES A, S, R, AND K

Classification	Description
SCHEDULE	Alpha character designation of the type of schedule in the MAX budget system that appears at the beginning of each schedule.
LINE NUMBER	For schedules A and S, a 4-digit code that indicates the data being reported (see section 81.4). For schedules K and R, a 6-digit code (xxxx-xx) that indicates the character classification (see sections 81.4 and 84.4). A line number appears on each line for which data are provided.
SUBFUNCTION	For accounts with a single subfunctional classification (see section 79.3), you can enter data without specifying the subfunction; MAX automatically provides the subfunction designation. For multifunction accounts, you must enter data under each of the appropriate subfunctions.
SEQUESTERABLE/ EXEMPT	Used to compute BEA sequesters. Indicates whether amounts are sequesterable or exempt. Use for: <ul style="list-style-type: none"> • Budget authority; • Unobligated balances (for defense only); • Limitations; and • Outlays. <p>Sequesterable means amounts not exempted by any provision of the BEA and, therefore, subject to a uniform percentage reduction, elimination of an automatic spending increase, or reduction under special rules. Applies to spending authority from offsetting governmental collections (from non-Federal sources) (see section 20.7).</p> <p>Exempt means amounts not subject to any reduction because the program, account, or resource type is specifically exempted by the BEA or other laws. The exempt category includes:</p> <ul style="list-style-type: none"> • Spending authority from offsetting collections from Federal sources; and • Spending authority from voluntary offsetting collections from non-Federal sources for goods and services (for example, national park entrance fees); and outlays from prior balances or from prior limitations for non-defense accounts. <p><i>Only applies to schedule K and S.</i></p>

SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS

Classification	Description																														
	<p>In addition, the accounts listed below have special sequestration rules under the BEA that specify the maximum sequester that can be applied to these accounts and the method for calculating the maximum sequester. For these accounts only, use the special coding provided below. For example, the maximum sequester for the mandatory portion of Medicare is 4%; the budget authority and outlays that are subject to this special rule should be divided between the sequestrable 4% amount (entered on a line coded M) and the 96% that is exempt (entered on a line coded B) because of the special rule. If any portion of these accounts is not subject to the special rule, the line code for that portion should be entered on a line coded S or E, as appropriate.</p> <table> <tr> <th>Program amounts</th><th>Code</th></tr> <tr> <td>Subject to across-the-board sequester.....</td><td>S</td></tr> <tr> <td>Exempt from across-the-board sequester.....</td><td>E</td></tr> <tr> <td colspan="2"><i>Automatic Spending Increase (ASI) Accounts:</i></td></tr> <tr> <td>Amount subject to special rule sequester.....</td><td>A</td></tr> <tr> <td colspan="2"><i>Department of Education:</i></td></tr> <tr> <td>Federal family education loan program account (91-0231).....</td><td>L</td></tr> <tr> <td colspan="2"><i>Department of Health and Human Services:</i></td></tr> <tr> <td>Foster care and adoption assistance (75-1545).....</td><td>F</td></tr> <tr> <td>Medicare, amount subject to 4% sequester limit.....</td><td>M</td></tr> <tr> <td>Other health programs, amount subject to 2% sequester limit.....</td><td>H</td></tr> <tr> <td>Exempt portion of medical accounts due to special rule.....</td><td>B</td></tr> <tr> <td colspan="2"><i>Department of Veterans Affairs:</i></td></tr> <tr> <td>Medical care (36-0160), amount subject to 2% sequester.....</td><td>H</td></tr> <tr> <td>Exempt portion of medical accounts due to special rule.....</td><td>B</td></tr> </table>	Program amounts	Code	Subject to across-the-board sequester..... CIVILIAN PAY/ MILITARY PAY/ NON-PAY <i>Only applies to schedule S.</i>	<p>Indicates whether amounts are used to fund personnel compensation and benefits or other activities.</p> <p>Applies to baseline budget authority (other than spending authority from offsetting collections) and limitations.</p> <p>Civilian pay means the amount of new budgetary resources used to fund personnel compensation and benefits for civilian personnel, consistent with the definitions for object classes 11.1 through 11.5 and 12.1.</p> <p>Military pay means the amount of new budgetary resources used to fund personnel compensation and benefits for military personnel, consistent with object classes 11.7 and 12.2.</p> <p>Amounts designated as pay should reflect personnel compensation financed from discretionary budget authority or limitations only.</p>																														

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

Classification	Description
	<i>Non-pay</i> means the amount of new budgetary resources not used to fund personnel compensation. Applies to mandatory budget authority even if it funds personnel compensation.
BUDGET ENFORCEMENT CATEGORY/ SUBCATEGORY/ JURISDICTION/ USER FEE INDICATOR	<p>Indicates:</p> <ul style="list-style-type: none"> • BEA category (i.e., discretionary, mandatory, net interest, governmental receipt); • Subcategory (i.e., emergency, user fees, asset sales, third scorecard, modification to a mandatory account, conservation spending, highway, mass transit); • Jurisdiction (appropriations or authorizing committee); and • Whether the amount is a user fee. <p>Report data by the categories listed in the next table, "Summary of BEA Data Classifications." Use multiple entries if more than one classification applies to the budgetary resources and outlays in an account.</p> <p>Applies to all line entries <i>except</i> the number of beneficiaries (line 9993).</p> <p>In most cases, if an account is classified as discretionary under the BEA, you classify any spending authority from offsetting collections (line 6890), the offsetting collections from which they are derived (lines 8800-8896), and the outlays from the offsetting collections (line 93xx) as <i>discretionary</i>. Likewise, you classify these amounts as <i>mandatory</i> in accounts designated as mandatory under the BEA, except for administrative expenses, which are classified as discretionary. Obtain prior OMB approval if you want to split the data reported on these lines between discretionary and mandatory classifications.</p> <p>All discretionary resources are under the jurisdiction of appropriations committees. The classification for mandatory resources differentiates between appropriations and authorizing committee jurisdiction.</p>

SUMMARY OF BEA DATA CLASSIFICATIONS

If the resource is classified by the BEA as ...	And is controlled by the ...	And the following conditions apply ...	Then the data classification is ...
Discretionary	Appropriations committee	None of the conditions described below applies.	<p>DISCRETIONARY</p> <p><i>This category includes spending authority that requires appropriations committee action and the associated outlays, as well as receipts made available through action by appropriations committees in discretionary accounts.</i></p>

SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS

If the resource is classified by the BEA as ...	And is controlled by the ...	And the following conditions apply ...	Then the data classification is ...
			<i>Do not use this category if amounts can be classified in any of the other discretionary categories described below.</i>
		The amounts include user fees .	DISCRETIONARY, USER FEES <i>Only applies to offsetting collections credited to expenditure accounts (line 8890 in schedules A and S) and to offsetting receipts (in schedules R and K).</i>
		The amounts include emergency funding (i.e., funding that is proposed to be designated as emergency by the President and Congress in statute).	DISCRETIONARY, EMERGENCY <i>Only applies to new emergency funding proposed in the budget. Use only with OMB approval.</i>
		The amounts include asset sales enacted in an appropriations act that cannot be counted for BEA scoring (i.e., those where the net financial cost to the Government is a loss (see Appendix A, rule 15)).	DISCRETIONARY, ASSET SALES <i>Use only with OMB approval.</i>
		The amounts are under the discretionary highway category of the BEA, as amended by the Transportation Equity Act for the 21 st Century (P.L. 105-178).	DISCRETIONARY, HIGHWAY <i>Classify amounts in excess of the highway category spending cap as “discretionary” not as “discretionary, highway.”</i>
		The amounts are under the discretionary mass transit category of the BEA, as amended by the Transportation Equity Act for the 21 st Century (P.L. 105-178).	DISCRETIONARY, MASS TRANSIT <i>Classify amounts in excess of the mass transit category spending cap as “discretionary” not as “discretionary, mass transit.”</i>
		The amounts are under the conservation spending category of the BEA, as amended by the Department of the Interior and Related	DISCRETIONARY, CONSERVATION SPENDING

BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

If the resource is classified by the BEA as ...	And is controlled by the ...	And the following conditions apply ...	Then the data classification is ...
		Agencies Appropriations Act, 2001 (P.L. 106-291).	
		Appropriations action modifies the spending authority or receipts in an otherwise mandatory account.	DISCRETIONARY, MODIFICATION OF A MANDATORY ACCOUNT <i>Does not apply to baseline estimates. Use only with OMB approval.</i>
Mandatory	Appropriations committee	None of the conditions described below applies.	MANDATORY, APPROPRIATIONS COMMITTEE <i>Do not use this category if amounts can be classified in any of the other mandatory categories described below.</i>
		The amounts include <i>user fees</i> .	MANDATORY, USER FEES, APPROPRIATIONS COMMITTEE <i>Only applies to offsetting collections credited to an expenditure account (line 8890 in schedules A and S) and to offsetting receipts (in schedules R and K).</i>
		The amounts include <i>emergency funding</i> (i.e., funding that is proposed to be designated as emergency by the President and Congress in statute).	MANDATORY, EMERGENCY, APPROPRIATIONS COMMITTEE <i>Use only with OMB approval.</i>
		The amounts result from proposed legislative changes to mandatory budget authority, outlays or receipts that are not scored as PAYGO or subject to discretionary limits under the BEA. Includes changes that are “level of effort” changes, or when the level of receipts is dependent upon the amount of annual appropriations.	MANDATORY, THIRD SCORECARD, APPROPRIATIONS COMMITTEE <i>Does not apply to schedules K or S.</i>
	Authorizing committee	None of the conditions described below applies.	MANDATORY, AUTHORIZING COMMITTEE <i>Do not use this category if amounts can be classified in any of the other mandatory categories described below.</i>

SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS

If the resource is classified by the BEA as ...	And is controlled by the ...	And the following conditions apply ...	Then the data classification is ...
		The amounts include <i>user fees</i> .	MANDATORY, USER FEES, AUTHORIZING COMMITTEE <i>Only applies to offsetting collections credited to an expenditure account (line 8890 in schedules A and S) and to offsetting receipts (in schedules R and K).</i>
		The amounts include <i>emergency funding</i> (i.e., funding that is proposed to be designated as emergency by the President and Congress in statute.)	MANDATORY, EMERGENCY, AUTHORIZING COMMITTEE <i>Use only with OMB approval.</i>
		The amounts include <i>asset sales</i> that are enacted in an authorization act that cannot be counted for BEA scoring (i.e., those where the net financial cost to the Government is a loss (see Appendix A, rule 15)).	MANDATORY, ASSET SALES, AUTHORIZING COMMITTEE <i>Use only with OMB approval.</i>
		The amounts result from proposed legislative changes to mandatory budget authority, outlays, or receipts that are not scored as PAYGO or subject to discretionary limits under the BEA.	MANDATORY, THIRD SCORECARD, AUTHORIZING COMMITTEE <i>Does not apply to schedules K or S.</i>
Net interest		None of the conditions described below applies.	NET INTEREST <i>Applies to budget authority, outlays, and offsetting receipts included in the net interest functions (function 900).</i>
		The amounts result from proposed legislative changes to interest budget authority, outlays, or receipts under authorizing committee jurisdiction that are not scored as PAYGO or subject to discretionary limits under the BEA.	NET INTEREST, THIRD SCORECARD <i>Does not apply to schedules K or S.</i>

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

If the resource is classified by the BEA as ...	And is controlled by the ...	And the following conditions apply ...	Then the data classification is ...
Governmental receipts	Authorizing committee	None of conditions described below applies.	GOVERNMENTAL RECEIPTS <i>Applies to governmental receipts in schedules K and R.</i>
		The amounts are user fees included in governmental receipts accounts.	GOVERNMENTAL RECEIPTS, USER FEES <i>Applies to governmental receipts in schedules R and K.</i>
		The amounts result from proposed legislative changes to Governmental receipts under authorizing committee jurisdiction that are not scored as PAYGO or subject to discretionary limits under the BEA.	GOVERNMENTAL RECEIPTS, THIRD SCORECARD <i>Applies to governmental receipts in schedule R; does not apply to schedule K.</i>
	Appropriations committee	The amounts are not user fees and result from appropriations action modifying Governmental receipts.	DISCRETIONARY MODIFICATION OF GOVERNMENTAL RECEIPTS <i>Applies to governmental receipts in schedule R; does not apply to schedule K. Use only with OMB approval.</i>
		The amounts are user fees and result from appropriations action modifying Governmental receipts.	DISCRETIONARY MODIFICATION OF GOVERNMENTAL RECEIPTS, USER FEES <i>Applies to governmental receipts in schedule R; does not apply to schedule K. Use only with OMB approval.</i>

81.4 What line codes do I use for A, S, R, and K?

(a) Budgetary resources.

The line numbers indicate the type of budgetary resource and whether it is discretionary or mandatory. The following table indicates the line numbers used to report budgetary resources. The lines apply to schedules A and S unless otherwise specified.

SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS

BUDGETARY RESOURCES

Entry	Description*
2199 <i>Only applies to schedule S</i>	Sequestrable unobligated balances (defense only). Report for CY and BY+1 the sequestrable unobligated balances of budgetary resources that became available in previous years. Use only for accounts in function 050, national defense. Amounts reported on line 2199 should be consistent with the sum of entries on lines 21xx of the program and financing schedule.
4300-5590	Discretionary budget authority. Use total lines (lines 4300, 4790, 4990, 5300, 5590) to report the appropriate amounts from the program and financing schedule for each applicable type of authority (see section 82.3). Use separate lines to report rescissions and reductions of unobligated balances if a different outlay rate is needed.
6250-6790	Mandatory budget authority. Use total lines (lines 6250, 6390, 6490, 6590, 6690, or 6790) to report the appropriate amounts from the program and financing schedule for each applicable type of authority (see section 82.3).
6890	Discretionary spending authority from offsetting collections. Use line 6890 to report the appropriate amounts from the program and financing schedule (see section 82.3).
6990	Mandatory spending authority from offsetting collections. Use line 6990 to report the appropriate amounts from the program and financing schedule (see section 82.3).
7xxx <i>Memorandum entry</i>	<p>Limitations. Includes enacted or proposed limitations on administrative expenses and de facto limitations established as a result of sequestration under the BEA. Also includes limitations on obligations enacted in authorizing legislation for certain transportation programs in the absence of limitations enacted in appropriations acts. See section 81.4(b) for the coding scheme for limitations.</p> <p>Mandatory budget authority that is subject to a discretionary limitation on obligations set in an appropriations act is scored as discretionary budget authority rather than as a limitation for all affected accounts except trust fund accounts in the Department of Transportation.</p> <p>Baseline data are not required for loan limitations.</p>
9993 <i>Memorandum entry</i> <i>Only applies to schedule S</i>	Number of beneficiaries (in thousands). Report the annual average number of beneficiaries that are served by Federal hospital insurance, supplementary medical insurance, unemployment insurance, and rail industry pension fund programs. MAX uses these data to generate discretionary baseline budget authority for administrative expenses for these programs.

*Do not report baseline data (schedule S) for the PY.

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

(b) Limitations.

MAX includes data on limitations:

- For selected accounts where limitations on administrative expenses are enacted or proposed; and
- Where de facto limitations are established as a result of sequestration under the BEA.

The line numbers distinguish between types of limitations (e.g., limitation on program level, direct loan) and indicate the amount of the limitation and the associated outlays. The limitation(s) applicable to an account must be specified on the BAT file (see section 79.1) before you can report limitation data in MAX.

Budget year limitation amounts should correspond to the limitation language proposed in the budget. Current year limitation amounts should correspond to the enacted limitation language. For accounts with limitations on direct loan obligations and loan guarantee commitments, the limitation amounts should tie to the amounts reported in MAX schedules G and H through BY+4 (see section 85.10).

When more than one limitation is applicable, report each one separately. Present any supplemental requests involving limitations in a schedule under a separate transmittal code, even if a separate program and financing schedule is not required.

Show limitation amounts on a presequester basis, and report the effects of any reductions pursuant to the BEA separately. Show defacto limitations as if they were in place before the sequester. De facto limitations resulting from sequestration of the BEA law will be reported only for PY and CY, as applicable.

Credit limitations should be reported in the program account. You do not need to report baseline data for credit limitations because these limitations are not sequestrable.

Mandatory budget authority that is subject to a discretionary limitation on obligations is treated as discretionary budget authority rather than as a limitation for all affected accounts, except trust fund accounts in the Department of Transportation.

The following table indicates the line numbers used to report limitations. The lines apply to schedules A and S unless otherwise specified.

LIMITATIONS

Entry	Description*
Xxxx	For the first digit, use: <ul style="list-style-type: none">• 7 -- to report the amount of the limitation; or• 9 -- to report the outlays associated with the limitation.

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

Entry	Description*
<i>Do not report outlays for limitations on loan guarantee commitments.</i>	
xXxx	<p>For the second digit, use:</p> <ul style="list-style-type: none"> • 0 -- to report the amount of the limitation; • 9 -- to report BEA reductions in limitations; • 7 -- to report outlays from new limitations (i.e., from a limitation in the year the limitation is enacted or proposed); or • 8 -- to report outlays from prior limitations (i.e., from limitation that were enacted in prior years).
<i>Show outlays from limitations on a post-sequester basis.</i>	
xxXx	<p>For the third digit, use:</p> <ul style="list-style-type: none"> • 0 -- to indicate the limitation was not established as a result of the BEA; or • 1 -- to indicate de facto limitations established as a result of the BEA.
<i>For outlays, use "0" in all cases.</i>	
xxxX	<p>The fourth digit identifies the specific limitation pertaining to the account and will be assigned by OMB as follows:</p> <ul style="list-style-type: none"> • 1 through 5 -- for limitations on administrative and other expenses; • 6 -- for limitations on program level (obligations); • 7 -- for limitations on direct loan activity; • 8 -- for limitations on loan guarantee commitments; or • 9 -- for other purposes, as determined by OMB.
<i>xxx7 and xxx8 only apply to schedule A.</i>	

*Do not report baseline data (schedule S) for the PY.

(c) *Offsets.*

Provide data on offsetting collections (i.e., cash credited to the account) and changes in receivables and unpaid, unfilled orders from Federal sources for all accounts with spending authority from offsetting collections (lines 6890 or 6990). The following table indicates the line numbers used to report offsets. The lines apply to schedules A and S.

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

OFFSETS

Entry	Description*
	Offsetting collections (cash) from: (see section 82.6 for line definitions)
8800	Federal sources
8820	Interest on Federal securities
8825	Interest on uninvested funds
8840	Non-Federal sources
8845	Offsetting governmental collections (from non-Federal sources)
8890	Total offsetting collections (cash)
8895	Change in uncollected customer payments from Federal sources (unexpired
8896	Portion of cash collections credited to expired accounts (-)

* Do not report baseline data (schedule S) for the PY. MAX will automatically calculate line 8890 (the sum of lines 8800-8845).

(d) Outlays.

The line numbers indicate the source of the outlays as follows:

- New budget authority (line 9111) or balances of budget authority made available in prior years (line 9121);
- New spending authority from offsetting collections (line 9311) or balances of spending authority from offsetting collections from prior years (line 9321); or
- New limitations (line 970x) or balances of limitations from prior years (line 980x).

For discretionary programs, you must report outlays from end of PY balances as memorandum (non-add) entries in schedule S through BY+9. MAX will automatically copy this information to schedule A and use it (along with the outlay rates you provide) to calculate discretionary policy and baseline outlay estimates. Specifically, MAX will use the data entered for these memorandum entries (lines 9122, 9322, or 9822) to calculate the corresponding outlays from balances (lines 9121, 9321, and 98xx). If you enter these data for mandatory programs, along with outlay rates, MAX will calculate the corresponding outlays. However, you may override and change the automatically calculated mandatory outlays.

The total gross outlays reported for PY through BY in schedule A (i.e., the sum of lines 91xx through 98xx, excluding memorandum entries) must be consistent with those reported in MAX schedule P on line 7320. The distribution of PY outlays between those from new budget authority and those from balances of prior authority should be available from accounting records. Estimate the distribution of outlays for CY through BY+9 between those from new budget authority and those from balances based on experience in the timing of outlays for the respective obligations.

The following table indicates the line numbers used to report outlays. The lines apply to schedules A and S unless otherwise specified.

OUTLAYS

Entry	Description
9111	<p><i>Outlays from new authority.</i> The outlays from new budget authority for that year. These outlays may not exceed the sum of budget authority entries in the program and financing schedule (lines 40xx through 67xx) for that year.</p> <p>Exclude outlays from new limitations reported on line 97xx and outlays from new spending authority from offsetting collections reported on line 93xx.</p>
9121	<p><i>Outlays from balances.</i> The outlays from balances (both obligated and unobligated) of budget authority brought forward from the previous year. The sum of outlays on lines 9121 and 9221 may not exceed balances at the start of the year (lines 21xx and 72xx of schedule P), plus or minus adjustments in those balances during the year (lines 2221, 2222, 7331, 7332, and 7340 of schedule P).</p> <p>Exclude outlays from prior limitations reported on line 98xx and outlays from balances of spending authority from offsetting collections reported on line 9321.</p> <p>In schedule S, all outlays from prior year balances of non-defense accounts are classified as exempt from sequester. For defense accounts, report outlays from sequestrable unobligated balances on line 9994 in schedule S, as appropriate.</p>
9122 <i>Memorandum entry</i>	<p><i>Outlays from end of PY balances.</i> The outlays that will occur each year (CY-BY+9) from balances of budget authority made available prior to the current year. Do not report outlays from new budget authority provided in CY-BY+9.</p> <p>Include outlay impact (+ or -) of balance transfers (lines 2221, 2222, 7331, 7332 in schedule P) and adjustments in expired accounts (line 7340 in schedule P).</p> <p>Exclude outlays from end of PY balances of prior limitations reported on line 9822 and outlays from end of PY balances of prior spending authority from offsetting collections reported on line 9322.</p> <p>MAX will copy the data entered in schedule S to schedule A and use it to calculate discretionary outlays from balances on line 9121.</p>

**SECTION 81 -- POLICY AND BASELINE ESTIMATES OF
BUDGET AUTHORITY, OUTLAYS, AND RECEIPTS**

Entry	Description
9311	<i>Outlays from new spending authority from offsetting collections.</i> The outlays from new spending authority from offsetting collections becoming available in that year. These outlays cannot exceed the total amount reported on lines 68xx and 69xx of the program and financing schedule for that year.
9321	<i>Outlays from balances of spending authority from offsetting collections.</i> The outlays from balances (both obligated and unobligated) of spending authority brought forward from a previous year.
9322 <i>Memorandum entry</i>	<p><i>Outlays from end of PY balances of spending authority from offsetting collections.</i> The outlays that will occur each year (CY-BY+9) from balances of spending authority from offsetting collections made available prior to the current year. Do not report outlays from new spending authority provided in CY through BY+9.</p> <p>Include outlay impact (+ or -) of balance transfers (lines 2221, 2222, 7331, 7332 in schedule P) and adjustments in expired accounts (line 7340 in schedule P).</p> <p>Exclude outlays from end of PY balances of budget authority reported on line 9122 and outlays from end of PY balances of prior limitations reported on line 9822.</p> <p>MAX will copy the data entered in schedule S to schedule A and use it to calculate discretionary outlays from balances on line 9321.</p>
970X	<i>Outlays from new limitations.</i> The outlays from new limitations (i.e., outlays from limitations in the year the limitations were enacted or proposed), where “X” indicates the specific limitation involved. Include outlays from spending authority from offsetting collections that are controlled through new limitations.
980X	<i>Outlays from prior limitations.</i> The outlays from prior limitations (i.e., outlays from limitations that were enacted in prior years), where “X” indicates the specific limitation involved. Include outlays from spending authority that are controlled through prior limitations. In schedule S, classify outlays from prior limitations as exempt from sequester.
9822 <i>Memorandum entry</i>	<p><i>Outlays from end of PY balances of prior limitations.</i> The outlays that will occur each year (CY-BY+9) from balances of limitations that were enacted prior to the current year. Do not report outlays from limitations enacted or proposed for CY through BY+9.</p> <p>Exclude outlays from end of PY balances of budget authority reported on line 9122 and outlays from end of PY balances of spending authority from offsetting collections reported on line 9322.</p> <p>MAX will copy the data entered in schedule S to schedule A and use it to calculate discretionary outlays from prior limitations balances on line 98xx.</p>
9994 <i>Memorandum entry</i>	<p><i>Outlays from sequestrable unobligated balances.</i> Report only for accounts in function 050, national defense.</p> <p><i>Only applies to schedule S (for CY through BY+1).</i></p>

*Do not report baseline data (schedule S) for the PY.

(e) Receipts data

You must report data on all collections deposited in receipt accounts (i.e., receipts and offsetting receipts) in schedules R and K. The line numbers for offsetting receipts are also used to designate receipt character classification (see section 84.4). Only one character classification (line number) is valid for each receipt account. The following table indicates the line numbers used to report receipts in schedules K and R:

RECEIPTS

Entry	Title	Description*
0000-00	<i>Receipts</i>	Report all collections classified as receipts (see section 20.7).
	<i>Offsetting receipts:</i>	Report all offsetting receipts based on the character classification of the receipts (see section 84.4). <i>Most offsetting receipts will be reported on line 2004-03.</i>
1330-03	Proceeds from sale of commodities	
1340-03	Receipts from sales of property or assets	
1352-03	Receipts from other physical assets	
1512-03	Receipts for education and training	
2004-03	All other offsetting receipts	

*Baseline data (schedule K) are not reported for the PY.

Relationships Between Schedules A, K, P, R, and S

Relationships between some MAX schedules have implications for the way in which users revise data in the MAX database. This explanation provides some basic tips for updating MAX, based on the way data are copied by MAX from one schedule to another. Although there are many ways to revise the database, the following approach takes advantage of the automatic copy features in MAX.

In updating the database, agencies usually complete the PY column before entering data for CY and beyond. As a general rule, users should update PY data in schedule P and, since MAX copies some schedule A data to schedule P, revise the PY column of schedule A before updating other data. For CY through BY+9, users should revise schedule S before updating schedule A, since MAX copies some schedule A data from schedule S. Likewise, since MAX copies some schedule K data to schedule R, update schedule K before schedule R.

SCHEDULE P (PROGRAM AND FINANCING SCHEDULE)

For PY:

- PY outlays are automatically loaded into the net outlays line (line 9000) from the *Treasury Annual Report Appendix*.¹
- Other PY data (e.g., start and end of year unobligated and obligated balances, etc.) should be consistent with the corresponding data reported to Treasury.
- PY end of year balances are copied to the CY column and provide a good starting point for beginning to revise the detail in this column. Note that gross outlay data for schedule P (lines 86xx) are imported from schedule A; they cannot be entered directly in schedule P.

Before updating CY and BY, agencies may wish to revise schedules S and A, as follows.

SCHEDULE S (BASELINE BUDGET AUTHORITY AND OUTLAYS)

For CY-BY+9:

- Mandatory baseline budget authority, limitations, and outlays reported under transmittal code 0 must be entered in schedule S and are copied to schedule A.
- You may use MAX to calculate mandatory baseline outlays through BY+9. Enter the mandatory budgetary resources for CY through BY+9, CY and BY outlay rates, and outlays from end of PY balances of mandatory resources (9x22) to generate mandatory baseline outlays.
- MAX calculates discretionary baseline budget authority and outlays through BY+9. Enter CY discretionary budgetary resources, CY and BY outlay rates, and outlays from end of PY balances of discretionary budgetary resources to generate discretionary baseline estimates.
- Outlays from end of PY balances of budgetary resources (lines 9x22) are copied to schedule A. MAX uses these data to calculate discretionary outlays from balances (lines 9x21) in schedules A and S.

SCHEDULE A (POLICY BUDGET AUTHORITY AND OUTLAYS)

For PY:

- Enter data for mandatory and discretionary policy estimates directly into schedule A.

For CY-BY+9:

- Mandatory policy estimates in schedule A are copied from schedule S; to revise amounts in schedule A, change the amounts in schedule S.
- MAX calculates discretionary policy budget authority as well as offsetting collections entries through BY+9. Users may overwrite these amounts for spending authority from offsetting collections (line 6890).
- MAX calculates discretionary policy outlays through BY+9. Enter discretionary budgetary resources for CY-BY+4 and CY and BY outlay rates. Outlays from end of PY balances of discretionary resources (lines 9x22) must be entered in schedule S, are copied to schedule A, and are used to calculate discretionary policy outlays from balances (lines 9x21).

For PY-BY:

- Outlay data in schedule A will be copied to lines 86xx in schedule P.

SCHEDULE K (BASELINE RECEIPTS)

For CY-BY+9:

- Mandatory current law baseline receipts must be entered in schedule K under transmittal code 0 and are copied to schedule R.
- Other baseline receipts entered in schedule K are not copied to schedule R.

SCHEDULE R (POLICY RECEIPTS)

For PY:

- PY receipt data are automatically loaded in receipt accounts from Treasury data.¹

For CY-BY+9:

- Mandatory current law policy receipts in schedule R are copied from schedule K; to revise amounts in schedule R, change the amounts in schedule K.²
- Other policy receipts can be entered directly to schedule R.

¹PY data on these lines cannot be revised by agencies. If an agency does not agree with the net outlay or receipt amounts loaded into MAX, an explanation of the differences should be submitted to the agency's OMB representative.

²Applies to transmittal code 0 only. Data for other transmittal codes are entered directly in schedule A or R, as appropriate.

Setting Up Outlay Calculations

S-4300 01 Appropriation (total)
Discretionary

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
CY Rates ¹	5.155	44.43	20.16	13.87	10.88	2.85
BY Rates ²	10.12	54.13	20.10	10.83	1.50	1.32

	Year 7	Year 8	Year 9	Year 10	Year 11	Total ³
CY Rates ¹	1.15	.75	.50	.25	.005	100.0
BY Rates ²	1.05	.90	.05	---	---	100.0

S-6890 01 Spending authority from offsetting collections (total)
Discretionary

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
CY Rates ¹	100.0	---	---	---	---	---
BY Rates ²	95.0	5.00	---	---	---	---

	Year 7	Year 8	Year 9	Year 10	Year 11	Total ³
CY Rates ¹	---	---	---	---	---	100.0
BY Rates ²	---	---	---	---	---	100.0

¹ Enter the outlay rates for the budgetary resources provided in the current year. For this purpose, Year 1 represents CY, Year 2 represents BY, etc. Outlay rates must be provided for each type of budgetary resource. *Amounts will be reported as percentages, with the option to include up to six decimal places.*

² Enter the outlay rates for the budgetary resources provided in the budget year. For this purpose, Year 1 represents BY, Year 2 represents BY+1, etc. Outlay rates must be provided for each type of resource. *Amounts will be reported as percentages, with the option to include up to six decimal places.*

³ Outlay rates should total 100 percent unless the budget authority does not spend out within eleven years; the total should never exceed 100 percent.

Note: Agencies have the option of using MAX to automatically calculate mandatory outlays.

Setting Up Outlay Calculations -- Resource with Multiple Outlay Rates

Use multiple line sequence numbers when you have multiple outlay rates (e.g., reductions or rescissions of unobligated balances) or want to generate separate outlay data (see Exhibit 81D).

Automatic Generation of Discretionary Outlays in Schedule A

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Table of Contents*Overview*

- 82.1 What is the purpose of the program and financing schedule and how is it organized?

Detailed Guidance on the Program and Financing Schedules

- 82.2 How do I report obligations?
 82.3 How do I report the budgetary resources available for obligation?
 82.4 How do I report obligated balances?
 82.5 How do I report outlays?
 82.6 How do I show net budget authority and outlays?
 82.7 What additional information must I report on schedule P?

Special Requirements

- 82.8 How do I present enacted rescissions and reductions of budget authority?
 82.9 How do I present rescission proposals?
 82.10 How do I present supplemental appropriations requests and items proposed for later transmittal?
 82.11 How do I present transfers of resources?
 82.12 How do I present transfers in the estimates?
 82.13 How do I present merged accounts and consolidated schedules?
 82.14 How do I present annual limitations on trust or revolving funds?
 82.15 How should I treat allocation accounts?
 82.16 How do I present credit financing accounts?
 82.17 What actuals in the P&F are imported from the actuals I reported to Treasury?
 82.18 Do the actuals I report in the P&F need to tie to the actuals I reported to Treasury?
 82.19 What do I do if I do not agree with the PY amount on line P 9000 "Outlays (net)"?
 82.20 What do I do if I do not agree with other PY amounts imported from Treasury?

- Ex-82A Relationships between Selected Program and Financing Lines (MAX Schedule P)
 Ex-82B Automatic Generation of MAX Schedule P Data

Summary of Changes

Drops the distinction between definite and indefinite authority (section 82.3).

Clarifies the treatment of transfers, rescissions, and reductions (section 82.3).

Drops the requirement to distinguish general from special fund amounts for selected lines using line serial numbers (sections 82.3 and 82.4).

Modifies the presentation of spending authority from offsetting collections and the calculation of net budget authority (sections 82.3 and 82.6).

Simplifies the presentation of obligated balances (section 82.4).

82.1 What is the purpose of the program and financing schedule and how is it organized?

This Appendix schedule presents information on agency programs, the allocation of budgetary resources by activity, the status of those resources, and spending patterns. It is used to:

- Analyze and evaluate the estimates;
- Compare enacted funding levels to the President's request;
- Relate budget formulation to budget execution (estimates to actuals); and
- Identify programmatic and historical trends.

The schedule covers PY through BY, except Defense agencies must also report on BY+1 in the years they are required to submit a biennial budget request. MAX generates schedule P from data that you enter:

- Directly into schedule P;
- Into schedule A; and
- Into Treasury systems for preparation of the Treasury Annual Report.

The MAX system automatically generates totals and subtotals, start of year balances, and selected other entries, including net outlays for the past year (see exhibit 82B). In some cases, you can override the generated amounts; in others, the amounts are protected. Section 79 describes the MAX budget system, and the MAX A-11 User's Guide provides detailed information on the system.

The P&F consists of the following parts:

- | | |
|---|-----------------|
| • Obligations by program activity | (section 82.2). |
| • Budgetary resources available for obligation | (section 82.3). |
| • New budget authority (gross), detail | (section 82.3). |
| • Change in obligated balances | (section 82.4). |
| • Outlays (gross), detail | (section 82.5). |
| • Offsets to gross budget authority and outlays | (section 82.6). |
| • Net budget authority and outlays | (section 82.6). |
| • Memorandum (non-add) entries | (section 82.7). |

Sections 82.2 through 82.7 provide detailed instructions for completing these parts of the P&F.

82.2 How do I report obligations?

The P&F shows the activities or projects financed by the account and the amount of budgetary resources required to finance these activities and projects. It presents the new obligations incurred or estimated to be incurred for each activity.

(a) Selecting program activities.

Use activities that provide a constructive basis for analyzing and evaluating the estimates. Keep the number of activities to a reasonable minimum without sacrificing clarity. Do not use subactivities (such as projects or recipient institutions), unless the amounts are significant and the breakdown necessary to provide full understanding. The activities should:

- Clearly indicate the services to be performed or the programs to be conducted;
- Distinguish investment, developmental, grant and subsidy, and operating programs;
- Distinguish direct obligations from reimbursable programs;
- Have adequate accounting support; and
- Relate to administrative control and operation of the agency.

Obtain approval for any changes in activity structure with OMB prior to your initial submission.

(b) Allocating expenses to activities.

Charge personnel compensation to activities on the basis of organizational units or on the basis of specific assignments. When feasible, distribute other administrative and overhead expenses among activities. However, you must be able to readily separate these overhead expenses from other charges. If you need to distribute amounts between two or more activities, base the distribution on readily supportable factors. Be consistent from year to year, and do not rely on overly detailed procedures.

Do not report adjustments to obligations in expired accounts in this part of the P&F. Report them under changes in obligated balances, on line 7340 of (see section 82.4). For the regular budget schedules (transmittal code 0), you must report all obligations as positive amounts.

(c) Reimbursable programs.

If your account includes reimbursable obligations (see section 20.5), show the obligations financed by reimbursements separately from direct obligations. Use the side headings “Direct program” and “Reimbursable program” (illustrated in exhibit 82A) to distinguish between the different types of obligations. List activities under each side heading if the amounts are significant or add to the understanding of the program. If the same activities are conducted on both a direct and reimbursable basis, you may list the same entries in both sections.

Report all the obligations in non-credit revolving fund accounts as reimbursable; report all the obligations in credit program and liquidating accounts as direct. You must report direct and reimbursable obligations in the P&F and in the object classification schedule on a consistent basis, and the amounts must tie (see section 83).

(d) Program activity codes.

Program activity codes are unique to each account and have no relationship to the codes shown in other schedules, except for credit programs (as described below). Use the four-digit line numbering scheme described in the following table to code the activities and subactivities listed in the P&F. Code descriptive side headings only if no activities are listed under the side heading and amounts are reported opposite the side heading.

OBLIGATIONS BY PROGRAM ACTIVITY

Entry	Description
<i>All accounts:</i>	
0xxx	The first digit will always be zero (0).
<i>Noncredit programs:</i>	The line codes are unique to each account and have no relationship to information shown in other schedules.
Direct programs:	
0Xxx	For the second digit, use the values 0 through 8 to identify the activity or subactivity group.
0xXX	For the third and fourth digits, use the values 01 through 89 to identify activity or subactivity detail items. Any number sequence in this range is valid.
	For subtotals, use the values 91 through 98 as follows: <ul style="list-style-type: none"> • xx91- Single activity or subactivity group subtotal • xx92- Subtotal of two activity or subactivity groups • xx93- Subtotal of three activity or subactivity groups
	Use the value 00 for running subtotals (i.e., previous subtotal plus additional activity or subactivity group).
Reimbursable programs:	If coding requirements for reimbursable programs create difficulties in developing the account display, consult with OMB.
09xx	The second digit will always be 9.
09XX	For the third digit, use the values 0 through 8; for the fourth digit, use the values 1 through 8 to identify activity or subactivity detail items.
	For subtotals, use the value 9 for the fourth digit as follows: <ul style="list-style-type: none"> • 0909--Subtotal of activities on lines 0901 through 0908 • 0919--Subtotal of activities on lines 0910 through 0918 • 0929--Subtotal of activities on lines 0920 through 0928 • 0939--Subtotal of activities on lines 0930 through 0938
	Use the value 0999 for reporting total reimbursable obligations when both direct and multiple reimbursable activities are reported.
<i>Credit programs:</i>	Use the following standard line coding scheme for credit programs. See sections 85.10 and 85.11 for more information on requirements related to credit financing and liquidating accounts.
Credit program accounts:	
0001	Direct loan subsidy
0002	Loan guarantee subsidy

Entry	Description
0003	Subsidy for modifications of direct loan terms
0004	Subsidy for modifications of loan guarantees
0005	Reestimates of direct loan subsidy
0006	Interest on reestimates of direct loan subsidy
0007	Reestimates of loan guarantees
0008	Interest on reestimates of loan guarantee subsidy
0009	Administrative expenses
Credit financing accounts:	
0001-0009	Obligations for post-1991 direct loan disbursements, default claims, interest supplements to lenders, interest on debt owed to Treasury
0801	Negative subsidies paid to receipt accounts
0802	Downward reestimates paid to receipt accounts
0803	Adjusting payments to liquidating accounts
All accounts:	
1000	Total new obligations. This is the final entry in this part of the P&F. MAX requires this line whenever new obligations are reported and will generate this line from the detail you enter. If this is the only entry you use for this part, you must manually enter the appropriate amounts. Equals line 2395, with the opposite sign.

82.3 How do I report the budgetary resources available for obligation?

One part of the P&F provides information on the budgetary resources available to finance obligations. It includes information on all the budgetary resources available for obligation in the account. Another part provides detailed information on the new budget authority in the account.

(a) *Budgetary resources available for obligation.*

The P&F tracks the status of budgetary resources available for obligation from the start of the fiscal year to the end of the fiscal year. The resources include unobligated balances carried over from prior years, new budget authority, and adjustments to those amounts (such as transfers of balances to and from other budget accounts and recoveries resulting from downward adjustments of prior year obligations). You deduct new obligations and expiring or withdrawn amounts to arrive at the end-of-year unobligated balances. Do not include expired amounts or amounts unavailable for obligation.

Use the entries in the following table to prepare this section of the P&F. Consult with OMB if you want to modify the standard line titles. MAX will automatically generate the line entries indicated in **boldface**.

BUDGETARY RESOURCES AVAILABLE FOR OBLIGATION

	Entry	Description
2140	Unobligated balance carried forward, start of year	Unobligated balance of appropriations or other budgetary resources carried forward from the preceding year and available for obligation without new action by Congress. MAX copies CY and BY from the end of year amounts reported on line 2440 for the previous year. Includes uninvested balances and balances invested in U.S. securities (par value), adjusted for unrealized discounts (a negative amount). Includes all unobligated balances (appropriations, authority to borrow, fund balances) at the start of the year, except for unobligated balances of contract authority, which are reported on line 2149. Does not include any deficiencies reported in the prior year's budget on line 2397; expired unobligated balances; or special and trust fund amounts and offsetting collections that are not available for obligation because provisions of law, such as benefit formulas or limitations on obligations (see section 20.4).
2149	Unobligated balance carried forward, start of year: Contract authority	Contract authority is unfunded. After an appropriation is enacted to liquidate the contract authority, don't report the balance as contract authority any longer.
2199	Total unobligated balance carried forward, start of year	Sum of lines 2140 and 2149, when there are entries on both lines.
2200	New budget authority (gross)	The total amount of gross budget authority. Equals the sum of the detailed budget authority entries on lines 4000 through 6990. It also equals line 7000.
2210	Resources available from recoveries of prior year obligations	Amount made available for obligation in no-year and <i>unexpired</i> multiple-year accounts through recoveries (i.e., deobligation or downward adjustments) of obligations incurred in prior years. Equals line 7345, but with opposite sign.
	<i>Use line 2210 only for PY-or CY if recoveries have already occurred prior to transmittal of the budget-unless specifically approved in advance by OMB.</i>	<i>Note: Net recoveries of current year obligations against new obligations for the same year without further identification. Report recoveries of prior year obligations in expired annual and multiple-year accounts on line 7340.</i>
2221	Unobligated balance transferred to other accounts (-) [xx-xxxx]	Amount of unobligated balance transferred to other accounts that represents an adjustment to the accounts involved and does not involve an obligation or an outlay (see section 20.4). Use only for transfers of balances of prior year resources when the purpose of the funding has not changed (e.g., transfers of activities under reorganization plans) or transfers of balances resulting from general transfer authority. Show transfers of balances of prior year resources that result from legislation that changes the purpose for which the amounts are available as adjustments to budget authority on line 4100. Generally, transfers to other accounts cannot exceed the unobligated balance at the start of the year.

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

	Entry	Description
2222	Unobligated balance transferred from other accounts (+) [xx-xxxx]	Amount of available unobligated balances transferred from other accounts that represents an adjustment to the accounts involved and do not involve an obligation or an outlay (section 20.4). Use only for transfers of balances of prior year resources when the purpose of the funding has not changed (e.g., transfers of activities under reorganization plans) or transfers of balances resulting from general transfer authority. Show transfers of balances of prior year resources that result from legislation that changes the purpose for which the amounts are available as adjustments to budget authority on line 4200. <i>Note: You must identify each account involved in each transfer (gaining and losing) in MAX using the 6-digit Treasury basic account symbol (see section 79.2 and Appendix C).</i>
2240	Capital transfer to general fund (-)	Amount of balances deposited to Treasury capital transfer receipt accounts, such as “Earnings of Government-owned enterprises,” or “Repayments of capital investment, Government-owned enterprises.” Don’t include interest payments or capital transfers of offsetting collections received during the year (see lines 6827 and 6927). For capital transfers of appropriations, contact OMB.
2260	Portion applied to repay debt (-)	Amount of balances used for repayments of borrowing outstanding. Do not include appropriations or new offsetting collections used to retire outstanding debt (see lines 4047, 6047, 6847, and 6947).
2270	Balance of authority to borrow withdrawn (-)	Use these entries to report withdrawn unobligated balances of indefinite borrowing or contract authority realized in no-year or multiple year accounts through deobligation or downward adjustments of prior year obligations reported on lines 2210 and 7345. <i>Note: When new appropriations or spending authority from offsetting collections are used to liquidate obligations initially incurred against authority to borrow, report the amounts on lines 6053, 6853, or 6953, as appropriate.</i>
2275	Balance of contract authority withdrawn (-)	
2380	Reduction pursuant to P.L. 99-177 in unobligated balances (discretionary) (-)	Amount of cancellation of unobligated balances of budgetary resources pursuant to G-R-H. <i>Use only for PY and CY and only in accounts in the national defense function (050).</i>
2385	Reduction pursuant to P.L. 99-177 in unobligated balances (mandatory) (-)	
2390	Total budgetary resources available for obligation	Sum of lines 21xx or 2199 through 2385, when there are multiple entries on lines 21xx through 2385.
2395	Total new obligations (-)	Equals line 1000, with opposite sign. Use only if line 1000 is used.

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

	Entry	Description
2397	Deficiency	Amount of obligations (as of the end of the year) that exceed the budgetary resources available for obligation that requires an appropriation or future offsetting collections to liquidate unpaid obligations. This amount is reportable as a violation of the Antideficiency Act. Use this entry in the year in which the deficiency is incurred. Also report the deficiency on line 9190 until liquidated. <i>Note: See OMB Circular No. A-34 for additional reporting requirements on deficiencies.</i>
2398	Unobligated balance expiring or withdrawn (-)	Amount available for obligation during the year that ceased to be available for obligation during or at the end of the fiscal year (other than amounts rescinded by law). Include unobligated balances expiring for obligation (even if they have been reappropriated) and unobligated balances returned to unappropriated receipts. Also, include unobligated balances of unexpired amounts written off or withdrawn by administrative action. Do not include cancellation of unobligated balances that expired in prior years. Also, do not use for the withdrawal of indefinite contract authority or borrowing authority when obligated balances are liquidated by offsetting collections (see lines 6849, 6949, 6853, and 6953).
2440	Unobligated balance carried forward, end of year	Unobligated balance carried forward and available for obligation in the following year. Include uninvested balances and balances invested in U.S. securities (par value), adjusted for unrealized discounts (a negative amount). Include all unobligated balances available for obligation (appropriations, authority to borrow, fund balances) at the end of the year, except for unobligated balances of contract authority, which are reported on line 2449. Do not include expired unobligated balances. Do not include special and trust fund amounts and offsetting collections that are not available for obligation because provisions of law, such as benefit formulas or limitations on obligations (see section 20.4). Equals the sum of lines 2390 through 2398 when line 2449 amount is zero.
2449	Unobligated balance carried forward, end of year: Contract authority	Contract authority is unfunded. After an appropriation is enacted to liquidate the contract authority, don't report the balance as contract authority any longer.
2499	Total unobligated balance carried forward, end of year	Sum of lines 2440 and 2449. Use only if there are entries on both lines.

(b) New budget authority (gross) detail.

The P&F contains very specific information on the new budget authority reported in the account. The entries indicate the basic type of authority (such as appropriations, contract authority, spending authority from offsetting collections) and whether the authority:

- Is discretionary or mandatory; and
- Pertains to a special or trust fund account.

You must use separate entries to identify adjustments resulting from transfers, rescissions, G-R-H reductions, capital transfers, repayments of outstanding borrowing, etc.

Use the entries in the following table to prepare this section of the P&F. Consult with OMB if you want to modify the standard line titles. Since most types of discretionary budget authority have a mandatory counterpart (and vice versa), the table is arranged by type of authority and shows the applicable discretionary and mandatory entries for each.

Discretionary budget authority means budget authority under the jurisdiction of appropriations committees and controlled by annual appropriations acts. It includes spending authority provided in appropriations acts except where such authority funds direct-spending programs, such as appropriated entitlements. Use the appropriate discretionary entries to report budget authority that is classified as *discretionary* under the BEA (see sections 20.4 and 81.3).

Mandatory budget authority means budget authority resulting from permanent laws and includes programs the BEA defines as “appropriated entitlements and mandates.” Use the appropriate mandatory entries to report all budget authority that is classified as *mandatory* under the BEA, as well as budget authority that is classified as *net interest*. Also use the appropriate mandatory entries to report budget authority associated with credit financing accounts.

Definite and indefinite budget authority normally will not be separately identified. This is a change from past practice. If there is a compelling reason to separately identify definite and indefinite amounts, you may use separate line serial numbers with your OMB representative’s approval.

Use the entries in the following table to prepare this section of the P&F. Consult with OMB if you want to modify the standard line titles. MAX will automatically generate the line entries indicated in **boldface**.

NEW BUDGET AUTHORITY (GROSS), DETAIL

Entry	Discretionary	Mandatory	Description
<i>APPROPRIATIONS</i>			
Appropriation	4000	6000	Amount appropriated, estimated or requested to be appropriated from general funds. Include amounts for liquidation of contract authority, debt reduction, and deficiency appropriations, when applicable. Do not include emergency appropriations. For indefinite amounts, the past year amount will equal the amount certified by appropriation warrants for the year after being reduced by any excess resources returned to the Treasury.
Appropriation (emergency)	4015	n/a	Amount of emergency appropriations enacted or requested. Include amounts that are contingent on the President

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
			submitting a budget request to Congress designating the amount as an emergency requirement.
Appropriation (special fund)	4020	6020	Amount appropriated or requested to be appropriated from special fund receipts.
Appropriation (trust fund)	4026	6026	Amount appropriated or requested to be appropriated from trust fund receipts.
Appropriation (unavailable balances)	n/a	6028	For special and trust funds with mandatory appropriations that are precluded from obligation by provisions of law (see the description of line 6045), the amount of budget authority that becomes available for obligation from balances of receipts previously unavailable and included in the amounts reported in schedule N (see section 86.6). <i>Use only with OMB approval.</i>
<i>Advance funding:</i>			Advance funding is generally used to finance higher than anticipated costs in benefit programs. <i>Use only in PY and CY and only with OMB approval.</i>
Appropriation available from subsequent year	4028	n/a	Portion of the succeeding year's appropriation made available for obligation as advance funding.
Appropriation available in prior year (-)	4029	n/a	Portion of the appropriation made available for obligation as advance funding in the preceding year.
<i>Rescissions:</i>			
Appropriation rescinded (-)	4035	6035	Amount of rescission of appropriations. <i>Use only in PY or CY.</i>
			In cases where there is an across-the-board rescission of budget authority (percentage or other) mandated in appropriations law, allocated to affected accounts and required to be separately identified for reporting purposes, OMB may instruct you to use one of the reduction lines (4074 through 4079) in lieu of line 4035.
Unobligated balance rescinded (-)	4036	6036	Amount of rescission of unobligated balances of prior year budgetary resources. Use line 4036 for all discretionary rescissions of balances except for rescissions of balances of contract authority, which should be reported on line 4936. Use line 6036 for all mandatory rescissions of balances.
			When legislation defers existing budget authority (or unobligated balances) from a year in which it was available for obligation to a year in which it was not available for obligation, report the deferred amount as a rescission and

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
			show reappropriations in the first year of the extended availability.
Portion precluded from obligation (-)	n/a	6045	For special and trust funds with mandatory appropriations, amount precluded from obligation in a fiscal year by a provision of law (such as a limitation on obligations or a benefit formula). This amount is treated as a balance of budgetary resources (see the description of line 6028). MAX will automatically report this amount in schedule N (see section 86.6). <i>Use only with OMB approval.</i>
<i>Adjustments:</i>			<i>Use the following lines only if the appropriations language specifies that the appropriations are for these purposes:</i>
Portion applied to repay debt (-)	4047	6047	Amount of appropriations used to repay debt.
Portion applied to liquidate deficiencies (-)	4048	6048	Amount of appropriations used to eliminate a prior year deficiency.
Portion applied to liquidate contract authority (-)	4049	6049	Amount of appropriations used to liquidate contract authority.
Portion of appropriation to liquidate contract authority withdrawn (-)	4050	n/a	Amount withdrawn or lapsed from appropriations to liquidate contract authority. <i>Use only in PY or CY and only with OMB approval.</i>
Portion substituted for borrowing authority (-)	n/a	6053	Amount of appropriations used to liquidate obligations initially incurred against authority to borrow when the borrowing is not exercised.
<i>Reductions pursuant to appropriations acts or G-R-H reductions:</i>			
Reduction pursuant to P.L. xxx-xxx (-)	4074	6074	Amount of reductions in budget authority (percentage or other) mandated in appropriations law and allocated to affected accounts. OMB will tell you which code to use to identify the appropriate appropriation acts. <i>Use only in PY and CY.</i>
	4075	6075	
	4076	6076	
	4077	6077	
	4078	6078	
	4079	6079	
			In cases where it is important to cite the public law for a rescission to fulfill reporting requirements, OMB may instruct you to use one of these reduction lines in lieu of line 4035. In these cases, rescissions are reported as reductions. An example is the treatment of rescissions pursuant to the Consolidated Appropriations Act of 2000 (e.g., P.L. 106-113). In this case, all rescissions and reductions were reported as reductions on lines xx76 in the 2002 Budget.

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
Reduction pursuant to P.L. 99-177 (-)	4085	6085	Amount of cancellation of appropriations pursuant to the G-R-H law. <i>Use only in PY and CY.</i>
<i>Transfers:</i>			
Transferred to other accounts (-) [xx-xxxx]	4100	6100	<p>Amount transferred to another account in the same year the authority becomes available for obligation when the transfer does not involve an obligation or an outlay. Use this line to show adjustments in budget authority resulting from:</p> <ul style="list-style-type: none"> • Transfers under reorganization plans; • Transfers authorized by Congress in lieu of appropriations; and • Transfers where the purpose of the funding has changed. <p>Also use for transfers of unobligated balances that result from legislation that changes the purpose for which the balances are available. (Show transfers of balances for which the purpose has not changed or resulting from general transfer authority on line 2221.)</p> <p>Show amounts transferred from mandatory accounts to discretionary accounts, pursuant to appropriations law, on line 6100 in the losing account and line 4200 in the receiving account.</p>
Transferred from other accounts (+) [xx-xxxx]	4200	6200	<p>Amount transferred from other accounts in the same year the authority becomes available for obligation when the transfer does not involve an obligation or an outlay. Use this line to show adjustments in budget authority resulting from:</p> <ul style="list-style-type: none"> • Transfers under reorganization plans; • Transfers authorized by Congress in lieu of appropriations; and • Transfers where the purpose of the funding has changed. <p>Also use for transfers of unobligated balances that result from legislation that changes the purpose for which the balances are available. (Show transfers of balances for which the purpose has not changed or transfers of balances resulting from general transfer authority on line 2222.)</p> <p>Show amounts transferred to discretionary accounts from mandatory accounts, pursuant to appropriations law, on line 4200 in the receiving account and on line 6100 in the losing account.</p>

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
<i>Identify each account involved in each transfer (gaining and losing) in MAX using the 6-digit Treasury basic account symbol (see section 79.2 and Appendix C).</i>			
Appropriation (total)	4300	6250	Sum of lines 4000 through 4200 is the discretionary total. Sum of lines 6000 through 6200 is the mandatory total. Use only if there are multiple entries on these lines.
AUTHORITY TO BORROW			
Authority to borrow	4700	6710	Amount of new authority authorized or requested to be authorized to be expended from moneys derived from borrowing from the Treasury or from investors other than Treasury. To the extent that indefinite borrowing authority is used to cover obligations, report authority to borrow for all such obligations even though subsequent appropriations or offsetting collections will ultimately be used to liquidate the obligations. For indefinite authority to borrow, record the amount that you obligated in the past year or estimate you will obligate in CY and BY.
Authority to borrow (12 U.S.C. 2281-96)	n/a	6716	Amount of authority to borrow for direct loan obligations from the Federal Financing Bank. <i>Use only for liquidating accounts.</i>
Authority to borrow rescinded (-)	4735	6735	Amount of rescissions of authority to borrow. Report rescissions of unobligated balances of authority to borrow on line 4036 (discretionary) or line 6036 (mandatory). <i>Use only in PY or CY.</i>
Reduction pursuant to P.L. 99-177 (-)	4785	6785	Amount of cancellation of authority to borrow pursuant to the G-R-H law. <i>Use only in PY and CY.</i>
Authority to borrow (total)	4790	6790	Sum of lines 4700 through 4785 is the discretionary total. Sum of lines 6710 through 6785 is the mandatory total. Use only if there are multiple entries on these lines.
CONTRACT AUTHORITY			
Contract authority	4900	6610	Amount of new authority to incur obligations in advance of collections or an appropriation for liquidation. For indefinite contract authority, record the amount that you obligated in the past year or estimate you will obligate in CY and BY.
Contract authority rescinded (-)	4935	6635	Amount of rescissions of contract authority. <i>Use only in PY or CY.</i>

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
Unobligated balance rescinded (-)	4936	n/a	In cases where there is an across-the-board rescission of budget authority (percentage or other) mandated in appropriations law, allocated to affected accounts and required to be separately identified for reporting purposes, OMB may instruct you to use one of the reduction lines (4974 through 4979) in lieu of line 4935.
Portion precluded from obligation (limitation on obligations) (-)	4945	n/a	Amount of contract authority precluded from obligation in a fiscal year by a limitation on obligations. <i>Use only with OMB approval.</i>
Reduction pursuant to P.L. xxx-xxx (-)	4974 4975 4976 4977 4978 4979	n/a	Amount of reductions in budget authority (percentage or other) mandated in appropriations law and allocated to affected accounts. OMB will tell you which code to use to identify the appropriate appropriation acts. <i>Use only in PY and CY.</i> In cases where it is important to cite the public law for a rescission to fulfill reporting requirements, OMB may tell you to use one of these reduction lines in lieu of line 4935. In these cases, rescissions are reported as reductions. An example is the treatment of rescissions pursuant to the Consolidated Appropriations Act of 2000 (e.g., P.L. 106-113). In this case, all rescissions and reductions were reported as reductions on lines xx76 in the 2002 Budget.
Reduction pursuant to P.L. 99-177 (-)	4985	6685	Amount of cancellation of contract authority pursuant to the G-R-H law. <i>Use only in PY and CY.</i>
Transferred to other accounts (-) [xx-xxxx]	n/a	6661	Amount of contract authority transferred to other accounts.
Transferred from other accounts (+) [xx-xxxx]	n/a	6662	Amount of contract authority transferred from other accounts. <i>Note: You must identify each account involved in each transfer (gaining and losing) in MAX using the 6-digit Treasury basic account symbol (see section 79.2 and Appendix C).</i>
Contract authority (total)	4990	6690	Sum of lines 4900 through 4985 is the discretionary total. Sum of lines 6610 through 6685 is the mandatory total. Use only if there are multiple entries on these lines.
REAPPROPRIATIONS			
Reappropriation	5000	6300	Amount of new budget authority resulting from legislation that extends the period of availability of general funds that have expired or would otherwise expire. Such extensions of availability are counted as new budget authority in the first year of the extended availability (see section 20.4).

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
Reappropriation rescinded (-)	5035	6335	Amount of rescissions of reappropriations. Report rescissions of unobligated balances on line 4036 (discretionary) or line 6036 (mandatory). <i>Use only in PY and CY.</i>
Reduction pursuant to P.L. 99-177 (-)	5085	6385	Amount of cancellation of reappropriations pursuant to the G-R-H law. <i>Use only in PY and CY.</i>
Reappropriation (total)	5300	6390	Sum of lines 5000 through 5085 is the discretionary total. Sum of lines 6300 through 6385 is the discretionary total. Use only if there are multiple entries on these lines.
<i>ADVANCE APPROPRIATIONS</i>			
Advance appropriation	5500	6500	Appropriation that becomes available for obligation one fiscal year or more beyond the fiscal year for which the legislation is enacted. Report amount in the year in which it first becomes available for obligation.
Advance appropriation (trust fund)	5526	6526	
Advance appropriation rescinded (-)	5535	6535	Amount of rescissions of advance appropriations. Report rescissions of unobligated balances on line 4036 (discretionary) or line 6036 (mandatory). <i>Use only in PY and CY.</i>
			In cases where there is an across-the-board rescission of budget authority (percentage or other) mandated in appropriations law, allocated to affected accounts and required to be separately identified for reporting purposes, OMB may instruct you to use one of the reduction lines (5574 through 5579) in lieu of line 5535.
Reduction pursuant to P.L. xxx-xxx (-)	5574 5575 5576 5577 5578 5579	n/a	Amount of reductions in budget authority (percentage or other) mandated in appropriations law and allocated to affected accounts. OMB will tell you which code to use to identify the appropriate appropriation acts. <i>Use only in PY and CY.</i>
			In cases where it is important to cite the public law for a rescission to fulfill reporting requirements, OMB may tell you to use one of these reduction lines in lieu of line 5535. In these cases, rescissions are reported as reductions. An example is the treatment of rescissions pursuant to the Consolidated Appropriations Act of 2000 (e.g., P.L. 106-113). In this case, all rescissions and reductions were reported as reductions on lines xx76 in the 2002 Budget.
Reduction pursuant to P.L. 99-177 (-)	5585	6585	Amount of cancellation of advance appropriations pursuant to the G-R-H law. <i>Use only in PY and CY.</i>

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
Advance appropriation (total)	5590	6590	Sum of lines 5500 through 5585 is the discretionary total. Sum of lines 6500 through 6585 is the mandatory total. Use only if there are multiple entries on these lines.
<i>MANDATORY PROCEEDS OF LOAN ASSET SALES WITH RECOURSE</i>			
Proceeds from loan asset sales with recourse	n/a	6400	Amount of new budget authority resulting from the sale of financial assets with recourse (see section 20.4).
Portion applied to repay debt (-)	n/a	6447	Amount used to repay debt.
Proceeds of loan asset sales with recourse (total mandatory)	n/a	6490	Sum of lines 6400 and 6447. Use only if there are entries on both of these lines.
<i>SPENDING AUTHORITY FROM OFFSETTING COLLECTIONS</i>			As a general rule, you classify spending authority from offsetting collections as discretionary for accounts classified as discretionary by the BEA and as mandatory for accounts classified as mandatory under the BEA.
Offsetting collections (cash)	6800	6900	<i>For unexpired accounts only:</i> Amount of offsetting collections (cash) credited to the account and refunds that pertain to obligations recorded in prior fiscal years.
Change in uncollected customer payments from Federal sources (unexpired)	6810	6910	<i>For unexpired accounts only:</i> Amount of increase (+) or decrease (-) in accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources from the start of year to the end of year. The total amounts reported on these lines will equal the amount reported on line 7400, but with the opposite sign.
From offsetting collections (unavailable balances)	6826	6926	For accounts with limitations on the use of offsetting collections, the amount of budget authority that becomes available for obligation from unavailable balances of offsetting collections reflected in the schedule on unavailable collections (see section 86.6).
<i>Adjustments:</i>			
Capital transfer to general fund (-)	6827	6927	Amount of offsetting collections deposited to Treasury receipt accounts for "Earnings of Government-owned enterprises," or "Repayments of capital investment, Government-owned enterprises." Do not include interest payments. <i>Primarily used by revolving funds; however, may be used by other accounts with OMB approval.</i>

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
Portion applied to liquidate deficiencies (-)	6833	6933	Amount of offsetting collections used to cover deficiencies incurred in a prior year.
Portion precluded from obligation (limitation on obligations) (-)	6845	6945	Amount of offsetting collections credited to the account that are not available for obligation because of limitations on program level in appropriations acts.
Portion applied to repay debt (-)	6847	6947	Amount of offsetting collections used for repayments of outstanding borrowing.
Portion applied to liquidate contract authority (-)	6849	6949	Amount of offsetting collections used to liquidate contract authority.
Portion substituted for borrowing authority (-)	6853	6953	Amount of offsetting collections used to liquidate obligations initially incurred against authority to borrow when the borrowing is not exercised.
<i>Transfers:</i>			
Transferred to other accounts (-) [xx-xxxx]	6861	6961	Amount transferred to another account in the same year the authority becomes available for obligation when the transfer is treated as an adjustment in budget authority to the accounts and does not involve an obligation or outlay (see the description of line 4100 for more information). Transfers of balances should be reported on lines 2221 or 7331, as appropriate. Although the spending authority is transferred to another account, the offsetting collection will be credited to the account that initially received the collection on line 88xx.
Transferred from other accounts (+) [xx-xxxx]	6862	6962	Amount transferred from other accounts in the same year the authority becomes available for obligation when the transfer is treated as an adjustment in budget authority to the accounts and does not involve an obligation or outlay (see the description of line 4200 for more information). Transfers of balances should be reported on lines 2222 or 7332, as appropriate. Although the spending authority is transferred from another account, the offsetting collection will be credited to the account that initially received the collection on line 88xx.
<i>Note: You must identify each account involved in each transfer (gaining and losing) in MAX using the 6-digit Treasury basic account symbol (see section 79.2 and Appendix C).</i>			

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Discretionary	Mandatory	Description
<i>Reductions pursuant to appropriations acts or G-R-H reductions:</i>			
Reduction pursuant to P.L. xxx-xxx (-)	6874 6875 6876 6877 6878 6879	6874 6975 6976 6977 6978 6979	Use these lines for reductions mandated in appropriations law (percentage or other) allocated to affected accounts. OMB will tell you which code to use to identify the appropriation act mandating the reduction. In cases where it is important to cite the public law for a rescission to fulfill reporting requirements, OMB may tell you to use one of these reduction lines. In these cases, rescissions are reported as reductions. An example is the treatment of rescissions pursuant to the Consolidated Appropriations Act of 2000 (e.g., P.L. 106-113). In this case, all rescissions and reductions were reported as reductions on lines xx76 in the 2002 Budget.
Reduction pursuant to P.L. 99-177 (-)	6885	6985	Amount of cancellation of spending authority from offsetting collections pursuant to the G-R-H law. <i>Use only in PY and CY.</i>
Spending authority from offsetting collections (total)	6890	6990	Sum of lines 6800 through 6885 is the discretionary total. Sum of lines 6900 through 6985 is the mandatory total. Use if there are multiple entries on these lines.
Total new budget authority (gross)	7000	7000	Sum of combined total of mandatory and discretionary budget authority (lines 4000 through 6990) when more than one type is used. It also equals line 2200.

(c) *Financing obligations and adjustments.*

As a general rule, if unobligated balances from prior years and new budget authority are commingled in an account, charge new obligations against unobligated balances brought forward before budget authority. Similarly, charge capital transfers, redemption of debt, and liquidating of contract authority against unobligated balances before adjusting new budget authority.

82.4 How do I report obligated balances?

The P&F includes a section that bridges between start and end of year obligated balances. Report the start of year obligated balance. New obligations are added to the start of year balance, and gross outlays are deducted. Adjustments, such as transfers of obligated balances and the change in uncollected customer payments from Federal sources (both unexpired and expired), are added or subtracted, as appropriate, to determine the obligated balance at the end of the year. In addition to reporting transactions in unexpired accounts, you reflect outlays from and adjustments in expired (but not canceled) accounts.

Unpaid obligations and uncollected customer payments from Federal sources are included in the obligated balance and are not separately identified. This is a change from past practice. This change was made to

simplify the presentation of obligated balances while maintaining the appropriate level of detail necessary to present the budget.

Use the entries in the following table to prepare this section of the P&F. Consult with OMB if you want to modify the standard line titles. MAX will automatically generate the line entries indicated in **boldface**.

CHANGE IN OBLIGATED BALANCES

	Entry	Description
7240	Obligated balance, start of year	Sum of amounts: <ul style="list-style-type: none"> Accounts payable plus undelivered orders (These are also known as unpaid obligations.) Accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources (These are also known as uncollected customer payments.) Include: <ul style="list-style-type: none"> Uninvested balances; Balances invested in U.S. securities (par value), adjusted for unrealized discounts (a negative amount); and Amounts obligated against contract authority.
7310	Total new obligations	Equals line 1000.
7320	Total outlays (gross) (-)	Total disbursements made by the account. This must equal the total gross outlays reported in MAX schedule A.
7331	Obligated balance transferred to other accounts (-) [xx-xxxx]	Amount of unpaid obligations transferred to other accounts.
7332	Obligated balance transferred from other accounts (+) [xx-xxxx]	Amount of unpaid obligations transferred from other accounts. <i>Note: You must identify each account involved in each transfer (gaining and losing) in MAX using the 6-digit Treasury basic account symbol (see section 79.2 and Appendix C).</i>
7340	Adjustments in expired accounts (net)	Net amount of upward (+) or downward adjustments (-) in obligations in accounts that <i>expired</i> prior to the beginning of the fiscal year. <i>Use only for PY, unless specifically approved by OMB.</i>
7345	Recoveries of prior year obligations (-)	Amount made available for obligation in no-year and <i>unexpired</i> multiple-year accounts through recoveries (i.e., deobligation or downward adjustments) of obligations incurred in prior years. Equals line 2210, but with the opposite sign.
7400	Change in uncollected customer payments from Federal sources (unexpired)	<i>For unexpired accounts only:</i> Amount of increase (-) or decrease (+) in accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources from the start of year to the end of year. Equals the

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Description
	sum of the amounts on lines 6810 and 6910, but with the opposite sign.
7410 Change in uncollected customer payments from Federal sources (expired)	<i>For expired accounts only:</i> Amount of increase (-) or decrease (+) in accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources from the start of year to the end of year.
7440 Obligated balance, end of year	Sum of amounts: <ul style="list-style-type: none"> Accounts payable plus undelivered orders (These are also known as unpaid obligations.) Accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources (These are also known as uncollected customer payments.) Include: <ul style="list-style-type: none"> Uninvested balances; Balances invested in U.S. securities (par value), adjusted for unrealized discounts (a negative amount); and Amounts obligated against contract authority. Equals the sum of lines 7240 through 7410.
<i>Memorandum entries:</i>	
	Contract authority is unfunded. When appropriations or offsetting collections are provided to liquidate contract authority, the amounts are no longer considered to be contract authority, and you should not include the unpaid obligations on these lines.
7501 Obligated balance, start of year: Contract authority	Portion of the obligated balance reported on line 7240 obligated against contract authority.
7502 Obligated balance, end of year: Contract authority	Portion of the obligated balance reported on line 7440 obligated against contract authority.

82.5 How do I report outlays?

The P&F shows the account's gross outlays distributed on the basis of the type of budget authority that financed the outlay. This part presents separately, outlays from discretionary and mandatory budget authority and outlays from new authority and carryover balances.

MAX automatically generates all of the line entries that appear in this part from data reported in schedule A.

OUTLAYS (GROSS), DETAIL

Entry	Description
8690 Outlays from new discretionary authority	MAX calculates these entries based on the outlays reported in schedule A on lines 9111 through 9322.
8693 Outlays from discretionary balances	

Entry	Description
8697 Outlays from new mandatory authority	You should not use these lines for credit financing accounts. (see section 82.16)
8698 Outlays from mandatory balances	
8700 Total outlays (gross)	Use line 8700 if there are multiple entries coded 8690 through 8698. MAX copies the amount reported on line 7320, with the opposite sign. The amount on line 7320 must equal the sum of the amounts on lines 8690 through 8698.

82.6 How do I show net budget authority and outlays?

The P&F shows the offsets used to arrive at net budget authority and outlays for the account. Gross outlays are offset by cash collections (both unexpired and expired). Gross budget authority is offset by cash collections (unexpired only) *and* orders from Federal sources that are not accompanied by cash.

The *offsets* part of the P&F indicates the source of the offsetting collections (e.g., Federal sources, interest on U.S. securities, non-Federal sources).

The change in uncollected customer payments from Federal sources from the start to the end of the year is deducted from gross budget authority only. Increases in uncollected customer payments from the start to the end of the year increase the amount of the offset because the increase constitutes an increase in gross budget authority; decreases reduce the amount of the offset because a decrease means that a portion of the offsetting collections (cash) received has been applied to liquidate obligations for which an offset was already counted. Only unexpired offsetting collections (cash) are offset from gross budget authority because gross budget authority includes only unexpired amounts.

Use the entries in the following table to prepare this section of the P&F. MAX will automatically generate the line entries indicated in **boldface**. Consult with OMB if you want to modify the standard line titles.

OFFSETS

Entry	Description
<i>Against gross budget authority and outlays:</i>	
<i>Offsetting collections (cash) from:</i>	Amount of cash credited to the account. (Includes refunds that pertain to obligations recorded in prior fiscal years, as long as the account has not been canceled.) Identify the source of the payment (see the descriptions below). Use subentries when there are significant amounts of different types of income, such as insurance premiums, loan repayments, interest, fees, etc.
8800 Federal sources	<i>Note: Amounts for lines 8800 through 8890 under transmittal code 0 should be reported as positive amounts in MAX, but will appear in the Budget Appendix with the opposite sign.</i> Amount from other government accounts except interest received from investments in U.S. securities. Do not include

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Description
	orders and contracts that are valid obligations of ordering accounts that are not accompanied by advances. Include collections from general, special, trust, revolving, and management fund accounts. Also include collections from off-budget Federal entities.
8820 Interest on Federal securities	Amount of interest on investments in marketable and nonmarketable Treasury securities. Use for general and revolving fund accounts only.
8825 Interest on uninvested funds	Amount of interest from Treasury on balances not invested in marketable and nonmarketable Treasury securities.
8840 Non-Federal sources	Amount received from non-Federal sources as a result of business-type transactions (e.g., repayments of loan principal, interest on outstanding loans, user charges) and amount of orders received from non-Federal sources that are accompanied by advances. Exclude collections that arise from the Government's sovereign or governmental powers. Report such amounts on line 8845.
8845 Offsetting governmental collections (from non-Federal sources)	Amount received from non-Federal sources that are governmental in nature (e.g., tax receipts, compulsory user charges, custom duties, license fees) but required by law to be credited to the account (see section 20.7).
8890 Total offsetting collections (cash)	Sum of lines 8800 through 8845. Use only if there are multiple entries on lines 8800 through 8845.
<i>Against gross budget authority only:</i>	
8895 Change in uncollected customer payments from Federal sources (unexpired)	Amount of increase (+) or decrease (-) in accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources from the start of year to the end of year. Equals the sum of amounts on lines 6810 and 6910. <i>Amount will appear in the Budget Appendix with the opposite sign compared to what you enter in MAX.</i>
8896 Portion of offsetting collections (cash) credited to expired accounts	Amount of offsetting collections (cash) and refunds that pertain to an account that has expired but is not yet canceled. (see section 20.10) Equals the sum of amounts on lines 6800 and 6900 minus the amount on lines 8800 through 8845. <i>Amount will appear in the Budget Appendix with the opposite sign compared to what you enter in MAX.</i>

NET BUDGET AUTHORITY AND OUTLAYS

Entry	Description
8900 Budget authority (net)	Equals total new budget authority (gross) on line 2200 minus the amounts on lines 8800 through 8845 and on lines 8895 and 8896. Always include this line, even if the amount is zero.
9000 Outlays (net)	Equals total outlays (gross) on line 8700 minus the amounts on lines 8800 through 8845. Always include this line, even if the amount is zero.

82.7 What additional information must I report on schedule P?

The P&F displays supplementary information related to G-R-H sequesters; obligations in excess of available budgetary resources; and investments in U.S. securities. The amounts are not added or deducted from the budget authority or outlay amounts reported above. Use the entries in the following table to prepare this section of the P&F. MAX will automatically generate the line entries indicated in **boldface**. Consult with OMB if you want to modify the standard line titles.

MEMORANDUM (NON-ADD) ENTRIES

Entry	Description
9110 Outlays prior to reduction pursuant to P.L. 99-177	Amount of outlays that would have occurred <i>in the current year only</i> if resources had not been sequestered under G-R-H. Use only if line 9180 or 9185 is used.
9180 Sequestration pursuant to P.L. 99-177 (discretionary) (-)	Amount of reduction in outlays <i>in the current year only</i> associated with a G-R-H sequester of budgetary resources for discretionary programs.
9185 Sequestration pursuant to P.L. 99-177 (mandatory) (-)	Amount of reduction in outlays <i>in the current year only</i> associated with a G-R-H sequester of budgetary resources for mandatory programs.
9190 Unpaid obligations, end of year: Deficiency	Amount of obligations included in unpaid obligations, end of year that exceeded the resources available when the obligations were incurred and will require a deficiency appropriation or will be liquidated by future offsetting collections. For any year, the amount will equal the amount reported on this line in the previous year, plus any amount on line 2397, minus amounts on lines 4048, 6048, 6833, and 6933 plus or minus any adjustments to the amount reported in the previous year. (These adjustments are not reflected on the P&F schedule.)
	<i>Note: See OMB Circular No. A-34 for additional reporting requirements on deficiencies.</i>

Investments in Federal securities:

Report the par value of U.S. Federal securities; do not reflect unrealized discounts. Include all the balances invested at the

SECTION 82 -- PROGRAM AND FINANCING (SCHEDULE P)

Entry	Description
	start of the year, including those that are not available for obligation, i.e., those reported in the unavailable collections schedule (MAX schedule N). If a special or trust fund has multiple expenditure accounts, report the invested portion of the unavailable collections in the P&F of the account that receives the largest appropriation from the fund.
9201 Total investments, start of year: Federal securities: Par value	Amount of start of year balances that have been invested in U.S. Federal securities, brought forward from the end of the preceding year. For CY and BY, equals the corresponding entry at the end of the preceding year.
9202 Total investments, end of year: Federal securities: Par value	Amount of end of year balances that have been invested in U. S. Federal securities.

82.8 How do I present enacted rescissions and reductions of budget authority?

Include enacted rescissions, reductions mandated in appropriations acts, and G-R-H reductions in the regular (transmittal code 0) budget schedules. If enacted legislation defers existing budget authority from a year in which it was available for obligation to a year in which it was not available for obligation, then reflect this deferred amount as a rescission in the regular budget schedules. Show a reappropriation in the first year of the extended availability (see section 20.4). Show rescissions and reductions separate from the budget authority initially appropriated for all years covered by the P&F schedule.

Rescission and reductions can impact all types of budget authority (e.g., appropriations, borrowing authority, contract authority, advance appropriations, offsetting collections). However, rescissions of unobligated balances of budgetary resources other than contract authority will be reported on either line 4036 (discretionary) or line 6036 (mandatory), regardless of the type of budget authority involved. Reductions of balances of contract authority will be reported on line 4936. The two-digit suffixes listed below are used to denote rescissions and reductions of budget authority. (See the corresponding entries under appropriations (lines 40xx and 60xx) in section 82.3 for more information on how the suffixes are used.)

Entry	Description
xx35 [type of authority] rescinded (-)	Amount rescinded. <i>Note: Rescission proposals will be shown in a separate program and financing schedule with transmittal code "5," and the stub title will be modified to read "Rescission proposal."</i>
xx74 Reduction pursuant to P.L. xx75 xxx-xxx. (-) xx76 xx77 xx78 xx79	Reductions in appropriations law mandating reductions (percentage or other) allocated to affected accounts. OMB will tell you which code to use to identify the appropriation act. In cases where it is important to cite the public law for a rescission to fulfill reporting requirements, OMB may tell you to use one of these reduction lines. In these cases, rescissions are reported as reductions. An example is the treatment of

Entry	Description
	rescissions pursuant to the Consolidated Appropriations Act of 2000 (e.g., P.L. 106-113). In this case, all rescissions and reductions were reported as reductions on lines xx76 in the 2002 Budget.
	<i>Note: For special and trust fund accounts, these amounts generally are available for subsequent appropriation. They will be automatically reported in MAX schedule N as an adjustment on line 0620; agencies should advise OMB if these amounts are permanently canceled and should be excluded from schedule N.</i>
xx85 Reduction pursuant to P.L. 99-177 (-)	Amount of G-R-H reduction.

82.9 How do I present rescission proposals?

Omit the effect of rescission proposals in the current year that have been or will be included in a special message to Congress from the regular P&F schedule for the affected account and present it in a separate schedule under transmittal code 5 (see section 79.2). The combination of the regular and rescission schedules should display the condition of the account if Congress accepts the rescission proposal.

Show enacted rescissions on lines 4035 (appropriation rescinded) and 4036 (unobligated balance rescinded) in schedule P under transmittal code 0 (see section 82.3).

The rescission schedule under transmittal code 5 should reflect the changes to amounts in the regular schedule that would result from the rescission proposal. For example, if the budget authority would otherwise be obligated in the event that the rescission is not accepted, display negative amounts for obligations and outlays (outlay savings) in the rescission schedule. In cases where the amounts proposed for rescission could not otherwise be obligated and are shown as expiring in the regular schedule, show a positive entry on line 2398 "Unobligated balance expiring or withdrawn," on the rescission proposal schedule. Enter this same amount as a rescission proposal on the appropriate budget authority line.

OMB Circular No. A-34 describes the materials that must be submitted for rescission proposals and deferrals.

82.10 How do I present supplemental appropriations requests and items proposed for later transmittal?

The account identification code includes a transmittal code that identifies the nature of the request (e.g., supplementals and items proposed for later transmittal (see section 79.2)). Most requests that are transmitted to the Congress in the President's Budget are for appropriations for the upcoming fiscal year. These requests are normally reported under transmittal code 0. Separate schedules using non-zero transmittal codes are required to identify proposed rescissions, pending supplementals, supplementals requested in the budget, and items proposed for later transmittal under either existing or proposed authorizing legislation and their effect on the information presented in the regular schedule for the account. The combination of the regular schedule and the non-zero transmittal code schedule should display the condition of the account as it would exist if Congress enacts the proposals.

One of the following titles will be shown, as appropriate, at the top of the P&F schedule to identify proposed supplementals and items proposed for later transmittal:

- Supplemental now requested (transmittal code 1)
- Legislative proposal, not subject to PAYGO (transmittal code 2)
- Legislative proposal, subject to PAYGO (transmittal code 4)

When a supplemental proposal or legislative proposal involves a transfer between accounts, omit the transaction from the regular schedules and display it in separate schedules for each of the affected accounts.

82.11 How do I present transfers of resources?

Transfers between agencies resulting from Presidential reorganization plans or enacted reorganization legislation may involve unique problems. Agency staff must consult with OMB representatives in each instance. As a general rule, exclude the transferred activities from the schedules of the losing agency and show them in the gaining agency on a three year comparable basis. Use footnotes to identify the amounts involved. (See section 82.13 for an example of how the footnote should be worded and section 97.7 for guidance on submitting the footnotes for printing.) When the gaining agency assumes *all* of the activities previously financed under a single account in another agency, the losing agency should omit budget schedules and appropriation language for the affected account and the gaining agency should show the transferred activities and appropriation language with its schedules.

82.12 How do I present transfers in the estimates?

When a transfer in the estimates (see section 20.3) for the budget year results in a significant increase to or decrease from the amount of budget authority for the past or current year, include footnotes explaining the transfer after the program and financing schedule. (See section 97.7 for guidance on submitting the footnotes for printing.)

For the account assuming the responsibility, use the following footnote:

Note.—Includes \$-- million in budget authority in BY for activities previously financed from:
PY CY

[List the full title of each losing account, including agency and bureau, and the budget authority amount applicable to each. Where it is appropriate to show the amount on some other basis, such as obligations, you may modify the footnote accordingly.]

If the entire BY estimate is for the transferred activity, the footnote may be worded, “BY estimate is for activities previously financed from [List agency, bureau, and account title].”

For the account losing the activity, use the following footnote:

Note.—Excludes \$—million in budget authority in BY for activities transferred to:

[List the title of each gaining account, including agency and bureau, and the budget authority amount applicable to each. Where it is more appropriate to show the amount on some other basis, such as obligations, modify the footnote accordingly.]

Comparable amounts for PY (\$—million) and CY (\$—million) are included above.

You only need to provide a transfer in the estimates footnote in the year the transfer proposal is made. If you use more than one footnote, include them under a centered heading, "NOTES." Modify the wording of footnotes as necessary to explain current year transfers.

82.13 How do I present merged accounts and consolidated schedules?

(a) Merged accounts.

Where two or more appropriations have been or are proposed to be replaced by a single appropriation (see section 71.6), submit a single set of schedules for the new appropriation covering PY through BY. Show a distribution of budget authority and outlays by account at the end of each merged program and financing schedule. Also use the following footnote:

Note.—The activities previously financed under [agency title, bureau title, account title in PY and CY are presented in these schedules and are proposed to be financed in this account in BY. Budget authority and outlays are distributed by account above.

(See section 97.7 for guidance on submitting the footnotes for printing.)

(b) Consolidated schedules.

When two or more accounts are consolidated in a single set of schedules (see section 71.7), list the title of each unexpired account as an activity. You may use subentries to identify activities carried under the individual accounts when the amounts are significant. Show a distribution of budget authority and outlays by account at the end of the program and financing schedule.

(c) Distribution of budget authority and outlays.

When you consolidate or merge accounts, append a distribution of budget authority and outlays by account to the bottom of the program and financing schedule. List each merged or consolidated budget account by name and provide data for PY through BY. (See section 97.7 for guidance on submitting the distribution of budget authority and outlays for printing.)

82.14 How do I present annual limitations on trust or revolving funds?

Prepare a schedule that mirrors the format of the P&F to present annual limitations on administrative expenses and other annual limitations on the use of certain trust or revolving funds. These schedules are not included in the MAX database but the line entries should generally conform to the applicable line entries described in sections 82.2 through 82.6.

State the program totals in terms of obligations or other measures, depending on the basis on which the limitation operates. Use an entry reading "Balance lapsing" to identify amounts no longer available for obligation. References to budget authority should be changed to "Limitation" and references to outlays should be changed to "Outlays from limitation." Adjust the wording of total lines accordingly.

Include the impact of legislative proposals and supplemental increases in the same P&F schedule used for the regular annual limitation. However, you must separately reflect the effect of supplementals and legislative proposals on the account as a whole in schedule P, under the appropriate transmittal codes.

Limitations on direct loans and loan guarantees are treated separately (see sections 85.9 and 85.10).

Entries on the related object class schedule will be coded and entered into MAX (see section 83).

82.15 How should I treat allocation accounts?

Combine P&F information for allocation accounts with the parent account without separate identification (see section 71.5). However, you must identify the obligations incurred by allocation accounts in a separate section of the object class schedule of the parent account (see section 83.16).

Receiving agencies should include the following note at the end of each bureau that receives funding through allocations:

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows: [list agency, bureau, and account title for each parent appropriation].

(See section 97.7 for guidance on submitting the note for printing.)

82.16 How do I present credit financing accounts?

Modify program and financing schedule line entries associated with certain concepts for credit financing accounts, as follows:

Non-credit financing account stub entry	Credit financing account stub entry
Budget authority	Financing authority
Outlays	Financing disbursements
Uncollected customer payments from Federal sources	Uncollected customer payments from program account

You do not have to provide detailed information on gross outlays (lines 8690 through 8698) for credit financing accounts. Identify negative subsidies and downward reestimates paid to receipt accounts and adjusting payments to liquidating accounts in the obligations by program activity section of the P&F as indicated in section 82.2. See section 85 for requirements associated with credit accounts.

82.17 What actuals in the P&F are imported from the actuals I reported to Treasury?

In order to reduce duplicate reporting while improving the consistency of year-end data published in the President's Budget and the Treasury Annual Report, much of the initial data in the PY column of P&F schedule (except for line P 9000 "Outlays (net)") is imported electronically from Treasury's Federal Agencies Centralized Trial-Balance System II (FACTS II). FACTS II collects year-end and quarterly budget data and replaces previous requirements for separately reporting the FMS 2108 "Year-End Closing Statement" and the SF 133 "Report on Budget Execution."

In instructions issued by Treasury, agencies are required to capture certain kinds of data in their financial systems and to report them using FACTS II. See Treasury Transmittal Letter No. S2-01-02, a supplement to the Treasury Financial Manual (TFM), and subsequent versions. It is available from the Internet at www.fms.treas.gov/ussgl.

The TFM shows how each budget account (i.e., account presented in the President's budget) relates to one or more Treasury accounts (i.e., accounts used to report budget execution data) and presents a crosswalk between data in the agency financial systems (i.e. Standard General Ledger accounts and attributes) and the P&F schedules, FMS 2108, and SF 133.

82.18 Do the actuals I report in the P&F need to tie to the actuals I reported to Treasury?

Yes. Pursuant to 31 U.S.C. 1512, actuals reported in the budget must be consistent with amounts reported to Treasury and must be based on actual accounting data. If one group within your agency (for example, the accounting office) reports amounts to Treasury while another group (for example, the budget office) prepares budget schedules, then you must ensure that the amounts reported are conceptually and numerically consistent. FACTS II facilitates, and to a large extent eliminates the need for, this reconciliation. If you find an error, then please see sections 82.19 and 82.20.

At year-end, your agency provides Treasury the FMS 2108 "Year-End Closing Statement", which is one of the primary sources for the Treasury Annual Report (TAR). The TAR and FMS 2108 must tie to the final SF 133/Statement of Budgetary Resources, and the P&F.

Each month, Treasury provides your agency with the SF 6653 "Undisbursed Appropriation Account Ledger" on the fifteenth workday of each month. The SF 6653 reflects all activity reported to Treasury. You are required to reconcile the SF 6653 with your accounting system each month. At year-end, this reconciliation should be accomplished before submitting your FACTS II data.

Appendix E, exhibit E8, identifies selected relationships among the actuals reported on SF 133, MAX schedule P and the published Treasury Annual Report (TAR). OMB Circular No. A-34 contains a crosswalk from the SF 133/Statement of Budgetary Resources to the P&F schedule.

Invested balances reported in MAX should equal invested balances reported to the Treasury Department, as follows:

Reported to Treasury Department	MAX data
Invested balances, start of year	<p><i>For all accounts:</i> Schedule P (program and financing schedule): 9201—Total investments, start of year: Federal securities: Par value</p> <p><i>For accounts with schedule J:</i> Schedule J (status of funds schedule): 0101—Unexpended balance, start of year, Federal Securities Par value</p>
Invested balances, end of year	<p><i>For all accounts:</i> Schedule P (program and financing schedule): 9202—Total investments, end of year: Federal securities: Par value</p> <p><i>For accounts with schedule J:</i> Schedule J (status of funds schedule): 0701—Unexpended balance, end of year, Federal Securities Par value</p>

Reported to Treasury Department	MAX data
<p><i>Note: Amounts reported in these MAX schedules represent total invested balances, including those that are not available for obligation.</i></p>	

82.19 What do I do if I do not agree with the PY amount on line P 9000 “Outlays (net)?”

If you do not agree with the amount on line P 9000 “Outlays (net)” (Treasury SF 224 data), after the FACTS II database is locked (mid-November), and the outlay is reported in the Treasury Annual Report and imported into MAX A-11, then you must submit a written explanation of the difference to your OMB representative. The explanation must be signed by your budget officer and accounting officer and explain why the error happened. Include affected accounts and amounts. Include a revised SF 224 if appropriate. If the explanation is accepted, then line P 9000 will be changed centrally. Ensure that the actuals are revised in FACTS II as described in the previous section. You should get PY-related matters like this taken care of as soon as the budget database opens so that you can concentrate on the BY column later.

Similarly, submit a written explanation if your agency does not agree with the receipt actuals that have been imported into MAX schedule R from Treasury SF 224 data. (see section 81.1). Receipt account information is not collected via FACTS II.

82.20 What do I do if I do not agree with other PY amounts imported from Treasury?

You may over-write amounts imported from FACTS II. However, before over-writing an amount in the PY column of the P&F schedule in MAX A-11, you should talk with the person who entered the data into FACTS II to see why they entered that amount. If you both find that an amount reported via FACTS II was incorrect, then over-write the amount and let the person who entered the information in FACTS II know, so that they can revise it. After the budget database is locked, and once the FACTS II database opens for revisions, ensure that the revision is submitted properly. Although it will be too late to revise the FMS 2108 and TAR, the revision may affect the SF 133 or Monthly Treasury Statement. Revisions are intended to help you correct errors (not to give you extra time to verify your data) and should be used sparingly. For FACTS II reporting periods see www.fms.treas.gov/ussgl/FACTSII.

Relationships between Selected Program and Financing Lines (MAX Schedule P)

Program and Financing (in millions of dollars)		PY actual	CY est.	BY est.
Identification code 16-1182-0-1-755

Offsets:				
Against gross authority and outlays:				
Offsetting collections (cash) from:				
88.00	Federal sources.....	46	41	45
Against gross budget authority only:				
88.95	Change in uncollected customer payments from Federal sources (unexpired).....	-1	1
88.96	Portion of offsetting collections (cash) credited to expired accounts.....	-3	2
Net budget authority and outlays:				
89.00	Budget authority (net).....	90	89	95
90.00	Outlays (net).....	81	87	89

Separately identify new obligations by significant activity, as appropriate. Report obligations funded by reimbursements separately on lines coded 09XX. Report all obligations in noncredit revolving funds as reimbursable on lines 09XX.

Spending authority from offsetting collections consists of cash collections (unexpired) plus the change in uncollected customer payments from Federal sources (unexpired).

This equals accounts payable plus undelivered orders minus the amount of accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources.

This equals the sum of the amounts on lines 6810 and 6910, but with the opposite sign.

This equals accounts payable plus undelivered orders minus the amount of accounts receivable from Federal sources and unpaid, unfilled orders from Federal sources.

Separately identify cash collections, the change in uncollected customer payments from Federal sources, and the portion of offsetting collections (cash) credited to expired accounts.

This equals the sum of the amounts on lines 6800 and 6900 minus the amount on lines 8800 through 8845.

Always report lines 8900 and 9000, even if the amounts are zero.

This equals total new budget authority (gross) on line 2200 minus the amounts on lines 8800 through 8845 and on lines 8895 and 8896.

This equals total outlays (gross) on line 8700 minus the amounts on lines 8800 through 8845.

Automatic Generation of MAX Schedule P Data

The program and financing schedule shown below indicates the lines automatically generated by MAX. Some lines are copied from other entries in MAX; others are automatically calculated from detail entries.

Program and Financing (in millions of dollars)		
Identification code 16-1186-0-1-755	PY actual	CY est. BY est.
Obligations by program activity:

- 83.8 What object classes are associated with civilian and military pay in the baseline?

Classifying Specific Types of Transactions

- 83.9 How do I classify relocation expenses related to a permanent change of station (PCS)?
- 83.10 How do I classify purchases related to information technology (IT)?
- 83.11 How do I classify obligations for education and training?
- 83.12 How do I classify obligations for real property (space, land, and structures)?
- 83.13 How do I classify obligations for Federal civilian retirement under CSRS?
- 83.14 How do I classify obligations for military retirement?
- 83.15 How do I classify intragovernmental transactions?
- 83.16 How do I classify obligations under the Intergovernmental Personnel Act (IPA)?

The Object Class Schedule and MAX Schedule O

- 83.17 How is object class information presented in MAX schedule O and the Appendix?
- 83.18 When I report data in MAX schedule O will it generate subtotals or totals?

- Ex-83A Summary of Object Class Codes and Standard Titles (MAX Schedule O)
- Ex-83B Object Classification-Without Allocation Accounts
- Ex-83C Object Classification-With Allocation Accounts

Summary of Changes

Clarifies that object class 12.1 includes recruitment and retention obligations under the Student Loan Repayment Program authorized by 5 U.S.C. 5379 (section 83.7).

Clarifies which object classes are associated with civilian and military pay in the baseline (section 83.8).

83.1 What are object classes?

Object classes are categories in a classification system that presents *obligations by the items or services purchased* by the Federal Government. These are the major object classes:

SECTION 83 – OBJECT CLASSIFICATION (MAX SCHEDULE O)

- 10 Personnel compensation and benefits.
- 20 Contractual services and supplies.
- 30 Acquisition of assets.
- 40 Grants and fixed charges.
- 90 Other.

We divide these major classes into smaller classes and present them in the Budget Appendix in object class schedules.

The object classes present obligations according to their initial purpose, *not the end product or service*. For example, if you pay a Federal employee who constructs a building, classify the obligations for the employee's wages under *Personnel compensation and benefits*, rather than *Acquisition of assets*. If you purchase a building, classify the contractual obligations under *Acquisition of assets*.

You record *obligations* when the Federal Government places an order for an item or a service, awards a contract, receives a service, or enters into similar transactions that will require payments in the same or a future period (see section 20.5). You also record obligations when you make an *expenditure* transfer between Federal Government accounts (see section 20.4(j)).

83.2 Why must I report object class information?

You must report object class information because a law (31 U.S.C. 1104(b)) requires the President's budget to present obligations by object class for each account.

83.3 How do object classes compare to functional and character classes and program activity?

The following table shows how the object classification system differs from the other classification systems used in the President's budget.

Classification System	What is classified?	What does it tell me?
Object class	Obligations	Goods or services or items purchased, for example, supplies, rent, or equipment
Program activity (see section 82.2)	Obligations	Activity, project, or other programmatic distinction
Functional class (see section 79.3 (d))	Budget authority, outlays, and offsetting receipts	Major purpose served, for example, national defense, health, income security
Character class (see section 84.4)	Budget authority, outlays, and offsetting receipts	<ul style="list-style-type: none">• Whether the amount pays for an <i>investment</i> or an operating cost;• If investment, then, what type: physical asset, conduct of R&D, or education and training; or• Whether the amount is a <i>grant</i> to a State and local government or a <i>direct</i> Federal program.

83.4 How does the object class schedule relate to the program and financing schedule?

You report object class information whenever you report obligations on a program and financing (P&F) schedule (except you don't report object class information for credit financing accounts). This means you report obligations by object class separately for the regular budget requests, supplemental budget requests, rescission proposals, and legislative proposals.

In addition, object class schedules separately identify the following types of obligations:

- Direct and reimbursable obligations (see section 83.5).
- Obligations covered by statutory limitations (see section 83.6).
- Obligations for allocations between agencies (see section 83.17).

83.5 How can I determine whether an obligation should be classified as direct or reimbursable?

In general, reimbursable obligations are those financed by offsetting collections received in return for goods and services provided, while all other obligations are direct. However, there are exceptions. Classify *obligations within the account* as "direct" or "reimbursable" in accordance with the following criteria:

If the obligations are . . .	And if . . .	The classification is . . .
NOT financed from offsetting collections	The account is NOT a REVOLVING FUND	Direct
Financed from any type of budgetary resources, including offsetting collections	The account is a CREDIT program or liquidating account	Direct
Financed from offsetting collections from: <ul style="list-style-type: none"> • Asset sales; • Interest on Federal securities; • Interest on uninvested funds; • Compulsory collections from the public, such as taxes, compulsory user fees, customs duties, license fees; or • Intragovernmental expenditure transfers with no benefit (e.g., goods and services) to the paying account 		Direct
Financed from offsetting collections received in return for goods or services provided, including: <ul style="list-style-type: none"> • Reimbursements under the IPA (see section 83.16); and • Voluntary insurance premiums 	The offsetting collections are NOT from any of the sources identified in the previous case, that is, asset sales, interest, etc.	Reimbursable
<ul style="list-style-type: none"> • Note: Compulsory collections 		

SECTION 83 – OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligations are . . .	And if . . .	The classification is . . .
(as opposed to voluntary collections) are coded 8845 in schedule P (see section 82.7)		
Financed from any type of budgetary resources, including offsetting collections	The account is a REVOLVING FUND but is NOT a credit liquidating account	Reimbursable
Financed from offsetting collections from other Federal government account(s)	The collections are for a jointly funded grant or project	Reimbursable

The amounts you classify as reimbursable obligations in both MAX schedule O and MAX schedule P for a budget account should be identical. There are three exceptions:

- Line 9995, *Below reporting threshold*, in MAX schedule O may contain a mixture of direct and reimbursable obligations. These amounts are not material because they are normally \$4 million or less;
- Credit financing accounts do not have any MAX schedule Os; and
- All the obligations may be rolled up on line 1000 in MAX schedule P and there may be a mixture of direct and reimbursable obligations on that line.

MAX schedule O. Use the 4-digit object class line numbers in exhibit 83A when you enter obligations by object class in MAX schedule O. Be sure to use the right prefix to distinguish reimbursable from direct obligations. For reimbursable obligations, if the obligations are for the parent account use 2xxx and if the obligations are in a limitation schedule use 7xxx.

MAX schedule P. Use the 4-digit program activity codes in section 82.2 when you enter obligations in MAX schedule P. For reimbursable obligations, use x9xx.

83.6 How should I report obligations that are covered by statutory limitations?

When a law limits administrative or other expenses for a revolving or trust fund, you must separately identify the object classes that are covered by the limitation from those that are not covered. See exhibit 83A for the prefix and codes used to identify obligations under limitations and section 83.17 for the relationship between MAX schedule O and the *Budget Appendix*.

83.7 What object class codes and definitions should I use?

Earlier, we said that we divided the major object classes into smaller ones. The following table provides the codes, standard titles, and definitions used to identify detailed object class data. Exhibit 83A provides a summary of the codes and standard titles used in MAX schedule O.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

	Entry	Description
10	PERSONNEL COMPENSATION AND BENEFITS	This major object class consists of object classes 11, 12, and 13.
11	Personnel Compensation	Compensation directly related to duties performed for the Government by Federal civilian employees, military personnel, and non-Federal personnel. Object class 11 covers object classes 11.1 through 11.8.
11.1	Full-time permanent	<p>For full-time civilian employees with permanent appointments, report:</p> <ul style="list-style-type: none"> • Regular salaries and wages paid to the employees (some of which may be withheld from the employee's check to pay taxes, to pay a bill in a credit union, or to pay the employee's share of life and health insurance). • Other payments that become part of their basic pay (for example, geographic differentials, and critical position pay). • Regular salaries and wages paid while the employees are on paid leave, such as annual, sick, or compensatory leave. • Lump sum payments for annual leave upon separation (also known as terminal leave payments). <p>Exclude <i>compensation above the basic rate</i>, for example, overtime or other premium pay, which will be classified in object class 11.5, <i>Other personnel compensation</i>.</p> <p>Full-time permanent employees are those who are full-time civilian employees with <i>permanent appointments as defined by the Office of Personnel Management (OPM)</i>. The nature of the employee's appointment is controlling, not the nature of the position. Include <i>full-time permanent employees</i> in the:</p> <ul style="list-style-type: none"> • <i>Competitive Service</i> with career and career-conditional appointments. • <i>Excepted Service</i> whose appointments carry no restriction or condition. Include those serving trial periods or whose tenure is equivalent to career-conditional tenure in the Competitive Service. Exclude those serving on indefinite appointments and appointments limited to a specific time. • <i>Senior Executive Service (SES)</i> with career appointments as defined in 5 U.S.C. 3132(a)(4) and non career appointments as defined in 5 U.S.C. 3132(a)(7). • Public Health Service and the National Oceanic and Atmospheric Administration appointed as <i>commissioned officers</i>. <p>Note: Refer to your agency's human resources office for assistance on the types of appointments for staff in your agency.</p> <p>Exclude full-time <i>temporary</i> employees who are full-time civilian employees with <i>temporary appointments as defined by OPM</i> who will be classified in object class 11.3, <i>Other than full-time permanent</i>.</p>

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

	Entry	Description
11.3	Other than full-time permanent	<p data-bbox="634 281 1360 338">Regular salaries and wages paid to civilian employees for part-time, temporary, or intermittent employment.</p> <p data-bbox="634 375 1179 403">Other than full-time permanent employees include:</p> <ul data-bbox="634 407 1409 842" style="list-style-type: none"> • <i>Part-time permanent employees</i>, that is, employees with appointments that require work on a prearranged schedule of fewer hours or days of work than prescribed for full-time employees in the same group or class. • <i>Temporary employees</i>, that is, employees with appointments for a limited period of time that is generally less than a year. For example: <ul data-bbox="678 627 1341 751" style="list-style-type: none"> (a) full-time temporary employees, (b) seasonal employees without permanent appointments, (c) employees with term appointments, and (d) employees with indefinite appointments. • <i>Intermittent employees</i>, that is, employees with appointments that require work on an irregular or occasional basis and who are paid only for the time actually employed or services actually rendered. <p data-bbox="634 871 1409 1119"><i>Note:</i> For personal services contracts with individuals who are classified by OPM as Federal employees, classify the basic pay in this object class and classify compensation above the basic pay in object class 11.5, <i>Other personnel compensation</i>. On the other hand, classify the payments to a contractor principally for the personal services of a group of the contractor's employees according to the type of contract involved (for example, classify personal services contracts for operation and maintenance of facilities under object class 25.4).</p>
11.5	Other personnel compensation	<p data-bbox="634 1148 1401 1205">Compensation <i>above the basic rates</i> paid directly to civilian employees. Include:</p> <ul data-bbox="634 1209 1419 1709" style="list-style-type: none"> • <i>Overtime</i>, which is pay for services in excess of the established work period as defined in 5 U.S.C. 5542, standby duty and administratively uncontrollable overtime as defined in 5 U.S.C. 5545, and unscheduled availability duty hours for criminal investigations as defined in 5 U.S.C. 5545a. • <i>Holiday pay</i> as defined in 5 U.S.C. 5546(b). • <i>Night work differential</i>, which is pay above the basic rate for regularly scheduled night work. • <i>Post differentials</i>, which are authorized under 5 U.S.C. 5925 above the basic rate for service at hardship posts abroad that are based upon conditions of environment substantially different from those in the continental United States and warrant additional pay as a recruitment and retention incentive. • <i>Hazardous duty pay</i>, which is pay above the basic rate because of assignments involving performance of duties that subject the employee to hazards or physical hardships. <p data-bbox="678 1738 1401 1860"><i>Note:</i> Post differentials and hazardous duty pay result from the job or services performed. For example, a job performed at a hardship post abroad or under hazardous duty is different from what might appear to be the same job performed elsewhere and under non-</p>

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

Entry	Description
	<p>hazardous conditions. Hence, both are classified with other pay in object class 11 and not as benefits in object class 12. By contrast, compensation in the form of cost of living allowances are classified as benefits in object class 12 because they do not result from the job or services performed. The cost for a job in one locale is different from the same job in another locale simply because the cost of living is higher in one locale.</p> <ul style="list-style-type: none"> • <i>Supervisory differential</i>, which is pay above the basic rate to adjust the compensation of a supervisor to a level greater than the highest paid subordinate. The differential applies to a General Schedule employee who supervises one or more employees not covered by the General Schedule. • <i>Cash incentive awards</i>, which are payments for cash awards that do not become part of the Federal civilian employee's basic rate of pay, such as those authorized under 5 U.S.C. 4503, 4504, 4505a, 4507, and 5384. • <i>Other payments above basic rates</i>, which are payments for other premium pay, such as stand-by pay and premium pay in lieu of overtime and special pay that is paid periodically during the year in the same manner and at the same time as regular salaries and wages are paid. Exclude other payments which are classified in object class 12.1, <i>Civilian personnel benefits</i>. • <i>Royalties</i> to Federal scientists and inventors which may last up to 17 years and may be paid after the employee has left Federal service or to the employee's beneficiary.
11.7 Military personnel	<p>The regular salaries and wages paid to military personnel (some of which may be withheld from the employee's check to pay taxes, to pay a bill in a credit union, or to pay the employee's share of life and health insurance) as well as amounts above the basic pay rates. For "amounts above the basic pay rates," apply the same definitions as for civilian employees in object class 11.5 plus:</p> <ul style="list-style-type: none"> • <i>Flight pay</i>. • <i>Basic allowance for subsistence (BAS) and for quarters (BAQ)</i>. • <i>Extra pay based upon conditions of environment</i> (except cost of living allowances for locations outside the contiguous 48 States and the District of Columbia which will be classified in object class 12.2, <i>Military personnel benefits</i>).
11.8 Special personal services payments	<p>Payments for personal services that don't represent salaries or wages paid directly to Federal employees and military personnel. Include payments for:</p> <ul style="list-style-type: none"> • <i>Reimbursable details</i>, that is, payments to other accounts for services of civilian employees and military personnel on reimbursable detail (both compensation and personnel benefits). • <i>Reemployed annuitants</i>, that is, payments by an agency employing an annuitant to reimburse the Civil service retirement and disability fund for the annuity paid to that employee under 5 U.S.C. 8339 through 8344.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

Entry	Description
	<ul style="list-style-type: none"> • <i>Non-Federal civilians, such as witnesses</i>; casual workers, patient and inmate help, and allowances for trainees and volunteers. • <i>Salary equalization</i> (authorized under 5 U.S.C. 3372 and 3584) to individuals on leave of absence while employed by international organizations or State and local governments, when the equalization payment is 50 percent or less of the person's salary. • <i>Staff of former Presidents</i> paid by GSA under 3 U.S.C. 102(b).
11.9	<p>Total personnel compensation</p> <p>Use this line when there is more than one entry on object classes 11.1 through 11.8.</p>
12 & 13 Personnel Benefits	<p>Benefits for <i>currently employed</i> Federal civilian, military, and certain non-Federal personnel. Exclude benefits to certain <i>former</i> civilian and military personnel that are classified in object classes 13.0 and 42.0. Covers object classes 12.1 and 12.2.</p>
12.1	<p>Civilian personnel benefits</p> <p>Cash payments (from the agency, not funds withheld from employee compensation) to other funds for the benefit of Federal civilian employees or direct payments to these employees.</p> <p>Also, payments to or for certain non-Federal employees as required by law. Non-Federal civilian employees are employees who are not reportable to the Office of Personnel Management as Federal employees, such as witnesses, casual workers, trainees, volunteers. For example, Peace Corps and VISTA volunteers, Job Corps enrollees, and U.S. Department of Agriculture Extension Service agents.</p> <p>Civilian personnel benefits include:</p> <ul style="list-style-type: none"> • <i>Insurance and annuities</i>, which are the employer's share of payments for life insurance, health insurance, employee retirement (including payments to finance fiduciary insurance costs of the Federal Retirement Thrift Investment Board), work injury disabilities or death and professional liability insurance (which are payments to reimburse qualified Federal employees for up to one half the cost of professional liability insurance premiums, as authorized by PL. 104-208 and amended by PL 106-58). • Recruitment, retention, and other incentives, such as: <ul style="list-style-type: none"> -- Payments above the basic rate for recruitment bonuses, relocation bonuses, and retention allowances authorized by 5 U.S.C. 5753 and 5754. -- Relocation and other expenses related to permanent change of station (PCS), except expenses for travel and transportation and the storage and care of vehicles and household goods (see subsection 83.9). -- Cash allowances for separate maintenance, education for dependents, transfers for employees stationed abroad, and personal allowances based upon assignment or position, and overseas differentials. -- Cost-of-living allowances (COLAs) as authorized under 5 U.S.C. 5924 and 5941 and other laws.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

Entry	Description
	<p><i>Note:</i> COLAs are classified as benefits in object class 12 (and not as compensation in object class 11) because they are not related to the job or service performed.</p> <p>--Student loan repayments authorized by 5 U.S.C. 5379.</p>
12.2 Military personnel benefits	<ul style="list-style-type: none"> • <i>Other allowances and payments</i> such as allowances for uniforms and quarters, special pay that is paid in a lump sum (such as compensatory damages or employee settlements), reimbursements for notary public expenses, and subsidies for commuting costs, that is, payments to subsidize the costs of Federal civilian employees in commuting by public transportation. <p>Cash allowances and payments of employer share to other funds for military personnel. Include:</p> <ul style="list-style-type: none"> • <i>Cash allowances</i> such as: <ul style="list-style-type: none"> -- Uniform allowances. -- Reenlistment bonuses. -- Cost-of-living allowances. -- Dislocation and family separation allowances. -- Personal allowances based upon assignment or rank. <p>Exclude hazardous duty pay, flight pay, extra pay based upon conditions of work environment, and other such pay, which are classified as military personnel compensation in object class 11.7, and benefit payments to veterans resulting from their past service, which are classified as benefits to former personnel in object class 13.0.</p> <ul style="list-style-type: none"> • <i>Payments to other funds</i>, such as the employer's share of military retirement, Federal Insurance Contribution Act taxes, Servicemen's Group Life Insurance premiums, and education benefits. • <i>Subsidies for commuting costs</i>, which are payments to subsidize the costs of military personnel in commuting by public transportation.
13.0 Benefits for former personnel	<p>Benefits for former officers and employees or their survivors that are based (at least in part) on the length of service to the Federal Government. Include:</p> <ul style="list-style-type: none"> • <i>Retirement benefits</i> in the form of pensions, annuities, or other retirement benefits paid to former military and certain civilian Government personnel or to their survivors, exclusive of payments from retirement trust funds, which are classified as insurance claims and indemnities under object class 42.0. • <i>Separation pay</i>, which are severance payments to former employees who were involuntarily separated through no fault of their own and voluntary separation incentive (VSI) payments, also known as "buy-outs" to employees who voluntarily separate from Federal service. • <i>Payments to other funds</i> for ex-Federal employees and ex-service personnel (e.g., agency payments to the unemployment trust fund for ex-employees and one-time agency payments of final basic pay to the civil service retirement fund for employees who took the

33.0	Investments and loans	<p>Purchase of:</p> <ul style="list-style-type: none"> • Stocks, bonds, debentures, and other securities that are <u>neither</u> U.S. Government securities <u>nor</u> securities of wholly-owned Federal Government enterprises. • Temporary or permanent investments. • Interest accrued at the time of purchase and premiums paid on all investments. <p>For credit programs, see section 85 for object classification related to defaults.</p>
40	GRANTS AND FIXED CHARGES	<p>This major object class covers object classes 41.0 through 44.0.</p>
41.0	Grants, subsidies, and contributions	<p>Cash payments to States, other political subdivisions, corporations, associations, and individuals for:</p> <ul style="list-style-type: none"> • Grants (including revenue sharing). • Subsidies (including credit program costs). • Gratuities and other aid (including readjustment and other benefits for veterans, other than indemnities for death or disability). <p>Contributions to foreign countries, international societies, commissions, proceedings, or projects that are:</p> <ul style="list-style-type: none"> • Lump sum or quota of expenses. • Fixed by treaty. • Discretionary grants. <p>Taxes imposed by State and local taxing authorities where the Federal Government has consented to taxation (excluding the employer's share of Federal Insurance Contribution Act taxes) and payments in lieu of taxes.</p> <p><i>Note:</i> Obligations under grant programs that involve the furnishing of services, supplies, materials, and the like by the Federal Government, rather than cash, are not charged to this object class, but to the object class representing the nature of the services, articles, or other items that are purchased.</p>
42.0	Insurance claims and indemnities	<p>Benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. Include:</p> <p><i>Social insurance and retirement</i> payments for individuals from trust funds for:</p> <ul style="list-style-type: none"> • Social security. • Medicare. • unemployment insurance. • Railroad retirement. • Federal civilian retirement. • Military retirement. • Other social insurance and retirement programs.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

Entry	Description
	<p><i>Insurance payments from Federal insurance revolving funds, such as the Bank insurance fund, for:</i></p> <ul style="list-style-type: none"> • Liquidation and insurance. • Litigation settlements due receivers and trustees. • Working capital outlays. • Net case resolution losses. • Other unpaid resolution obligations, not otherwise classified. <p>(Note: Classify other payments by Federal insurance revolving funds to the object classes to which they apply, for example classify premiums on investments in object class 33.0, <i>Investments and loans</i>, and interest expenses in object class 43.0, <i>Interest and dividends</i>).</p> <p><i>Other claim or indemnity payments:</i></p> <ul style="list-style-type: none"> • To veterans and former civilian employees or their survivors for death or disability, whether service-connected or not. • Of claims and judgments arising from court decisions or abrogation of contracts; indemnities for the destruction of livestock, crops, and the like; damage to or loss of property; and personal injury or death. • To or for persons displaced as a result of Federal and federally assisted programs, as authorized under 42 U.S.C. 4622-4624. • For losses made good on Government shipments. • From liquidating accounts on guarantees where no asset is received and where forgiveness is not provided by law.
43.0 Interest and dividends	<p>Include:</p> <ul style="list-style-type: none"> • Payments to creditors for the use of moneys loaned, deposited, overpaid, or otherwise made available. • Distribution of earnings to owners of trust or other funds. • Interest payments under lease-purchase contracts for construction of buildings. <p>Exclude the interest portion of the payment of claims when a contract has been delayed by the Government. Classify these costs under the same object class used for the original contract.</p>
44.0 Refunds	<p>Payments of amounts previously collected by the Government. Include:</p> <ul style="list-style-type: none"> • Payments to correct errors in computations, erroneous billing, and other factors (see section 20.10). • Payments to former employees or their beneficiaries for employee contributions to retirement and disability funds (e.g., payments made when employees die before retirement or before their annuities equal the amount withheld). <p><i>Note:</i> In the account receiving the refund, previously recorded obligations will be reduced in the appropriate object class(es) by the amount of the refund, if the refund is received in the same year as the obligations are reported (see section 20.10).</p>

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

Entry		Description
90	OTHER	This major object class covers object classes 91.0 through 99.5.
91.0	Unvouchered	Charges that may be incurred lawfully for confidential purposes and are not subject to detailed vouchering or reporting.
92.0	Undistributed	Charges that cannot be distributed to the object classes listed above. Use this object class only with the prior approval of OMB.
93.0	Limitation on expenses	This object class is used when there is an annual limitation on administrative or other expenses for revolving and trust funds. (See section 83.6).
99.0	Subtotal, obligations	This entry is automatically generated by MAX: <ul style="list-style-type: none"> For <i>direct or allocation</i> account obligations, the subtotal stub entry should appear when more than one object class category is reported in a single account. <p>For <i>reimbursable</i> obligations, the subtotal stub entry, "Reimbursable obligations," should appear, even if all reimbursable obligations are classified in a single object class category.</p>
99.5	Below reporting threshold	Use this object class adjustment line when: <ul style="list-style-type: none"> The sum for an object class entry is \$500 thousand or less, that is, it is below the reporting threshold, <i>and</i> The sum of <i>all</i> the below threshold amounts rounds to \$1 million or more. <p>There will be <i>only one</i> adjustment line per object class schedule. It will:</p> <ul style="list-style-type: none"> Follow the last subtotal (object class 99.0) for the schedule. Be coded 9995 in MAX. <p>Do not report amounts of more than \$4 million in this object class, unless approved by OMB.</p>

83.8 What object classes are associated with civilian and military pay in the baseline?

Civilian pay means the budgetary resources used to fund civilian compensation and benefits consistent with object classes 11.1 through 11.5 and 12.1.

Military pay means the budgetary resources used to fund military personnel compensation and benefits consistent with object classes 11.7 and 12.2.

83.9 How do I classify relocation expenses related to a permanent change of station (PCS)?

When an employee accepts a Federal position at a different location, such as a different State, this is called a permanent change of station. An agency, at its discretion, may reimburse the employee for a variety of expenses related to the relocation. Follow the instructions in the table to classify these expenses among the object classes.

If the obligations are for ...	Then classify in object class ...
Transportation, per diem while in travel status, or reimbursement of actual travel expenses for the employee or the employee's immediate family	21.0 <i>Travel and transportation of persons</i>
Transportation of household goods, house trailers, and effects	22.0 <i>Transportation of things</i>
Storage and care of vehicles and household goods	25.7 <i>Operation and maintenance of equipment</i>
All other relocation expenses for <i>civilian</i> employees, such as: <ul style="list-style-type: none"> • Allowances for expenses incurred in connection with a sale of a residence or settlement of an unexpired lease. • Subsistence when occupying temporary quarters (in contrast to per diem while in travel status, above). • Reimbursements of amounts equal to income taxes incurred by transferred employees for moving or storage expenses under 5 U.S.C. 5724b. • Contractual charges for relocation services under 5 U.S.C. 5724c. • Miscellaneous moving expenses under 5 U.S.C. 5724a. 	12.1 <i>Civilian personnel benefits</i>
All other relocation expenses for <i>military</i> personnel	12.2 <i>Military personnel benefits</i>

83.10 How do I classify purchases related to information technology (IT)?

For some reason, we have had many questions on how to classify IT obligations among the various object classes. The general rule is to focus on the nature of the services, articles or other items for which obligations are first incurred. The following table shows the application of this rule.

If the obligations are for ...	Then classify in object class ...
IT services or the rental of IT equipment	23.3 <i>Communications, utilities, and miscellaneous charges</i>
Operation and maintenance of IT systems by the private sector	25.7 <i>Operation and maintenance of equipment</i>
Operation and maintenance of IT systems by another Federal Government account	25.3 <i>Purchases of goods and services from Government accounts</i>
IT hardware and software	31.0 <i>Equipment</i>

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligations are for ...	Then classify in object class ...
IT supplies and materials, such as manuals, diskettes, toner cartridge	26.0 <i>Supplies and materials</i>
IT consulting services in the form of: <ul style="list-style-type: none"> • Management and professional support services. • Studies, analyses, and evaluations. • Engineering and technical services. 	25.1 <i>Advisory and assistance services</i>

83.11 How do I classify obligations for education and training?

We have also had many questions on how to classify education and training obligations among the various object classes. The general rule is to focus on the nature of the services, articles or other items for which obligations are first incurred. The following table shows the application of this rule.

If the obligations are for ...	Then classify in object class ...
Payments of tuition to universities or colleges leading to a degree, or for attendance at conferences	25.2 <i>Other services</i>
All other payments to a private sector company for training courses	25.1 <i>Advisory and assistance services</i>
Payments to other Federal government agencies for training courses	25.3 <i>Purchases of goods and services from Government accounts</i>
Cash allowances for the education of dependents that are provided as recruitment and retention incentives for civilian employees	12.1 <i>Civilian personnel benefits</i>
Cash allowances for the education of dependents that are provided as recruitment and retention incentives for military personnel	12.2 <i>Military personnel benefits</i>

83.12 How do I classify obligations for real property (space, land, and structures)?

Classify obligations for the *purchase, including lease purchase, or improvement* (that is, alteration or modification) of real property in object class 32, *Land and structures*.

Classify the *rental or lease* of real property, as follows:

If the obligation are for ...	And if ...	Then classify in object class ...
Payment to another Federal government account	The other account is GSA's Federal Buildings Fund*	23.1 <i>Rental payments to GSA</i>

SECTION 83 – OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligation are for ...	And if ...	Then classify in object class ...
Payment to another Federal government account	The other account is NOT GSA's Federal Buildings Fund	25.3 <i>Purchases of goods and services from Government accounts</i> Note: The paying account must use this <u>object class code</u> but may change the title to "Rental payments to GSA."
Payment to the private sector		23.2 <i>Rental payments to others</i>

* Classify amounts for the *standard* services, such as cleaning and security, covered by the *basic rental charge* assessed by GSA in object class 23.1, *Rental payments to GSA*. However, if the payment is for rent "related" services provided by GSA in addition to services provided under rental payments, for example, extra protection or extra cleaning, report the amounts under object class 25.3, *Purchases of goods and services from Government accounts*.

GSA operating delegations. When GSA *delegates* the operation of a facility back to an agency ("operating delegations"), the agency is in charge of operating the facility.

GSA bills for basic rental charges differ depending on whether the building is owned or leased by GSA.

For GSA-leased buildings, the GSA bills the total (gross) amount of the basic rental charge which includes a charge for operating the building. In these cases, the following transactions occur:

- GSA bills the agency for the *gross* amount of the basic rental charge.
- Agency records obligations in object class 23.1, *Rental payments to GSA*, and pays GSA's Federal Buildings Fund the *gross* amount.
- GSA *rebates* the amount for operating the facility back to the agency.
- Agency records the amount rebated as offsetting collections.
- If the agency, in turn, contracts with the private sector to clean the facilities, the obligations are classified in object class 25.4, *Operation and maintenance of facilities*.
- If the agency, in turn, contracts with another agency (for example, to guard the building), the obligations are classified in object class 25.3, *Purchases of goods and services from Government accounts*.

The above treatment will continue for rental of ***GSA-leased buildings***.

Beginning in FY 1999, for GSA-owned buildings only, GSA began billing agencies with operating delegations for the *net* amount. Amounts for *standard* services that have been delegated back to the agencies are no longer included in object class 23.1.

83.13 How do I classify obligations for Federal civilian retirement under CSRS?

Use the following:

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligations are for ...	Then classify in object class ...
The accrual for the future retirement cost of current civilian personnel covered by CSRS that is charged to the accounts that pay direct compensation to those personnel	12.1 <i>Civilian personnel benefits</i>
Note: The corresponding receipts credited to the civil service retirement and disability trust fund are treated as undistributed offsetting receipts (Employer share, employee retirement on the inter fund transaction line)	
The Government's share of retirement costs that amortize increases in the static unfunded liability created since October 20, 1969 by any statute which authorizes new or liberalized benefits, an extension of retirement coverage, or pay increases	12.1 <i>Civilian personnel benefits</i>
Note: This applies to OPM's "Payment to the Civil Service Retirement and Disability Fund" account only.	
Interest on the static unfunded liability and annuity disbursements attributable to military service and the payment to provide annuities to former spouses of annuitants who died between September 1978 and May 1986 and who did not elect survivor coverage	13.0 <i>Benefits for former personnel</i>
Note: This applies to OPM's "Payment to the Civil Service Retirement and Disability Fund" account only.	
Payments to CSRS retirees	42.0 <i>Insurance, claims, and indemnities</i>
Note: This applies to OPM's "Civil Service Retirement and Disability Fund" account only.	

83.14 How do I classify obligations for military retirement?

Since 1985, when the financing of military retirement changed to an accrual basis, the payments should be classified as follows:

If the obligations are ...	Then classify in object class ...
The accrual for the future retirement cost of current military personnel that is charged to the accounts that pay direct compensation to those personnel	12.2 <i>Military personnel benefits</i>
Note: The corresponding receipts credited to the military retirement trust fund are treated as undistributed offsetting receipts (Employer share, employee retirement on the inter fund transaction line).	
From general revenues to the military retirement fund to finance retirement costs for service prior to 1985	13.0 <i>Benefits for former personnel</i>
Note: This applies to the "Payment to Military	

SECTION 83 – OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligations are ...	Then classify in object class ...
Retirement Fund” account only.	
Made to military retirees Note: This applies to the “Military Retirement Fund” account only.	42.0 <i>Insurance, claims, and indemnities</i>

83.15 How do I classify intragovernmental transactions?

For payments between two Federal government accounts for:

- Relocation expenses, see section 83.9;
- Information technology, see section 83.10;
- Education and training, see section 83.11;
- Real property, see section 83.12;
- Federal civilian retirement under CSRS, see section 83.13; and
- Military retirement, see section 83.14.

For other payments between two Federal government accounts, classify the obligations as follows:

If the obligations are ...	Then classify in object class ...
Transfers by the paying account to reimburse the receiving account for an asset or a service <i>with a specific object class</i>	<p>The paying account should classify the <i>direct</i> obligations in the object class that best describes the purchase, such as:</p> <p>21.0 <i>Travel and transportation of persons</i> 22.0 <i>Transportation of things</i> 23.1 <i>Rental payments to GSA</i> 23.2 <i>Rental payments to others</i> 23.3 <i>Communications, utilities, and miscellaneous charges</i> 24.0 <i>Printing and reproduction</i> 25.1 <i>Advisory and assistance services</i> 25.4 <i>Operation and maintenance of facilities</i> 25.5 <i>Research and development contracts</i> 25.6 <i>Medical care</i> 25.7 <i>Operation and maintenance of equipment</i> 25.8 <i>Subsistence and support of persons</i> 26.0 <i>Supplies and materials</i> 31.0 <i>Equipment</i> 32.0 <i>Land and structures</i> 33.0 <i>Investment and loans</i> 43.0 <i>Interest and dividends</i> 44.0 <i>Refunds</i></p>
Transfers by the paying account to reimburse the receiving account for an asset or a service <i>without a specific object class</i>	25.3 <i>Purchases of goods and services from Government accounts.</i> Do not use this object class if a more specific object class applies.

If the obligations are ...	Then classify in object class ...
Transfers where the transfer merely moves resources between Federal and trust fund accounts. Normally these transfers result from appropriations action or general transfer authority where the obligations are simply accounting transfers.	92.0 <i>Undistributed</i> Note: The paying account should report direct obligations in object class 92.0 and the receiving account should distribute the obligations as direct obligations in the appropriate object classes.

83.16 How do I classify obligations under the Intergovernmental Personnel Act (IPA)?

Under the IPA, a Federal employee, with his or her consent, may be assigned temporarily to a non-Federal organization.

- *Detailed Federal employees.* A detailed Federal employee continues to receive pay, allowances, and benefits from the Federal agency. In some cases, these costs are reimbursed by the non-Federal organization.
- *Federal employees on LWOP.* A Federal employee on LWOP is paid by the non-Federal organization to which he or she is assigned. The salary paid by the non-Federal organization may be more or less than the employee's current Federal salary. If the rate of pay of the non-Federal organization is less, then the Federal agency may pay a supplemental salary to the employee.

Also under the IPA, an employee of a non-Federal organization may be assigned temporarily to a Federal agency either (1) with a temporary Federal appointment or (2) on detail.

- *Non-Federal employees with temporary Federal appointments.* A non-Federal employee with a temporary Federal appointment is paid by the Federal agency to which he or she is assigned. However, he or she is eligible to enroll in the Federal Employees Health Benefits program only if the Federal appointment results in the loss of coverage under the non-Federal health benefits system. He or she is not covered by any retirement system for Federal employees or by the Federal Employees Group Life Insurance Program.
- *Non-Federal employees detailed to a Federal Position.* A non-Federal employee who is detailed to a Federal agency continues to receive pay, allowances, and benefits from the non-Federal organization to which he or she is employed. In some cases these costs may be reimbursed by the Federal agency. In addition, if the non-Federal salary of the employee on detail is less than the minimum rate of pay for the Federal position, the Federal agency may supplement the salary to make up the difference.

Cost-sharing arrangements for IPA assignments are negotiated between the participating organizations. The Federal agency may agree to pay all, some, or none of the costs associated with an assignment. These include basic pay, supplemental pay, fringe benefits, and travel and relocation expenses. A Federal agency may not reimburse a non-Federal organization for indirect or administrative costs associated with the assignment.

Because of these cost sharing arrangements you should use the following table to classify these obligations.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

If the obligations are ...	And if the employees is ...	Then classify in object class ...
Regular salaries and wages	Federal full-time and on detail to a non-Federal organization	11.1 <i>Full-time permanent</i>
	Federal but not full-time and on detail to a non-Federal organization	11.3 <i>Other than full-time permanent</i>
	non-Federal <i>with a temporary Federal appointment.</i>	
	non-Federal <i>on detail to a Federal agency to provide consulting services</i>	25.1 <i>Advisory and assistance services</i>
	non-Federal <i>on detail to a Federal agency to provide services other than consulting</i>	11.8 <i>Special personal services payments</i>
Supplemental pay	Federal on LWOP	11.8 <i>Special personal services payments</i>
	non-Federal on detail	
Cash incentive awards	Federal	11.5 <i>Other personnel compensation</i>
	non-Federal <i>with a temporary Federal appointment</i>	
	(Note: you cannot give this type of award to a non-Federal employee who is detailed to a Federal position.)	
Travel or relocation expenses		See sections 83.5 and 83.9
Other expenses		See section 83.5

83.17 How is object class information presented in MAX schedule O and the Appendix?

You must enter all object class information in MAX schedule O. Then the *Appendix* will present object class information in tables that are called object class schedules. These tables will present the object class codes, the object class titles, and the amounts of obligations in the past, current, and budget year.

MAX schedule O. Object class data are displayed in MAX on the basis of a 4-digit line number. This line number is made up of a *prefix* and a *3-digit object class code*. See the box on exhibit 83A for the type of obligations indicated by each prefix. Also, see exhibit 83A for a list of the 3-digit object class codes.

Note: The 3-digit object class code in MAX schedule O is the same 3-digit object class code in the *Appendix*, except that in the *Appendix* there is a decimal before the last digit. See section 83.7 for the definitions of the object classes.

Appendix schedules. The object class schedules in the *Appendix* present the 3-digit object class codes and the object class titles.

Normally, the *Appendix* will include a separate object class schedule for each P&F schedule that reports obligations (see exhibits 83B and 83C). However, when all obligations in a P&F schedule are classified in a *single object class*, there will be no object class schedule in the *Appendix*. Instead, the code for the appropriate object class will be identified in the P&F schedule in parentheses () at the end of the line for total new obligations. For example, if all obligations in a P&F are for grants, then “(object class 41.0)” will be at the end of the stub entry on line 10.00 of the P&F. Although there will be no object class schedule in the *Appendix*, you must enter the data in MAX schedule O.

Normally, the *Appendix* includes only one object class line for each object class code and uses the standard titles listed in section 83.7. However, you may insert additional object class lines in MAX and edit the standard titles. For example, to present employee travel separately from grantee travel in object class 21.0, *Travel and transportation of persons*, you may insert another line in MAX schedule O, edit the standard titles, and distribute the obligations between the two lines.

When there is a *statutory limitation* on obligations for administrative or other expenses for a revolving or trust fund, you must separately identify the obligations that are covered by the limitation from those that are not. Enter the appropriate prefix (see the box on exhibit 83A) in MAX schedule O. The *Appendix* will present two object class schedules:

- The regular object class schedule will present the *total* obligations for the account. The portion of the obligations that are covered by the statutory limitation are not distributed among the object classes. Instead, the obligations covered by the statutory limitation are presented as a lump-sum on object class line 93, *Limitation on expenses*.
- A separate object class schedule will distribute the obligations covered by the statutory limitation among the various object classes. Since the regular schedule presents total obligations, on line 99.9, to prevent double counting obligations, this schedule presents the sum of the obligations on object class line 93 as a negative (-) amount and the total obligations, on line 99.9, as zero.

Allocations between agencies. In some cases, funds appropriated to the President or to an agency are allocated to one or more agencies that help to carry out the program. Obligations incurred under such allocations are included in the data for the account to which the appropriation was made in the allocating agency, that is, the parent account. You must enter the data in MAX schedule O. Use the appropriated prefix in the box on exhibit 83A as the first digit in the 4-digit line number. See exhibit 83C for an illustration of an *Appendix* galley of an object class schedule for a parent account with allocations.

83.18 When I report data in MAX schedule O will it generate subtotals or totals?

Yes. MAX will generate subtotals for different types of obligations from the amounts that you entered, as follows:

- For “reimbursable” obligations (lines 2XXX and 7XXX), MAX will automatically generate subtotal lines (2990 and 7990) when you enter “at least one” amount on lines 2XXX or 7XXX.

SECTION 83 -- OBJECT CLASSIFICATION (MAX SCHEDULE O)

- For all other obligations (lines 1XXX, 3XXX, 6XXX, and 8XXX), MAX will automatically generate subtotal lines (1990, 3990, 6990, and 8990) when you enter “more than one” amount on lines 1XXX, 3XXX, 6XXX, or 8XXX.

MAX will generate “Total new obligations” on line 9999, when you enter more than one amount above this line.

Amounts that are generated for you by MAX will appear as the color “blue” on the screen of most personal computers. You may override these amounts by entering a different amount in MAX. Amounts that you override will appear as the color “green.” However, you will receive error messages when the amounts are not within rounding tolerances (see Appendix D).

(Summary of Object Class Codes and Standard Titles (MAX Schedule O))

3-digit object class code	Standard Titles	4-digit object class line number in MAX schedule O.
	Personnel compensation and benefits

Object Classification (in millions of dollars)

Identification code 09-2650-0-1-301	PY act.	CY est.	BY est.
-------------------------------------	---------	---------	---------

Direct obligations:

Personnel compensation:

11.1	Full-time permanent.....	113	112	115
11.3	Other than full-time permanent.....	3	3	3
11.5	Other personnel compensation.....	3	3	3
11.8	Special personal services payments.....	1	1	1
11.9	Total personnel compensation.....	120	119	122
12.1	Civilian personnel benefits.....	24	24	25
23.1	Rental payments to GSA.....	23	23	24
25.4	Operation and maintenance of facilities.....	5	5	5
25.7	Operation and maintenance of equipment.....	1	1	1

Use this entry to report transfers between Federal and trust funds resulting from appropriation action or general transfer authority.

99.2	Undistributed.....	4	4
99.0	Subtotal, direct obligations.....	211	208	209
99.0	Reimbursable obligations.....	26	27	28
23.95	Below reporting threshold.....	1	2	2
99.9	Total new obligations.....	238	237	239

Use to show payments that do not represent salaries or wages paid directly to Federal employees (section 83.5).

Report data rounded to the nearest million. If the total of amounts that fall below the threshold rounds to \$1 million or more, report the total in object class 99.5. To determine the amount on line 99.5, add the below threshold amounts in thousands, and round the total to the nearest million.

The reimbursable subtotal line will always appear whenever more than one category (e.g., direct, reimbursable, allocation, etc.) is reported and whenever any reimbursable obligations are reported in nonrevolving fund accounts.

Total new obligations and subtotals for direct and reimbursable obligations will agree with the corresponding amounts on the program and financing schedule.

------	----------------------------	-------	-----	-----

Obligations are distributed as follows:

→ Bureau of Public Works.....	971	711	561
Bureau of Inspection.....	30	35	30
Department of the Interior.....	10	5	5
General Services Administration.....	20	20	25

Where there is only one allocation, the center heading and the subtotal line will contain the name of the organizational unit involved and the distribution below will be omitted.

This entry will agree with the total new obligations on the program and financing schedule.

In the distribution of total obligations, the parent organizational unit will be listed first, followed, as applicable, by (a) other bureaus within the same agency, and (b) other agencies in budget order.

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)**Table of Contents**

- 84.1 What is the purpose of the character classification system?
- 84.2 What terms do I need to know?
- 84.3 What do I need to know about reporting the data and relationships with other data requirements?
- 84.4 How do I report character classification in MAX?

Ex-84A Summary of Character Classification Codes (Schedule C)

Ex-84B Research and Development Character Classification Codes

Summary of Changes

Requires agencies to report budget authority and outlays on a gross basis (section 84.3).

Deletes the crosscut for climate change technology and retitles the crosscut for high-performance computing and communications and information technology to networking and information technology R&D (section 84.4).

Classifies transactions related to credit liquidating accounts as non-investment activities (section 84.3).

84.1 What is the purpose of the character classification system?

We use character classification to distinguish between investment and non-investment activities. Investments finance activities that yield benefits largely in the future. We also use character classification to report data on grants to State and local governments separately from direct Federal programs. Character class line numbers include the following:

- Investment activities:
 - ▶ Lines 13xx, physical assets.
 - ▶ Lines 14xx, research and development (R&D).
 - ▶ Lines 15xx, education and training.
- Non-investment activities:
 - ▶ Lines 2xxx.

The classification system also includes additional information on R&D (e.g., R&D performed by colleges and universities, the allocation of R&D funds, and R&D crosscuts) that is used by OMB and others in the review of agency budget requests, Government-wide resource allocation, and R&D budget presentations.

See exhibit 84A for a summary of character classification line numbers. See section 84.4 for detailed descriptions of all of the line numbers that you must use to report character classification.

84.2 What terms do I need to know?

(a) *State or local governments.*

For preparing character classification data, State or local governments include the following:

- The 50 States and the District of Columbia.
- Cities, counties, townships, school districts, special districts, and other local governmental units, as defined by the Bureau of the Census.
- Puerto Rico, the Virgin Islands, and other U.S. territories.
- The Federated States of Micronesia, Marshall Islands, and Palau, if the payments are a relatively small part of the accounts that have grants to State or local governments.
- Indian Tribal governments when:
 - ▶ The legislation authorizing the payment includes such entities within the definition of eligible State or local units.
 - ▶ The Tribal government acts as a nonprofit agency operating under State or local auspices.
- Quasi-public nonprofit entities, such as community action agencies, when the boards of such entities must either be elected in State or local elections, or must include significant representation of State or locally-elected officials.

(b) *Grants to State and local governments.*

Report budget authority and outlays as grants to State and local governments if the Federal government's resources support State or local programs of government operations or provision of services to the public. For reporting character classification data, grants include the following:

- Direct cash grants to State or local governmental units, to other public bodies established under State or local law, or to their designee.
- Payments for grants-in-kind, such as purchases of commodities distributed to State or local governmental institutions, for example, school lunch programs.
- Payments to nongovernmental entities when such payments result in cash or in-kind services or products that are passed on to State or local governments, for example, payments to the Corporation for Public Broadcasting, or to the American Printing House for the Blind.
- Payments to regional commissions and organizations that are redistributed at the State or local level to provide public services.
- Payments to State and local governments for research and development that is an integral part of the State and local governments' provision of services to the general public (e.g., research on crime

control financed from law enforcement assistance grants, or on mental health associated with the provision of mental rehabilitation services; see discussion below for exclusions related to research and development and payments for services rendered).

- Direct loan or loan guarantee subsidies to State or local governments.
- Shared revenues. These payments to State or local governments are computed as a percentage of the proceeds from the sale of certain Federal property, products, or services (e.g., payments from receipts of Oregon and California grant lands). Also included are tax or other collections by the Federal Government that are passed on to State or local governments (e.g., internal revenue collections for Puerto Rico).

Exclude the following:

- Federal administrative expenses associated with grant programs.
- Grants directly to profit-making institutions, individuals, and non-profit institutions not covered above, for example, payments to Job Corps centers and trainees.
- Payments for research and development not directly related to the provision of services to the general public, for example, basic research awarded via competitive grants.
- Payments for services rendered, for example, utility services, training programs and expenses for Federal employees, research and development for Federal purposes conducted under contracts, grants, or agreements by such agencies as the National Institutes of Health (NIH), the National Science Foundation (NSF), the Department of Energy (DOE), the National Aeronautics and Space Administration (NASA), and the Department of Defense (DOD).
- Federal grants to cover administrative expenses for regional bodies and other funds not redistributed to the States or their subordinate jurisdictions, for example, the administrative expenses of the Appalachian Regional Commission.

(c) *Direct Federal programs.*

Federal programs that are not classified as grants to State and local governments will be classified as direct Federal programs.

84.3 What do I need to know about reporting the data and relationships with other data requirements?

(a) *Expenditure accounts.*

Report budget authority and outlays on a gross basis. Do not deduct offsetting collections except as indicated below. Total budget authority and outlays in schedule C will equal gross budget authority and outlays in schedule A, with the following two exceptions:

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

- You must report offsetting collections from the sale of physical assets (e.g. land, structures, equipment, or commodities) in the corresponding physical asset character classes net of offsetting collections. Contact your OMB representative if you have this situation.
- You must report credit reform program accounts related to investments (i.e., for physical assets, the conduct of research and development, and the conduct of education and training) net of offsetting collections. Contact your OMB representative if you have this situation.

You must report budget authority and outlays by subfunction for PY-BY.

Do not report character class for credit financing accounts.

OMB does not control the character classification of expenditure accounts. If the nature of an account changes and requires the use of different classes, you may enter budget authority and outlays in MAX under the appropriate character class without advance approval from OMB.

As a general rule, if a transaction fits into more than one classification, report it in the classification category with the lowest numerical character classification code. For example, record amounts for construction of research and development facilities in the appropriate 13xx grouping, not in the 14xx grouping. (For treatment of memorandum entries, see section 84.3(c) and exhibit 84A.)

Where accounts are split between two or more character classifications, omit a classification involving less than \$1 million in each of the three fiscal years, and include the amounts in some larger classification for that particular account.

Grants: You must report grants by BEA subcategory (e.g. discretionary or mandatory). (See section 81.3 and exhibit 84A.) In some cases, grants to State and local governments allow the recipient jurisdiction the option of using funds for current or investment-type purposes, such as in community development block programs. In such instances, record all of the budget authority and outlays for grants in the category where the majority of the funds is anticipated to be used.

R&D: Schedule C contains memorandum entries on lines 1441-01 through 1464-xx that supplement, and are a subset of, R&D information reported on lines 1311-xx through 1432-xx. Use these entries to report the following information:

- Direct and indirect costs associated with R&D performed by colleges and universities.
- Allocation of research funds (congressional direction, inherently unique, limited competitive selection, merit reviewed with competitive selection and internal evaluation, and merit-reviewed with competitive selection and external (peer) evaluation).
- Crosscutting R&D data for specific areas identified by the National Science and Technology Council (NSTC).

(b) *Receipt accounts.*

You must also report offsetting receipts for PY through BY by character class in schedules K and R (see section 81.4). OMB controls the character classification of offsetting receipts centrally, and you must ask

your OMB representative to change the classification (see section 79.1) before you can enter data under a different code.

Report character class information for offsetting collections deposited in receipt accounts in schedules K (baseline) and R (policy) using the instructions in section 81.4 (e). You must use line 2004-xx for offsetting receipt accounts, with the following two exceptions:

- You must report the proceeds from the sale of physical assets (e.g., land, structures, equipment, or commodities) in the corresponding physical asset character classes; and
- You must report credit reform offsetting receipt accounts for downward reestimates and negative subsidies for investment-related programs (i.e., for physical assets, the conduct of research and development, and the conduct of education and training) on the appropriate investment line number (i.e., 13xx, 14xx, or 15xx).

(c) Relationships with other data requirements.

For each account, the totals for character class data in schedule C (excluding the memorandum (non-add) entries) must correspond to the total gross budget authority and outlays reported in schedule A in each year, except as noted in (a) above.

You should be able to reconcile information reported in this schedule related to the conduct of research and development with information reported in the National Science Foundation Annual Survey of Federal Funds for Research and Development (see description of line 14xx).

Actual outlays for past year grants and shared revenue must be consistent with the respective amounts reported to the Department of Commerce, Bureau of the Census, pursuant to the instructions on the “Federal Aid to States” publication.

(d) Outyear projections.

MAX will automatically generate outyear projections of character class data (except memorandum entries) based on in-year data. For grants to State and local governments, outyear projections will be generated through BY+9; and, for direct Federal programs, outyear projections will be generated through BY+4.

Using an algorithm, MAX will assume that the percentage of gross budget authority and outlays estimated for a character class for outyears is the same as that reported in the BY. For example, if 18 percent of gross budget authority in the account is on line 1511-01 (grants for education and training) in BY, then 18 percent of gross budget authority will be estimated on line 1511-01 for each outyear. Agencies may view these outyear projections on-screen. If projections do not accurately reflect outyear policy, you may override the projections by entering the correct amounts (not percentages) directly into MAX.

84.4 How do I report character classification in MAX?

Character class data in schedules C, K, and R are identified by a line number that consists of a four-digit number and a two-digit suffix (XXXX-XX). The line number identifies data as investment or noninvestment, and as grants or direct Federal programs.

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Classify all investment activities in the 1xxx series and all noninvestment activities in the 2xxx series. For credit program accounts, classify subsidies for direct loans and loan guarantees and their administrative expenses according to the purpose of the program. For example, credit subsidies for construction should be in the character class for construction and rehabilitation, and credit subsidies for the conduct of education should be in the character class for the conduct of education and training.

The two-digit suffix differentiates among budget authority, outlays, and offsetting receipts, as follows:

- 01 – Budget authority.
- 02 – Outlays.
- 03 – Offsetting receipts.

Ensure that data are reported in the correct categories. For example, report data on R&D activities using the appropriate R&D character class entries (see exhibit 84B and the listing of R&D memorandum entries below). Report data on activities other than R&D in non-R&D character classes. Only some of the following codes apply to offsetting receipts; they are specifically noted below with an asterisk (*). All of the line numbers apply to budget authority and outlays except lines 1441 and 1442, which apply only to budget authority.

The following table indicates the line numbers you use to report character classification. See exhibit 84A for a summary of the coding structure.

Entry		Description
1xxx	INVESTMENT ACTIVITIES	Budget authority, outlays, or offsetting receipts for programs that yield benefits largely in the future.
13xx	Physical assets:	Amounts for the purchase, construction, manufacture, rehabilitation, or major improvement of physical assets regardless of whether the assets are owned or operated by the Federal Government, States, municipalities, or private individuals. Physical assets are land, structures, equipment, and intellectual property (e.g., software) that have an estimated useful life of two years or more; and commodity inventories. The cost of the asset includes both its purchase price and all other costs incurred to bring it to a form and location suitable for its use.
131x	<i>Construction and rehabilitation:</i>	Amounts for construction and rehabilitation, including both grants and direct Federal programs. Construction and rehabilitation means the design and production of fixed works and structures or substantial alterations to such structures or land. Includes new works and major additions, alterations, improvements to and replacements of existing works. Excludes preliminary surveys, maintenance, repair, administration of such facilities and other Federal operating expenses.
	Research and development facilities:	Amounts for the construction and rehabilitation of research and development facilities (see category 14xx for the definition of research and development).
1311-xx	Grants to State and local governments	

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry		Description
1312-xx	Direct Federal programs	<p>Includes the acquisition, design, and construction of, or major repairs or alterations to, all physical facilities for use in R&D activities. Facilities include land, buildings, and fixed capital equipment, regardless of whether the facilities are to be used by the Government or by a private organization, and regardless of where title to the property may rest. Includes the international space station and such fixed facilities as reactors, wind tunnels, and particle accelerators.</p> <p>Include:</p> <ul style="list-style-type: none"> • Construction of R&D facilities only. <p>Exclude:</p> <ul style="list-style-type: none"> • Other facility funding (show on line 1313-xx or 1314-xx). • Movable R&D equipment (show on line 132x-xx).
Other construction and rehabilitation:		Amounts for all other construction and rehabilitation.
1313-xx	Grants to State and local governments	
1314-xx	Direct Federal programs	
132x	<i>Major equipment:</i>	Amounts for identifiable items of major equipment, including information technology (see section 53), vehicles, ships, machine tools, aircraft, tanks, satellites and other physical assets in space, and nuclear weapons. Excludes routine purchases of ordinary office equipment or furniture and fixtures. However, where there are major programs for acquisition of equipment, includes all equipment purchases.
Research and development equipment:		Amounts for major equipment for research and development. (See category 14xx for the definition of research and development.) Includes acquisition or design and production of movable equipment, such as spectrometers, research satellites, detectors, and other instruments. At a minimum, this should include programs devoted to the purchase or construction of R&D equipment.
1321-xx	Grants to State and local governments	
1322-xx	Direct Federal programs	
Other major equipment:		Amounts for all other major equipment.
1323-xx	Grants to State and local governments	
1324-xx	Direct Federal programs	
<i>Commodity inventories:</i>		Amounts for federally-owned commodities held for resale or in stockpiles.
1330-xx*	Direct Federal programs	
	Proceeds from the sale of commodities	Offsetting receipts collected from the sale of federally-owned commodities that were previously purchased by

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry	Description
	the government or from reduction in stockpiles.
<i>Purchases and sales of land and structures for Federal use:</i>	Amounts for purchase, including lease-purchases, of land and structures for use by the Federal Government and sales of such land and structures. Includes office buildings and park and forest lands. Does not include land or structures acquired as temporary inventory, such as collateral on defaulted loans.
1340-xx* Direct Federal programs	
Receipts from sales of property or assets	Offsetting receipts collected from sales of federally-owned property or assets used by the Federal Government. Includes office buildings and park and forest lands.
<i>Other physical assets:</i>	Amounts for all other physical assets, such as conservation, reforestation and range improvements; grants to State or local governments for the purchase of land or structures; and amounts for privately-held assets, including improvements to private farms, land and structures acquired as collateral on defaulted loans, and sales of such land and structures. Does not include operation and maintenance of land and structures.
1351-xx Grants to State and local governments	
1352-xx* Direct Federal programs	
Receipts from sales of other physical assets	Offsetting receipts collected from the sale of physical assets not used by the Federal Government. Includes sales of assets obtained by the Federal Government as collateral on defaulted loans.
14xx Conduct of research and development (R&D):	<p>Research and development (R&D) activities comprise creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and the use of this stock of knowledge to devise new applications.</p> <p>Include:</p> <ul style="list-style-type: none"> • Administrative expenses for R&D. <p>Exclude:</p> <ul style="list-style-type: none"> • Physical assets for R&D such as R&D equipment and facilities (show on line 13xx). • Exclude routine product testing, quality control, mapping, collection of general-purpose statistics, experimental production, routine monitoring and evaluation of an operational program, and the training of scientific and technical personnel. <p>Definitions of basic and applied research and development are provided below. You should be able to reconcile information reported in this schedule with information subsequently reported in the National Science Foundation Annual Survey of Federal Funds</p>

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry		Description
		for Research and Development.
<i>Basic research:</i>		Basic research is defined as systematic study directed toward fuller knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications towards processes or products in mind.
1411-xx	Grants to State and local governments	
1412-xx	Direct Federal programs	
<i>Applied research:</i>		Applied research is defined as systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met.
1421-xx	Grants to State and local governments	
1422-xx	Direct Federal programs	
<i>Development:</i>		Development is defined as systematic application of knowledge or understanding, directed toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements.
1431-xx	Grants to State and local governments	
1432-xx	Direct Federal programs	
Memorandum R&D entries		
<i>R&D performed by colleges and universities:</i>		Budget authority for R&D performed by institutions engaged primarily in providing instruction for at least a 2-year program above the secondary school level. Includes colleges of liberal arts; schools of arts and sciences; professional schools (such as engineering and medicine); affiliated hospitals and associated institutes; and agricultural experimental stations. Does not include federally-funded R&D centers administered by universities. R&D performed by colleges and universities should equal the sum of the two lines – direct and indirect costs – below. Do not report outlays for lines 1441 or 1442.
1441-01	Direct costs to colleges and universities	Direct costs are those costs that can be identified specifically with a particular sponsored project, an instructional activity, or any other institutional activity or that can be directly assigned to such activities relatively easily with a high degree of accuracy.
1442-01	Indirect costs to colleges and universities	Indirect costs are classified as "administration" or "facilities" costs that are incurred for common or joint objectives, and therefore, cannot be identified with a particular sponsored project. Facilities costs are defined as depreciation and use allowances, interest on debt associated with a certain building, equipment and capital improvements, and operations and maintenance. Administration costs are defined as general administration. See OMB Circular No. A-21 "Cost Principles for Educational Institutions" for further definition and guidance on indirect costs. Indirect

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry	Description
	definition and guidance on indirect costs. Indirect costs to colleges and universities should be reported based on agency tracking and not using formula-based estimates.
<i>Allocation of research funds:</i>	<p>The total allocation of research funds reported on lines 1451-01 through 1455-01 must equal the total amount reported for the conduct of basic and applied research on lines 1411-XX through 1422-XX. Exclude amounts spent on development.</p> <p>Use these definitions for allocating research funds to the categories listed below:</p> <ul style="list-style-type: none"> • <i>Peer evaluation</i> means merit-reviewed by appropriately qualified scientists, engineers, or other technically qualified individuals who are apart from the people or groups making the award decisions. • <i>Competitive selection</i> means applicants not prohibited from applying by highly restrictive criteria (e.g., by geography, by title, by affiliation with particular institutions, by past associations, by capabilities in unrelated or programmatically non-essential aspects other than long-standing statute or regulation).
1451-xx Research performed at congressional direction	Intramural and extramural research programs where funded activities are awarded to a single performer or collection of performers with limited or no competitive selection or with competitive selection but outside of the agency's primary mission, based on direction from the Congress in law, in report language, or by other direction. Funded activities may be merit-reviewed prior to award.
1452-xx Inherently unique research	Intramural and extramural research programs where funded activities are awarded to a single performer or team of performers without competitive selection. The award may be based on the provision of unique capabilities, concern for timeliness, or prior record of performance (e.g., facility operations support for a unique facility, such as an electron-positron linear collider; research grants for rapid response studies such as <i>Pfisteria</i> , an environmental hazard that arose suddenly).
1453-xx Merit-reviewed research with limited competitive selection	Intramural and extramural research programs where funded activities are competitively awarded from a pool of qualified applicants that are limited to organizations that were created to largely serve Federal missions and continue to receive most of their annual research revenue from Federal sources. The limited

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry		Description
		competition may be for reasons of stewardship, agency mission constraints, or retention of unique technical capabilities (e.g., funding set aside for researchers at laboratories or centers of DOD, NASA, Environmental Protection Agency, and National Oceanic and Atmospheric Administration; intramural programs at NIH; Federally-Funded Research and Development Centers; formula funds for the U.S. Department of Agriculture).
1454-xx	Merit-reviewed research with competitive selection and internal (program) evaluation	Intramural and extramural research programs where funded activities are competitively awarded following review for scientific or technical merit. The review is conducted by the program manager or other qualified individuals from within the agency program, without additional independent evaluation (e.g., DOD's merit-reviewed research; NSF's small grants for exploratory research).
1455-xx	Merit-reviewed research with competitive selection and external (peer) evaluation	Intramural and extramural research programs where funded activities are competitively awarded following review by a set of external scientific or technical reviewers (often called peers) for merit. The review is conducted by appropriately qualified scientists, engineers, or other technically-qualified individuals who are apart from the people or groups making the award decisions, and serves to inform the program manager or other qualified individual who makes the award (e.g., NSF's single-investigator research; NASA's research and analysis funds).
<i>Conduct of National Science and Technology Council (NSTC) crosscuts</i>		
1462-xx	Partnership for a new generation of vehicles	Research designed to: <ul style="list-style-type: none"> • Develop advanced manufacturing techniques that make it easier to get new automobiles and auto components into the marketplace quickly. • Use new technologies for near-term improvements in auto efficiency, safety, and emissions. • Lead to production prototypes of vehicles three times more fuel efficient than today's cars, with no sacrifice in comfort, performance, or price, including exploration in such advanced technologies as fuel cells, advanced clean diesel engine, hybrid drive trains, and energy storage systems.
1463-xx	U.S. global change research program	Research focused on: <ul style="list-style-type: none"> • Observing and documenting global environmental changes and identifying their causes. • Predicting the responses of the Earth system.

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry	Description
	<ul style="list-style-type: none"> • Determining the ecological, human health, and socioeconomic consequences of these changes. • Identifying strategies for adaption and mitigation that will most benefit society and the environment. <p>P.L. 101-606 requires this program crosscut.</p>
1464-xx	<p>Networking and information technology R&D</p> <p><i>Large scale networking:</i></p> <ul style="list-style-type: none"> • Research and technology development in high performance network components. • Technologies focused on wireless, optical, mobile, and wireline communications. • Large-scale network services, engineering, and management. • Deeply networked systems. • Simulation and modeling. • Systems software and program development environments for network-centric computing. • Next Generation Internet initiative activities. <p><i>High-end computing:</i></p> <ul style="list-style-type: none"> • Research and technology development to improve the usability and effectiveness of teraflops-scale systems. • Leading-edge research for future generations of computing, petascale computers and exabyte storage systems including system software to improve scalability, throughput, speed, portability, and programmability. • Current and advanced device technologies and subsystem components and innovative advanced architectures. • Prototype demonstration systems. <p><i>High-end computation and infrastructure:</i></p> <ul style="list-style-type: none"> • Research and development of applications requiring large scale computation-intensive and/or information-intensive operations. • Development of mathematical algorithms and programming environments, and tools for collaboration, visualization, and data management. • Research facilities built on large scale test systems and on large scale, high performance computational grids and networks. <p><i>High confidence software and systems:</i></p> <ul style="list-style-type: none"> • Research and technology development to achieve security, survivability, availability, reliability, and safety of systems that rely on information technology.

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry	Description
	<ul style="list-style-type: none"> Assurance of software- and information-centric systems through research in theoretical foundations, development of tools and techniques (with linkages to domain-specific languages), engineering and experimentation, and demonstrations and pilots. <p><i>Human computer interface and information management:</i></p> <ul style="list-style-type: none"> Research and technology development in human sensory-motor systems, perception, attention, pattern recognition, and decision-making to improve the interaction of people and machines. Management, exploitation, and visualization of information and knowledge, including large knowledge repositories. Multilingual document translation and understanding. Collaboratories. Digital libraries. <p><i>Software design and productivity:</i></p> <ul style="list-style-type: none"> Research and technology development in software design and implementation. End-user programming, including intelligent templates and domain-specific languages. Component-based software. Software for embedded systems. Autonomous software. <p><i>Social, economic, and workforce implications of IT and IT workforce development:</i></p> <ul style="list-style-type: none"> Research in social, economic, and workforce effects of information technology. Development of model curricula and course materials to promote IT literacy. Graduate and postdoctoral programs to increase the number of IT professionals.
1465-xx National nanotechnology initiative	<p>Research and technology development at the atomic, molecular, or macromolecular levels, in the length scale of approximately 1 - 100 nanometer range, to provide a fundamental understanding of phenomena and materials properties at the nanoscale and to model, create, characterize, manipulate, and use structures, devices, and systems that have novel properties and functions because of their small or intermediate size. The novel and differentiating properties and functions are developed at a critical length scale of matter typically under 100 nanometers. Nanotechnology research and development includes integration of</p>

SECTION 84 -- CHARACTER CLASSIFICATION (SCHEDULE C)

Entry		Description
		nanoscale structures into larger material components, systems, and architectures. Within these larger scale assemblies, the control and construction of their structures and components devices remains at the nanometer scale.
15xx	Conduct of education and training:	Amounts for programs whose primary purpose is education, training, and vocational rehabilitation.
1511-xx	Grants to State and local governments	Includes veterans' education and training; operating assistance for elementary, secondary, vocational, adult, and higher education; and agricultural extension services; income support activities directly contingent upon participating in such programs. Excludes training of military personnel or other persons in government service. Also excludes amounts for physical assets, which are classified in 13xx, and amounts for the conduct of research and development, which are classified in 14xx.
1512-xx*	Direct Federal programs	
	Receipts from education and training	Offsetting receipts for negative subsidies, and downward reestimates of loan subsidies that are associated with the conduct of education and training.
2xxx	NON-INVESTMENT ACTIVITIES	Amounts that are not classified as investment activities.
Grants to State and local governments:		Grant amounts that are not classified as investment activities.
2001-xx	Other than shared revenues	
2003-xx	Shared revenues	
2004-xx*	Direct Federal programs	Amounts for all other non-investment activities. Includes transactions related to credit liquidating accounts.
	All other offsetting receipts	Offsetting receipts collected and deposited in receipt accounts that are not otherwise classified.

Summary of Character Classification Codes (Schedule C)

4 digit prefix	Standard titles	Schedule C's 6 digit line numbers are comprised of a 4 digit prefix and a 2 digit suffix.
	INVESTMENT ACTIVITIES	
	Physical assets:	
1311-xx ¹	Construction and rehabilitation: Research and development facilities: Grants	2 digit suffix xxxx-01 Budget authority
1312-xx	Construction and rehabilitation: Research and development facilities: Direct Federal programs	xxxx-02 Outlays
1313-xx ¹	Construction and rehabilitation: Other construction and rehabilitation: Grants	xxxx-03 Offsetting receipts
1314-xx	Construction and rehabilitation: Other construction and rehabilitation: Direct Federal program	
1321-xx ¹	Major equipment: Research and development equipment: Grants	Totals for budget authority and outlays reported in schedule C must equal those reported in schedule A. For exceptions, see section 84.3(a).
1322-xx	Major equipment: Research and development equipment: Direct Federal programs	
1323-xx ¹	Major equipment: Other major equipment: Grants	
1324-xx	Major equipment: Other major equipment: Direct Federal programs	
1330-xx	Commodity inventories: Direct Federal programs	
1340-xx	Purchases and sales of land and structures for Federal use: Direct Federal programs	
1351-xx ¹	Other physical assets: Grants	
1352-xx	Other physical assets: Direct Federal programs	
1411-xx ¹	Conduct of research and development: Basic research: Grants	
1412-xx	Basic research: Direct Federal programs	
1421-xx ¹	Applied research: Grants	
1422-xx	Applied research: Direct Federal programs	
1431-xx ¹	Development: Grants	Memorandum (non-add) entries for R&D are a subset of data reported on lines 1311-xx through 1432-xx.
1432-xx	Development: Direct Federal programs	
1441-01	<i>Memorandum (non-add) R&D entries</i> R&D performed by college and universities: Direct costs to colleges and universities	Lines 1441-01 and 1442-01 only pertain to budget authority and sum to total R&D funding to colleges and universities.
1442-01	Indirect costs to colleges and universities	
1451-xx	Allocation of research funds: Research performed at congressional direction	Lines 1451-xx through 1455-xx must equal the sum of line 1411-xx through 1422-xx.
1452-xx	Inherently unique research	
1453-xx	Merit-reviewed research with limited competitive selection	
1454-xx	Merit-reviewed research with competitive selection and internal (program) evaluation	
1455-xx	Merit-reviewed research with competitive selection and external (peer) evaluation	
1462-xx	Crosscuts: Partnership for a new generation of vehicles	
1463-xx	U.S. global change research program	
1464-xx	Networking and information technology R&D	
1465-xx	National nanotechnology initiative	
1511-xx ¹	Conduct of education and training: Grants	
1512-xx	Direct Federal programs	
	NON-INVESTMENT ACTIVITIES	
2001-xx ¹	Grants-other than shared revenues	
2003-xx ¹	Grants-shared revenues	
2004-xx	Direct Federal programs	¹ You must report budget authority and outlays for grants by BEA subcategory (e.g. discretionary or mandatory).

Research and Development Character Classification Codes

The character classification includes the following ten categories that are used to report research and development activities. In addition, memorandum (non-add) entries are used to report on R&D performed by universities, the allocation of R&D funds, and R&D crosscuts. (See exhibit 84A for a listing of these entries.)

Code	Description
	Physical assets:
	Construction and rehabilitation:
1311-xx	Research and development facilities: Grants
1312-xx	Research and development facilities: Direct Federal programs
	Major equipment:
1321-xx	Research and development equipment: Grants
1322-xx	Research and development equipment: Direct Federal programs
	Conduct of research and development:
1411-xx	Basic research: Grants
1412-xx	Basic research: Direct Federal programs
1421-xx	Applied research: Grants
1422-xx	Applied research: Direct Federal programs
1431-xx	Development: Grants
1432-xx	Development: Direct Federal programs

Character class categories for activities other than R&D are listed in Exhibit 84A.

SECTION 85 -- FEDERAL CREDIT

Table of Contents

85.1	Does this section apply to me?
85.2	What background information must I know?
85.3	What special terms must I know?
85.4	How do I calculate the subsidy estimate?
85.5	How do I calculate reestimates?
85.6	How do I calculate and record modifications?
85.7	What must I know about the sale of delinquent loan assets?
85.8	What are the reporting requirements for credit accounts?
85.9	What do I report for program accounts?
85.10	What do I report for financing accounts?
85.11	What do I report for liquidating accounts?
85.12	What do I report for receipt accounts?
Ex-85A	Program account, program and financing schedule (schedule P)
Ex-85B	Program account, summary of loan levels and subsidy data (schedule U)
Ex-85C	Direct loan financing account, program and financing schedule (schedule P)
Ex-85D	Direct loan financing account, status of direct loans (schedule G)

Ex-85K	Liquidating account, status of guaranteed loans (schedule H)
Ex-85L	Liquidating account, balance sheet (schedule F)

Summary of Changes

Provides a definition for subsidy estimates (section 85.3).

Introduces the balances approach to calculate reestimates (section 85.5).

Requires agencies to report budget authority and outlays for reestimates on separate lines rather than aggregating them in schedule U and changes the line coding system (section 85.9).

Revises the limitation lines in schedules G and H (section 85.10).

Automatically loads PY start of year balances of loans outstanding (line 1210 in schedule H and line 2210 in schedule G) from the end of year data reported in the previous year's budget (section 85.10).

Requires agencies to report net financing disbursements (line 6300 in schedules G, H, and Y) through BY+9 rather than BY+4 (section 85.10).

85.1 Does this section apply to me?

These instructions apply to all programs that provide direct loans or loan guarantees (see sections 85.3(d) and (k) for definitions of these terms) to non-Federal entities and are subject to the Federal Credit Reform Act of 1990, as amended (FCRA). Even though Section 506 of the FCRA exempts certain programs from credit reform budgeting, these programs are still required to report data in MAX schedules G and H (see section 85.10).

Section 504(b) of the FCRA provides that new direct loan obligations and new loan guarantee commitments may be made only to the extent that:

- New budget authority to cover their costs is provided in advance in an appropriations act;
- A limitation on the use of funds otherwise available for the cost of a direct loan or loan guarantee program is provided in advance in an appropriations act; or
- Authority is otherwise provided in an appropriations act.

These requirements also apply to modifications of direct loans (or direct loan obligations) or loan guarantees (or loan guarantee commitments) that increase their cost, including modifications of pre-1992 direct loans and loan guarantees. OMB will specify exemptions from these requirements for mandatory programs pursuant to section 504(c) of the FCRA.

Unless otherwise specified by law, budget authority is available for liquidating obligations (i.e., outlays) for only five fiscal years after the authority expires. For credit subsidies financed by annual or multi-year budget authority, you must ensure that the budget authority for the subsidy cost will remain available for disbursement over the full period in which loans will be disbursed. If you expect the disbursement period will be longer than five fiscal years after the budget authority expires, you must include a special provision in the appropriations language (see section 96.5).

85.2 What background information must I know?

The FCRA changed the budgetary measurement of cost for direct loans and loan guarantees from the amount of cash flowing into or out of the Treasury to the estimated long-term cost to the Government. Only the unreimbursed costs of making or guaranteeing new loans (the subsidy cost, on a present value basis, and administrative expenses, on a cash basis) are included in the budget. Agencies must receive appropriations for the subsidy cost before they can enter into direct loan obligations or loan guarantee commitments. The actual cash flows are recorded as a means of financing (see section 20.7) and are not included in the budget totals.

The subsidy cost is the estimated present value of the cash flows from the Government (excluding administrative expenses) less the estimated present value of the cash flows to the Government resulting from a direct loan or loan guarantee, discounted to the time when the loan is disbursed. The cash flows are the contractual cash flows adjusted for expected deviations from the contract terms (delinquencies, defaults, prepayments, and other factors). Present values must be calculated using the OMB Credit Subsidy Calculator. The OMB Credit Subsidy Calculator discounts the cash flow that is estimated for each year (or other time period) using the interest rate on a marketable zero-coupon Treasury security with the same maturity from the date of disbursement as that cash flow, regardless of the maturity of the loan. A positive

net present value means that the Government is extending a subsidy to borrowers; a negative present value means that the credit program generates a “profit” (excluding administrative costs) to the Government.

Appropriations for the subsidy cost are made to the program account established for the credit program and are recorded as budget authority. Obligations for the subsidy cost are recorded when the Government enters into a loan obligation or guarantee commitment. Outlays are recorded when the direct loan or guaranteed loan is disbursed to the public and simultaneously the subsidy is paid from the program account to the financing account. The program account also receives appropriations for the direct costs of administering the credit program.

The actual cash flows (e.g., loan disbursements, collections of principal and interest payments, and payment of guarantee claims) are recorded in separate financing accounts. There is at least one financing account associated with each program account. Separate financing accounts are required for direct loan cash flows and for loan guarantee cash flows if the program account provides subsidy costs for both forms of credit. The transactions of the financing accounts are displayed in the budget *Appendix* for informational and analytical purposes, together with the related program accounts, but are excluded from the budget totals because the net cash flows do not represent a cost to the government. The direct loan financing account combines the subsidy payment from the program account with borrowing from Treasury to finance the direct loans. It repays Treasury over time using principal and interest collected from the borrower. The loan guarantee financing account holds the subsidy payment from the program account as a reserve against default claims. The reserve, together with interest earnings on this reserve from Treasury, is used to pay all default claims over the life of the loans.

All cash flows resulting from direct loan obligations and loan guarantee commitments made prior to the effective date of the FCRA (in FY 1991 or previous years) are recorded in liquidating accounts. These accounts are recorded on a cash basis and are included in the budget totals. Liquidating account collections are available to pay obligations of the account, but they are not available to finance new direct loans or loan guarantees. If the collections are insufficient, the FCRA provides liquidating accounts with permanent indefinite authority to pay for losses and to repay any debt owed to Treasury or to other sources.

By focusing on the long-term costs of the program, credit budgeting meets the most fundamental goal of budgetary cost measurement: it provides decision makers with the information and the incentive to allocate resources efficiently. Unlike most budgetary transactions, the cash disbursements for a credit program are a poor measure of cost. Counting outlays for loan disbursements without taking into account probable repayments overstates the cost of a direct loan. Loan guarantees appear costless initially because payments of guarantee claims generally occur several years after the decision to extend credit has been made. Credit budgeting places the cost of credit programs on a budgetary basis equivalent to other federal spending, allowing for better comparison of cost between direct loan and loan guarantee programs and between credit and other programs. This improves the incentive to make good budgetary decisions.

Agencies are required to reestimate the subsidy cost throughout the life of each cohort of direct loans or loan guarantees to account for differences between the original assumptions of cash flow and actual cash flow or revised assumptions about future cash flow. These reestimates represent additional costs or savings to the Government and are recorded in the budget. Reestimates that indicate an increase in the subsidy cost are financed by permanent indefinite authority. There are two types of reestimates. Interest rate reestimates adjust for the effect on the subsidy of differences between actual interest rates and the interest rates assumed when estimates were made for budget formulation and obligation (the same interest rate assumptions must be used at formulation and obligation). These reestimates must be made when the cohort is at least 90

percent disbursed. Technical reestimates adjust for revised assumptions about loan performance, such as differences between assumed and actual default rates or new projections of prepayments. These reestimates must be made after the close of each fiscal year.

Modifications of a direct loan or loan guarantee can also change the subsidy cost. A modification is any Government action different from the baseline assumptions that affects the subsidy cost, such as a change in the terms of the loan contract or legislation that provides new collection tools. The cost of a modification is the difference between the present value of the cash flows before and after the modification. Agencies must have been provided budget authority to cover the cost of a modification that increases the subsidy before the loans can be modified.

85.3 What special terms must I know?

The following are key terms used in credit budgeting. In these definitions, the term "post-1991" means direct loan obligations or loan guarantee commitments made on or after October 1, 1991, and the resulting direct loans or loan guarantees. The term "pre-1992" means direct loan obligations or loan guarantee commitments made prior to October 1, 1991, and the resulting direct loans or loan guarantees.

(a) **Administrative expenses** mean all costs that are directly related to credit program operations. The FCRA generally requires that administrative expenses for both pre-1992 and post-1991 direct loans and loan guarantees be included in program accounts. Administrative expenses are included in the liquidating accounts only if the amounts would have been available for administrative expenses under a provision of law in effect prior to October 1, 1991, and if no direct loan obligation or loan guarantee commitment has been made, or any modification of a direct loan or loan guarantee has been made, since September 30, 1991.

Administrative expenses that are tangentially related to the credit program should not be included in the program account. As an illustration, the cost of auditing credit programs that is financed in the accounts for Inspectors General should not be included. Administrative expenses include:

- The appropriate proportion of administrative expenses that are shared with non-credit programs;
- The cost of operating separate offices or units that make policy decisions for credit programs;
- The cost of loan systems development and maintenance, including computer costs (under no circumstances should computer costs be paid out of financing accounts);
- The cost of monitoring credit programs and private lenders for compliance with laws and regulations;
- The cost of all activities related to credit extension, loan servicing, write-off, and close out; and
- The cost of collecting delinquent loans, except for the costs of foreclosing, managing, and selling collateral that are capitalized or routinely deducted from the proceeds of sales.

Administrative expenses may be expended directly from the program account or, if authorized by appropriation language (see section 96.5), used to reimburse a salaries and expenses account or the Federal Financing Bank (FFB). If they are transferred to a salaries and expenses account or the FFB, record the transfer as an expenditure transfer. Record an obligation and outlay in the program account and an offsetting collection in the salaries and expenses account. In the salaries and expenses account, obligations for administrative expenses may be recorded without necessarily identifying them as credit program expenses.

Administrative expenses are almost always provided by annual appropriations acts and, therefore, are discretionary spending. If such expenses are included in a program account that subsidizes a mandatory program, the account will be split between mandatory and discretionary spending.

(b) **Claim payment** means a payment made to private lenders when a guaranteed loan defaults. Report default claim obligations and disbursements in the program and financing schedule (schedule P) in liquidating and guaranteed loan financing accounts. As described below, report the claim payments in the status of guaranteed loans schedule (schedule H) and, for liquidating accounts only, the object class schedule (schedule O). If a loan asset is acquired in exchange for the claim payment, report the claim payment as a termination for default that results in a loan receivable on line 2261 of schedule H, and, for liquidating accounts, as investment and loan obligations on object class line 33 in schedule O. If a physical asset is acquired in exchange for the claim payment, report the claim payment as a termination for default that results in acquisition of property on line 2262 of schedule H, and, for liquidating accounts, the object class that best represents the asset in schedule O. For example, if the asset is a building, then classify the obligations on line 32, land and structures. (See section 83.7 for object classification). If nothing of value is received in exchange for the claim payment, report the claim payment as termination for defaults that result in claim payments on line 2263 in schedule H, and, for liquidating accounts, as insurance claims and indemnities on object class line 42 in schedule O.

(c) **Cohort** means all direct loans or loan guarantees of a program for which a subsidy appropriation is provided for a given fiscal year (except as provided below for pre-1992 direct loans and loan guarantees that are modified). For direct loans and loan guarantees for which a subsidy appropriation is provided for one fiscal year, the cohort will be defined by that fiscal year. For direct loans and loan guarantees for which multi-year or no-year appropriations are provided, the cohort is defined by the year of obligation. Direct loans and loan guarantees that are made from supplemental appropriations will be recorded in the same cohort as those that are funded in annual appropriations acts. These rules apply even if the direct loans or guaranteed loans are disbursed in subsequent years.

Cohort accounting applies to post-1991 direct loans and loan guarantees. It applies to pre-1992 direct loans and loan guarantees that have been modified but not to unmodified pre-1992 direct loans and loan guarantees. Post-1991 direct loans or loan guarantees remain with their original cohort throughout the life of the loans, even if they are modified. All of the modified pre-1992 direct loans of a program will be assigned to a single cohort and all of the modified pre-1992 loan guarantees for a program will be assigned to a single cohort, even if the subsidy appropriation is provided in different fiscal years. For purposes of budget presentation, cohorts will be aggregated. However, accounting and other records will be maintained separately for each cohort.

(d) **Direct loan** means a disbursement of funds by the Government to a non-Federal borrower under a contract that requires repayment of such funds with or without interest. The term includes:

- The purchase of, or participation in, a loan made by a non-Federal lender;
- Financing arrangements that defer payment for more than 90 days, including the sale of a government asset on credit terms; and
- Loans financed by the Federal Financing Bank (FFB) pursuant to agency loan guarantee authority (see also section 33.14).

The term does not include the acquisition of federally guaranteed loans in satisfaction of default or other guarantee claims or the price support loans of the Commodity Credit Corporation.

Pre-1992 loans made by the FFB on behalf of any agency continue to be recorded as direct loans of the agency. Agency guarantees of post-1991 loans that are financed by the FFB are treated as direct loans in the budget, but the intrabudgetary cash flows reflect elements of direct loans and loan guarantees. The direct loan financing account for these loans will collect and hold the subsidy payment from the program account. This balance, together with interest earnings, will be available to pay the FFB in the event of default by the non-Federal borrower. Agencies with programs financed by the FFB should consult with the OMB representative with primary responsibility for the program to ensure correct treatment of these loans.

(e) **Direct loan obligation** means a binding agreement by a Federal agency to make a direct loan when specified conditions are fulfilled by the borrower.

(f) **Direct loan subsidy cost** means the estimated long-term cost to the Government of a direct loan, calculated on a net present value basis, excluding administrative costs. Specifically, the cost of a direct loan is the net present value, at the time when the direct loan is disbursed from the financing account, of the following estimated cash flows:

- Loan disbursements.
- Repayments of principal.
- Payments of interest.
- Recoveries or proceeds of asset sales.
- Other payments by or to the Government over the life of the loan.

These estimated cash flows include the effects of estimated defaults, prepayments, fees, penalties, and expected actions by the Government and the borrower within the terms of the loan contract, such as the exercise by the borrower of an option included in the loan contract.

Obligations for the subsidy cost will be recorded against budget authority in the program account when the direct loan obligation is incurred. Accounts payable (to the direct loan financing account) will be recorded in the amount of the estimated obligation. The subsidy will be paid to the financing account when the loan is disbursed. (See section 85.4 and the OMB Credit Subsidy Calculator and accompanying documentation for information about estimating the subsidy.)

(g) **Discount rates** mean the collection of interest rates that are used to calculate the present value of the cash flows that are estimated over a period of years. The discount rates are based on the Treasury rates in the economic assumptions for the budget year. For loans made, guaranteed, or modified in FY 2001 and thereafter, the cash flow estimated for each year (or other time period) is discounted using the interest rate on a marketable zero-coupon Treasury security with the same maturity from the date of disbursement as that cash flow. The discount rate assumptions for the budget will be provided by OMB in a file for use with the OMB Credit Subsidy Calculator. The rate at which interest will be paid on the amounts borrowed or held as an uninvested balance by a financing account for a particular cohort is a weighted average discount rate derived from this collection of interest rates. An electronic spreadsheet is available from OMB to calculate budget estimates of the interest income or expense for financing accounts.

(h) **Financing account** means a non-budgetary account (its transactions are excluded from the budget totals) that records all of the cash flows resulting from post-1991 direct loans or loan guarantees. It disburses loans, collects repayments and fees, makes claim payments, holds balances, borrows from Treasury, earns or pays interest, and receives the subsidy cost payment from the credit program account. There is at least one financing account associated with each program account. Separate financing accounts are required for direct loan cash flows and for loan guarantee cash flows if the program account provides subsidy costs for both

forms of credit. Financing account schedules are printed in the budget *Appendix* together with the program account.

(i) **Liquidating account** means a budget account that records all cash flows to and from the Government resulting from pre-1992 direct loan obligations or loan guarantee commitments (unless they have been modified and transferred to a financing account). Liquidating account collections in any year are available only for obligations incurred during that year or to repay debt. All liquidating accounts are classified as mandatory. Collections credited to a liquidating account include:

- Interest;
- Loan repayments and prepayments;
- Payments from financing accounts when required for modifications;
- Proceeds from the sales of loans; and
- Fees.

These collections are available only for:

- Interest payments and repayment of debt;
- Disbursements of loans;
- Default and other guarantee claim payments;
- Interest supplement payments;
- Cost of foreclosing, managing, and selling collateral that is capitalized or routinely deducted from the proceeds of sales;
- Payments to financing accounts when required for modifications;
- Administrative expenses but only if (1) amounts credited to the liquidating accounts would have been available for administrative expenses under a provision of law in effect prior to October 1, 1991, and (2) no direct loan obligations or loan guarantee commitments have been made, or any modification of a direct loan or loan guarantee has been made, since September 30, 1991; and
- Other payments that are necessary for the liquidation of pre-1992 direct loan obligations and loan guarantee commitments.

Amounts credited to liquidating accounts in any year are only available for obligations that are incurred in that year (the outlay may occur in a subsequent year) and for repayment of debt. Any remaining unobligated balances at the end of the fiscal year are unavailable for obligation in subsequent fiscal years and must be transferred to the general fund at the end of the fiscal year unless an extension has been approved by OMB (see section 58.3).

The FCRA provides permanent indefinite authority to cover obligations and commitments in the event that funds in liquidating accounts are otherwise insufficient. If the liquidating account's obligations will exceed its collections during the year, the agency must request an apportionment and warrant of permanent indefinite authority estimated to be needed for the fiscal year, before the beginning of the fiscal year.

The liquidating account status of direct and/or guaranteed loans schedule reflects disbursements and repayments of pre-1992 loans. Therefore, in the liquidating account status of direct and/or guaranteed loans:

- There will be no post-1991 direct loan obligations or loan guarantee commitments;
- Direct and guaranteed loan disbursements will be shown only for pre-1992 direct loans or loan guarantees; and
- Repayments and prepayments will reflect only pre-1992 direct loan obligations and loan guarantee commitments.

(j) ***Loan asset sale*** means a sale of one or more loans to a non-Federal buyer, either individually, pooled, packaged, securitized, or as a joint venture, at a single point in time, subject to parties fulfilling the terms and conditions of the Government's offer. Loan assets consist of direct loans and loan receivables resulting from defaulted guaranteed loans.

(k) ***Loan guarantee*** means any guarantee, insurance, or other pledge with respect to the payment of all or a part of the principal or interest on any debt obligation of a non-Federal borrower to a non-Federal lender, except for the insurance of deposits, shares, or other withdrawable accounts in financial institutions. Loans that are financed by the FFB pursuant to agency loan guarantee authority are treated as direct loans rather than loan guarantees.

(l) ***Loan guarantee commitment*** means a binding agreement by a Federal agency to make a loan guarantee when specified conditions are fulfilled by the borrower, the lender, or any other party to the guarantee agreement.

(m) ***Loan guarantee subsidy cost*** means the estimated long-term cost to the Government of a loan guarantee, calculated on a net present value basis, excluding administrative costs. Specifically, the cost of a loan guarantee is the net present value, at the time when the guaranteed loan is disbursed by the lender, of the following estimated cash flows:

- Payments by the Government to cover defaults and delinquencies, interest subsidies, and other requirements; and
- Payments to the Government, including origination and other fees, penalties, and recoveries.

These estimated cash flows include the effects of expected Government actions and the exercise by the guaranteed lender or the borrower of an option included in the loan guarantee contract.

Obligations for the subsidy cost will be recorded against budget authority in the program account when the loan guarantee commitment is made. The subsidy will be paid to the guaranteed loan financing account when the loan is disbursed by the private lender. (See section 85.4 and the OMB Credit Subsidy Calculator and accompanying documentation for information about estimating the subsidy.)

(n) ***Modification*** means a Government action that (1) differs from actions assumed in the baseline estimate of cash flows and (2) changes the estimated cost of an outstanding direct loan (or direct loan obligation) or an outstanding loan guarantee (or loan guarantee commitment). The modification may be for a single loan or loan guarantee as well as a group; it may be any size; it may affect pre-1992 direct loans and loan

guarantees or post-1991 direct loans or loan guarantees. New legislation that alters the baseline cash flow estimate for a loan or group of loans always results in a modification.

A Government action may change the cost directly by altering the terms of existing contracts, selling loan assets (with or without recourse) or converting guaranteed loans to direct loans by purchasing them from a private lender. It also may change the cost indirectly by legislatively changing the way in which a portfolio of direct loans or guaranteed loans is administered. Examples of changes in the terms of existing loan contracts are forgiveness, forbearance, interest rate reductions, extensions of maturity, and prepayments without penalty. Examples of changes in loan administration are new methods of debt collection, such as using tax refunds to repay loans and restrictions on debt collections. If the baseline cost estimate does not assume an action, and the cost would be increased or decreased as a result of that action, the action is a modification.

Modifications do not include a Government action that is assumed in the baseline cost estimate, as long as the assumption is documented and has been approved by OMB. For example, modifications would not include routine administrative workouts (see section 85.3(w)) of troubled loans or loans in imminent default. They also would not include a borrower's or the Government's exercise of an option that is permitted within the terms of an existing contract, such as a borrower prepaying the loan. The baseline subsidy estimate must include all anticipated actions by the Government, lenders, and borrowers that are permissible under current law and that affect the cash flow. If later the cost estimate of an action by the borrower, lender, or the Government differs from what is anticipated in the documented baseline subsidy estimate, then the difference in cost is included in a reestimate.

Modifications do not include additional disbursements to borrowers that increase the amount of an outstanding direct loan or an outstanding loan guarantee. These are treated as new direct loans or loan guarantees in the amount of the additional disbursement.

There are situations where it is not clear whether a Government action constitutes a modification or a reestimate. These situations should be judged on a case-by-case basis by OMB in consultation with the agency. They could include actions by the Government that are not addressed in existing contracts, management changes that are within an agency's existing specific authority for the loan program, and broad changes in agency policy (e.g., loan sale policy). In general, if the possibility of the action was explicitly included in the cash flows for the baseline subsidy estimate, and this can be documented, it would most likely be a reestimate. If not, it would most likely be a modification.

Modifications produce a one-time change in the subsidy cost of *outstanding* direct loans and loan guarantees. The effect of the Government action on the subsidy cost of direct loan obligations and loan guarantee commitments made after the date of the modification, if there is any effect, is not a modification. Instead, the effects are incorporated in the initial cost estimates for subsequent direct loan obligations and loan guarantee commitments.

(o) **Modification cost** means the difference between the estimate of the net present value of the remaining cash flows assumed for the direct loan or loan guarantee contract before and after the modification. The estimate of the remaining cash flows before the modification must be the same as assumed in the baseline for the most recent President's budget. The estimate of the remaining cash flows after the modification must be the pre-modification cash flows adjusted solely to reflect the effects of the modification.

An outstanding direct loan (or direct loan obligation) or loan guarantee (or loan guarantee commitment) can not be modified in a manner that increases its cost, unless budget authority for the additional cost has been

provided in advance in an appropriations act. If the modification is mandated in legislation, the legislation itself provides the budget authority to incur a subsidy cost obligation (whether explicitly stated or not).

Budget authority, an obligation, and an outlay will be recorded in the year in which the legislation is enacted or the administrative discretion is exercised, or in the case of appropriations acts enacted before the fiscal year to which they apply, the year for which appropriations are provided.

When post-1991 direct loans or loan guarantees are modified, a modification adjustment transfer between the financing account and the general fund must also be calculated. When pre-1992 direct loans or loan guarantees are modified, a transfer must be made between the liquidating account and financing account. These calculations and the budgetary treatment are explained in section 85.6.

(p) **Negative subsidies** mean subsidy costs that are less than zero. They occur if the present value of cash inflows to the Government exceeds the present value of cash outflows. In such cases, appropriations bills must still provide specific authority before direct loans or loan guarantees can be made.

When a direct loan obligation or a loan guarantee commitment is made that has a negative subsidy, an amount equal to the negative subsidy will be obligated in the financing account. The financing account will pay the negative subsidy to the negative subsidy receipt account (or to the program account in the case of a mandatory program) when the loan is disbursed. The collections are recorded as offsetting receipts or offsetting collections, and they offset the agency's budget authority and outlays. The accounting for negative subsidies is discussed in (q) below.

(q) **Negative subsidy receipt accounts** mean budget accounts for the receipt of amounts paid from the financing account when there is a negative subsidy for the original estimate or a downward reestimate (see section 85.3(p) and (t)). In most cases, the receipt account is a general fund receipt account and amounts are not earmarked for the credit program. They are available for appropriation only in the sense that all general fund receipts are available for appropriation.

At the discretion of the OMB representative with primary responsibility for the program, a special fund receipt account may instead be established for the purpose of earmarking the receipts for appropriation to the program (in which case a special fund expenditure account also will be established and merged with the program account). If the program is a discretionary program, these receipts are available for obligation only to the extent provided in annual appropriations acts. For mandatory programs, the receipts are permanently appropriated for subsidy costs but usually are available for administrative expenses only to the extent provided in annual appropriations acts. For mandatory programs, negative subsidies and downward reestimates may be credited directly to the program account as offsetting collections from non-Federal sources.

Obligations may not be incurred against appropriations of the receipts until they have been credited to the receipt account. Because negative subsidy receipts are not credited to the receipt account until the underlying direct loan or guaranteed loan is disbursed, they might not become available in time to fund expenditures in a timely manner. Such situations might require an appropriation from the general fund to permit obligations to be made until receipts are available for obligation.

(r) **Net proceeds**, when used in the context of loan asset sales, mean the amounts paid by the purchasers less all seller transaction costs (such as underwriting, rating agency, legal, financial advisory, and due diligence fees) that are paid out of the gross sales proceeds rather than paid as direct obligations by the agency. The net proceeds from the sale of an equity partnership are the same as defined above plus an estimate of the net present value of future cash inflows to the Government from the sale.

(s) **Program account** means a budget account that receives and obligates appropriations to cover the subsidy cost of a direct loan or loan guarantee and disburses the subsidy cost to the financing account. Program accounts usually receive a separate appropriation for administrative expenses.

(t) **Reestimates** mean revisions of the subsidy cost estimate of a cohort (or risk category) based on information about the actual performance and/or estimated changes in future cash flows of the cohort. Reestimates must be made immediately after the end of each fiscal year, as long as any loans in the cohort are outstanding, unless a different plan is approved by OMB (see section 85.5). An upward reestimate indicates that insufficient funds had been paid to the financing account, so the increase (plus interest on reestimates, as described in section 85.5(b)) is paid from the program account to the financing account to make it whole. Permanent indefinite budget authority is available for this purpose pursuant to section 504(f) of the FCRA. A downward reestimate indicates that too much subsidy had been paid to the financing account. For discretionary programs, the excess (plus interest, as above) is disbursed to a negative subsidy receipt account (see section 85.3(q)). For mandatory programs, the excess (plus interest, as above) may be credited directly to the program account as offsetting collections or to a negative subsidy receipt account.

(u) **Risk categories** mean subdivisions of a cohort of direct loans or loan guarantees into groups that are relatively homogeneous in cost, given the facts known at the time of obligation or commitment. They are developed by agencies in consultation with the OMB representative with primary budget responsibility for the credit account. The number will depend on the size of the difference in subsidy cost between categories and the ability to predict it statistically based on facts known at origination.

Risk categories will group all direct loans or loan guarantees within a cohort that share characteristics predictive of defaults and other costs. They may be defined by characteristics or combinations of characteristics of the loan, the project financed, and/or the borrower. Examples of characteristics or indicators that may predict cost include:

- The loan-to-value ratio;
- The relationship between the loan interest rate and relevant market rates;
- Type of school attended for education loans;
- Country risk categories for international loans; and
- Various asset or income ratios.

Statistical evidence must be presented, based on historical analysis of program data or comparable credit data, concerning the likely costs of defaults, other deviations from contract, or other costs that are expected to be associated with the loans in that category.

(v) **Subsidy estimates** mean estimates of budget authority and outlays for direct loan and loan guarantee subsidy costs for a cohort or risk category of direct loans or loan guarantees. Like budget estimates for non-credit programs, the budget includes both Presidential policy subsidy estimates and baseline subsidy estimates. Baseline subsidy estimates project the current year (CY) levels of subsidy costs into the outyears based on laws already enacted. Presidential policy subsidy estimates reflect the effect on subsidy costs of policies included in the budget, including any proposed legislation that would affect subsidy costs. See section 85.4 for guidance on calculating subsidy estimates.

(w) **Work-outs** mean plans that offer options short of default or foreclosure for resolving troubled loans or loans in imminent default, such as deferring or forgiving principal or interest, reducing the borrower's interest rate, extending the loan maturity, or postponing collection action. Work-outs are expected to minimize the cost to the Government of resolving troubled loans or loans in imminent default. They should only be

utilized if it is likely that the borrower will be able to repay under the terms of the work-out and if the cost of the work-out is less than the cost of default or foreclosure. For post-1991 direct loans and loan guarantees, the expected effects of work-outs on cash flow are included in the original estimate of the subsidy cost. Therefore, to the extent that the effects of work-outs on cash flow are the same as originally estimated, they do not alter the subsidy cost. If the effects on cash flow are more or less than the original estimate, the differences are included in reestimates of the subsidy and are not a modification.

85.4 How do I calculate the subsidy estimate?

(a) *General.*

You must provide subsidy estimates for both Presidential policy and the baseline for all budget accounts that have post-1991 direct loan obligations or loan guarantee commitments or that have modifications of pre-1992 direct loan or loan guarantee contracts. You must make subsidy estimates for each risk category. Under section 503(a) of the FCRA, OMB has the final responsibility for determining subsidy estimates, in consultation with the agencies.

Use the OMB Credit Subsidy Calculator to discount all agency-generated estimates of cash flows to and from the Government. The OMB Credit Subsidy Calculator and documentation provide an explanation and example of the discounting method and how the subsidy rate is calculated. All agencies must use the OMB Credit Subsidy Calculator and discount rates to ensure government-wide comparability and uniformity of discounting. These can be obtained from the OMB representative with primary budget responsibility for the credit account.

Direct loan and loan guarantee subsidy costs are defined in sections 85.3(f) and (m). The subsidy cost is the estimated long-term cost to the Government of direct loans or loan guarantees calculated on a net present value basis, excluding administrative costs. For budget formulation (and execution), subsidy estimates are to be based on the economic and technical assumptions underlying the President's budget that is submitted for the fiscal year in which the funds will be obligated. For CY, this means using the economic and technical assumptions underlying the BY subsidy estimates contained in the President's budget for the previous year (adjusted for changes in terms of the contract or legislation enacted since the budget was transmitted; see Circular No. A-34). For BY through BY+4, this means using the economic and technical assumptions in the President's budget that will be submitted for BY.

For loans made, guaranteed, or modified in FY 2001 and thereafter, the cash flow that is estimated for each year (or other time period) is discounted using the interest rate on a marketable zero-coupon Treasury security with the same maturity from the date of disbursement as that cash flow, regardless of the maturity of the loan; for example, a cash flow expected to occur one year from the date of disbursement will be discounted at the one-year zero-coupon Treasury rate. The discount rate assumptions for the budget will be provided by OMB in a file for use with the OMB Credit Subsidy Calculator.

(b) *Presidential policy subsidy estimates.*

Make separate subsidy estimates for all programs (discretionary and mandatory) for CY and BY. The steps for calculating the presidential policy estimates of subsidy budget authority and outlays (including negative subsidies) for a cohort (or risk category) of direct loans and loan guarantees are as follows:

- *Step 1.* Estimate the cash flows to and from the Government for the cohort of direct loans or loan guarantees obligated or committed in that year, for that year and each subsequent year for the life of the direct or guaranteed loan. If you have not finalized the requested amount of obligations or

commitments, you may use any amount to calculate the subsidy estimate as long as the cash flows you have developed are based on that same amount. Discount these cash flows to the point of loan disbursement using the OMB Credit Subsidy Calculator. The difference between the present value of the cash outflows and inflows is the total subsidy (i.e., the subsidy cost) for the obligations or commitments made in that year.

- *Step 2.* Calculate the subsidy rate for the cohort by dividing the subsidy cost by the direct loan obligations or loan guarantee commitments made in that year. For this purpose, the loan guarantee commitment is the full principal amount, not just the portion guaranteed by the Government.
- *Step 3.* When the requested amount of direct loan obligations or loan guarantee commitments has been finalized, multiply the subsidy rate by the direct loan obligations or loan guarantee commitments to calculate budget authority (or offsetting receipts, in the case of negative subsidies) for the subsidy cost. For this purpose, the loan guarantee commitment is the full principal amount, not just the portion guaranteed by the Government.
- *Step 4.* Subsidy outlays for each fiscal year are equal to the subsidy cost for all loans disbursed in that year, whether the loans or guarantees were obligated or committed in that year or in prior years. For this purpose, the loan guarantee commitment is the full principal amount, not just the portion guaranteed by the Government.

(c) *Baseline subsidy estimates.*

The steps for calculating the baseline estimates of subsidy budget authority and outlays (including negative subsidies) for a cohort (or risk category) of direct loans and loan guarantees are as follows:

- *Step 1.* For discretionary programs, inflate the subsidy budget authority enacted for CY (the base year) to calculate the subsidy budget authority for BY through BY+4. The inflator is the annual adjustment factor for non-pay costs (the gross domestic product chain-type price index) provided in the economic assumptions for the President's budget that will be submitted for BY.
- *Step 2.* For mandatory programs, first calculate the subsidy rate as described above under “presidential policy estimates,” excluding the effects of any legislative proposals. Then multiply the subsidy rate by the baseline estimate of demand for loans to calculate the subsidy BA.
- *Step 3.* For any programs with negative subsidies, first calculate the subsidy rate as described above under “presidential policy estimates,” excluding the effects of any legislative proposals. Then multiply the subsidy rate by the baseline estimate of demand for loans, constrained by the estimated limitation, to calculate the amount of offsetting receipts. The limitation should be estimated by inflating the CY enacted limitation using the annual adjustment factor for non-pay costs (the gross domestic product chain-type price index) provided in the economic assumptions for the President's budget that will be submitted for BY.
- *Step 4.* Subsidy outlays for each fiscal year are equal to the subsidy cost for all loans disbursed in that year, whether the loans or guarantees were obligated or committed in that year or in prior years. For CY only, the total also includes outlays for reestimates and interest on reestimates. First calculate outlays expected from disbursements of loans obligated or committed in prior fiscal years; for example, the subsidy cost of a direct loan obligated in CY that disburses equally over 2 years will outlay 50 percent in the first year (CY) and 50 percent in the second year (BY). Then add outlays from disbursements of loans obligated or committed in that year. For CY only, you should also add

outlays for reestimates and (although it is not part of the subsidy as such) add outlays for interest on reestimates.

85.5 How do I calculate reestimates?

(a) General.

Subsidy reestimates are made on direct loans and loan guarantees that have been disbursed. They are recorded in the current year column of the budget. (For example, the subsidy for direct or guaranteed loans disbursed during 1999 would be reestimated during 2000 and would be recorded in the 2000 column of the FY 2001 Budget.) A closing reestimate should be made once all the loans in the cohort have been repaid or written off.

Two different types of reestimates are made:

- Interest rate reestimates for differences between interest rate assumptions at the time of formulation (the same assumption is used at the time of obligation or commitment) and the actual interest rate(s) for the year(s) of disbursement; and
- Technical reestimates for changes in technical assumptions.

Interest rate reestimates of the subsidy cost of a cohort of direct loans or loan guarantees must be made when a cohort has substantially disbursed (i.e., when at least 90 percent of the direct loans or guaranteed loans have been disbursed). The computation should be made after the close of the fiscal year in which this criterion is met, unless a later time within the same fiscal year is approved by the OMB representative with primary budget responsibility for the credit account. You may calculate interest rate reestimates more frequently than under this requirement, including a final interest rate reestimate when the cohort has fully disbursed. If you decide to do so, consult with the OMB representative with primary responsibility for the account.

An interest rate reestimate will be made to adjust the subsidy estimate for the difference between the interest rates estimated at the time of formulation (the same assumptions are used at the time of obligation or commitment) and the actual interest rate(s) prevailing during the year(s) of disbursement. To calculate the size of this effect, all other assumptions (disbursement rates, default rates, etc.) must be identical to those used to calculate the original subsidy estimate. For those programs with variable interest rate supplements to the lender or with variable interest rates charged to the borrower, the original cash flow projections are adjusted to incorporate the actual interest rate(s) prevailing during the year(s) of disbursement and are subsequently adjusted after the end of each year so long as the loans are outstanding.

Technical reestimates of the subsidy cost of a cohort of direct loans or loan guarantees must be made after the close of each fiscal year as long as the loans are outstanding, unless a different plan is approved by the OMB representative with primary budget responsibility for the credit account. The different plan might be with regard to the time when reestimates are made within the year or the frequency of reestimates. If the plan allows reestimates to be made less frequently than every year, it should require reestimates to be made for any year when any one of the following four conditions is met:

- (1) When required based on periodic schedules established in coordination with OMB, consistent with the unique attributes of each program (e.g., initially every two years after the cohort has been substantially disbursed, then every five years);

- (2) When a major change in actual versus projected activity is detected (e.g., a large loan goes into default or prepays substantially earlier than expected);
- (3) When a material difference is detected through monitoring triggers developed in coordination with OMB. The triggers would focus on major data elements (e.g., total projected versus total actual cohort collections) rather than in-depth individual cohort analysis. Agencies should focus on a few major loan elements recognizing there are different key elements applicable to each program and different reporting problems; and
- (4) When a cohort is being closed out.

Technical reestimates are made for all changes in assumptions other than interest rates. This type of reestimate compares the subsidy estimate that already includes any reestimate for actual interest rates with a reestimated subsidy using updated technical information (for defaults, fees, recoveries, etc.) as well as actual interest rates.

The purpose of technical reestimates is to adjust the subsidy estimate for differences between the original projection of cash flows (as estimated at obligation) and the amount and timing of cash flows that are expected based on actual experience, new forecasts about future economic conditions, and other events and improvements in the methods used to estimate future cash flows. Because actual cash flows are experienced every year and the ability to forecast future years also changes, this reestimate must be done after the end of every fiscal year as long as any loans are outstanding (except as provided above).

Reestimates must be made separately for each cohort. If a cohort is divided into risk categories, each risk category within a cohort must be reestimated separately. The reestimate will then be compared with the previous estimate. For this purpose, all details of the previous subsidy estimates by risk category should be retained in program records.

For both interest rate and technical reestimates, you should record reestimates in the budget whenever they have been made for the financial statements even if they are not otherwise required for the budget under the criteria of this chapter (e.g., if interest rate reestimates are made before the cohort is substantially disbursed, or if technical reestimates are made more often than under a plan OMB has approved). Whenever reestimates are made less frequently than every year, the reestimate should cover cumulatively the entire period since the last reestimate.

(b) Calculating interest rate reestimates.

Use the following procedures to calculate interest rate reestimates, unless an alternative method has been approved by OMB.

- *Step 1.* Start with the original cash flows used to estimate the subsidy at obligation (on a risk category basis).
- *Step 2.* Reestimate the subsidy rate using the OMB Credit Subsidy Calculator. For programs that disburse fully in one year, the Calculator will use the actual average annual interest rate for the year in which the loans were disbursed. For programs that disburse over more than one year, the calculator will determine a weighted average discount rate based on actual annual interest rates for each year in which loans have disbursed and the original disbursement assumptions. The Calculator will use this discount rate to calculate a revised subsidy rate for the entire cohort.

- *Step 3.* Calculate the percentage point difference between this revised subsidy rate and the subsidy rate estimated at the time of obligation. For example, if the subsidy rate estimated at the time of obligation is 7 percent and the revised subsidy rate is 9 percent, then this difference is 2 percentage points.
- *Step 4.* Multiply the dollar value of actual loan disbursements to date by the percentage point difference in the subsidy rates. For example, using the case in step 3, if \$100 million in loans have been disbursed, then this amount would be \$2 million (\$100 million multiplied by 2 percentage points). The product is the cumulative interest rate reestimate. Deduct previous interest rate reestimates (if any) to derive the additional interest subsidy reestimate for the current year (see (d) below).

The instructions accompanying the OMB subsidy reestimate worksheet provide additional instructions for calculating interest rate reestimates.

(c) *Calculating technical reestimates.*

There are two methods for calculating technical reestimates: the traditional approach and the new balances approach. Under the traditional approach, reestimates are performed by revising the original subsidy estimate cash flows to incorporate any available actual data and to update future year projected data for any changes in assumptions. Under the balances approach, reestimates are performed by comparing the net present value of projected future cash flows to the balance in the financing account. Agencies must receive approval from OMB before implementing the balances.

(1) *Traditional approach.*

- *Step 1.* Reestimate the subsidy percentage for each risk category based on actual cash flows to the date of reestimate and updated expectations of delinquencies, defaults, fees, recoveries, and other technical conditions (using the same interest rates used for the latest interest rate reestimate, if applicable). Use the OMB Credit Subsidy Calculator to generate the revised subsidy rate.
- *Step 2.* Calculate the percentage point difference between this revised subsidy rate and the subsidy rate used at the time of obligation, or, if applicable, the revised subsidy rate calculated in the most recent interest rate reestimate. For example, if the subsidy rate used at the time of obligation is 7 percent and the revised subsidy rate is 5 percent, then the difference is -2 percentage points.
- *Step 3.* Multiply the dollar value of actual loan disbursements to date by the percentage point difference in subsidy rates that was calculated in step 2. For example, using the case in step 2, if \$100 million in loans have been disbursed, then this amount would be -\$2 million (\$100 million multiplied by -2 percentage points). The product is the technical reestimate.

The amount calculated in step 3 is the cumulative technical reestimate. Deduct previous technical reestimates to derive the additional technical subsidy reestimate for the current year (see (d) below).

The instructions accompanying the OMB subsidy reestimate worksheet provide additional instructions for estimating technical reestimates.

(2) *Balances approach.* For details on calculating technical reestimates under the balances approach, contact the OMB representative with primary responsibility for the program.

(d) Calculating the total reestimate.

The total reestimate is the sum of the interest rate reestimate, if any, and the additional technical reestimate for the current year. To calculate the total reestimate:

- *Step 1.* Add the cumulative interest rate reestimate and the cumulative technical reestimate calculated in (b) and (c) above.
- *Step 2.* Subtract all reestimates (not including interest on reestimates) that have been recorded in previous budgets and outlays which have been apportioned for credit modifications, as defined by Section 85.3(n). This remainder is the total reestimate for the current year.

(e) Calculating interest on reestimates.

Interest on reestimates is the amount of interest that would have been earned or paid by each cohort on the total reestimate, if that reestimate had been included as part of the original subsidy estimate. It is paid on the amount of the reestimate by the program account (for upward reestimates) or the financing account (for downward reestimates). The purpose is to put the financing account in the same position as if the subsidy cost had been estimated in the first place using the information that is incorporated in the reestimate. The interest rate to calculate the interest on reestimates is the same rate that is used to discount cash flows for the cohort.

Interest on reestimates is calculated automatically by the OMB subsidy reestimate worksheet. To calculate the interest on the reestimate:

- *Step 1.* Calculate the percentage point difference between the reestimated subsidy rate and the original subsidy rate used at the time of obligation.
- *Step 2.* For each year in which loans were disbursed, multiply the dollar value of actual loan disbursements by the percentage point difference calculated in step 1. These amounts are the total subsidy reestimates for each year.
- *Step 3.* Calculate the weighted average disbursement interest rate for the cohort. For each year in which loans were disbursed, multiply the dollar value of actual loan disbursements by the annual interest rate for that year. Add the results. Divide this amount by total loan disbursements to date. The resulting rate is used to calculate the interest on reestimates for the cohort.
- *Step 4.* Calculate interest on reestimates for each of the annual amounts calculated in step 2, using the weighted average disbursement interest rate calculated in step 3. The interest is compounded from the year of disbursement to the year for which the reestimate is made. In general, assume that the subsidy reestimates would have been disbursed in equal amounts throughout the year, so calculate interest on only half the reestimate in the year it would have been disbursed. This calculation produces the interest on reestimates for each year of disbursements.
- *Step 5.* Add the interest on reestimates for each year of disbursement. This is the interest on reestimates. These amounts will be recorded in the same way as the total subsidy reestimates except that they will be recorded as “interest on reestimates of direct loan subsidy” or as “interest on reestimates of loan guarantee subsidy.”

(f) Reestimate increases/decreases.

All increases or decreases in subsidy cost for different risk categories within the same cohort will be netted against each other; that is, risk categories which require increased subsidies may first draw on the excess from any risk categories within the cohort where the reestimate shows a subsidy decrease. No such netting may occur between cohorts.

If the reestimate indicates a net increase in the subsidy cost of the cohort as a whole since the last estimate or reestimate, an obligation in the amount of the net increase (plus interest) must be recorded against permanent indefinite budget authority available to the program account for this purpose. The obligation must be recorded separately in the program and financing schedule as “reestimates of direct loan subsidy” or as “reestimates of loan guarantee subsidy” (and as “interest on reestimates of direct loan subsidy” or as “interest on reestimates of loan guarantee subsidy”), so that it can be distinguished from obligations for the subsidy cost of new loans and loan guarantees. An equal amount of outlays from the program account to the financing account will be recorded when the reestimate is made. The interest rate to calculate the interest on upward reestimates is the same rate that is used to discount cash flows for the cohort.

When outlays for reestimates are recorded in the credit program account, an equal amount of offsetting collections will be recorded in the appropriate risk categories in the financing account. In the case of direct loans, the offsetting collections from the program account, together with repayments from borrowers, will be used to pay interest and repay principal on borrowing from Treasury and for other expenses. In the case of loan guarantees, the offsetting collections will be retained as unobligated balances, together with the unobligated balances of the original subsidy payment, fees, and interest, until needed to pay default claims and other expenses. Any unused balances of collections due to the reestimate will earn interest at the same rate as is paid on other funds held by the financing account for the same cohort.

If the reestimate indicates a net decrease in the subsidy cost of the cohort as a whole since the last estimate or reestimate, there is a downward reestimate. To keep the correct amount of balances in the financing account, an obligation and a financing disbursement in the amount of the net decrease (plus interest on the reestimate) must be recorded in the financing account. In the case of direct loans, the obligation will be financed with authority to borrow from the Treasury. In the case of loan guarantees, the obligation will be financed with unobligated balances. The obligation will be recorded in the program and financing schedule as “payment of downward reestimates” (and as “interest on downward reestimates”). The interest rate to calculate the interest on downward reestimates is the same rate that is used to discount cash flows for the cohort.

As a general rule, the financing disbursement for a downward reestimate (plus interest on the reestimate) will be made from the financing account to a general fund receipt account (a negative subsidy account) established for each credit program. The receipts will be recorded as offsetting receipts, which will offset the total budget authority and outlays of the agency and the budget subfunction of the program.

At the discretion of the OMB representative with primary responsibility for the program, a special fund receipt account may instead be established. For mandatory programs, downward reestimates (and interest on reestimates) may be credited directly to the program account as offsetting collections.

If a special fund receipt account is used for the credit program and already exists, the downward reestimates and interest on reestimates will be recorded in a subaccount rather than a new special fund receipt account. Schedule N is required for these special funds (see section 86). When a special fund receipt account is used, the receipts from downward reestimates and interest on reestimates, like those from negative subsidies, are only available for obligation to the extent provided in advance in appropriations acts (except for mandatory

programs, where they are immediately available for obligation). The normal provisions still apply: discretionary appropriations are required for discretionary subsidy costs, modifications, and administrative costs; mandatory appropriations are available for upward reestimates and mandatory programs.

If the disbursement of reestimates and interest on reestimates is made directly from the financing account to the program account in a mandatory program, it is immediately available for obligation.

(g) Closing reestimates.

Agencies will make a closing technical reestimate once all of the loans in a cohort have been either repaid or written off. This reestimate will be based on actual accounting systems data and will be used in closing the accounting books for the cohort. All the procedures are applied that are described above for the technical reestimate and interest on reestimates. Closing entries will be made in the accounting records.

The increases or decreases in subsidy cost for different risk categories within the same cohort will be netted against each other; that is, risk categories which require increased subsidies may first draw on the excess from any risk categories within the cohort where the reestimate shows a subsidy decrease. No such netting may occur between cohorts.

85.6 How do I calculate and record modifications?

When a direct loan or loan guarantee is modified, directly or indirectly, the subsidy cost of the modification must be calculated. The subsidy cost calculation will indicate whether the Government action changes the subsidy cost. If there is no change in cost, there will be no budgetary effect, and nothing needs to be recorded in the budget. If the modification will increase or decrease the cost, the budgetary effect must be recorded as described under modification cost increases/decreases below. Additional transfers to or from the financing account will be required, with the type of transfer depending on whether the modification affects pre-1992 or post-1991 direct loans and loan guarantees. These additional transfers are described in separate subsections below. These requirements apply to all modifications, both to pre-1992 and to post-1991 direct loans (or direct loan obligations) and loan guarantees (or loan guarantee commitments). The calculations are explained below.

The subsidy cost of the modification is the difference between the estimate of the net present value of the remaining cash flows assumed for the direct loan or loan guarantee contract before and after the modification. The estimate of remaining cash flows before modification must be the same as assumed in the baseline for the most recent President's budget. The estimate of remaining cash flows after modification must be the pre-modification cash flows adjusted solely to reflect the effects of the modification.

(a) Estimating the modification subsidy cost.

The subsidy cost is calculated as follows (where cash flows to the Government have negative signs and cash flows from the Government have positive signs):

- *Step 1.* Estimate the remaining cash flows expected just before the modification under the loan contract terms assumed in the baseline of the most recent budget submitted to Congress. These estimates must assume the same deviations (defaults, delinquencies, etc.) from contract terms as assumed for the risk category in which the loan is classified.
- *Step 2.* Discount the cash flows estimated in step 1 to the time of the modification using the discount rates assumed in the economic assumptions for the most recent President's budget when the loan is

modified. The remaining cash flow for each year (or other time period) of the loan that is being modified should be discounted using the interest rate on a marketable zero-coupon Treasury security with the same maturity from the date of modification (not from the date of the original maturity) as that cash flow.

- *Step 3.* Estimate the cash flows expected under the modified contract terms. For cash flows unaffected by the modified contract terms, these estimates must assume the same deviations (defaults, delinquencies, etc.) from contract terms as assumed for the risk category in which the loan is classified.
- *Step 4.* Discount the cash flows estimated in step 3 to the time of the modification using the same discount rates that are used in step 2. If a loan asset is sold, the amount in this step (minus appropriate administrative costs) equals the net proceeds from the sale.
- *Step 5.* Subtract the amount calculated in step 2 from the amount calculated in step 4 to produce the estimated subsidy cost resulting from the modification.

The results of this calculation will be positive, negative, or zero. A positive estimate indicates that the Government will incur an additional subsidy cost because of the modification. A negative estimate indicates that the Government is achieving some savings. A zero estimate indicates that the modification will not change the subsidy cost.

(1) *Cost increases.* Modifications may be made only to the extent that budget authority for the additional cost has been provided in advance in an appropriations act and is available in the program account. At the time that a modification is made, an obligation in the amount of the estimated increase in subsidy cost will be recorded against budget authority in the program account. At the same time, an outlay in the amount of the increase in the subsidy cost will be made from the program account to the appropriate direct loan or guaranteed loan financing account. Simultaneously, an equal amount of offsetting collections will be recorded in the financing account (line 8800).

In the case of *direct loans*, the offsetting collections in the financing account will be credited to the cohort and risk category of the modified loan and will be used to pay interest and to repay debt owed to Treasury and for other expenses. In the case of *loan guarantees*, the offsetting collections will be credited to the cohort and risk category of the modified loan guarantee and will be retained as unobligated balances until needed to pay default claims and other expenses. The additional balances due to the modification will earn interest at the same rate as is paid on other funds held by the financing account for the same cohort.

(2) *Cost decreases.* At the time that a modification is made, an obligation in the amount of the estimated decrease in subsidy cost will be recorded in the financing account. In the case of a direct loan modification, the obligation will be recorded against authority to borrow from the Treasury. In the case of a loan guarantee, the obligation will be recorded against unobligated balances for the cohort, or if unobligated balances are insufficient, against authority to borrow. At the same time, the financing account will record an equal disbursement to the negative subsidy receipt account established for each credit program.

(b) *Additional financing account transfers for modifications of post-1991 direct loans and loan guarantees.*

When a post-1991 direct loan or loan guarantee is modified, a modification adjustment transfer must be made between the financing account and the general fund. The modification adjustment transfer adjusts for the

disconnect between the interest rate used to calculate the cost of the modification and the interest rate at which the cohort pays or earns interest. The discount rates used to calculate the cost of the modification are the interest rates in the economic assumptions for the most recent President's budget when the direct loan or loan guarantee is modified. In contrast, the cohort borrows or earns interest at the rate applicable when the direct loan or guaranteed loan was disbursed. Therefore, if the only transfer made between the financing account and the general fund was for the change in the subsidy cost, the resources of the financing account would be out of balance. Either it would have too much or too little resources to pay its claims to the public or repay its debt to the Treasury.

This imbalance is eliminated by a modification adjustment transfer between the financing account and the general fund. The transfer is not an outlay or an offsetting collection, because it does not represent a cost to the Government of the loan or the guarantee. Instead, it is a facilitating adjustment that makes the present value of the assets and liabilities held by the financing account come out even.

The modification adjustment transfer is the difference between the present value of the estimated change in cash flows due to the modification, calculated using the discount rates applicable when the direct loan or loan guarantee is modified, and the present value of the estimated change in cash flows due to the modification, calculated using the discount rates applicable when the direct loan or guaranteed loan was disbursed. This transfer is in addition to the transactions described above. Specifically, it is calculated in the following further steps:

- *Step 6.* Take the difference in cash flows due to the modification. This is the amount calculated in step 1 above minus the amount calculated in step 3 above.
- *Step 7.* Calculate the present value of this difference using the interest rate at which the cohort pays or earns interest.
- *Step 8.* Subtract the step 5 amount from the step 7 amount. This difference is the modification adjustment transfer.

The effects of the modification adjustment transfer on the program and financing schedule of a financing account are summarized below. They distinguish between a loan guarantee and a direct loan and between which present value of the modified cash flow is higher: the estimate using the current discount rates (i.e., the discount rates in the economic assumptions for the most recent President's budget when the direct loan or loan guarantee is modified) or using the original discount rates (i.e., the discount rate when the direct or guaranteed loan was disbursed). Depending on which present value is higher, the transfer is made from the general fund to the financing account or from the financing account to the general fund.

If the cost of the modification is more when calculated at the current discount rates than at the original discount rates, the financing account would be over compensated by the subsidy payment for the modification. Therefore, the financing account makes a modification adjustment transfer to the general fund. This transfer is recorded on line 6927, "Capital transfer to general fund." The transfer produces the accompanying transactions with Treasury:

- If a loan guarantee is modified, the financing account's offsetting collection for the modification cost increases the unobligated balance (line 2440). The capital transfer to the general fund reduces the amount by which the unobligated balance is increased. (The amount of the increase shown on line 2440 is net of the capital transfer). Subsequent interest earnings on the addition to the balance are lower than they would have been without the capital transfer.

- If a direct loan is modified, the financing account's offsetting collection for the modification cost is used to reduce debt owed to Treasury (line 6947, "Portion applied to debt reduction"). The capital transfer reduces the amount by which the debt is reduced. (The amount of the increase shown on line 6947 is net of the capital transfer.) Subsequent interest paid to Treasury is higher than it would have been without the capital transfer.
- The general fund will collect the modification adjustment transfer in a non-budgetary capital transfer receipt account. There will be one receipt account to collect the modification adjustment transfers from all financing accounts.

If the cost of the modification is less when calculated at the current discount rates than at the original discount rates, the financing account would be under compensated by the subsidy payment for the modification. Therefore, the financing account receives a modification adjustment transfer from the general fund, which is recorded in the financing account as a permanent appropriation (line 6000, "Appropriation"). This transfer produces the accompanying transactions with Treasury:

- If a loan guarantee is modified, the financing account's offsetting collection for the modification cost increases the unobligated balance (line 2440). The modification adjustment transfer also increases the unobligated balance (line 2440). Subsequent interest on uninvested funds is higher than it would have been without the modification adjustment transfer.
- If a direct loan is modified, the offsetting collection for the modification cost is used to reduce debt owed to Treasury (line 6947, "Portion applied to debt reduction"). The modification adjustment transfer is also used to reduce debt owed to Treasury (line 6047, "Portion applied to debt reduction"). Subsequent interest paid to Treasury is lower than it would have been without the modification adjustment transfer.

(c) *Additional financing account transfers for modifications of pre-1992 direct loans and loan guarantees.*

Pre-1992 direct loans and loan guarantees are held in liquidating accounts unless they are modified. When they are modified, the cost of the modification is estimated and accounted for in the same way as modifications of post-1991 loans. In addition, there are transactions between the liquidating account and the financing account that must be recorded. The transactions differ depending on whether the direct loan asset or the loan guarantee liability is transferred from the liquidating account to the financing account or continues to be held by the liquidating account.

(1) *Transfer of asset or liability to financing account.* This approach should be used, unless the OMB representative for the credit program approves using the alternative approach (described in (2) below).

At the time of the modification, the direct loan asset or loan guarantee liability will be transferred from the liquidating account to the financing account, and a one-time adjusting payment will be made between the two accounts. The adjusting payment will equal the estimated net present value of the Government's remaining cash flows expected just before the modification under the terms assumed in the baseline of the most recent budget submitted to Congress. The remaining cash flow for each year (or other time period) should be discounted using the interest rate on a marketable zero-coupon Treasury security with the same maturity from the date of modification as that cash flow, regardless of the maturity of the loan. This amount is the result of the first two steps in estimating the subsidy cost of the modification.

In the case of a direct loan modification, the adjusting payment will be made from the financing account to the liquidating account. The financing account, in effect, buys the loan from the liquidating account.

An obligation and a disbursement will be recorded in the financing account in the amount of the payment when it is made. The obligation will be recorded on line 0802 in the financing account program and financing schedule. The financing account will use its collection of the subsidy payment from the program account plus borrowing from Treasury to make the adjusting payment. The interest rate on the amount borrowed from Treasury will be the same as the rate used to calculate the present value of cash flows under the modified contract. Collections from the direct loan assets over their remaining life will be credited to the financing account and used to pay interest and repay debt owed to Treasury. The liquidating account will record offsetting collections equal to the adjusting payment, which it will use to repay debt owed to Treasury or transfer to the general fund as a capital transfer.

In the case of a loan guarantee modification, the adjusting payment will be made from the liquidating account to the financing account. The liquidating account, in effect, pays the financing account to assume the loan guarantee liability. Unobligated balances and permanent indefinite appropriations to the liquidating account will be used to make the payment. Outlays will be recorded in the liquidating account in the amount of the payment when it is made. The financing account will record an equal amount of offsetting collections. These collections will be combined with the collection of the subsidy payment from the program account and retained in the financing account as a reserve to pay default claims and other expenses.

(2) *Asset retained by liquidating account.* Subject to the approval of the OMB representative for the credit program, this method can be used if a modification affects a large number of direct loans or loan guarantees and it would be less complicated for the liquidating account to retain the assets or liabilities.

In the case of a modification that increases subsidy cost, the liquidating account will collect less from the public over time if a direct loan has been modified and will pay more to the public if a loan guarantee has been modified. The financing account will collect a subsidy payment from the program account equal to the present value of the change in cash flows to the Government. The financing account will obligate and disburse the same amount to the liquidating account to compensate it for the reduced asset or increased liability. The liquidating account will record offsetting collections, which it will use to pay current obligations or to repay debt. Any excess at the end of the year will be transferred to the general fund. Since the program account's outlays for the subsidy payment will exactly equal the liquidating account's collections from the financing account, there will be no net change in the surplus or deficit for that year.

In the case of modifications that decrease subsidy cost, the liquidating account will collect more from the public over time if a direct loan has been modified or pay less to the public if a loan guarantee has been modified. The liquidating account will use permanent indefinite authority to make a payment to the financing account equal to the present value of the change in cash flows in the liquidating account. The financing account will record offsetting collections, which it will pay to the negative subsidy receipt account for the credit program. Since the payment by the liquidating account and the negative subsidy receipts will be equal, there will be no net change in the surplus or deficit for that year.

(d) *Single cohort for modifications of pre-1992 direct loans or loan guarantees.*

All modifications of pre-1992 direct loans and loan guarantees for a given program will be accounted for in a single direct loan cohort or a single loan guarantee cohort.

85.7 What must I know about the sale of delinquent loan assets?*(a) General.*

Beginning in FY 1999, credit agencies with over \$100 million in loan assets are expected to sell delinquent loan assets that meet the criteria described in (b). This applies to loan assets held by both liquidating and financing accounts. The cash flows used to calculate the baseline subsidy rates for existing cohorts should be adjusted to reflect this policy, as should the cash flows used to estimate the subsidy rates for future cohorts. Modifications of this policy that increase the cost will have to be covered by appropriations of subsidy budget authority. Differences between the estimated and actual sale proceeds due to market conditions will be treated as reestimates.

(b) Loan asset sale criteria.

Loan assets that are more than one year delinquent should be sold, except for the following categories of loans:

- Loans to foreign countries or entities.
- Loans in structured forbearance, when conversion to repayment status is expected within 12 months or after statutory requirements are met.
- Loans that are written off as unenforceable due to death, disability, or bankruptcy.
- Loans that have been submitted to Treasury for offset and are expected to be extinguished within three years.
- Loans in adjudication or foreclosure.

Agencies should consult the OMB representative with primary responsibility for the account to determine which loan assets meet these criteria.

(c) Justification for non-compliance.

If an agency can demonstrate that the present value of cash flows associated with continued Government ownership of the loan assets would exceed the expected sale proceeds, the agency may not be required to sell the loan assets. Also, if there is a serious conflict between selling delinquent loan assets and Administration policy for the program, and the agency can justify to the satisfaction of their OMB representative that the sale policy cannot be reconciled with the program policy, the agency may not be required to sell the loan assets. Agencies should consult with the OMB representative with primary responsibility for the program if they believe either of these tests would be met.

(d) Cost of loan asset sales.

If the cash flows for existing loans do not incorporate an explicit assumption about the sale of delinquent loan assets, the sale is a modification, whether the loan assets are held by financing accounts or liquidating accounts. Otherwise, the sale is part of the subsidy estimates for Presidential policy and the baseline, and differences between the estimated and actual sale proceeds are a reestimate.

If the sale is a modification, the cost would equal the difference between the net sale proceeds and the estimated value to the Government, on a present value basis, of continuing to own the loan asset (the “hold value”).

The modification cost of multiple sales with closing dates in the same fiscal year is the sum of the cost or saving calculated for each sale of loans within the same cohort or risk category. The closing date of a sale is the date on which the seller and the buyer(s) close the transaction and title of the assets legally transfer to the buyer(s). Therefore, for loans within the same cohort or risk category, a modification cost for one sale can be offset by a modification saving for a different sale within the same fiscal year. For sales that include loans from more than one cohort or risk category, a single modification cost or savings is first calculated for all of the loans sold, and the cost or savings is subdivided among each of the cohorts or risk categories.

Loan assets that are sold with recourse are treated as a combination of a sale without recourse and a new loan guarantee. The cost of the provision for recourse is estimated separately from the cost of the loan asset sale, and the subsidy for its cost, as well as the cost of the implicit loan sale without recourse, must be appropriated in advance of the sale. Sales with recourse are not permitted except where they are specifically authorized by statute.

If the Government takes an equity stake (or participation) in the cash flow of the sold assets, such as a joint venture or equity-held sale, the net sale proceeds equal the actual cash proceeds plus an estimate of the present value of the proceeds from the Government's equity position, net of any transaction costs.

You may pay certain direct costs of loan asset sales from the gross proceeds of those sales. In general, the guidelines for whether an expense should be paid from the administrative expense appropriation or from asset sale proceeds are similar to those for determining whether an expense should be paid from the administrative expense appropriation to the program account or from the financing account (see section 85.3(a)). Generally, costs that may be paid from proceeds include:

- Underwriting;
- Rating agency;
- Due diligence;
- Legal; and
- Transaction financial advisory fees.

These costs are part of the cash flows used to calculate net sale proceeds to determine the modification cost of the sale (if the sale constitutes a modification) or to reestimate the subsidy cost on a cohort in which loan assets have been sold (if the sale is not a modification).

The costs of Government personnel, travel, computer systems, etc., associated with the development and execution of a loan asset sales program, as well as the cost of any contracts for asset sale program financial advisory services, should be paid from the agency's administrative expense appropriation. Questions about whether a specific cost should be paid from the administrative expense appropriation or sale proceeds should be directed to OMB.

(e) *OMB review of sales.*

No sale may occur without the approval of the OMB examiner. After identifying loans that meet the criteria described in (b), agencies must develop a plan for selling these loans in consultation with their OMB examiner. In addition, at least 30 calendar days prior to the scheduled final bid day (the date on which a

buyer may submit a bid to the seller), the agency must submit for approval to the OMB representative with primary responsibility for the program the following information:

- The expected date of sale;
- A description of the loans to be sold (including balances, business program under which the loans were originated, and current payment status);
- The estimated hold value, with relevant supporting documents and analysis;
- The estimated net sale proceeds, with relevant supporting documents and analysis;
- The estimated modification cost, whether positive, negative, or zero; and
- An evaluation of relevant previous asset sales, including the hold values, net sale proceeds, and positive/negative subsidy generated from each, if applicable.

Three weeks after the sale, an agency must advise the OMB examiner of the actual amount of the proceeds realized from the sale and the actual amount of the transaction costs that were paid from the proceeds.

85.8 What are the reporting requirements for credit accounts?

Each program making post-1991 direct loans or loan guarantees will have at least two and as many as five types of accounts, even if the Administration is proposing to terminate the program:

- A program account.
- A financing account for direct loan obligations, if any.
- A financing account for loan guarantee commitments, if any.
- A negative subsidy receipt account for negative subsidies and downward reestimates, if any.
- A liquidating account for pre-1992 direct loans and loan guarantees, if any.

Generally, the print materials and MAX schedules required for credit program, financing, liquidating, and negative subsidy receipt accounts are listed below. References to applicable A-11 sections are also provided.

SUMMARY OF REQUIREMENTS

Requirement	Program	Financing	Liquidating	Receipt
Appropriations language	✓			
Narrative statement (section 97)	✓	✓	✓	
Schedule P (PY-BY) (section 82)	✓	✓	✓	
Schedule O (PY-BY) (section 83)	✓		✓	
Schedule N (PY-BY) (section 86)	✓			
Schedule U (PY-BY) (section 85)	✓			
Schedule A (PY-BY+9) (section 81)	✓		✓	
Schedule S (CY-BY+9) (section 81)	✓		✓	
Schedule C (PY-BY) (section 84)	✓		✓	
Schedule H (PY-BY+9) (section 85)		✓	✓	
Schedule G (PY-BY+9) (section 85)		✓	✓	
Schedule R (PY-BY+9) (section 81)				✓
Schedule K (PY-BY+9) (section 81)				✓
Schedule Y (CY-BY+9) (section 85)		✓	✓	
Schedule F (PY-BY) (section 86)		✓	✓	
Schedule E (PY-BY) (section 86)			✓	

Separate schedules are required for supplemental requests and proposed legislation items. These schedules show the effect of the supplemental request or proposed legislation on the information presented in the regular schedules for the program.

A written justification is required for all new credit programs or credit programs requiring reauthorization. The justification must address the Federal credit policies and guidelines contained in OMB Circular No. A-129.

85.9 What do I report for program accounts?

Program accounts are required for post-1991 direct loan obligations or loan guarantee commitments and for modifications of pre-1992 direct loans and loan guarantees. They record budget authority, obligations, and outlays for subsidy costs and the administrative expenses of a credit program (including administrative expenses for pre-1992 direct loans and loan guarantees). In most cases, current, definite budget authority is provided in appropriation acts for subsidy payments (except for entitlements, which have permanent indefinite budget authority) and administrative expenses. Permanent indefinite authority is available for reestimates and interest on reestimates.

(a) *Program and financing schedule (schedule P).*

Use the following line number scheme in the “obligations by program activity” section of the program and financing schedule (see exhibit 85A):

Line number	Description
	OBLIGATIONS BY PROGRAM ACTIVITY:
0001	Direct loan subsidy
0002	Loan guarantee subsidy
0003	Subsidy for modifications of direct loans
0004	Subsidy for modifications of loan guarantees
0005	Reestimates of direct loan subsidy
0006	Interest on reestimates of direct loan subsidy
0007	Reestimates of loan guarantee subsidy
0008	Interest on reestimates of loan guarantee subsidy
0009	Administrative expenses

(b) *Object classification (schedule O).*

Record all direct expenses in the appropriate object class. For administrative expenses transferred to a salaries and expenses account, use object class 25.3, "Purchases of goods and services from Government accounts." In the salaries and expenses account receiving the transfer, record reimbursable obligations for administrative expenses using a "2" as the first digit of the line number. (See section 83 for more information about the classification of reimbursable programs in the object class schedule.)

(c) *Loan levels and subsidy (schedule U).*

Prepare a schedule of loan levels (see exhibit 85B), subsidy budget authority, subsidy rate, subsidy outlays, and reestimates for each program account. These data are displayed by program or by program and risk category. The titles of the stub entries should be tailored to identify the program to which each entry belongs. Note that some entries are reported by cohort while others (reestimates) are reported for combined cohorts. Although no outyear data are collected in schedule U, you may be required to provide outyear data by your OMB representative.

Use the entries in the following table to prepare schedule U. MAX will automatically generate the line entries indicated in **boldface**.

DATA REQUIREMENTS FOR SCHEDULE U

Entry	Description
Direct loan levels supportable by subsidy budget authority:	Report lines 1150-1339 by cohort.
1150 Direct loan levels	Equals the amount of direct loans that can be obligated with the amount of new subsidy budget authority requested or provided in that year. Include loan volume reestimates, if any, in PY. Do not include proceeds from asset sales. Do not report the unused portion of multi-year loan limitations that are carried forward. In the CY and PY, loan levels do not have to equal enacted loan limitations, as Congress may enact limitations that are not achievable with the subsidy budget authority provided. However, in the BY, loan levels supportable by the subsidy requested must equal the direct loan limitation. For discretionary programs, direct loan limitations are also reported in schedule A in program accounts on line 7007 and in schedule G in direct loan financing accounts on line 1111. For mandatory programs, only line 1131 in schedule G in the financing account is required. These data are required even if the subsidy rate is zero or negative.
1159 Total direct loan levels	The sum of all lines 1150.
Direct loan subsidy (in percent):	
1320 Subsidy rate	The 1320 data line series presents data in percentages on the subsidy costs inherent in making a cohort of direct loans. In the PY column, the rate should be the reestimated subsidy. In the CY column use the budget execution rate. Note that the subsidy rate (in percent) must be rounded to the nearest hundredth of one percent and entered into MAX without decimal points. For example, enter 50.503 as 5050, 5.05 percent as 505 and 0.5 percent as 50. Amounts should be shown, even if zero or negative.
1329 Weighted average subsidy rate	The disbursement weighted average sum of all lines 1320 above, calculated by dividing total subsidy budget authority (line 1339) by total direct loan level (line 1159). For non-zero transmittal codes, this is the change to the subsidy rates reported under transmittal code zero, not the new rates.
Direct loan subsidy budget authority:	
1330 Subsidy budget authority	The 1330 data line series presents data in dollars on the subsidy costs inherent in making direct loans. It will not include unobligated balances eligible to be carried forward. If the PY cohort has been reestimated, then the PY column amount should reflect the reestimate. In the CY column, the amount will equal the amount appropriated for subsidies. The BY column will show the requested subsidy amount and must agree with amounts in appropriations language. Report even if the subsidy is negative.
1339 Total subsidy budget authority	The sum of all lines 1330 above.

Entry	Description
Direct loan subsidy outlays:	Report line 1340 for all cohorts.
1340 Subsidy outlays	The 1340 data line series presents data on the amount of subsidy disbursed in a given year. An outlay will be recorded in the program account at the time of disbursement of the loan to the borrower. Both outlays from new budget authority and outlays from balances are reported on this line. These amounts, together with the total upward reestimate outlays (line 1369), should equal line 8800 (offsetting collections (cash) from Federal sources) in schedule P of the financing account.
1349 Total subsidy outlays	The sum of all lines 1340 above.
Direct loan upward reestimate subsidy budget authority:	Report lines 1350-1389 for all cohorts.
1350 Upward reestimate subsidy budget authority	The 1350 data line series presents data on the amount of upward reestimate budget authority paid to the financing account in any given year. Report upward reestimates for all outstanding fiscal year cohorts for which upward reestimates are paid to the financing account. Report amounts in PY and CY only. Where possible, report amounts by risk category to correspond to the risk categories reported on lines 1150, 1320, 1330, and/or 1340.
1359 Total upward reestimate budget authority	The sum of all lines 1350 above.
Direct loan upward reestimate subsidy outlays:	
1360 Upward reestimate subsidy outlays	The 1360 data line series presents data on the amount of upward reestimates outlayed to the financing account in any given year. Because reestimates should be fully outlayed as soon as they are made available, the entries should correspond to the entries in the 1350 data line series.
	Equals each line 1350 reported.
1369 Total upward reestimate subsidy outlays	The sum of all lines 1360 above.
Direct loan downward reestimate subsidy budget authority:	
1370 Downward reestimate subsidy budget authority	The 1370 data line series presents data on the amount of downward reestimate budget authority paid out of the financing account in any given year. Report downward reestimates for all outstanding fiscal year cohorts for which downward reestimates will be paid out of the financing account. Report amounts in PY and CY only. Where possible, report amounts by risk category to correspond to the risk categories reported on lines 1150, 1320, 1330, and/or 1340.
1379 Total downward reestimate budget authority	The sum of all lines 1370 above.

Entry	Description
Direct loan downward reestimate subsidy outlays:	
1380 Downward reestimate subsidy outlays	The 1380 data line series presents data on the amount of downward reestimates outlayed from the financing account in any given year. Because reestimates should be fully outlayed in the year that they are reported, the entries should correspond to the entries in the 1370 data line series. Equals each line 1370 reported.
1389 Total downward reestimate subsidy outlays	The sum of all lines 1380 above.
Guaranteed loan levels supportable by subsidy budget authority:	Report lines 2150-2339 by cohort.
2150 Loan guarantee levels	Equals the full principal amount, not just the portion guaranteed by the Government, of guaranteed loans that can be committed with the amount of new subsidy budget authority requested or provided in that year. Include loan volume reestimates, if any, in PY. Do not include proceeds from asset sales. Do not report the unused portion of multi-year loan guarantee limitations that are carried forward. In the PY and CY, loan levels do not have to equal enacted loan guarantee limitations, as Congress may enact limitations that are not achievable with the subsidy budget authority provided. However, in the BY, loan levels supportable by the subsidy must equal the guaranteed loan limitation. For discretionary programs, guaranteed loan limitations are also reported in schedule A in program accounts on line 7008, and in schedule H in guaranteed loan financing accounts on line 2111. For mandatory programs, only line 2131 in schedule H in the financing account is required. These data are required even if the subsidy rate is zero or negative.
2159 Total loan guarantee levels	The sum of all lines 2150.
Guaranteed loan subsidy (in percent):	
2320 Subsidy rate	The 2320 data line series presents data on the subsidy costs inherent in making a cohort of guaranteed loans. In the PY, the rate should be the reestimated subsidy. In the CY column use the budget execution rate. Note that the subsidy rate (in percent) must be rounded to the nearest hundredth of one percent and entered into MAX without decimal points. For example, 50.503 percent will be entered as 5050, 5.05 percent as 505, and 0.5 percent as 50. Amounts should be shown, even if zero or negative.
2329 Weighted average subsidy rate	The disbursement weighted average sum of all lines 2320 above calculated by dividing total subsidy budget authority (line 2339) by total guaranteed loan level (line 2159). For non-zero transmittal codes, this is the change to the subsidy rates reported under transmittal code zero, not the new rates.

Entry	Description
Guaranteed loan subsidy budget authority:	
2330 Subsidy budget authority	The 2330 data line series presents data in dollars on the subsidy costs inherent in making a cohort of guaranteed loans. It will not include unobligated balances eligible to be carried forward. If the PY cohort has been reestimated, then the PY column should reflect the reestimate. In the CY column, the amount will equal the amount appropriated for subsidies. The BY column will show the requested subsidy amount and must agree with amounts in appropriations language. Report even if the subsidy is zero or negative.
2339 Total subsidy budget authority	The sum of all lines 2330 above.
Guaranteed loan subsidy outlays:	Report line 2340 for all cohorts.
2340 Subsidy outlays	The 2340 data line series presents data on the amount of subsidy disbursed in a given year. An outlay will be recorded in the program account at the time the lender disburses the loan to the borrower. Both outlays from new budget authority and outlays from balances are reported on this line. These amounts, together with the total upward reestimate outlays (line 2369), should equal line 8800 (offsetting collections (cash) from Federal sources) in schedule P of the financing account. Report even if the subsidy is negative.
2349 Total subsidy outlays	The sum of all lines 2340 above.
Guaranteed loan upward reestimate subsidy budget authority:	Report lines 2350-2389 for all cohorts.
2350 Upward reestimate subsidy budget authority	The 2350 data line series presents data on the amount of upward reestimate budget authority paid to the financing account in any given year. Report upward reestimates for all outstanding fiscal year cohorts for which upward reestimates are paid to the financing account. Report amounts in PY and CY only. Where possible, report amounts by risk category to correspond to the risk categories reported on lines 2150, 2320, 2330, and/or 2340.
2359 Total upward reestimate budget authority	The sum of all lines 2350 above.
Guaranteed loan upward reestimate subsidy outlays:	
2360 Upward reestimate subsidy outlays	The 2360 data line series presents data on the amount of upward reestimates outlayed to the financing account in any given year. Because reestimates should be fully outlayed as soon as they are made available, the entries should correspond to the entries in the 2350 data line series. Equals each line 2350 reported.
2369 Total upward reestimate subsidy outlays	The sum of all lines 2360 above.

Entry	Description
Guaranteed loan downward reestimate subsidy budget authority:	
2370 Downward reestimate subsidy budget authority	The 2370 data line series presents data on the amount of downward reestimate budget authority paid out of the financing account in any given year. Report downward reestimates for all outstanding fiscal year cohorts for which downward reestimates will be paid out of the financing account. Report amounts in PY and CY only. Where possible, report amounts by risk category to correspond to the risk categories reported on lines 2150, 2320, 2330, and/or 2340.
2379 Total downward reestimate budget authority	The sum of all lines 2370 above.
Guaranteed loan downward reestimate subsidy outlays:	
2380 Downward reestimate subsidy outlays	The 2380 data line series presents data on the amount of downward reestimates outlaid from the financing account in any given year. Because reestimates should be fully outlaid in the year that they are reported, the entries should correspond to the entries in the 2370 data line series.
	Equals each line 2370 reported.
2389 Total downward reestimate subsidy outlays	The sum of all lines 2380 above.
Administrative expense data:	Report lines 3510-3590 for all program accounts.
3510 Budget authority	Budget authority provided or requested for administrative expenses for both direct and guaranteed loan programs.
3580 Outlays from balances	Outlays for administrative expenses from prior year obligated balances.
3590 Outlays from new authority	Outlays for administrative expenses from new budget authority.

Note: Schedule U data is identified by a four-digit line number and a two-digit suffix. The four-digit number identifies data by category (e.g., direct loan subsidy budget authority, downward reestimate subsidy outlays). The two-digit suffix differentiates between the various risk categories reported in the schedule.

85.10 What do I report for financing accounts?

Financing accounts record the cash flows associated with post-1991 direct loan obligations or loan guarantee commitments and for modifications of all direct loans and loan guarantees. These cash flows include loan disbursements, payments for guarantee claims, principal repayments, interest received from borrowers, interest paid on borrowing, interest earned on uninvested funds, interest supplements, and fees and premiums received. Separate financing accounts are used for direct loan obligations and loan guarantee commitments.

(a) *Program and financing schedules (schedule P)*

The following lines are typically used in schedule P for financing accounts (see exhibits 85C and 85F):

SELECTED P&F ENTRIES IN FINANCING ACCOUNTS

Entry	Description
Obligations by program activity: Stub entries should describe the transactions reported below. 0001-0009	Obligations for post-1991 direct loan disbursements (equal to face value), default claims on post-1991 loan guarantees, interest supplements to lenders, interest on debt owed to Treasury (calculated at the same rate as the discount rate for the cohort). A spreadsheet is available from OMB to calculate interest expense.
0801	Obligations for negative subsidies to be paid to the negative subsidy receipt account for the credit program.
0802	Obligations for downward reestimates of the subsidy to be paid to the negative subsidy receipt account for the credit program.
0803	Obligations for payments to purchase liquidating account loan assets or to reimburse the liquidating account for modification cost increases for pre-1992 direct loans and loan guarantees.
0804	Obligations for interest on the downward reestimate to be paid to the negative subsidy receipt account for the credit program.
New financing authority (gross), detail: 6000 Appropriation	Amount of authority becoming available as a result of a modification adjustment transfer from the general fund in the event that the modification cost estimate under compensated the financing account.
6400 Proceeds from loan asset sales with recourse	Amount of new budget authority resulting from the sale of financial assets with recourse.
6710 Authority to borrow	Financing authority (authority to borrow from Treasury) for the part of direct loans not financed by subsidy and fees, and for any default claims that cannot be paid by unobligated balances.
6900 Offsetting collections (cash)	Amount of offsetting collections (cash) credited to the account and refunds that pertain to obligations recorded in prior years.
6910 Change in uncollected customer payments from program account	Change in unpaid, unfilled orders from program account for direct loan subsidy. Report increases as positive entries; report decreases as negative entries.
6927 Capital transfer to general fund	Used for modification adjustment transfer to the general fund in the event that the modification cost estimate over compensated the financing account.
Change in obligated balance: 7240 Obligated balance, start of year	Includes unpaid obligations that represent undisbursed direct loan obligations.

Entry	Description
7440 Obligated balance, end of year	Includes unpaid obligations that represent undisbursed direct loan obligations.
Offsets: 8800 Federal sources	Collections of subsidy payments and upward reestimates from program accounts, certain modification adjustment transfers from the general fund, and adjusting payments from liquidating accounts for pre-1992 direct loans and loan guarantees.
8825 Interest on uninvested funds	Collections of interest on uninvested funds. A spreadsheet is available from OMB to calculate interest earned.
8840 Non-Federal sources	Collections of principal repayments and interest payments on direct loans by borrowers, collections on defaulted direct loans or guaranteed loans, fees or premiums paid by non-federal lenders or borrowers, prepayments of direct loans, and proceeds from the sale of direct loans or collateral.

(b) *Direct loan data (schedule G).*

Prepare a Status of direct loans schedule (Schedule G) (PY-BY+4, except line 6300) for all liquidating accounts and all direct loan financing accounts (see exhibits 85D and 85J). Each line entry is described in the table below. MAX will automatically generate the line entries indicated in **boldface**.

Lines 1111-1150 show data on an agency's direct loan obligations as they relate to enacted or proposed limitations. Lines 1210-1264 show balances and changes in balances of direct loans outstanding and are applicable to both liquidating and direct loan financing accounts. These lines record the cumulative balance of direct loans disbursed, less various kinds of repayments plus or minus other adjustments.

DATA REQUIREMENTS FOR SCHEDULE G

Entry	Description
Position with respect to appropriations act limitation on obligations:	Provide lines 1111-1150 for direct loan financing accounts only.
1111 Limitation on direct loans	Amount of limitation enacted or proposed to be enacted in appropriations acts. For discretionary programs, this amount should be consistent with line 1159 in schedule U. So long as any entry appears on lines 1111 through 1131, this line should remain in MAX and will be listed in the stub column even if no amounts are shown.
1113 Unobligated limitation carried forward (P.L. xx)	Amount of multi-year limitation enacted in a prior year appropriations act that was not obligated and is carried forward and used in a subsequent year.
1121 Limitation available from carry-forward	Amount of limitation available from a multi-year limitation enacted in a previous year that was not obligated and is available for use. This amount should correspond to the previous year's amount of unobligated limitation carried forward (line 1143). For programs

SECTION 85 -- FEDERAL CREDIT

Entry	Description
	that do not have a fixed loan limitation, this amount should be equal to the direct loan level supportable with the budget authority that is carried forward.
1131 Direct loan obligations exempt from limitation	Amount of obligations for direct loans to the public not subject to a specific limitation in appropriations acts.
1142 Unobligated direct loan limitation (-)	Amount of limitation enacted in appropriations acts that is not obligated in the year it is enacted. Include only amounts that lapse. Do not include multi-year limitation amounts that can be carried forward in a future fiscal year (see line 1143). Report amounts in PY and CY only unless specifically approved by OMB.
1143 Unobligated limitation carried forward (P.L. xx) (-)	Amount of multi-year limitation enacted in an appropriations act that was not obligated and is carried forward for use in a subsequent year.
1150 Total direct loan obligations	The sum of lines 1111 through 1143. This is the direct loan portion of the credit budget. This amount should be consistent with direct loan obligations recorded in the program and financing schedule of the financing account.
These data should be provided for liquidating and direct loan financing accounts.	
Cumulative balance of direct loans outstanding:	Provide lines 1210-1290 for liquidating and direct loan financing accounts.
1210 Outstanding, start of year	Amount of direct loan principal outstanding at the beginning of the year. Amounts for PY are automatically generated from data reported in the previous year's <i>Budget Appendix</i> and can be changed only with OMB approval.
Disbursements:	
1231 Direct loan disbursements	Amounts of disbursements of principal for direct loans. This does not include amounts shown separately in line 1232. In the liquidating account, this entry will include loans disbursed by the FFB.
1232 Purchase of loan assets from the public	Amount of loans purchased or repurchased by the account from non-Federal lenders.
1233 Purchase of loan assets from a liquidating account	Amount of direct loan assets transferred from liquidating account to a financing account as a result of a loan modification.
Repayments:	These entries must agree with amounts included for these transactions on line 8840 (offsetting collections from non-Federal sources) of the program and financing schedule for the account. The proceeds from discounted prepayment programs that were part of a loan asset sales program should be recorded together with the proceeds from loan asset sales to the public (line 1253). The discount (i.e., the difference between the face value of the loan and the proceeds received from discounted prepayments) should be

Entry	Description
	recorded together with the discount on loan asset sales to the public (line 1262).
1251 Repayments and prepayments (-)	Amount of principal repayments or prepayments. In the liquidating account, this entry will include repayments on loans disbursed by the FFB.
1252 Proceeds from loan asset sales to the public or discounted prepayments without recourse (-)	Amount of gross proceeds received from the non-recourse sale of loans to non-Federal buyers or the discounted loan prepayments that were part of a loan asset sales program.
1253 Proceeds from loan asset sales to the public with recourse (-)	Amount of gross proceeds received from the sale of loans to non-Federal buyers when loans are sold with recourse to the Federal Government. The full principal of the loans is scored as a new guaranteed loan commitment (line 2132). The amount of new budget authority resulting from the sale should equal the amount on line 6400 of the program and financing schedule.
Adjustments:	
1261 Capitalized interest (+)	Amount of interest due at the end of the year that is capitalized as part of the existing loan principal.
1262 Discount on loan asset sales to the public or discounted prepayments (-)	Difference between the face value of the loan and the proceeds received by the account from the sales of loans to non-Federal buyers or discounted loan prepayments that were part of a loan asset sales program.
Write-offs for default:	
1263 Direct loans (-)	Amount of direct loan principal reduced by write-offs for defaults. This line should only be used to indicate write-offs of loans that were initiated as direct loans. (Refer to the definitions for write-offs in OMB Circular No. A-129.)
1264 Other adjustments, net (+ or -)	Proceeds from the sale of collateral acquired from the foreclosure of direct loans; amount of principal repayments waived as provided by statute, in the event of certain specified contingencies; outstanding balances of loans transferred to or received from other accounts; amount of principal reduced or increased for other reasons. When this line is used, the nature of the adjustment must be explained in a footnote.
1290 Outstanding, end of year	Amount of direct loan principal outstanding at the end of the year. The sum of lines 1210 through 1264.
Net financing disbursements	Provide line 6300 for direct loan financing accounts only. See section 85.10(d).
6300 Net financing disbursements	Equals net financing disbursements reported on line 9000 of the program and financing schedule. Report PY-BY+9.

Note: Line 6300 does not print in the Appendix but is used by OMB for analytical and reporting purposes.

(c) *Guaranteed loan data (schedule H).*

Prepare a Status of Guaranteed Loans (schedule H) (PY-BY+4, except line 6300) for all liquidating and guaranteed loan financing accounts (see exhibits 85G and 85K). Report the full principal amounts of loans guaranteed, whether guaranteed in full or in part. Report principal only, even if the guarantee covers both the principal and interest. Do not count agency guarantees of loans disbursed by the FFB as guaranteed loans; treat such loans as direct loans of your agency financed by the FFB.

Each line entry is described in the table below. MAX will automatically generate the line entries indicated in **boldface**.

DATA REQUIREMENTS FOR SCHEDULE H

Entry	Description
Position with respect to appropriations act limitation on commitments:	Provide lines 2111-2199 for guaranteed loan financing accounts only.
2111 Limitation on guaranteed loans made by private lenders	Amount of limitation enacted or proposed to be enacted in appropriations acts on full principal of commitments to guarantee loans by private lenders. For discretionary programs, this line is equal to line 2159 in schedule U. So long as any entry appears on lines 2111 through 2132, this line should remain in MAX and will be listed in the stub column even if no amounts are shown.
2113 Uncommitted limitation carried forward (P.L. xx)	Amount of multi-year limitation enacted in a prior year appropriations act that was not committed and is carried forward and used in a subsequent year.
2121 Limitation available from carry-forward	Amount of limitation on full principal of commitments to guarantee loans by private lenders that is available from a multi-year limitation enacted in a previous year that was not obligated and is available for use. This amount should correspond to the previous year's amount of unobligated limitation carried forward (line 2143). For programs that do not have a fixed loan limitation, this amount should be equal to the guaranteed loan level supportable with the budget authority that is carried forward.
2131 Guaranteed loan commitments exempt from limitation	Amount of full principal of commitments to guarantee loans by private lenders that is not subject to limitation.
2132 Guaranteed loan commitments for loan asset sales to the public with recourse	Amount of full principal of guaranteed loan commitments made as a result of selling direct loans to non-Federal buyers with recourse to the Federal Government.
2142 Uncommitted loan guarantee limitation	Amount of limitation enacted in appropriations acts on full principal of commitments to guarantee loans by private lenders that is not committed in the year it is enacted. Includes only amounts that expire. Do not include multi-year limitation amounts that can be carried forward in a future fiscal year (see line 2143). Report amounts for PY and CY only.

Entry	Description
2143 Uncommitted limitation carried forward (P.L. xx) (-)	Amount of multi-year limitation enacted in an appropriations act that was not committed and is carried forward for use in a subsequent year.
2150 Total guaranteed loan commitments	The sum of lines 2111 through 2143. This is the guaranteed loan portion of the credit budget.
Memorandum: 2199 Guaranteed amount of guaranteed loan commitments	Amount of maximum potential Federal liability for the guaranteed loan principal associated with line 2150. To the extent the guarantee covers both principal and interest, this amount must exclude interest. This entry is required even though the amount may be the same as in line 2150.
Cumulative balance of guaranteed loans outstanding:	Provide lines 2210-2390 for liquidating and guaranteed loan financing accounts.
2210 Outstanding, start of year	Amount of guaranteed loan principal outstanding at the beginning of the year. Amounts for PY are automatically generated from data reported in the previous year's <i>Budget Appendix</i> and can be changed only with OMB approval.
Disbursements:	
2231 Disbursements of new guaranteed loans	Amount of guaranteed loan principal disbursed.
2232 Guarantees of loans sold to the public with recourse	Face value amount of guaranteed loan principal of loans sold to non-Federal buyers with recourse to the Federal Government.
2251 Repayments and prepayments (-)	Amount of principal repayments and prepayments.
Adjustments:	
2261 Terminations for default that result in loans receivable (-)	Amount of loan principal reduced by terminations for default that subsequently become a loans receivable in which the formerly guaranteed borrower owes the agency for the amount of claims paid as a result of the borrower's default.
2262 Terminations for default that result in acquisition of property (-)	Amount of loan principal reduced by terminations for default that lead to the acquisition of property by the agency.
2263 Terminations for default that result in claim payments (-)	Amount of loan principal reduced by terminations for default that lead to claim payments by the agency that result in neither a loan receivable nor the acquisition of property.
2264 Other adjustments, net (+ or -)	Amount of loan principal reduced or increased for reasons other than those covered by the lines listed above; outstanding principal balances of guaranteed loans transferred to or received from other accounts. When this line is used, the nature of the adjustment must be explained in a footnote.
2290 Outstanding, end of year	Amount of guaranteed loan principal outstanding at the end of the year. The sum of lines 2210 through 2264.

SECTION 85 -- FEDERAL CREDIT

Entry	Description
Memorandum: 2299 Guaranteed amount of guaranteed loans outstanding, end of year	Amount of maximum potential Federal liability for the guaranteed loan principal associated with line 2290. To the extent the guarantee covers both principal and interest, this amount must exclude interest. This entry is required even though the amount may be the same as in line 2290.
Addendum: Cumulative balance of defaulted guaranteed loans that results in loans receivable:	
2310 Outstanding, start of year	Amount of defaulted guaranteed loans that resulted in the acquisition of a loan receivable outstanding at the beginning of the year.
2331 Disbursements for guaranteed loan claims	Amount of disbursements for acquisition of defaulted loans that were previously guaranteed and result in loans receivable, where the borrower owes the account for the disbursement. These disbursements include past due interest amounts that were paid under the terms of the loan guarantee, if such amounts were capitalized as part of the loan principal.
2351 Repayments of loans receivable (-)	Proceeds received by the account from the settlement of claims on defaulted guaranteed loans that resulted in loans receivable to be applied to the reduction of the loans receivable outstanding. Exclude any premium realized.
2361 Write-offs of loans receivable (-)	Amount of loans receivable written-off for default that were initiated as guaranteed loans but were subsequently acquired as loans receivable. (Refer to the definitions for write-offs provided in OMB Circular No. A-129.)
2364 Other adjustments, net (+ or -)	Amount of loans receivable reduced or increased for reasons other than those covered by the lines listed above. When this line is used, the nature of the adjustment must be explained in a footnote.
2390 Outstanding, end of year	Amount of defaulted guaranteed loans that resulted in loans receivable outstanding at the end of the year. The sum of lines 2310 through 2364.
Net financing disbursements:	Provide line 6300 for guaranteed loan financing accounts only. See section 85.10(d).
6300 Net financing disbursements	Equals net financing disbursements reported on line 9000 of the program and financing schedule. Report PY-BY+7.

Note: Line 6300 does not print in the Appendix but is used by OMB for reporting and analytical purposes.

(d) *Agency debt held by the FFB and net financing disbursements (schedules Y, G, and H).*

Baseline data on ***debt owed to the FFB*** must be reported by all financing and liquidating accounts and by programs that are not covered by the FCRA, such as the Tennessee Valley Authority and Federal Deposit Insurance Corporation (which assumed the responsibilities of the Resolution Trust Corporation). Prior to enactment of the Gramm-Rudman-Hollings Act, when the FFB was off-budget, it had three types of

transactions. With the enactment of the Gramm-Rudman-Hollings law, the distinctions disappeared for budgetary purposes. Now, all FFB transactions are treated as means of financing to the agencies. In order to track old and new transactions, the lines should be coded with a two-digit suffix as follows, to identify the transactions:

- .01 FFB loan originations.
- .02 Sale of loan assets to the FFB.
- .03 Sale of debt securities to the FFB.

Report this data on the 3300 data line series in schedule Y (PY through BY+4). No policy estimates are required.

Baseline and policy data on *net financing disbursements* must be reported. “Net financing disbursements” correspond to “net outlays” reported on line 9000 in schedule P of the program account. Rather than total outlays (gross) less total offsetting collections, net financing disbursements consist of total financing disbursements (gross) less total offsetting collections in the financing account. Net financing disbursements are calculated by subtracting total cash inflows to the financing account from total cash outflows from the financing account. Cash inflows include subsidy and reestimate collections from the program account, borrower principal and interest payments, recoveries, fees, interest received from Treasury, and other inflows. Cash outflows include loan disbursements, default claim payments, negative subsidy and downward reestimate payments to the receipt account, interest paid to Treasury, and other outflows. In PY through BY, these amounts should equal the amount reported on line 9000 in schedule P of the financing account. These data are needed to estimate Federal borrowing and interest on the public debt.

Report this data on line 6300 of schedule G or H (PY through BY+9) for policy estimates and schedule Y for baseline estimates. Schedule Y only collects baseline net financing disbursement data for financing accounts.

DATA REQUIREMENTS FOR SCHEDULE Y

Entry	Description
Agency debt held by the FFB	Provide lines 3310-3390 for liquidating and direct and guaranteed loan financing accounts.
3310 Outstanding agency debt, start of year	Amount of agency debt issues held by FFB at the beginning of the year.
3330 New agency borrowing	Amount of new borrowing from FFB.
3350 Repayments and prepayments (-)	Amount of repayments made to FFB.
3390 Outstanding agency debt, end of year	Amount of agency debt issued held by FFB at the end of the year. The sum of lines 3310 through 3350.
Net financing disbursements:	Provide line 6300 for direct and guaranteed loan financing accounts only. Report CY-BY+9.
6300 Net financing disbursements	Analogous to net outlays in budgetary accounts reported on line 9000 of the program and financing schedule.

Note: Lines 3310-6300 do not print in the Appendix but are used by OMB for reporting and analytical purposes.

85.11 What do I report for liquidating accounts?

Reporting requirements for liquidating accounts are discussed in sections 85.8, 85.10(b), 85.10(c), and 85.10(d). Illustrations of typical liquidating account status of direct and guaranteed loans schedules can be found at exhibits 85J and 85K. An illustration of a typical liquidating account program and financing schedule can be found at exhibit 85I.

85.12 What do I report for receipt accounts?

Negative subsidy receipt accounts record receipts of amounts paid from the financing account when there is a negative subsidy or downward reestimate. Usually, they are general fund receipt accounts, but with the permission of the OMB representative for the account, they can be special fund receipt accounts. If the program is discretionary, report negative subsidies as “discretionary.” If the program is mandatory, report negative subsidies as “mandatory.” Report downward reestimates for all credit programs as “mandatory, authorizing committee” in schedules R and K (see section 81.3).

359000	Outlays from new authority	129	129	129

Shaded entries are automatically calculated by MAX.

To insert reestimate budget authority lines (1350xx and 1370xx for direct loans, 2350xx and 2370xx for loan guarantees), select the line number from the edit/insert menu that corresponds to the risk category listed on lines 1150xx and 2150xx. For example, to insert line 2350xx for risk category E, select line number 235004. The corresponding reestimate outlay lines (1360xx and 1380xx for direct loans, 2360xx and 2380xx for loan guarantees) will be automatically generated.

For negative subsidy risk categories, report lines 2320xx through 2340xx as negative amounts.

Direct Loan Financing Account
Program and Financing Schedule (Schedule P)

Net value of assets related to post-1991 direct loans receivable:					
1401	Direct loans receivables, gross	83	60	93	96
1402	Interest receivable	3	2	3	3
1405	Allowance for subsidy cost (-)	-7	-5	-7	-8
1499	Net present value of assets related to direct loans	79	57	89	91
1404	Net value of assets related to post-1991 acquired defaulted guaranteed loans receivable:				
	Foreclosed property	9			
1999	Total assets	160	284	232	226
LIABILITIES					
Federal liabilities:					
2103	Debt payable to Treasury	160	284	232	226
2999	Total liabilities	160	284	232	226
NET POSITION					
3300	Cumulative results of operations.....				
3999	Total net position.....				
4999	Total liabilities and net position	160	284	232	226

Line 1101 equals obligated and unobligated balances.

Shaded entries are automatically calculated by MAX.

Line 1106 includes only undisbursed upward reestimates and interest on such reestimates. Do not report amounts for CY or BY. Do not include undisbursed subsidy from the program account even if it has been obligated.

See section 86.2 for detailed information about balance sheets.

The financing account is designed to break even and thus have a zero results of operation.

Include undisbursed downward reestimates and interest on such reestimates on line 2101.

- Ex-86C Budget Year Appropriations Request in Thousands of Dollars (MAX Schedule T)

Summary of Changes

Drops the requirement for schedule Z, related to budget execution information (old section 86.5).

86.1 What do I need to know about the personnel summary (schedule Q)?

This Appendix schedule shows the total full-time equivalent (FTE) employment of straight-time compensable workyears (i.e., not overtime) financed by an account for PY through BY. FTE employment includes straight-time hours for ceiling exempt employees and excludes estimates for terminal leave, overtime and holiday hours. The method for calculating workyears is described in section 32.3. You must provide a personnel summary when an account contains an entry for personnel compensation in the object class schedule (i.e., object class entry 11.1 or 11.3 (see section 83.7)). For allocation accounts, the receiving agency must provide a personnel summary, reporting the FTEs, but the parent agency will report the obligation.

When an agency hires another agency to perform work, the hiring agency reports no FTEs and shows the obligations in a non-employment object class. The performing agency hired to do the work reports both the FTEs and funding on a reimbursable basis.

The definition of object class 11.1 (see section 83.7) stipulates that compensation must be included for all workdays in the fiscal year. You must ensure that FTE levels in the personnel summary and funding for FTEs in the object class schedule are reported consistently. See Appendix D for a description of the edit checks that compare these schedules. See also Appendix E, exhibit E3, for a diagnostic report that compares FTE levels and funding for FTEs.

SECTION 86 – OTHER MAX DATA

You must also ensure that agency-wide FTE totals agree with the “approved” levels in the current and budget years. Prior year FTEs in the personnel summary must equal the year-end FTE usage that your agency reported on the SF 113-G to the Office of Personnel Management (OPM). See Appendix E, exhibit E2 for a diagnostic report that compares agency-wide “approved” FTE levels with FTE levels in the personnel summary. See section 32.3 for policies related to FTE levels.

Use the four-digit line numbering scheme described in the following table to code entries in MAX schedule Q.

PERSONNEL SUMMARY

Entry	Description
Xxxx	The first digit of the line number distinguishes between direct, reimbursable, and other categories, consistent with the reporting of data in the object classification schedule (see section 83.4). Use the following codes: 1—direct 2—reimbursable 3—allocation account 6—limitation account-direct 7—limitation account-reimbursable
xXxx	The second digit of the line number distinguishes between civilian and military personnel. Use the following codes: 0—civilian personnel 1—military personnel
xx0x	The third digit is always 0.
xxx1	The fourth digit is always 1.

86.2 What do I need to know about financial statements (schedules E and F)?

(a) General instructions.

Financial statements consist of the following information:

- Statement of operations (MAX schedule E), which covers PY-1 through BY.
- Balance sheet (MAX schedule F), which covers PY-1 through BY.

You must submit financial statements for:

- All Government-sponsored enterprise funds;
- Credit liquidating and financing accounts, except statements of operation which are not required for credit financing accounts; and
- When specifically required by OMB, revolving funds (including trust revolving funds) that conduct business-like activities with the public and intragovernmental revolving funds.

For budget presentation purposes, data in program and financing schedules (MAX schedule P) fulfill the legal requirement in 31 U.S.C. 9103 for "business-type budget" information on wholly-owned Government corporations in the President's budget.

Amounts in schedules E and F for PY-1 should be consistent with your agency's audited financial statements.

You must submit separate schedules for supplemental requests and proposed legislation items that show the effect of the supplemental request or proposed legislation on the information presented in the regular schedules for the account.

(b) *Statement of operations (schedule E).*

This Appendix schedule provides information on the net income (or loss) of programs and on the total revenue, expense, and income or loss for the account as a whole. Do not provide statements of operations for credit financing accounts. Report amounts based on accrual accounting standards.

Statements of operation are also used to report comprehensive income. Generally this applies only to Government-sponsored enterprises (GSE's). *Comprehensive income* is the change in equity (assets less liabilities) during a period except that amount which results from investments by owners and distributions to owners. It is the sum of net income and other comprehensive income. *Other comprehensive income* consists of revenues, expenses, gains and losses that under generally accepted accounting principles are included in comprehensive income but excluded from net income. It should be divided among major components, if material.

Prepare statements of operations in the format of exhibit 86A, with audited actual amounts for PY-1, actual amounts for PY, and estimates for CY and BY. When an enterprise is engaged in two or more significant programs, report the revenue, expense, and net income or loss for each program separately. Use a two-digit group code to group data by program, as described in the MAX User's Guide.

Use the four-digit line numbering scheme described in the following table to code the entries in MAX schedule E. MAX will automatically generate the total and subtotal entries.

STATEMENT OF OPERATIONS

Entry	Description
01xx	The first digit will always be "0" and the second digit will always be "1".
01Xx	Use the third digit with values of 0 through 8 to identify different programs. When you are presenting two or more programs, a subtotal is required and will take on the value of 9.
01xX	Use the fourth digit to indicate whether the data represent revenue, expense, or net income or loss: 1—Revenue 2—Expense (<i>Note: Enter expense as a negative (-) amount</i>) 5—Net income or loss <i>Use the following only if you have comprehensive income to report:</i> 8—Other comprehensive income 9—Total comprehensive income

SECTION 86 -- OTHER MAX DATA

(c) Balance sheet (schedule F).

This Appendix schedule provides information on program assets, liabilities, and net position and is used to assess the resources available for Federal programs.

Prepare balance sheets in the format of exhibit 86B, with audited actual amounts as of the close of PY-1, actual amounts as of the close of PY, and estimates as of the close of CY and BY.

Use the entries listed below to prepare the balance sheets. These entries correspond to entries used in OMB Bulletin No. 97-01 entitled, Form and Content of Agency Financial Statements, as amended, which instructs agencies to prepare financial statements at the entity level. Use the terms, definitions, and instructions provided in that bulletin to prepare the balance sheets at the account level. The following table bridges from Standard General Ledger (SGL) accounts to the MAX line entry. MAX will automatically generate the line entries indicated in **boldface**.

If your agency is a Government-sponsored enterprise (GSE), you will need to modify line entries to reflect the non-Federal status of GSE's. Consult your OMB representative for additional guidance.

BALANCE SHEET

Entry		Description
ASSETS		
<i>Federal assets:</i>		
These assets arise from transactions among Federal agencies. Federal agency assets are claims of a Federal agency against other Federal agencies which, when collected, can be used in the agency's operations.		
1101	Fund balances with Treasury	The unobligated and obligated balances with Treasury for which you are authorized to make expenditures and pay liabilities, including clearing account balances and the dollar equivalent of foreign currency account balances. Your agency's fund balance with Treasury also includes the unobligated balances in guaranteed loan financing accounts, the obligated balances in direct loan financing accounts, and the unobligated and obligated balances in liquidating accounts.
	<i>Investments in Federal securities:</i>	Total investments in Federal securities. These consist of securities issued by Federal agencies including non-marketable par value Treasury securities, market-based Treasury securities, marketable Treasury securities, and securities issued by other Federal agencies.
1102	Treasury securities, net	Net value of Treasury securities acquired (i.e., the par (face or nominal) value of a security minus the amount of any unamortized discounts or plus the amount of any unamortized premiums).
1104	Agency securities, net	Net value of agency securities acquired (i.e., the par (face or nominal) value of a security minus the amount of any unamortized discounts or plus the amount of any unamortized premiums).

Entry	Description
1106 Receivables, net	Accounts receivable and interest receivable, net of uncollectible amounts. Interest receivable is the amount of interest income earned but not received for an accounting period. Report receivables from Federal agencies separately from receivables from non-Federal entities (on line 1206). Report interest receivable related to direct loans and acquired defaulted guaranteed loans separately below as a component of credit program receivables.
1107 Advances and prepayments	Advances are cash outlays made by a Federal agency to cover a part or all of the recipients' anticipated expenses or advance payments for the costs of goods and services the agency is to receive. Prepayments are payments made by a Federal agency to cover certain period expenses before those expenses are incurred. Advances and prepayments made to Federal agencies are intragovernmental and are accounted for and reported separately from those made to non-Federal entities.
<i>Non-Federal assets:</i>	
These assets arise from transactions of the Federal Government with non-Federal entities. These entities include domestic and foreign persons and organizations outside the U.S. Government.	
1201 Investments in non-Federal securities, net	Securities issued by State and local governments, private corporations, and government-sponsored enterprises, net of premiums, discounts and allowances for losses. Securities are normally reported at acquisition cost or amortized acquisition cost. However, you should use market value when there is: <ul style="list-style-type: none"> • An intent to sell the securities prior to maturity; and • A reduction in the value of the securities that is more than temporary.
1206 Receivables, net	Accounts and interest receivable due from non-Federal entities, net of an allowance for estimated uncollectible amounts. Do not recognize interest as revenue on accounts receivable or investments that are determined to be uncollectible unless the interest is actually collected. Report interest receivable related to direct loans and acquired defaulted guaranteed loans as a component of credit program receivables.
1207 Advances and prepayments	Advances are cash outlays made by a Federal agency to its employees, contractors, grantees or others to cover a part or all of the recipients' anticipated expenses or advance payments for the costs of goods and services the agency receives. Prepayments are payments made by a Federal agency to cover certain periodic expenses before those expenses are incurred.
<i>Credit program receivables and related foreclosed property:</i>	
These items represent the net value of assets related to pre-1992 and post-1991 direct loans receivable and acquired defaulted guaranteed loans receivable.	

SECTION 86 -- OTHER MAX DATA

Entry		Description
<i>Net value of assets related to post-1991 direct loans receivable:</i>		
1401	Direct loans receivable, gross	The face value of all direct loans outstanding excluding amounts repaid or written off.
1402	Interest receivable	Amount of interest receivable.
1403	Accounts receivable from foreclosed property	Amount of accounts receivable related to foreclosed property.
1404	Foreclosed property	Value of foreclosed property associated with post-1991 direct and acquired defaulted guaranteed loans at the net present value of the projected cash flows associated with the property. To practicably accomplish this requirement, you may record foreclosed property at the estimated net realizable value at the time of foreclosure. A portion of the related allowance for subsidy account will apply to the foreclosed property, but that amount need not be separately determined. Rather, subtract the allowance account from the sum of the credit program assets to determine the net present value of the assets.
1405	Allowance for subsidy cost (-)	The unamortized amount of subsidy expenses for the direct loan disbursements that the direct loan financing account has made in that year and all previous years, for all direct loans outstanding. (The allowance for subsidy costs of a direct loan is the present value of estimated cash outflows over the life of the loan minus the present value of estimated cash inflows. It is due to defaults, delinquencies, lending at interest rates below the Treasury borrowing rate, etc., with an offset for fees, penalties, and recoveries.)
1499	Net present value of assets related to direct loans	The sum of lines 1401 through 1405.
<i>Net value of assets related to post-1991 acquired defaulted guaranteed loans receivable:</i>		
1501	Defaulted guaranteed loans receivable, gross	Amount of defaulted guaranteed loans that resulted in the acquisition of a loan receivable that is still outstanding.
1502	Interest receivable on defaulted guaranteed loans	Amount of interest receivable related to defaulted guaranteed loans.
1504	Foreclosed property related to defaulted guaranteed loans	The estimated net realizable value of related foreclosed property.
1505	Allowance for subsidy cost on defaulted guaranteed loans (-)	The unamortized amount of subsidy for those defaulted guaranteed loans that the guaranteed loan financing account has acquired in that year and all previous years, for all such loans outstanding that are still held by the financing account. (The

Entry		Description
		subsidy of a defaulted guaranteed loan is the present value of estimated cash outflows over the life of the loan minus the present value of estimated cash inflows. It is due to defaults, delinquencies, interest subsidies, etc., with an offset for fees, penalties, and recoveries.)
1599	Net present value of assets related to defaulted guaranteed loans	The sum of lines 1501 through 1505.
<i>Net value of assets related to pre-1992 direct loans receivable and acquired defaulted guaranteed loans receivable:</i>		
1601	Direct loans, gross	For each pre-1992 direct loan program, report loans gross.
1602	Interest receivable	Amount of interest receivable.
1603	Allowance for estimated uncollectible loans and interest (-)	Estimated amount of loans and interest that will not be collected.
1604	Direct loans and interest receivable, net	The sum of lines 1601 through 1603.
1605	Accounts receivable from foreclosed property	Amount of accounts receivable related to foreclosed property.
1606	Foreclosed property	The estimated net realizable value of related foreclosed property.
1699	Value of assets related to direct loans	The sum of lines 1604 through 1606.
1701	Defaulted guaranteed loans, gross	For each pre-1992 loan guarantee program, report receivables as defaulted guaranteed loans acquired by the Government.
1702	Interest receivable	Amount of interest receivable related to defaulted guaranteed loans.
1703	Allowance for estimated uncollectible loans and interest (-)	Estimated amount of defaults on loans, interest, and accounts receivable.
1704	Defaulted guaranteed loans and interest receivable, net	The gross amount of defaulted guaranteed loans that resulted in the acquisition of a loan receivable, and interest receivable, net of an allowance for uncollectible amounts. The sum of lines 1701 through 1703.
1705	Accounts receivable from foreclosed property	Amount of accounts receivable related to foreclosed property.
1706	Foreclosed property	The estimated net realizable value of related foreclosed property.
1799	Value of assets related to loan guarantees	The sum of lines 1704 through 1706.

SECTION 86 -- OTHER MAX DATA

Entry	Description
<i>Other Federal assets:</i>	
1801 Cash and other monetary assets	<p>The total of all cash resources and all other monetary assets. Cash consists of:</p> <ul style="list-style-type: none"> • Coins, paper currency, and readily negotiable instruments, such as money orders, checks, and bank drafts on hand or in transit for deposit; • Amounts on demand deposit with banks or other financial institutions; • Cash held in imprest funds; and • Foreign currencies, which, for accounting purposes, should be translated into U.S. dollars at the exchange rate on the financial statement date. <p>Other monetary assets include gold, special drawing rights, and U.S. Reserves in the International Monetary Fund. This category is principally for use by the Treasury.</p>
1802 Inventories and related properties	<p>Inventory is tangible personal property that is:</p> <ul style="list-style-type: none"> • Held for sale; • In the process of production for sale; or • To be consumed in the production of goods for sale or in the provision of services for a fee. It includes inventory (i.e., items held for sale), operating materials and supplies, stockpile materials, seized and forfeited property, and goods held under price support and stabilization programs.
1803 Property, plant and equipment, net	<p>The amount of real and personal property (i.e., land, structures and facilities, construction in progress, purchased and self-developed software, equipment and related improvements) that has been capitalized, net of accumulated depreciation if any. Also includes assets acquired by capital leases and leasehold improvements; and property owned by the agency in the hands of the agency or contractors.</p>
1901 Other assets	Other assets not included on the lines above.
1999 Total assets	The sum of lines 1101 through 1207, 1499, 1599, 1699, 1799, 1801 through 1901.

LIABILITIES

Recognize liabilities when they are incurred regardless of whether they are covered by available budgetary resources. This includes liabilities related to canceled appropriations.

Federal liabilities:

These liabilities arise from transactions among Federal agencies. Federal liabilities are claims against the agency by other Federal agencies.

Entry		Description
2101	Accounts payable	The amounts owed by a Federal agency for goods and services received from, progress in contract performance made by, and rents due to other Federal agencies.
2102	Interest payable	The amount of interest expense incurred but unpaid on debts to other Federal agencies.
2103	Debt	The cumulative amounts of borrowing (less repayments) from the Treasury, the Federal Financing Bank, or other Federal agencies.
2104	Resources payable to Treasury	Amounts of collections or receivables that must be transferred to Treasury.
2105	Other	Use this item for other liabilities that are not recognized in specific categories or lines above. Include advances and prepayments received from other Federal agencies for goods to be delivered or services to be performed and deposit fund amounts held in escrow.
<i>Non-Federal liabilities:</i> These liabilities arise from transactions of an agency of the Federal Government with non-Federal entities. Non-Federal liabilities are claims against the agency by non-Federal entities.		
2201	Accounts payable	The amounts owed by a Federal agency for goods and services received from, progress in contract performance made by, and rents due to non-Federal entities.
2202	Interest payable	The amount of interest expense incurred but unpaid on debt owed to non-Federal entities.
2203	Debt	Debt issued to non-Federal entities under general or special financing authority (e.g., Treasury bills, notes, bonds and FHA debentures).
2204	Liabilities for loan guarantees	For guaranteed loan financing accounts, report the net present value of the estimated cash flows to be paid as a result of loan guarantees. For liquidating accounts, report the amount of known and estimated losses. (The net present value of estimated cash flows is the present value of estimated cash outflows over the life of the loan guarantee minus the present value of estimated cash inflows. It is due to defaults, interest subsidies, etc., with an offset for fees, penalties, and recoveries.)
2205	Lease liabilities, net	The present value of the liability for capital leases. A capital lease is one that transfers substantially all the benefits and risks inherent in the ownership of property. This transfer occurs if, at the inception of the lease, one or more of the following criteria exist: <ul style="list-style-type: none"> • Ownership of the property is transferred to the lessee by the end of the lease term; • The lease contains a bargain purchase option; • The lease term is substantially (i.e., 75% or more) equal to the estimated useful life of the leased property; or

SECTION 86 -- OTHER MAX DATA

Entry	Description
	<ul style="list-style-type: none"> At the beginning of the lease term, the present value of the minimum lease payments, with certain adjustments, is 90% or more of the fair value of the property. <p>The lessee accounts for such a lease as the acquisition of an asset and the incurrence of a liability.</p>
2206 Pension and other actuarial liabilities	For agency-administered pension, health insurance and similar plans requiring actuarial determinations. Report the actuarial accrued liability for pension, health insurance, and similar plans requiring actuarial determination using the aggregate entry age normal method.
2207 Other	<p>Other liabilities that are not recognized in specific categories. Include in this line the total amount due non-Federal entities for other liabilities that are not included on other lines above. This includes:</p> <ul style="list-style-type: none"> Entitlement benefits due and payable at the end of the year; Advances and prepayments received from other non-Federal agencies or the public for goods to be delivered or services to be performed; Deposit fund amounts held in escrow, estimated losses for commitments, and contingencies if: <ul style="list-style-type: none"> Information available before the statements are issued indicates an asset probably has been impaired or a liability incurred as of the date of the statements; and The amount can be reasonably estimated as a specific amount or range of amounts (e.g., the amount of employee accrued annual leave (i.e., earned but not used) that would be funded and paid from future years' appropriations). <p>Examples of commitments and contingencies for which you should report the estimated losses on this line are:</p> <ul style="list-style-type: none"> Insurance —Insurance payments due for losses resulting from bank failures, crop failures, floods, expropriations, loss of life, and similar unplanned events. Indemnity agreements —reimbursements due to licensees or contractors for losses incurred in support of Government activities. Adjudicated claims —claims against the Government that are in the process of judicial proceedings. Commitments to international institutions —payments due to international financial institutions.
2999 Total liabilities	The sum of lines 2101 through 2207.

NET POSITION

The components of net position are classified as follows:

Entry		Description
3100	Unexpended appropriations	The portion of the agency's appropriations represented by undelivered orders and unobligated balances.
3300	Cumulative results of operations	The net results of operations since inception plus the cumulative amount of prior period adjustments, including the cumulative amount of donations and transfers of assets in and out without reimbursement.
3999	Total net position	The sum of lines 3100 through 3300.
4999	Total liabilities and net position	The sum of lines 2999 and 3999.

86.3 What do I need to know about budget plans (schedule D)?

Only DoD-Military submits a special schedule on obligations for PY through BY.

Use the entries in the following table to prepare MAX schedule D. MAX will automatically generate the line entries indicated in **boldface**.

BUDGET PLAN

Entry		Description
<i>Direct program:</i> 06xx, 07xx [List individual activities for which data are reported.]		Amount of obligations incurred or estimated to be incurred from an appropriation, regardless of the timing of the obligations, for direct program activities. (In other words, for a multi-year appropriation, report total obligations to be incurred during the entire period of availability in the year in which the appropriation is enacted.)
		For the third and fourth digits, use the values of 01 through 89 to identify direct program activities in the budget plan.
xx91	Subtotal, direct	Use the value 91 for subtotals of direct program activities, as follows: 0691—subtotal for activities coded 0601 through 0689. 0791—subtotal for activities coded 0701 through 0789. Subtotals are required only if there are multiple entries within the subgroupings listed above.
0801	Reimbursable program	Amount of obligations incurred or estimated to be incurred from an appropriation, as defined above, for reimbursable activities. Report data on reimbursable programs as a single entry.
0893	Total budget plan	Total obligations reported in the budget plan.

86.4 What do I need to know about reporting budget year appropriations requests in thousands of dollars (schedule T)?

Use MAX schedule T to report, in thousands of dollars, the net amount of budget year budgetary resources contained in the appropriations language request for your account (see exhibit 86C). If your account has

SECTION 86 – OTHER MAX DATA

appropriations language requesting new spending authority for the budget year (e.g., accounts that report discretionary appropriations, discretionary limitations on expenses, and appropriated entitlements), you must complete schedule T only for amounts reported in the regular budget schedule under transmittal code 0 (see section 79.2). Do not report limitations on direct loans and loan guarantees; they are not budgetary resources.

For the majority of budget accounts, only a single entry is required. For consolidated and merged accounts, use separate line entries to report the budget year appropriation request for each component account. Identify all line entries with the account involved using the six-digit basic account symbol assigned by the Treasury Department (see exhibit 86C). This code is required in order to enter data on the budget year request.

Exclude amounts that will be applied to repay debt, liquidate contract authority, or liquidate deficiencies from the amounts reported. For transfers specified in appropriations language, report amounts on a pre-transfer basis. Do not include advance appropriations that will become available in the budget year and advance appropriations requested in the budget year for a future fiscal year in the amounts reported. For indefinite appropriations, enter your best estimate. Ensure that all amounts reported in MAX schedule T are consistent with the amounts reported in the program and financing schedule (MAX schedule P).

86.5 What do I need to know about the schedule on the status of funds (schedule J)?

This Appendix schedule presents cash flow data for certain special, trust, and other funds. The MAX database generates the data for the status of funds schedule from other data and stores it in the database as schedule J.

The accounts listed in the following table require a schedule J.

FUNDS REQUIRED TO SUBMIT STATUS OF FUNDS DATA

Agency	Account
Energy	Nuclear waste disposal fund
HHS	Federal hospital insurance trust fund Federal supplementary medical insurance trust fund
Interior	Abandoned mine reclamation fund
Labor	Unemployment trust fund Black lung disability trust fund
State	Foreign service retirement and disability fund
Transportation	Highway trust fund Airport and airways trust fund Oil spill liability trust fund
Veterans Affairs	National service life insurance fund United States Government life insurance fund
DOD-Civil	Military retirement fund Education benefits fund
EPA	Hazardous substance superfund Leaking underground storage tank trust fund

Agency	Account
IAP	Overseas Private Investment Corporation (noncredit)
OPM	Civil service retirement and disability fund Employees health benefits fund
SSA	Federal old-age and survivors insurance trust fund Federal disability insurance trust fund
RRB	Rail industry pension fund Supplemental annuity pension fund Railroad social security equivalent benefit fund

MAX generates schedule J from:

- Data you enter in other MAX schedules for the receipt and expenditure accounts that make up the fund;
- Data you entered in reports to the Treasury that Treasury used to publish the Treasury Annual Report;
- Data on uninvested balances and unrealized discounts that you enter directly into schedule J;
- For selected accounts, data on outstanding debt to Treasury and commitments against unexpended balances that you enter directly into schedule J; and
- With OMB approval, subaccount detail for cash income and cash outgo that you enter directly into schedule J.

The budget includes only *one* schedule J for each of the specified funds. The schedule covers all the collections in the receipt accounts and all the appropriations of those receipts to the various expenditure accounts that make up the fund. It aggregates all the data reported under different transmittal codes to a single schedule presented under transmittal code 0. The CY and BY columns of schedule J include any effects of supplemental requests (transmittal code 1), rescission proposals (transmittal code 5) and proposed legislation (transmittal codes 2, 3, and 4).

When you make changes to other MAX schedules that affect the fund (for example, you change receipt estimates in schedule R), you will see the effect on MAX schedule J *the following day*, after the MAX system incorporates the changes as part of the overnight production process.

The following table identifies the source for each line in MAX schedule J. Even though much of the data is automatically generated and you cannot change amounts, you can change the line titles of the detail lines (1200-5589 and 7625-7650) through MAX A-11 data entry.

SCHEDULE ON THE STATUS OF FUNDS

Entry	Description and Source
<i>Unexpended balance, start of year:</i>	Start of year balances of budgetary resources and investments in Federal securities, net of amounts borrowed from the Treasury.
0100 Uninvested balance	MAX derives the PY amount from the <i>Undisbursed Funds</i> at the start of the year reported in the Treasury Annual Report, and the uninvested unappropriated receipts recorded at Treasury. MAX copies CY and BY amounts from the end of year amounts reported on line 8700 for the previous year.
0101 Federal securities: Par value	MAX derives the PY amount from the balance of <i>Investments in Public Debt Securities</i> and <i>Investments in Agency Securities</i> at the start of the year reported in the Treasury Annual Report, and copies CY and BY amounts from line 9201 in MAX schedule P.
0102 Unrealized discounts (-)	MAX derives the PY amount from the balance of <i>unrealized discount on investments</i> (-) and the <i>unamortized premium and discount</i> (+/-) at the start of the year reported in the Treasury Annual Report, and copies CY and BY amounts from the end of year amounts reported on line 8702 for the previous year.
0105 Outstanding debt to Treasury (-)	MAX derives the PY amount from the end of year amount reported on line 8705 in the previous year's <i>Budget Appendix</i> , and copies CY and BY amounts from the end of year amounts reported on line 8705 for the previous year.
0199 Total balance, start of year	Except for the Highway and Airport and Airway Trust Funds, MAX calculates this amount as the sum of: <ul style="list-style-type: none"> • Unobligated balances in schedule P (lines 2140); • Obligated balances in schedule P (lines 7240); and • Unavailable collections in schedule N (line 0199).
	The amount on this line should equal the sum of lines 0100 through 0105. If it does not, you will receive an error message.
<i>Cash income during the year:</i>	Collections deposited in special and trust fund receipt accounts and offsetting collections (cash) credited to expenditure accounts. MAX presents current law amounts (transmittal codes 0 and 3) separately from proposed legislation amounts (transmittal codes 1, 2, 4, and 5). You can change the titles of the detail lines to better describe the nature of the collections.
<i>Current law:</i>	
1200-1219 Receipts 1220-1239 Offsetting receipts (proprietary) 1240-1259 Offsetting receipts (intragovernmental)	Unless you have made other arrangements with OMB, MAX copies the detail lines from amounts reported in schedule R under transmittal codes 0 and 3. MAX lists each receipt account separately by title.
1260-1279 Offsetting governmental receipts	MAX will use a line serial number of 01 for lines that are automatically generated. Subaccount lines that are manually entered will have separate line serial numbers for each subaccount,

Entry	Description and Source
	as described in the MAX A-11 User's Guide.
1280-1289 Offsetting collections	MAX copies these amounts from amounts reported in schedule P under transmittal codes 0 and 3 on lines 8800 - 8845.
1299 Income under present law	Subtotal for income under present law. MAX calculates this amount as the sum of the receipts and collections reported in schedules R and P for transmittal codes 0 and 3.
<i>Proposed legislation:</i>	MAX uses line serial numbers in the range 01-05 to identify different transmittal codes, as described in the MAX User's Guide.
2200-2219 Receipts	MAX copies the detail lines from amounts reported in schedule R under transmittal codes 1, 2, 4, and 5. Each receipt account will be listed separately by title.
2220-2239 Offsetting receipts (proprietary)	
2240-2259 Offsetting receipts (intragovernmental)	
2260-2279 Offsetting governmental receipts	
2280-2289 Offsetting collections	MAX copies these amounts from amounts reported in schedule P under transmittal codes 1, 2, 4, and 5 on lines 8800 - 8845.
2299 Income under proposed legislation	Subtotal for income under proposed legislation. MAX calculates this amount as the sum of the receipts and collections reported in schedules R and P for transmittal codes 1, 2, 4, and 5.
3299 Total cash income	MAX calculates this amount as the sum of the receipts and collections reported in schedules R and P for all transmittal codes.
<i>Cash outgo during the year (-):</i>	These entries present the gross outlays from the fund, identified by the nature of the transaction, the activity for which the money was outlaid or, as appropriate, the recipient. MAX presents current law amounts (transmittal codes 0 and 3) separately from proposed legislation amounts (transmittal codes 1, 2, 4, and 5). You can change the titles of the detail lines to better describe the nature of the outlays.
<i>Current law:</i>	Unless you have made other arrangements with OMB, MAX automatically generates the detail lines from amounts reported in schedule P on line 7320 for transmittal codes 0 and 3.
4500 - 4589	MAX will use a line serial number of 01 for lines that are automatically generated. Subaccount lines that are manually entered will have separate line serial numbers for each subaccount, as described in the MAX A-11 User's Guide.
4599 Outgo under current law	Subtotal for gross outlays under present law. MAX calculates this amount as the sum of the gross outlays reported in schedule P on lines 7320 for transmittal codes 0 and 3.
<i>Proposed legislation:</i>	MAX automatically generates the detail lines from amounts reported in schedule P on line 7320 for transmittal codes 1, 2, 4,

SECTION 86 -- OTHER MAX DATA

Entry		Description and Source
5500-5589		and 5. MAX uses line serial numbers in the range 01-05 to identify different transmittal codes, as described in the MAX User's Guide.
5599	Outgo under proposed legislation	Subtotal for gross outlays under proposed legislation. MAX calculates this amount as the sum of the gross outlays reported in schedule P on lines 7320 for transmittal codes 1, 2, 4, and 5.
6599	Total cash outgo	MAX calculates this amount as the sum of the gross outlays reported in schedule P for all transmittal codes. The amount on this line should equal the sum of lines 4500-4589 and 5550-5589. If it does not, you will receive an error message.
Adjustments:		
7625	Permanently canceled balances	Amount that is transferred from the expenditure account to the general fund of the Treasury as a result of a specific provision of law. Notify your OMB representative if amounts should be reported on this line; OMB will enter these data centrally.
7645	Transfers, net	Net amount of transfers of budget authority and balances (obligated and unobligated). MAX generates this amount from the transfers reported in schedule P on lines 2221, 2222, 4100, 4200, 6100, 6200, 7331, 7332.
7650	Other adjustments, net	Other adjustments that affect the fund balances, such as capital transfers to the general fund of the Treasury and repayment of debt. MAX generates this amount from the amounts reported in schedule P on lines 2240, 2260, 4047, 4050, 6047, 6827, 6847, 6927, and 6947.
7699	Total adjustments	MAX calculates this amount as the sum of amounts on lines 7625 - 7650.
Unexpended balance, end of year:		
8700	Uninvested balance	End of year balances of budgetary resources and investments in Federal securities. MAX derives the PY amount from the <i>Undisbursed Funds</i> at the end of the year reported in the Treasury Annual Report and the uninvested unappropriated receipts recorded at Treasury. You must input the CY and BY amounts.
8701	Federal securities: Par value	MAX derives the PY amount from the <i>Investments in Public Debt Securities</i> and <i>Investments in Agency Securities</i> at the end of the year reported in the Treasury Annual Report; CY and BY amounts are copied from line 9202 in MAX schedule P.
8702	Unrealized discounts (-)	MAX derives the PY amount from the <i>unrealized discount on investments (-)</i> and the <i>unamortized premium and discount (+/-)</i> at the end of the year reported in the Treasury Annual Report; you must input CY and BY amounts.

Entry		Description and Source
8705	Outstanding debt to Treasury	You must input these amounts. This entry only applies to selected accounts.
8799	Total balance, end of year	<p>Except for the Highway and Airport and Airway Trust Funds, MAX calculates this amount as the sum of:</p> <ul style="list-style-type: none"> • Unobligated balances in schedule P (lines 2440); • Obligated balances in schedule P (lines 7440); and • Unavailable collections in schedule N (line 0799). <p>The amount on this line should equal the sum of lines 8700 through 8705. If it does not, you will receive an error message.</p>
<i>Commitments against unexpended balance, end of year:</i>		Use these lines only at the direction of OMB.
9801	Obligated balance (-)	You must input amounts on line 9801 and 9802. MAX calculates line 9899 as the sum of lines 9801 and 9802 and line 9900 as the sum of lines 8799 and 9899.
9802	Unobligated balance (-)	
9899	Total commitments (-)	
9900	Uncommitted balance, end of year	

86.6 What do I need to know about the schedule on unavailable collections (schedule N)?

This Appendix schedule provides information on collections and appropriations for special, trust, and certain other funds. The MAX database generates the data for the schedule on unavailable collections from other data and stores it in the database as schedule N.

The following types of accounts require schedule N:

- Special or non-revolving trust funds.
- Accounts with offsetting collections that are unavailable for obligation because of a limitation on obligations in PY, CY, or BY.

MAX generates schedule N from:

- Data reported in the previous year's *Budget Appendix*;
- Data in schedule R; and
- Data in schedule P.

The budget includes only *one* schedule N for each fund. The schedule covers all the receipts and offsetting receipts that pertain to a particular special or trust fund account. It aggregates all the data reported under different transmittal codes to a single schedule presented under transmittal code 0. The CY and BY columns of schedule N will include the effect of supplemental requests (transmittal code 1), rescission proposals (transmittal code 5) and proposed legislation (transmittal codes 2, 3, and 4).

SECTION 86 – OTHER MAX DATA

When requesting the establishment of new special or trust fund accounts (see section 71.3), please specify whether the MAX database should include a *new* schedule on unavailable collections or use an *existing* schedule on unavailable collections to report the transactions related to the new account.

When you make changes to other MAX schedules that affect the fund (for example, you change receipt estimates in schedule R), you will see the effect on MAX schedule N *the following day*, after the MAX system incorporates the changes as part of the overnight production process.

The following table identifies the source for each line in MAX schedule N. Even though the data are automatically generated and you cannot change any amounts, you can change the line titles of the detail lines (lines 02xx, 05xx) through A-11 data entry.

SCHEDULE ON UNAVAILABLE COLLECTIONS

Entry		Description
0199	Balance, start of year	<p>Includes:</p> <ul style="list-style-type: none">• Unappropriated special and trust fund receipts and offsetting receipts. (PY amount should equal the balance on the Department of Treasury's <i>Unappropriated Receipts Trial Balance</i>, FMS Form 6655, plus invested unappropriated receipts.)• Special and trust fund receipts and offsetting receipts that are precluded from obligation because of a provision of law, such as a benefit formula or limitation on obligations in PY, CY, or BY.• Offsetting collections that are unavailable for obligation because of limitations on obligations in PY, CY, or BY. <p>MAX derives the PY amount from the PY amount reported on line 0799 in the previous year's <i>Budget Appendix</i>. If you believe the PY amount is incorrect, provide your OMB representative with a detailed written explanation of the difference. MAX copies CY and BY amounts from the end of year amounts reported on line 0799 for the previous year.</p>
<i>Receipts:</i>		
0200-0219	Receipts	Amount of new collections deposited in special and trust fund receipt accounts. Each receipt account will be listed separately by title and transmittal code. MAX copies these amounts from schedule R.
0220-0239	Offsetting receipts (proprietary)	
0240-0259	Offsetting receipts (intragovernmental)	
0260-0279	Offsetting governmental receipts	
0280-0289	Offsetting collections	<p>Amount of new offsetting collections that are unavailable for obligation because of limitations. MAX copies this amount from schedule P (lines 6845 and 6945).</p> <p>MAX uses line serial numbers in the range 10-15 to identify different transmittal codes, as described in the MAX User's Guide.</p>
0299	Total receipts and collections	MAX calculates this amount as the sum of lines 0200 through 0289.

Entry	Description
0400 Total: Balances and collections	MAX calculates this amount as the sum of lines 0199 and 0299.
0500 - 0589 Appropriations (-)	<p>MAX calculates this amount from schedule P (the sum of amounts reported on lines 4020, 4026, 4028, 6020, 6026, 6028, 6045, 6826, and 6926). It excludes amounts precluded from obligation in a fiscal year because of provisions of law such as benefit formulas or limitations on obligations and includes amounts that become available for obligation from balances of receipts and offsetting collections that were previously unavailable.</p> <p>If more than one appropriation is made from the fund, each will be listed separately by title and transmittal code. MAX uses line serial numbers in the range 10-15 to identify different transmittal codes, as described in the MAX User's Guide.</p> <p><i>For accounts with contract authority that will be liquidated by trust fund receipts, contract authority will be deducted from the balances rather than the amounts appropriated to liquidate such contract authority.</i></p>
0599 Total appropriations (-)	MAX calculates this amount as the sum of lines 0500-0589.
0610 Unobligated balance returned to receipts	<p>Unobligated balance of special and trust fund appropriations expiring that are returned to the receipt account and are available for subsequent appropriation action.</p> <p>MAX calculates this amount from amounts reported in schedule P on lines 2398 and 7340.</p> <p>If amounts are transferred to the general fund of the Treasury and are <i>not</i> available for subsequent appropriation, notify your OMB representative so OMB can adjust the entry centrally.</p>
0620 Reduction pursuant to Public Law xxx-xxx	<p>Reductions in special and trust fund appropriations of receipts that are returned to the receipt account pursuant to the BEA or other law and are available for subsequent appropriation action.</p> <p>MAX calculates this amount from amounts reported in schedule P on lines xx35 and xx36, xx74-xx79, and xx85.</p> <p>If amounts are transferred to the general fund of the Treasury and are <i>not</i> available for subsequent appropriation, notify your OMB representative so OMB can adjust the entry centrally.</p> <p><i>For accounts with contract authority that will be liquidated by trust fund receipts, reductions in contract authority will increase balances.</i></p>
0799 Balance, end of year	MAX calculates this amount as the sum of lines 0199, 0299, 0599, 0610, and 0620.

86.7 What do I need to know about the schedule on the status of contract authority (schedule I)?

If you reported reporting contract authority in PY, CY, or BY in the program and financing schedule, MAX will automatically generate a schedule on the status of contract authority for your account. A single schedule under transmittal code zero will be used to reflect total amounts reported under separate transmittal codes.

MAX will derive the information required to produce the schedule on the status of contract authority from data in MAX schedule P, as part of the overnight production. *You should note that changes to schedule I resulting from changes to MAX schedule P will not appear on screen until the next day.* Only one line requires user input – portion applied from balances of excess liquidating cash. The automatically generated schedule will contain the following entries, as applicable, in the sequence shown.

SCHEDULE ON UNFUNDED CONTRACT AUTHORITY

Entry		Description
0100	Balance, start of year	Amount of contract authority for which appropriations to liquidate are not provided or requested at the beginning of the year. Equal to the sum of lines 2149 and 7501 of the program and financing schedule.
0200	Contract authority	Amount of contract authority provided for the period (generally in substantive law). This entry will be consistent with the entries on lines 49xx and 66xx of the program and financing schedule. Separate entries will be used, as appropriate, to report reductions pursuant to the BEA (Public Law 99-177, as amended), supplemental requests, and legislative proposals.
0210	Contract authority, supplemental request	
0220	Contract authority, legislative proposal	
0230	Reduction in contract authority pursuant to Public Law 99-177	
0299	Total contract authority	Sum of the contract authority entries on lines 0200-0230.
0300	Unfunded balance rescission proposal (-)	Amount of contract authority proposed for rescission. Derived from amounts on lines 4935, 4936, and 6635 of the program and financing schedule for the rescission proposal (transmittal code "5").
0340	Unobligated balance transferred	Amount of unobligated balances of contract authority transferred to or from other accounts. This entry will be consistent with amounts on line 2221 and 2222 of the program and financing schedule.
0350	Unfunded balance expiring (-)	Amount of definite contract authority, expiring or withdrawn, for which liquidating cash will not be required. This entry will be consistent with amounts on line 2230 of the program and financing schedule.
0360	Adjustments in expired accounts	Amount of upward or downward adjustments in obligations that were made in accounts that expired prior to the beginning of the fiscal year. This entry will be consistent with amounts on line 7340 of the program and financing schedule.

Entry		Description
0400	Appropriation to liquidate contract authority (-)	The appropriation provided or requested to liquidate contract authority, equal to the sum of lines 4049 and 6049 of the program and financing schedule.
0405	Portion applied from balances of surplus liquidating cash (-)	Amount of surplus liquidating cash provided in previous years used to liquidate obligations of contract authority. <i>User input required.</i>
0500	Offsetting collections applied to liquidate contract authority (-)	Amount of offsetting collections used to liquidate contract authority equal to line 6849 and 6949 of the program and financing schedule.
0600	Balance of contract authority withdrawn (-)	The withdrawal of balances of indefinite contract authority realized through downward adjustments of prior year obligations that have been withdrawn. Equal to the amounts on line 2275 of the program and financing schedule.
0700	Balance, end of year	Amount of contract authority for which appropriations to liquidate are not provided or requested at the end of year. Equal to the sum of lines 2449 and 7502 of the program and financing schedule. The end of year balance will equal the balance at the start of the succeeding fiscal year.
0705	Surplus liquidating cash, end of year (memo entry)	Amount of appropriation to liquidate contract authority in excess of ability to incur obligations (either because the appropriation exceeds the contract authority available for obligation or the limitation on obligations).

86.8 What do I need to know about the summary of budget authority and outlays?

If you have a regular account that has separate program and financing schedules for supplemental requests, legislative proposals, or rescission proposals, a summary will be printed in the Budget Appendix to report the totals for budget authority and outlays for PY through BY. MAX automatically generates the summary from data in schedule A. However, it is not a separate MAX schedule and cannot be viewed in the database.

The summary normally will contain the following entries, as applicable, in the sequence shown:

SUMMARY OF BUDGET AUTHORITY AND OUTLAYS

Entry		Description
Enacted/requested: Budget authority Outlays		Total amount of budget authority and outlays for all years shown in the regular program and financing schedule under transmittal code 0. Entries reflect, without separate identification, reductions pursuant to the BEA.
Proposed for later transmittal: Budget authority Outlays		Total amount of budget authority and outlays for all years shown in a separate program and financing schedule under transmittal codes 2, 3, or 4. (For a description of transmittal codes, see section 79.2.)

SECTION 86 -- OTHER MAX DATA

Entry	Description
Supplemental: Budget authority Outlays	Total budget authority and outlays for all years shown in a separate program and financing schedule under transmittal code 1.
Rescission proposal: Budget authority Outlays	Total amount of reduction of budget authority and outlays for all years shown in a separate program and financing schedule under transmittal code 5.
Total: Budget authority Outlays	Sum of all preceding entries.

Budget Year Appropriations Request in Thousands of Dollars (Schedule T)

OFFICE OF THE SECRETARY
 Salaries and Expenses

 For necessary expenses, including services authorized by 5 U.S.C. [\$89,786,000] \$100,788,000.

Account: 007-55-76-0030

Appropriations Requests in Thousands of Dollars (T):	PY	CY	BY
1001 01 Budget year budgetary resources [Treasury Acct].....			100,788

Account: 007-55-76-0030

Program and Financing (P)	PY actual	CY	BY
New budget authority (gross), detail:			
Discretionary:			
4001 01 Appropriation.....	96.....90		101
4200 01 Transferred from other accounts [75-1503].....	1.....		5
4300 01 Appropriation (total).....	97.....90		106

Account: 007-54-72-9915

Appropriations Requests in Thousands of Dollars (T)	PY	CY	BY
1000 01 Budget year budgetary resources [76-0819].....			97,843.....
1000 02 Budget year budgetary resources [76-0820].....			54,287.....
1000 03 Budget year budgetary resources [76-0824].....			21,000.....
1000 04 Budget year budgetary resources [76-0825].....			6,500.....

Use schedule T to report *in thousands of dollars* the net budgetary resources contained in the appropriations language request.

Amounts in schedule T must be consistent with amounts in schedule P.

 Report amounts on a pre-transfer basis.

 Exclude amounts applied to repay debt, liquidate contract authority, or liquidate deficiencies.

 Do not report advance appropriations.

For consolidated or merged accounts, use separate line entries to report the budget year appropriation request. Include in each line the six-digit basic account symbol assigned by Treasury. You do not need to enter the Treasury code when only a single account is involved.

SECTION 95 -- BUDGET APPENDIX AND PRINT MATERIALS

Table of Contents

Appendix

- 95.1 What is the budget *Appendix*?
- 95.2 How is the *Appendix* organized?
- 95.3 How is the “Detailed Budget Estimates” section organized?

Print Materials

- 95.4 What do I need to know about the print materials published in the *Appendix*?
- 95.5 What is the process for getting print materials published in the *Appendix*?
- 95.6 How do I revise galley proofs and submit new print materials?

Ex-95 Revising Galley Proofs

95.1 What is the budget *Appendix*?

The *Appendix – Budget of the United States* is one of several volumes that constitute the President’s budget. Like the other volumes, the President transmits the *Appendix* to Congress, and it is published through the Government Printing Office. The Appropriations Committees, in particular, use the *Appendix* because it contains the appropriation language proposed by the President for each account that requires such language. The *Appendix* contains other, detailed information about each account – such as, program and financing information, expenditures by object class, narrative statements and data about the work performed, and employment data. We refer to the information to be printed in the *Appendix* as *print materials*, which are described in more detail in section 95.4.

95.2 How is the *Appendix* organized?

The *Appendix* consists of these parts:

- Detailed Budget Estimates by Agency – This part, the main part of the *Appendix*, contains print materials for accounts organized by agency. Section 95.3 describes the organization of this part in more detail.
- Other Materials – This part contains:
 - ▶ A summary of proposed changes to current year estimates through supplemental appropriations and rescissions;
 - ▶ Detailed print materials for the proposed supplemental appropriations and rescissions;
 - ▶ A list of the amendments to current year budget authority proposed after the transmittal of the current year budget; and

- ▶ A list of advance appropriations, advance funding, and forward funding proposed in the budget.
- Financing Vehicles and the Board of Governors of the Federal Reserve – This part contains print materials for certain entities that are excluded from the main part of the *Appendix*.
- Government-Sponsored Enterprises – This part contains the print materials for entities (such as Fannie Mae) that are government-sponsored enterprises (private corporations chartered by Federal law).

95.3 How is the “Detailed Budget Estimates” section organized?

This part of the *Appendix* presents print materials in the following general order (see the Table of Contents of the most recent *Appendix* for the exact order):

- Legislative Branch;
- Judicial Branch;
- Cabinet agencies in alphabetical order;
- Large or prominent nondepartmental agencies (for example, the Environmental Protection Agency and the Executive Office of the President) and accounts grouped under the headings, “Other Defense Civil Programs” and “International Assistance Programs;” and
- The remaining agencies, under the heading “Other Independent Agencies,” in alphabetical order.

We use the term *chapter* to refer to the presentation of print materials for a separate agency or group of agencies. Within the chapter for a department or large agency, the print materials are organized by bureaus or other major subordinate organizations within the agency (for example, the Farm Service Agency in USDA) or by major program areas (for example, Community Planning and Development in HUD). For the sake of convenience in these instructions, we refer to all equivalent subdivisions of a chapter as bureaus.

The *Appendix* presents accounts in a uniform, logical order in all bureaus, unless there is a compelling reason for an exception. Accounts normally appear in the following order:

- General fund accounts, in the following order:
 - ▶ Accounts for which appropriations are requested for the BY.
 - ▶ Accounts for which appropriations were made in the CY but not requested for the BY.
 - ▶ Other unexpired accounts.
 - ▶ Expired accounts.
- Special fund accounts, in the following order:
 - ▶ Accounts for which appropriations are requested for the BY.
 - ▶ Accounts for which appropriations were made in the CY but not requested for the BY.
 - ▶ Other unexpired accounts.
 - ▶ Expired accounts.

- Public enterprise funds.
- Intragovernmental revolving funds and management funds.
- Credit reform accounts, with related accounts grouped together in the following order:
 - Program account.
 - Financing account.
 - Liquidating account.
- Trust funds.
- Trust revolving funds.

Limitation schedules generally follow the schedules for the related revolving or trust fund. A heading and a note for allocations from other accounts is shown at the end of the bureau (see section 82.15).

When we establish a new account in the MAX data base, we assign a bureau and account sequence code, which determines the order in which bureaus and accounts appear in the *Appendix* (see section 79.1).

95.4 What do I need to know about the print materials published in the *Appendix*?

The term *print materials* refers to the information presented for an account in the *Appendix*. The first column of the following table lists all of the print materials that could be required for an account in the order in which they would appear in the *Appendix*. Because not all of them will apply to a given account, the second column describes the circumstances in which they apply. The third column directs you to the section of this Circular with information about the type of material listed. The Government Printing Office (GPO) automatically generates some print materials by computer, using the data in the MAX database. We refer to these as generated schedules. You submit other print materials by revising galley proofs that we provide. The fourth column of the table tells you which print materials are generated (including the MAX schedule from which the data come) and which ones you must submit as revised galleys.

BUDGET APPENDIX PRINT MATERIALS

Type of material	Applicability	See A-11 section...	MAX generated or revised galley?
Appropriations language	Required for each account with appropriations enacted for the CY or proposed for the BY. Language is usually not submitted for legislative or rescission proposals -- transmittal codes 2, 4, or 5.	96	Revised galley
Schedule on unavailable collections	Required for all special and non-revolving trust fund accounts and for other types of accounts when amounts are precluded from obligation.	86.6	Generated from schedule N
General fund credit receipt accounts	Required whenever credit programs have negative subsidies and downward reestimates receipt accounts.	79	Generated from schedule R

SECTION 95 – BUDGET APPENDIX AND PRINT MATERIALS

Type of material	Applicability	See A-11 section...	MAX generated or revised galley?
Program and financing schedule	Required for all accounts and for annual limitations on certain revolving or trust funds.	82	Generated from schedule P, except for limitation schedules
Distribution of budget authority and outlays by account	Required for merged and consolidated accounts.	82.13	Revised galley
Budget plan	Required for selected accounts in the Department of Defense.	86.3	Generated from schedule D
Summary of budget authority and outlays	Required for each regular account that also has a supplemental request, legislative proposal, or rescission proposal.	86.8	Generated from schedule A for accounts reporting data under multiple transmittal codes
Status of contract authority	Required for each account that has contract authority in the PY, CY, or BY.	86.7	Generated from schedule I
Status of direct loans	Required for all credit liquidating and financing accounts with direct loan activity, including Government-sponsored enterprises.	85.10	Generated from schedule G
Status of guaranteed loans	Required for all credit liquidating and financing accounts with guaranteed loan activity, including Government-sponsored enterprises.	85.10	Generated from schedule H
Summary of loan levels, subsidy budget authority, and outlays by program	Required for all credit program accounts with direct loan or loan guarantee subsidies.	85.9	Generated from schedule U
Narrative statement	Required for all accounts.	97	Revised galley
Schedule on the status of funds	Required for major trust funds and certain other accounts specified in section 86.6.	86.5	Generated from schedule J
Statement of operations	Required for Government-sponsored enterprises and credit liquidating accounts. For noncredit revolving funds, optional at the discretion of OMB.	86.2	Generated from schedule E
Balance sheet	Required for Government-sponsored enterprises and credit liquidating accounts. For noncredit revolving funds, optional at the discretion of OMB.	86.2	Generated from schedule F
Object classification	Required for all accounts and annual limitations.	83	Generated from schedule O

Type of material	Applicability	See A-11 section...	MAX generated or revised galley?
Personnel summary	Required for each account that reports personnel compensation in object class 11.1 or 11.3. Also required when FTE are funded by allocations from other accounts	86.1	Generated from schedule Q

95.5 What is the process for getting print materials published in the *Appendix*?

The process for getting print materials published involves these steps:

1. In December, we give you copies of galley proofs reprinted by the GPO from last year's *Appendix*. The printed matter appears in one column on legal size pages. Although GPO simply labels them "galley proofs," we refer to this set of galley proofs as *reprinted galleys*.
2. You revise the reprinted galleys (following the instructions in section 95.6) and return an original and two copies to OMB, by the date we specify when we send you the galleys, together with any additional materials to be printed (such as those for new accounts).
3. We send the revised galleys and the additional print materials to GPO for processing.
4. GPO uses data from MAX to print the schedules that are generated and merges them with the revised galleys to produce new galley proofs.
5. We and you review the new galley proofs and make final changes.
6. We send the revised galley proofs to GPO for printing as *page proofs*, which present the material in two-column format, as it will be published.
7. We review the page proofs on an extremely short deadline, make essential corrections of errors, and send corrected page proofs to GPO for final printing.

95.6 How do I revise galley proofs and submit new print materials?

(a) *General instructions.*

When you receive the reprinted galleys from OMB, they will include:

- Updated year headings;
- Generic changes to stub entries in generated schedules;
- No amounts in the generated schedules and narrative tables; and

- Appropriations language for the current year (if language has been enacted by the time OMB prepares the reprinted galleys).

You must use the reprinted galleys as the basis for submitting all print materials other than generated schedules. You revise generated schedules, and add new ones, through changes in the MAX database. You cannot make changes to generated schedules, including changes in stub titles, by marking the galley. We and GPO will ignore all such changes. Only OMB can make changes to the standard stub titles in MAX, and we will make them only for compelling reasons. Consult your OMB representative if you feel a change in a standard stub title is essential.

Changes to the reprinted galleys include changes you make to information printed on the galleys you receive (such as small changes to the enacted CY appropriation language) and new information (such as a set of materials for a new account or legislative proposal for an existing account). Exhibit 95 shows you how to make changes to galleys. Make relatively small changes (not more than two lines) directly on the galley. Use inserts to the galleys for larger changes to existing information and to provide new print materials such as for new accounts and legislative proposals.

You should include new materials for supplemental requests and rescission proposals at the end of each set of galleys, even though we will separate them for printing in a different part of the *Appendix*.

Type information to be inserted on letter-size paper. Each insert must include the following information:

- Department or agency and bureau (if applicable).
- Account title and the account identification code.
- Galley extension and frame number where the new print material is to be inserted.

When you insert print materials for new accounts and legislative proposals, be sure to follow the account sequence in MAX and the sequence of materials specified in section 95.4. Although you must add generated schedules through MAX, you must mark the inserted material to indicate where you want to add a generated schedule and the type of schedule – for example, “Insert Schedule P.”

When we send you the reprinted galleys, we will give you the due date for their return. Return three sets (including at least one original), along with all the inserts as a single package for the agency, taking care to keep the galley proofs in order. Do not reduce the size of the reprinted galleys, cut them apart, or obliterate any GPO identifiers.

When we receive the new galley proofs from GPO, we will send them to you with instructions to mark corrections in the manner shown in Exhibit 95.

(b) Specific instructions for revising appropriations language.

The reprinted galleys will include the appropriations language enacted for the current year, if language has been enacted by the time OMB prepares the reprinted galleys. Make changes to the enacted language to reflect the budget year request following the instructions in section 96. If appropriations language is not included in the reprinted galleys, follow the instructions in section 96, attaching the material as inserts to the reprinted galleys.

(c) *Specific instructions for revising narrative statements, footnotes, and tables.*

Update these materials to address budget year activities by marking changes on the galley proofs or inserting new materials following the instructions in section 97. Be sure to revise footnotes, including the dollar amount and account references for transfers in the estimates.

(d) *Style rules.*

Follow these style rules to ensure consistency among in the materials in the *Appendix*:

- *Capitalization.* Follow the capitalization guidelines of the *Government Printing Office Style Manual*, except capitalize only the first word of references in the text to account titles and the titles of programs and activities (unless the title also contains proper nouns that would otherwise be capitalized).
- *Numbers and amounts.* Follow these rules for numbers:
 - ▶ Use leaders (...) in columns of figures in place of zeros (0).
 - ▶ Omit dollar signs from amounts in tables.
 - ▶ Omit minus signs in the stub entries of tables and include minus signs for negative amounts. (We use parenthesis around numbers to indicate memorandum or non-add entries. Do NOT use parenthesis if you want to show an amount being subtracted in a table.)
 - ▶ Present dollar amounts in millions of dollars, rounded to the nearest million, in tables. Where an amount falls exactly halfway between, round to the nearest *even* figure. (For example, both \$11,500,000 and \$12,500,000 would be rounded to \$12). Include amounts of \$500,000 or less as zero (...).
 - ▶ In footnotes and narrative statements, present dollar amounts as a figure in millions of dollars (following the same rounding rule as for tables) followed by the word “million” (for example, “\$314 million”).

Revising Galley Proofs

Return complete sets of galley proofs to OMB.	Do not reduce the size of the reprinted galleys.	GALLEY PROOF

Revising Galley Proofs (continued)

For changes to narrative materials, strike out information to be deleted and insert corrections; *do not use brackets to indicate deletions or italics to indicate new materials* (as you do for appropriation language). Mark short inserts in pencil directly on galley proof. Type inserts involving more than two lines and affix to the proof (if space is available). Type longer inserts on separate sheets of paper, identify the appropriate galley extension and frame number, and attach to the galley proof. For all inserts, draw an arrow to the proper insertion point. See section 97 for further guidance.

INSERT A to extension GOV.000, frame 0002

1. *Assistance and training.* The PY amendments to the Environmental Control Act increased the Federal portion of funds provided for water pollution control projects to 75 percent of the project estimates in BY. Additional training will accompany the increased project funding to provide for a more comprehensive review of future project plans and alternatives. In BY, amounts provided for training will increase 190.4 percent.

SECTION 96 -- APPROPRIATIONS LANGUAGE

Table of Contents

96.1	What do I need to know about appropriations language in general?
96.2	What format should I use when submitting appropriations language?
96.3	How do I make changes in language and amounts?
96.4	What supporting statutory references must I provide?
96.5	What are the special appropriations language requirements for credit programs?
96.6	What are the special language requirements for programs that disburse over a period longer than five fiscal years?
96.7	What do I need to know about explanations of appropriations language?
Ex-96A	Appropriations language
Ex-96B	General provisions

96.1 What do I need to know about appropriations language in general?

Appropriations language constitutes the President's request to Congress for budget authority or other legislative authority (such as general provisions) to be provided through the annual appropriations process. The *Appendix* includes appropriations language for each account for which appropriations or limitation language was enacted in the CY or is proposed for the BY.

Submit appropriations language as part of the *print materials* described in section 95. Follow the guidance in that section for your submission of print materials, in general, and the guidance in this section for appropriations language, in particular. Appropriations language submissions consist of:

- Language enacted for the current year (including enacted supplemental appropriations and rescissions) with the proposed changes for the budget year, if any;
- Proposed language if none was enacted for the current year and is required to carry out the President's proposals for the budget year; and
- Statutory references.

See section 96.5 for special requirements for credit programs and section 96.6 for special requirements for programs funded by budget authority that will be disbursed over periods longer than five fiscal years after the authority expires.

Whenever possible, try to include proposed substantive changes in appropriations language with the initial budget submission to provide adequate time for review by OMB.

96.2 What format should I use when submitting appropriations language?

In most cases, you will submit proposed BY appropriations language by marking up language enacted as part of a regular CY appropriations act. However, you may be marking up language contained in or referenced by a continuing resolution, if regular appropriations were not enacted. In other cases, you will submit new

language. The following guidance covers each of these cases. In all cases, you must submit the appropriations language for each account on a separate page.

Language enacted as part of a regular CY appropriations act. Provide language submissions in the format of exhibit 96A. The text printed in the appropriations acts for the CY constitutes the primary source of material for the language submissions.

Normally, we provide you with reprinted galleys (see section 95.4) that contain the CY language for each account from regular appropriations acts, supplemental appropriations acts, other appropriations actions, and rescissions. Use them to propose revisions to the CY language for the BY. When we cannot provide the CY language in the form of reprinted galleys, we provide copies of the enrolled bills with the language for the accounts. In this case, use these copies to prepare your language submissions. Cut language items related to an account from the enrolled bill (or bills) and paste it onto a separate sheet of paper for each account. Make changes to the language (whether provided in reprinted galleys or as enrolled bills) in accordance with section 96.3.

Follow these guidelines when submitting language:

- Use all of the text in the appropriations act, except the preamble and the title of the act.
- If the organizational unit is not identified as a heading in the text, insert the title of the organizational unit at the top of the sheet.
- If there was appropriation action in addition to the regular appropriations action for the current year (such as a supplemental appropriation or a rescission), include the text from the additional appropriations action on the same sheet as the text from the regular act, following the regular act's citation, and omit the account title from the additional language (see exhibit 96A).
- Display the citation for the additional appropriations after the specific language, in parentheses and underscored.
- In cases where the entire amount available was provided in a supplemental or other appropriations act, provide the title and any immediately preceding organizational unit identification in the same manner as items from an annual act.

Appropriations for the CY are provided in a continuing resolutions. If an appropriation for the current year is provided in a continuing resolution, prepare the proposed BY language as follows:

- If the continuing resolution includes specific language by account, we will give you the language as either a reprinted galley or an enrolled bill, and you should submit any revisions as described above for language enacted in a regular appropriations act.
- If the continuing resolution enacts specific language by reference to an appropriations bill, we will provide separate guidance on preparation of the language submissions.
- If the continuing resolution refers only to a level or rate (such as the lower of the House or Senate level, Senate level, or current rate), you must submit the proposed language for the BY as all new language. In such cases, we develop an explanatory note that you insert following the language.

No current year language enacted. If no current year language was enacted, you must type the proposed appropriation language as new material and underscore it to indicate that it should be italicized when printed.

96.3 How do I make changes in language and amounts?

Make changes to appropriations language and amounts as follows:

- To change language, amounts, or account titles enacted for the CY to reflect the BY request to Congress:
 - ▶ Enclose the material to be omitted in brackets []; and
 - ▶ Type (double-spaced) and underscore all new material. If possible, insert the new material in the right margin of the page.
- Use a caret (^) and line to indicate clearly the place where the new material is to be inserted.
- Place new material following bracketed material, even though the bracketed material may only include figures and new material includes additional language.
- State amounts in dollars rounded to the nearest thousand (for example, \$10,951,000; not \$10,950,768).
- Use black lead pencil to make brackets, carets, and insert lines.
- Do not obliterate pre-existing punctuation marks.
- If no CY language was enacted, type the proposed new language on a separate page, double-spaced and underscored.

Make changes to administrative and general provisions in the same manner (see exhibit 96B). If you propose to delete an entire numbered section, enclose the section in brackets. Insert proposed new provisions (underscored) at the end of the current law provisions. Be sure to revise the section numbers as necessary by bracketing the old number and inserting revised numbers (underscored) following the bracketed number.

96.4 What supporting statutory references must I provide?

You must provide the supporting statutory references described below, inserting them following the appropriations language (in parentheses and underscored). These references are informational only.

Present the references in the following sequence:

(1) *Basic authorizing legislation (including currently effective amendments), treaty, or executive order that continues in effect during the budget year.* Follow these guidelines in referring to basic authorizing legislation:

- Cite the legislation in one of the following forms, in this order of preference:
 - ▶ United States Code;
 - ▶ Public law number;

- ▶ Popular title of the law (if there is one); or
- ▶ Date of the Act, followed by the applicable volume and page of the Statutes at Large.
- Do not include references to Government-wide, generally applicable laws (such as Title 5 of the U.S. Code).
- Cite executive orders by number.
- Consolidate citations to the same title of the U.S. Code, and list titles (and sections thereunder) in ascending numerical order.
- Avoid multiple citations to the same statute.
- If a citation is included in statutory text, do not repeat it in parentheses.

(2) *The appropriations act from which the text of the appropriations language has been taken.* Follow these guidelines in citing appropriations acts:

- Generally, reference the short title of the applicable appropriations act.
- If an appropriations act provides a citation for a specific title (that is, portion of the act), use that citation.
- If the act or title thereof has no short title, your OMB representative will specify the citation to use.
- For accounts with appropriations language from more than one source (for example, an account with regular and a supplemental appropriations language), insert the reference following the appropriations language to which it applies.
- If the language in an appropriations bill was enacted by reference in a continuing resolution, cite the continuing resolution (not the referenced bill).

96.5 What are the special appropriations language requirements for credit programs?

The Federal Credit Reform Act imposes special appropriations language requirements for credit programs. (See section 85 for general guidance on credit programs.) Each program account for a direct loan or loan guarantee program must contain:

- A request for an appropriation for the subsidy costs on a net present value basis;
- A specification of the loan level supportable by the subsidy cost appropriation; and
- A request for an appropriation for the administrative expenses for operating the credit program.

Use the following standard subsidy appropriation language, using the bracketed elements as appropriate. If you need to transfer the amount for administrative expenses to a salaries and expenses account, modify the language as described below. Where loans are disbursed beyond the five year period after obligation, you need to add the proviso discussed in section 96.6.

[For the cost of direct loans, \$_____] [and] [for the cost of guaranteed loans, \$_____] as authorized by [authorizing statute]: Provided, That such costs, including the cost of modifying such loans, shall be as defined

in section 502 of the Congressional Budget Act of 1974: Provided further, That these funds are available to subsidize [gross obligations for the principal amount of direct loans not to exceed \$____] [,and] [total loan principal, any part of which is to be guaranteed, not to exceed \$ ____.] In addition, for administrative expenses to carry out the [direct] [and] [guaranteed] loan program[s], \$ ____.

Where you propose to transfer administrative expenses to a salaries and expenses account, substitute the following for the last sentence above:

In addition, for administrative expenses to carry out the [direct] [and] loan [guarantee] program[s], \$ ____, which shall be [transferred to and merged with the appropriation for [name of account]] [or, to the extent necessary,] [used to reimburse the Federal Financing Bank as authorized in section 505(c) of the Congressional Budget Act of 1974].

If you believe that the nature of a program requires a modification of the specified language, you may request an exception (see section 25).

96.6 What are the special language requirements for programs that disburse over a period longer than five fiscal years?

Unless otherwise specified by law, budget authority is available for liquidating obligations (that is, outlays) for only five fiscal years after the authority expires. This could be problematic for programs funded by annual or multi-year budget authority where disbursements are expected to occur more than five fiscal years after the authority expires. Where loans or other costs (such as termination costs for some contracts and annual lease payments under operating leases, capital leases, or lease-purchase agreements) will be disbursed beyond the five-year period, use the following standard proviso, modified as appropriate, to ensure that the budget authority will remain available for disbursement over the full term of the contract:

:Provided, That such sums are to remain available through 20XX for the disbursement of [loans] [lease payments] [termination costs] obligated in fiscal year 20XX.

96.7 What do I need to know about explanations of appropriations language?

Submit the information described below on a separate page from the language submissions. Do not write any explanations on the language submissions themselves.

- An explanation and justification of all new provisions, deletions and proposed changes (other than changes in amounts) in the language of the appropriation, including changes to general and administrative provisions.
- A copy of a letter from the Office of Personnel Management approving any new provisions that relate to employment of personnel without regard to civil service or classification laws.

Appropriations Language

When possible, OMB includes enacted CY appropriations language, including supplemental language, with appropriate headers and cites to the appropriations acts, in reprinted galleys. Otherwise we provide enrolled bills, which you must cut and paste (see section 96.2). In either case, mark up and return originals. See section 95 for general guidance on reprinted galleys.

GALLEY PROOF

KEY POINTS:

1. Enclose deletions with brackets [].
2. Show insertions with carets (^), following (not preceding) bracketed matter.
3. Include language to be inserted (underscored) in the right margin.
4. All brackets, carets, and insert lines are to be made in *black lead pencil* (not typed) so as not to obliterate punctuation marks.

DEPARTMENT OF GOVERNMENT
OFFICE OF THE SECRETARY
Federal Funds

General and special funds:

SALARIES AND EXPENSES

Add headings (if not already included in reprinted galley) to reflect the organizational unit, unless they already appear as a separate line at this point in the appropriations act.

For expenses necessary for the Office of the Secretary,
including not to exceed [\$90,000] for expenses of travel; \$94,000
purchase (not to exceed [one] for replacement only) and hire three, of which two shall be
of passenger motor vehicles; [and] services as authorized
by 5 U.S.C. 3109; [\$3,220,000: Provided, That not to
exceed \$20,000 of the amount appropriated under this head
in the Department of Government Appropriation Act, PY,
shall remain available during the current fiscal year] and uniform allowances
therefor, as authorized
(10 U.S.C. 3624; P.L. 92-926; Act of June 21, 1970, 82
Stat.898; Department of Government Appropriations Act, CY.)
by 5 U.S.C. 5901-5902;

[For an additional amount for "Salaries and Expenses," \$200,000.

(Supplemental Appropriations Act, CY).]

Include text (if not already included in reprinted galley) from current year supplemental appropriations acts, where applicable, even though the supplemental only provides an additional amount.

Add references (underlined and in parentheses) to basic authorizing legislation (unless cited in the body of the language) and to the act or acts containing the appropriations text (unless already included in the reprinted galley). See section 96.4 for the preferred method of making citations. Don't provide parallel citations or citations to Government-wide, generally applicable laws (e.g., title 5 of the U.S. Code.)

General Provisions

GALLEY PROOF

TITLE VII--GENERAL PROVISIONS

[SEC. 701. Within the unit of limit of cost fixed by law, appropriations and authorizations made for the Department of Government for the fiscal year 1996 under this Act shall be available for purchase, in addition to those specifically provided for; of not to exceed 665 passanger motor vehicles, of which 664 shall be for replacement only, and for the hire of such vehicles.]

SEC. [702] . Funds in this Act available to the Department of Government shall be available for 701 uniforms or allowances therefore as authorized by law (5 U.S.C. 5901-5902).

[SEC. 703. Not less than \$1,500,000 fo the appropriations of the Department of Government in this Act for research and service work authorized by the Acts of August 14, 1946 and July 28, 1954 (7. U.S.C. 427, 1621-1629), and chapter 63 of title 31, United States Code, shall be available for contracting in accordance with the said Acts and chapters.]

SEC. [704] . The cumulative total of transfers to the Working Capital Fund for the purpose of accumulating growth capital for data services and National Finance Center operations shall not exceed [\$2,000,000] ; *Provided* , That no 702 funds in this Act appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator.

SEC. [705] . No part of any appropriation contained in this Act shall remain availabe for obligation beyond the current fiscal year unless expressly so provided herein. 703

SEC. 704. From funds made available to the Department of Government in this Act, the Secretary may transfer amounts to "Department Administration," to be merged with such account and available for the same purpose.

KEY POINTS:

1. Deletions of entire sections are shown by use of brackets.
2. Section number, after those sections proposed for deletion, are bracketed and revised numbers are shown in the margin and underscored.
3. Any proposed new sectios are included at the end of the current law provisions and underscored.

SECTION 97 -- NARRATIVE STATEMENTS, FOOTNOTES, AND TABLES

Table of Contents

- 97.1 What is the purpose of narrative statements?
- 97.2 Must I prepare a narrative statement for every account?
- 97.3 How should I write the narrative statements?
- 97.4 What should narrative statements say about performance goals and indicators?
- 97.5 How do I get narrative statements into print?
- 97.6 Are there specific requirements for narrative statements in certain cases?
- 97.7 What do I need to know about footnotes and tables?

Ex-97 Analysis of Programs Financed by Multiple Budget Accounts

97.1 What is the purpose of narrative statements?

The information published for an account in the budget *Appendix* usually includes a narrative statement. For active accounts, the narrative statement should describe the account's performance goals, including outputs, and outcomes, and explain how the budget year request supports them. For inactive accounts, the narrative statement should give the reason for the inactivity and the expected disposition of the account's balances. Separate narrative statements explain the reason for each supplemental request, rescission proposal, and legislative proposal. Sections 97.3 and 97.6 (for special cases) explain more specifically what should be covered by narrative statements. Also, for technical reasons, you must treat footnotes to the program and financing schedule and special tables as narrative materials (see section 97.7).

97.2 Must I prepare a narrative statement for every account?

You must prepare a narrative statement (revising last year's statement, if there was one) for every active account. In most cases, you should include a brief narrative statement for an inactive account to explain the inactivity and the expected disposition of the account's balances.

97.3 How should I write the narrative statements?*(a) Active accounts.*

An account is active if the program and financing schedule shows obligations in the CY or BY, or you estimate that the account will incur obligations in the outyears. Follow these guidelines in writing the narrative for an active account:

- Write the narrative statements in a concise and factual manner, avoiding hyperbole.
- Orient them toward the policies and objectives for the budget year.
- Include quantitative tables that match program performance and dollar data.
- Discuss performance goals and indicators (see additional guidance in section 97.4).

- Discuss pertinent legislation enacted since the previous budget and legislative initiatives proposed in the budget.
- Do not discuss the history, authorizing statutes, and other legal references except in special cases, as explained below.

The separate activities (and any subactivities) listed in the obligations by program activity section of the program and financing schedule should present a meaningful breakdown of the total program (see section 82.2). Therefore, it usually makes sense to address them separately in the narrative statements. You should identify the activities in side headings by the title used in the program and financing schedule and present them in the same order.

(b) Inactive accounts.

An account is inactive if it shows no obligations in the CY or BY and you estimate that no obligations will be incurred in the outyears. The narrative for inactive accounts should explain why the account is inactive. For example, it may be that the account funded a temporary study commission that is no longer authorized, received no appropriation after the PY, and simply spends out obligated balances. If an inactive account shows any budgetary resources (budget authority or unobligated balances) in the CY, BY, or outyears, the narrative should explain the expected disposition of the budgetary resources.

97.4 What should narrative statements say about performance goals and indicators?

The statements should be consistent with the strategic plans and annual performance plans required for the agency in Part 2 of this Circular. Use the statements to discuss both the short-range and the long-range performance goals of the program. Explain how the budget year request supports them. Address significant increases or decreases in performance or financing from the current to the budget year (including a proposal to terminate a program in the budget year).

Include data on performance goals, preferably those that focus on outputs or outcomes instead of workload and other process measures. Outputs should reflect the products and services provided by the account and delivered or used outside of the account. Outcomes should reflect the results related to the outputs. Use tables to illustrate and compare these goals for the past, current, and anticipated budget year levels.

97.5 How do I get narrative statements into print?

Narrative statements are print materials. OMB will provide you with reprinted galleys, which will include the narrative statements for accounts presented in the previous year's budget. You should edit these galleys. For accounts not included in the reprinted galleys, prepare the narrative statements as new print materials. See section 95 for more detailed instructions on revising and submitting print materials.

97.6 Are there specific requirements for narrative statements in certain cases?

(a) Overview.

In addition to the information required for active accounts in general (see section 97.3), the narrative should include certain specific information, described in the following paragraphs, if the account involves any of the following:

- Major programs financed by multiple budget accounts;
- Revolving funds;
- Federal credit programs; or
- Various other special cases.

(b) *Narrative statements for major programs financed by multiple budget accounts.*

Where a single budget account does not contain the total financing needed to conduct a major program, include a table in the narrative statement of the account that finances the major portion of the program activity (that is, the "primary" account). Following the format of exhibit 97, list the primary account and any other accounts (that is, "supplementing" accounts) that support the activity performed by the primary account. For the primary account, each of the supplementing accounts, and in total, show the amounts of budget authority, outlays, and FTE for each of the years PY through BY.

For this purpose, major programs are those that obtain goods and services of \$100 million or more, in budget authority or outlays for the budget year, on a non-reimbursable basis from supplementing accounts.

Support provided by supplementing accounts includes the non-reimbursed cost of central support services that are directly attributable to implementation of the program, but not charged against the primary account. For example, in the case of a grant program, the budget account funding the grant would be the primary account, while a separate salaries and expenses account used for compensation of agency personnel responsible for implementing the program (e.g., disbursing and monitoring the grants) would be the supplementing account.

Consult your OMB representative on the designation of major programs and the form and content of the information presented in the narrative table.

(c) *Narrative statements for revolving funds.*

For revolving funds, the narrative statement should include the information required for active accounts in general (see section 97.3) using the side heading *Budget program*. In addition, the narrative statement should address the following topics, with the side headings shown:

- *Financing.* Provide significant information on the fund's means of financing, such as sources of income and authority to borrow (including limits on such authority, amounts actually borrowed and repaid during the year). For funds with a statutory limit on the amount of borrowing or on the amount of debt that can be outstanding at any one time, indicate the amount of the limit and discuss the position of the fund with respect to the limit during the budget year. Include in the statement a discussion of how close to the limit the fund will approach during the year.
- *Operating results.* Provide significant information relating to levels of revenue, expense, and net income or loss. Explain the steps being taken to dispose of any deficits and the planned disposition of net earnings. Include an analysis of retained income on a cumulative basis, disclosing any budget authority amounts used to offset deficits for non-revenue producing outlays since the inception of the fund.

SECTION 97 -- NARRATIVE STATEMENTS, FOOTNOTES, AND TABLES

For each fund covered by section 102 of the Government Corporation Control Act, include a specific recommendation on the application of the retained earnings or restoration of capital impairment at the end of the past year. The recommendation should indicate:

- The amount of retained income to be returned to the Treasury and the use to be made of the remainder, if any; and
- Whether restoration of any capital impairment is required and whether this should be done by appropriations or other means.

(d) Narrative statements for Federal credit programs.

Narrative statements for Federal credit programs should address these items:

- Significant factors in developing subsidy estimates, such as default rates and interest rates charged to borrowers.
- Where relevant, information about how risk categories are defined (see section 85.3).
- For loan guarantee programs, the percentage of the loan covered by the guarantee.

Use the following paragraphs, modified as necessary, to describe each account for a credit program.

For liquidating accounts:

As required by the Federal Credit Reform Act of 1990, this account records, for this program, all cash flows to and from the Government resulting from [direct loans obligated] [and] [loan guarantees committed] prior to 1992. All new activity in this program (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program accounts and financing accounts.

For program accounts:

As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the [direct loans obligated] [and] [loan guarantees committed] in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

For direct loan financing accounts:

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans obligated in 1992 and beyond (including modifications of direct loans that resulted from obligations in any year). The amounts in this account are a means of financing and are not included in the budget totals.

For guaranteed loan financing accounts:

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees committed in 1992 and beyond (including modifications of loan guarantees that resulted from commitments in any year). The amounts in this account are a means of financing and are not included in the budget totals.

(e) Narrative statements in special cases.

The narrative statement should explain any special circumstances affecting the means of financing the program. Cover the following cases in particular:

- *Permanent budget authority.* Indicate the legal basis for the authority (since no appropriations language is presented for such items).
- *Offsetting collections and receipts.* When offsetting collections or receipts earmarked in a special or trust fund finance a significant portion of the obligations of the account, discuss the source of the collections or receipts and the purposes of and restrictions on their use. For example, discuss user fees charged to the public, reimbursable work performed for other organizations, and asset sales. The narrative should also discuss receipts generated by the program but deposited into the general fund of the Treasury, when pertinent to the operations of the program.
- *Agency debt issued and investments in agency debt.* Unless the information is provided in a balance sheet for the account, the narrative statement should include the following information, as applicable, for PY-1 through BY. For accounts that issue debt instruments to other Federal accounts (excluding debt issued to Treasury or to the Federal Financing Bank) or to non-Federal entities, indicate the par value of outstanding debt securities issued by the account to other Federal accounts (in total) and non-Federal entities (in total). For accounts that own securities issued by other Federal accounts (excluding securities issued by the Treasury or the Federal Financing Bank) or by non-Federal entities, indicate the par value of the securities owned that were issued by Federal accounts (in total) and non-Federal entities (in total).
- *Limitations on borrowing or debt.* For accounts with a statutory limit on the amount of borrowing or on the amount of debt that can be outstanding at any one time, indicate the amount of the limit and discuss the position of the fund with respect to the limit during the budget year. Include in the statement a discussion of how close to the limit the fund will approach during the year.

97.7 What do I need to know about footnotes and tables?

Other sections of this Circular require footnotes and tables in certain circumstances. In some cases, these footnotes and tables appear to be part of a MAX schedule or resemble a MAX schedule. However, you must treat these footnotes and tables as part of the narrative statements because they are not in the MAX A-11 database and are not automatically generated.

- *Transfer in the estimates.* For an account with a transfer in the estimates, as defined in section 20.4(k), prepare a footnote in the format described in section 82.12 and insert it following the program and financing schedule.

SECTION 97 -- NARRATIVE STATEMENTS, FOOTNOTES, AND TABLES

- *Transfer of resources.* For an account with a transfer of resources as defined in section 20.4(j), prepare a footnote in the format described in section 82.11 and insert it at the end of the program and financing schedule.
- *Allocation accounts.* For each bureau (or agency if the agency has no bureaus) that receives an allocation as defined in 20.4(l), prepare a footnote in the format described in section 82.15 and insert it at the end of the print materials for the bureau that receives allocations.
- *Consolidated schedules and merged accounts.* For a program and financing schedule that contains data for accounts that have been consolidated or merged (see sections 71.6 and 71.7), prepare a table distributing budget authority and outlays by account in the format described in section 82.13 and insert it following the program and financing schedule.
- *Annual limitations on trust or revolving funds.* For a trust or revolving fund with an annual limitation on administrative expenses or other annual limitation on its obligations, prepare a table following the guidance in section 82.14 and insert it following the limitation language.

**SECTION 100 -- REVISED AND ADDITIONAL INFORMATION REQUIRED AFTER FINAL
BUDGET DECISIONS**

Table of Contents

- 100.1 What information must I provide after final budget decisions?
- 100.2 What materials must I provide in support of baseline estimates?
- 100.3 What information must I provide on grants to State and local governments?
- 100.4 What information must I provide on motor vehicles?
- 100.5 What information must I provide on relocation expenses?
- 100.6 What information must I provide on international travel?

Summary of Changes

Allows agencies to enter data on motor vehicles, relocation expenses, and international travel directly into MAX (sections 100.4, 100.5 and 100.6).

100.1 What information must I provide after final budget decisions?

You must revise the following materials if final budget decisions affect them and submit them promptly after the decisions are made:

- Report on resources for financial management activities (see section 52.5).
- Information on information technology (IT) (see section 53).
- Information on energy use, costs, and efficiency (see section 55).
- Information on drug control programs (see section 56).
- Capital asset plans (see section 300).

In addition, you must submit materials in support of baseline estimates (see section 100.2). As applicable to your agency, you must also submit the information described in sections 100.3-100.6, such as information on grants to State and local governments.

Unless otherwise specified in the guidance below, *after final decisions* means after the passback of initial decisions to your agency or, in the case of those items that could be affected by the outcome of appeals, after the resolution of appeals. Don't wait until all appeals are resolved to submit information that is unlikely to be affected by the outcome of the appeals.

100.2 What materials must I provide in support of baseline estimates?

Submit two copies of an agency summary table that provides a bridge between the current year baseline estimates and the budget year baseline estimates (see sections 80 and 81). This table should identify, as separate stub entries, major budget authority or outlay differences (\$50 million or more) between the current year and budget year baseline estimates. Explain these differences in terms of:

- Effects of enacted appropriations and other legislation;
- Inflation and pay-related costs;

**SECTION 100 -- REVISED AND ADDITIONAL INFORMATION
REQUIRED AFTER FINAL BUDGET DECISIONS**

- Prior year contracts and obligations; and
- Anticipated changes in relatively uncontrollable programs or receipts (including offsetting receipts).

Also, submit a table showing the impact on the baseline estimates of:

- Major regulations;
- Expiring provisions of law;
- Caseloads for major mandatory programs;
- Management initiatives;
- Administrative actions; and
- Other major program assumptions included in the baseline.

Show the budgetary impact of each major assumption separately. For example, a change in outlays resulting from a regulatory change should be shown separately from a change resulting from the expiration of a provision of law. Consult with your OMB representative on the format and content of this table.

Also, be prepared to furnish, upon request from your OMB representative, caseload estimates and other additional information.

100.3 What information must I provide on grants to State and local governments?

If your agency has major formula grants to State or local governments, you must provide information on obligations by program for the PY, CY, and BY and the percentage share for the BY allocated to:

- Each State;
- The District of Columbia;
- Territories; and
- Indian tribe set-asides, when applicable.

We use this information to develop the annual Budget Information for States report. We will provide separate instructions, including the timing of submissions, at a later date.

100.4 What information must I provide on motor vehicles?

(a) Agencies required to report.

If your agency operates at least 300 motor vehicles, then the Consolidated Omnibus Budget Reconciliation Act (COBRA) of 1985 (Public Law 99-272) requires your agency to report data on motor vehicles. The law exempts the following agencies from these requirements:

- Tennessee Valley Authority.
- Postal Service.
- Postal Rate Commission.

Report total agency costs for motor vehicle acquisition, operation, maintenance, leasing and disposal for PY, CY, and BY. Include the costs of Government-owned and leased vehicles and the costs of privately-owned

vehicles (POVs) while on official business. Report the costs in terms of obligations and outlays in millions of dollars. Report outlay totals as separate entries even if total obligations and outlays are identical.

Use the following definitions to report the data:

- ***Motor vehicle*** means any vehicle that is self-propelled or drawn by mechanical power, except the term does not include any vehicle designed or used for military field training, combat, or tactical purposes, or any other special purpose vehicle or equipment exempted by the Administrator of GSA (see the following definition).
- ***Special purpose vehicles and equipment*** means vehicles and equipment used and designed for specialized functions. This definition includes, but is not limited to, the following types of vehicles and equipment:
 - ▶ Trailers.
 - ▶ Semi-trailers and other types of trailing equipment.
 - ▶ Trucks with permanently-mounted equipment (such as aerial ladders).
 - ▶ Construction and other types of equipment included in Federal Supply Class (FSC) 38.
 - ▶ Material handling equipment in FSC 39.
 - ▶ Fire-fighting equipment in FSC 42.
- ***Cost of privately-owned vehicles (POVs) while on official business*** means the mileage cost reimbursed by the Government to the owner or operator of such a vehicle, except when a POV is used:
 - ▶ In a permanent change of station move;
 - ▶ In lieu of a common carrier; or
 - ▶ To commute between an employee's residence and a common carrier terminal or facility.

Please enter your agency's data into MAX as soon as possible, but no later than five days after the budget database is locked. The lockout date for entering data on motor vehicles is separate from the lockout date for entering data for the *President's Budget* exercise. Enter the data as follows:

- From the MAX A-11 data entry program, select the *Legal Requirements* exercise.
- For OMB account, enter the OMB agency code.
- You will find the data that your agency submitted last year. Replace with this year's data.
- After you have made your changes, save and upload your data.

After you have updated MAX, prepare a statement explaining why existing and new motor vehicle acquisition, operation, maintenance, leasing, and disposal activities cannot be met through one of the following means:

- Use of a qualified private fleet management firm or other private contractor;
- Increased reliance on the Interagency Fleet Management System operated by the General Services Administration; or
- Other existing motor vehicle management systems.

**SECTION 100 -- REVISED AND ADDITIONAL INFORMATION
REQUIRED AFTER FINAL BUDGET DECISIONS**

Include, in the lower right-hand corner, the name and telephone number of the individual responsible for preparing the submission and the date prepared. You may fax or e-mail the statement to your OMB representative.

OMB uses this information to prepare a table on motor vehicle obligations and outlays, which is provided to Congress as a part of the Object Class Analysis report.

100.5 What information must I provide on relocation expenses?

Section 635 of Public Law 105-61 requires your agency to report on total obligations for the agency's employee relocation expenses for the PY, CY and BY. ***Employee relocation expenses*** means all obligations incident to employee relocation authorized under either chapter 57 of Title 5, United States Code, or section 901 of the Foreign Service Act of 1980 (22 U.S.C. 4081; Public Law 96-465). These expenses are normally reported as part of the following object classes (see section 83):

- Travel and transportation of persons (object class 21).
- Transportation of things (object class 22) (for example, movement of household goods (but not storage costs, which are reported in object class 25.7)).
- Civilian personnel benefits (object class 12.1) (for example, various relocation allowances and expenses associated with sale of residence or breaking a lease).
- Military personnel benefits (object class 12.2) (for example, the same kinds of expenses reported in object class 12.1).
- Operation and maintenance of equipment (object class 25.7) (for example, contractual services for storage and care of vehicles and storage of household goods, when associated with relocation).

Please enter your agency's data into MAX as soon as possible, but no later than five days after the budget database is locked. The lockout date for entering data on relocation expenses is separate from the lockout date for entering data for the *President's Budget* exercise. Enter the data as follows:

- From the MAX A-11 data entry program, select the *Legal Requirements* exercise.
- For OMB account, enter the OMB agency code.
- You will find the data that your agency submitted last year. Replace with this year's data, making sure the data are consistent with MAX schedule O.
- After you have made your changes, save and upload your data.

OMB uses this information to prepare a table on total agency relocation expenses, which is provided to Congress as a part of the Object Class Analysis report.

100.6 What information must I provide on international travel?

Section 2505(g) of the Foreign Relations Authorizations Act, Fiscal Years 1998 and 1999 requires you to report for the agency as a whole:

- Total obligations in PY for official international travel (in thousands of dollars); and
- Total number of individuals engaged in such international travel in PY.

Use the following definitions to prepare this report:

- **International travel** means all travel between the United States and other nations, and travel between or within other nations. United States refers to the continental United States, Alaska, Hawaii, and all territories.
- **Expenditures** means the total obligations incurred and reported in object class 21, travel and transportation of persons, for international travel in PY. This includes all instances when an agency pays directly or reimburses the traveler. This does not include payments by contractors or grantees. Include the following work-related travel:
 - ▶ Conferences.
 - ▶ Meetings.
 - ▶ Inspections associated with treaty compliance.

Do not include:

- ▶ Expenses related to the relocation of Federal employees (for example, permanent change of station due to retirement or injury); or
- ▶ Deployment of troops for contingency operations.
- **Individuals** means the total number of people (not full-time equivalents) who engaged in international travel in PY. This specifically refers to the number of individuals, as opposed to the number of trips individuals take (for example, a person who takes two international trips is one individual).

Please enter your agency's data into MAX as soon as possible, but no later than five days after the budget database is locked. The lockout date for entering data on international travel is separate from the lockout date for entering data for the *President's Budget* exercise. Enter the data as follows:

- From the MAX A-11 data entry program, select the *Legal Requirements* exercise.
- For OMB account, enter the OMB agency code.
- You will find the data that your agency submitted last year. Replace with this year's data.
- After you have made your changes, save and upload your data.

OMB uses this information to prepare a table on international travel by the Executive Branch agencies. This table provides actual obligations for official international travel and the total number of individuals in each agency who engaged in such travel. This table is provided to Congress as a part of the Object Class Analysis report.

SECTION 110 -- SUPPLEMENTALS AND AMENDMENTS**Table of Contents**

110.1	How does the President inform Congress of changes in budget policy in between his annual transmittals of the budget?
110.2	What are supplementals and amendments?
110.3	What do I need to send to OMB?
110.4	What do I need to send to Congress?
Ex-110A	Supplemental requests--appropriations language
Ex-110B	Budget amendments--appropriations language
Ex-110C	Supplemental requests and budget amendments--program and financing schedule

110.1 How does the President inform Congress of changes in budget policy in between his annual transmittals of the budget?

After the President's budget has been transmitted to the Congress, the President informs the Congress of changes in his policy by transmitting appropriations requests to revise the original budget request for the current year (supplemental) or budget year (amendment), including proposed appropriations language for legislative initiatives (e.g., items included in the budget as legislative proposals).

All proposed revisions must conform to the policies of the President. The requests may be for additional amounts or proposed changes in appropriations language that do not affect amounts previously requested, such as technical corrections or changes in a limitation on the use of trust funds. These requests may be either supplementals or amendments, depending upon when they are transmitted (see section 110.2).

You should make every effort to postpone actions that require supplemental appropriations. However, submit proposals that decrease or eliminate amounts whenever such changes are warranted. When requesting supplementals and amendments that increase the amounts contained in the budget, provide proposals for reductions elsewhere in the agency (e.g., rescission proposals).

OMB will only consider requests for supplementals and amendments, including proposed changes in administrative expense limitations or authorizations of government corporations and trust funds, when:

- Existing law requires payments within the fiscal year (e.g., pensions and entitlements);
- An unforeseen emergency situation occurs (e.g., natural disaster requiring expenditures for the preservation of life or property);
- New legislation enacted after the submission of the annual budget requires additional funds within the fiscal year;
- Increased workload is uncontrollable except by statutory change; or

- Liability accrues under the law and it is in the Government's interest to liquidate the liability as soon as possible (e.g., claims on which interest is payable).

It generally takes a minimum of three weeks for OMB and the White House to consider agency proposals for supplementals or amendments that are not transmitted in the annual budget. Allow for this timing when making requests.

110.2 What are supplementals and amendments?

Supplementals are appropriations requests that are transmitted after completion of action on an annual appropriations bill by the Appropriations Committees of both Houses. They may be transmitted prior to, with, or subsequent to transmittal of the succeeding annual budget document. Supplemental requests that are known at the time the budget is prepared are normally transmitted to Congress with the budget, rather than later as separate transmittals. However, each case will be decided separately. OMB representatives will inform you which supplementals will be transmitted with the budget so you can submit the necessary information. These supplementals may be:

- *New supplementals*, requesting additional amounts not previously anticipated; or
- *Language only supplementals*, requesting changes in appropriations language that do not affect amounts previously appropriated.

Amendments are proposed actions that revise the President's budget request and are transmitted prior to completion of action on the budget request by the Appropriations Committees of both Houses of Congress. This includes appropriations language for activities authorized since transmittal of the President's budget that were included in the budget as a legislative proposal.

110.3 What do I need to send to OMB?

You need to submit the following materials in both hard copy and electronic versions. Also, you should be prepared to revise the material, as appropriate, to reflect Presidential decisions.

(a) *Appropriations language.*

- (1) *Supplementals.* Prepare language for supplemental requests, including emergency requests as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, in the format of exhibit 110A.
- (2) *Amendments.* Prepare language for budget amendments in the format of exhibit 110B. Use the language proposed for the budget year in the President's budget, not the current year appropriation as the base (i.e., make changes to the budget year proposed language).

(b) *Justification.*

Prepare a justification in accordance with applicable requirements of section 51. It should also include:

- The reason why additional funds are required in the fiscal year requested, identifying specifically which of the circumstances described in section 110.1 applies;

- An explanation of proposed language provisions, if necessary; and
- Pertinent data concerning the effect on Federal civilian employment.

For *supplemental requests* only, include the following:

- The date when requested funds are needed for obligation;
- A statement of actual and estimated obligations for the year, prepared on a quarterly basis; and
- A statement of actual obligations by month, for the previous three months.

(c) *Explanation of request.*

Provide a short explanation, including the effect of the request on outlays. This explanation should be suitable for transmittal to Congress as part of the President's proposal. If appropriate, the explanation may be a synopsis of the major points that appear in the justification.

(d) *Budget schedules and receipts data.*

Prepare and submit the following information, where the proposal affects the distribution of budget authority, obligations, or outlays. This information will not be entered into MAX, but should be prepared consistent with the instructions for the corresponding MAX schedules.

- Program and financing schedule (see section 82). If only a few items in a lengthy obligations by program activity section are affected, the activity items not changed may be grouped in a single line. However, show the rest of the program and financing schedule in full.
- Object classification schedule (see section 83).
- Personnel summary (see section 86.1).
- Receipts estimates (see section 81), when a supplemental or amendment will affect payments to a receipt account.
- Schedules on status of direct loans or status of guaranteed loans (see section 85), when a supplemental or amendment affects the level of direct loan obligations or loan guarantee commitments.

Column headings on the schedules will be modified as follows:

For *supplementals*, use transmittal code "1" in the account identification code. Retitle amount columns as illustrated in exhibit 110C and indicated below:

- *Presently available* (column 1). Enter the amount available under previous appropriations enacted for the current fiscal year.
- *Proposed supplemental* (column 2). Enter the additional amount requested.

SECTION 110 -- SUPPLEMENTALS AND AMENDMENTS

- *Revised estimate* (column 3). Enter the revised estimate of the total amount requested for the year (column 1 plus column 2).

For amendments, use transmittal code "0" in the account identification code. Retitle amount columns as illustrated in exhibit 110C and indicated below:

- *Pending request* (column 1). Enter the amount of the estimate currently pending before the Congress. Amounts included in the budget as items proposed for later transmittal should not be included.
- *Proposed amendment* (column 2). Enter the proposed change to the amount of the request currently pending before Congress.
- *Revised request* (column 3). Enter the total amount to be considered by Congress (column 1 plus column 2).

(e) *Letter from agency head*.

Provide a letter from the head of the agency that includes a statement concerning the validity of obligations, as required by 31 U.S.C. 1108 (see section 51.1 (b)).

110.4 What do I need to send to Congress?

Unless otherwise directed by the respective Committees, furnish 15 copies of the following information to each Appropriations Committee and five copies to the Congressional Budget Office as part of the agency's justification to the Congress of budget amendments and supplemental requests transmitted by the President:

- Program and financing schedule;
- Object classification schedule; and
- Personnel summary.

Column headings will be modified as described in section 110.3.

Supplemental Requests
Appropriations Language -- Continued

DEPARTMENT OF GOVERNMENT
OCEANIC AND ATMOSPHERIC BUREAU
Construction

Emergency request.

For an additional amount for "Construction" for emergency expenses resulting from flooding in the Pacific Northwest and other natural disasters, \$10,000,000 to remain available until expended: Provided that the entire amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

[Explanation. The last paragraph of the explanation should read as follows:

The entire amount requested has been designated by the President as an emergency requirement pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.]

DEPARTMENT OF GOVERNMENT
FEDERAL FOREST ADMINISTRATION
Construction

Emergency request,
including contingency.

For an additional amount for "Construction" for emergency expenses resulting from flooding in the Pacific Northwest and other natural disasters, \$60,000,000, to remain available until expended: Provided that the entire amount is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: Provided further, that of such amount, \$20,000,000 shall be available only to the extent an official budget request for a specific dollar amount that includes designation of the entire amount of the request as an emergency requirement as defined in such Act is transmitted by the President to Congress.

[Explanation. The last paragraph of the explanation should read as follows:

Of the request, \$40,000,000 has been designated by the President as an emergency requirement pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.]

Headings will be identical with those used in the current year appropriations act.

All language is underscored.

**Budget Amendments

SECTION 111 -- RELEASES OF CONTINGENT EMERGENCY FUNDING**Table of Contents**

111.1 What are releases of contingent emergency funding?

111.2 How do I request a release?

Ex-111 Releasing contingent emergency funding

111.1 What are releases of contingent emergency funding?

Releases of contingent emergency funding are actions by the President that make available for obligation previously appropriated emergency funds. These releases are made pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, as amended and may occur when an appropriations act provides funds that are contingent on the President submitting a budget request to Congress that designates the amount requested as an emergency requirement.

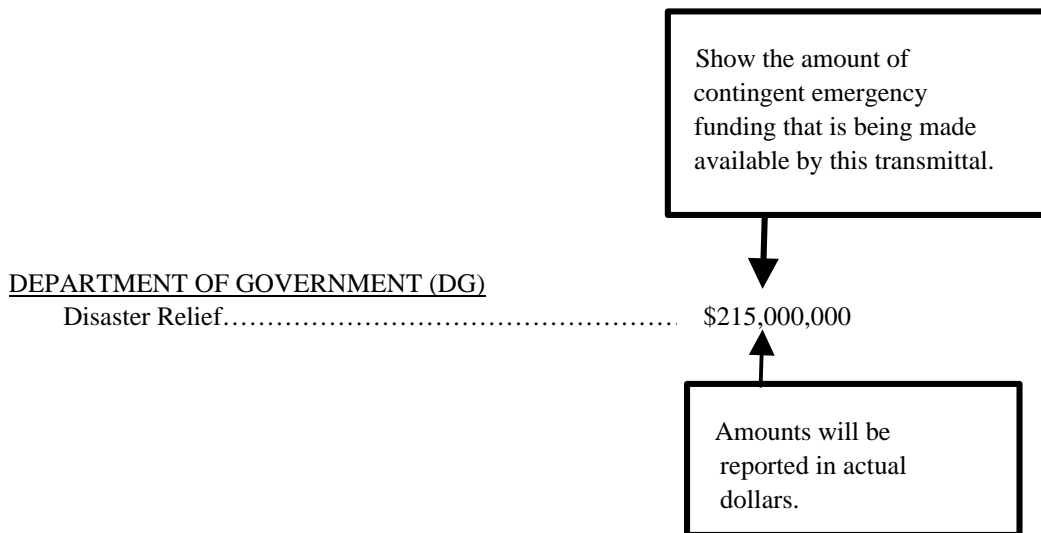

111.2 How do I request a release?

To request the release of contingent emergency funding, you need to submit the following materials in both hard copy and electronic versions. You should be prepared to revise the material, as appropriate, to reflect Presidential decisions.

- An explanation of the request in the format of exhibit 111 that includes:
 - ▶ A statutory reference to the source of the emergency funding;
 - ▶ Information on the total amount of emergency funding provided by Congress for the account, the amounts that have already been released, and the remaining amount that has not been released;
 - ▶ The specific circumstances that necessitate the release of the emergency funds; and
 - ▶ A description of how the funds will be used.
- A letter from the agency head.
- When requested by OMB, budget schedules (e.g., program and financing, object classification), prepared in accordance with the instructions for the corresponding MAX schedules.

Releasing Contingent Emergency Funding

EMERGENCY APPROPRIATIONS: AMOUNTS PREVIOUSLY APPROPRIATED MADE AVAILABLE BY THE PRESIDENT

Title I, Chapter 2, of the Miscellaneous Appropriations Act, 2001, as enacted by section 1000(a)(5) of the Consolidated Appropriations Act, 2000, P.L. 106-000, provided up to \$215.0 million to DG from disaster relief funds previously appropriated in Title III, of P.L. 106-74, contingent upon the President submitting a budget request to the Congress and designating the entire amount requested as an emergency requirement.

At this time, the entire \$215.0 million is required for DG to fund buyouts and relocation assistance for homes damaged by Hurricane Floyd-related flooding.

Provide explanation including the information specified in section 111.2.

SECTION 112 -- OTHER ACTIONS AND REQUIREMENTS FOLLOWING BUDGET TRANSMITTAL

Table of Contents

- 112.1 What do I need to know about rescission proposals and deferrals?
- 112.2 What do I need to know about Mid-Session Review?
- 112.3 What additional materials should I include in my congressional budget justifications?

Summary of Changes

Requires agencies to provide Congress with information to assess current and proposed capital projects that is consistent with the Administration's budget proposals (section 112.3).

112.1 What do I need to know about rescission proposals and deferrals?

The Impoundment Control Act of 1974 (Public Law 93-344), as amended, requires the President to transmit a *special message* to Congress whenever a rescission of budgetary resources is proposed. It also requires that special messages be transmitted to Congress when funds are withheld temporarily from obligation (i.e., deferred).

The President transmits *supplementary messages* to Congress when information contained in a special message transmitted previously is revised. Part VI of OMB Circular No. A-34 provides instructions on agency reporting procedures and required submissions to OMB. Section 82.9 explains how rescission proposals that are pending at the time the budget is transmitted are presented in the budget.

112.2 What do I need to know about Mid-Session Review?

The law requires the President to send a report to Congress updating budget estimates on or before July 15th. This report contains revised budget estimates resulting from changes in economic assumptions, technical reestimates, Presidential initiatives, and completed congressional actions that have occurred since transmittal of the budget. Your OMB representative will provide guidance on the development of these estimates at the appropriate time.

112.3 What additional materials should I include in my congressional budget justifications?

Section 41 U.S.C. 433(h) requires you to identify funding levels requested for education and training of the acquisition workforce in your budget justifications to the Congress.

Public Law 100-615 requires you to identify funds requested for energy conservation measures in your budget justifications to the Congress.

You should provide Congress with information to assess current and proposed capital projects that is consistent with the Administration's budget proposals, including appropriate information on planning; budgeting, including the current or proposed use of incremental or full funding; acquisition; and management of the projects.

**SECTION 112 -- OTHER ACTIONS AND REQUIREMENTS
FOLLOWING BUDGET TRANSMITTAL**

You must submit all budget justification materials to OMB for clearance before transmitting them to Congress (see section 36.3).

APPENDIX A -- SCOREKEEPING GUIDELINES

These budget scorekeeping guidelines are to be used by the House and Senate Budget Committees, the Congressional Budget Office, and the Office of Management and Budget (the "scorekeepers") in measuring compliance with the Congressional Budget Act of 1974 (CBA), as amended, and GRH, as amended. The purpose of the guidelines is to ensure that the scorekeepers measure the effects of legislation on the deficit consistent with established scorekeeping conventions and with the specific requirements in those Acts regarding discretionary spending, direct spending, and receipts. These rules shall be reviewed annually by the scorekeepers and revised as necessary to adhere to the purpose. These rules shall not be changed unless all of the scorekeepers agree. New accounts or activities shall be classified only after consultation among the scorekeepers. Accounts and activities shall not be reclassified unless all of the scorekeepers agree.

1. Classification of appropriations.

A list of appropriations that are normally enacted in appropriations acts is included in the conference report of the Balanced Budget Act of 1997, House Report 105-217, pp. 1014-1053. The list identifies appropriated entitlements and other mandatory spending in appropriations acts, and it identifies discretionary appropriations by category.

2. Outlays prior.

Outlays from prior-year appropriations will be classified consistent with the discretionary/mandatory classification of the account from which the outlays occur.

3. Direct spending programs.

Entitlements and other mandatory programs (including offsetting receipts) will be scored at current law levels, as defined in section 257 of GRH, unless congressional action modifies the authorizing legislation. Substantive changes to or restrictions on entitlement law or other mandatory spending law in appropriations laws will be scored against the Appropriations Committee's section 302(b) allocations in the House and the Senate. For the purpose of CBA scoring, direct spending savings that are included in both an appropriations bill and a reconciliation bill will be scored to the reconciliation bill and not to the appropriations bill. For scoring under sections 251 or 252 of GRH, such provisions will be scored to the first bill enacted.

4. Transfer of budget authority from a mandatory account to a discretionary account.

The transfer of budget authority to a discretionary account will be scored as an increase in discretionary budget authority and outlays in the gaining account. The losing account will not show an offsetting reduction if the account is an entitlement or mandatory program.

5. Permissive transfer authority.

Permissive transfers will be assumed to occur (in full or in part) unless sufficient evidence exists to the contrary. Outlays from such transfers will be estimated based on the best information available, primarily historical experience and, where applicable, indications of Executive or congressional intent.

This guideline will apply both to specific transfers (transfers where the gaining and losing accounts and the amounts subject to transfer can be ascertained) and general transfer authority.

6. Reappropriations.

Reappropriations of expiring balances of budget authority will be scored as new budget authority in the fiscal year in which the balances become newly available.

7. Advance appropriations.

Advance appropriations of budget authority will be scored as new budget authority in the fiscal year in which the funds become newly available for obligation, not when the appropriations are enacted.

8. Rescissions and transfers of unobligated balances.

Rescissions of unobligated balances will be scored as reductions in current budget authority and outlays in the year the money is rescinded.

Transfers of unobligated balances will be scored as reductions in current budget authority and outlays in the account from which the funds are being transferred, and as increases in budget authority and outlays in the account to which these funds are being transferred.

In certain instances, these transactions will result in a net negative budget authority amount in the source accounts. For purposes of section 257 of GRH, such amounts of budget authority will be projected at zero. Outlay estimates for both the transferring and receiving accounts will be based on the spending patterns appropriate to the respective accounts.

9. Delay of obligations.

Appropriations acts specify a date when funds will become available for obligation. It is this date that determines the year for which new budget authority is scored. In the absence of such a date, the act is assumed to be effective upon enactment.

If a new appropriation provides that a portion of the budget authority shall not be available for obligation until a future fiscal year, that portion shall be treated as an advance appropriation of budget authority. If a law defers existing budget authority (or unobligated balances) from a year in which it was available for obligation to a year in which it was not available for obligation, that law shall be scored as a rescission in the current year and a reappropriation in the year in which obligational authority is extended.

10. Contingent legislation.

If the authority to obligate is contingent upon the enactment of a subsequent appropriation, new budget authority and outlays will be scored with the subsequent appropriation. If a discretionary appropriation is contingent on the enactment of a subsequent authorization, new budget authority and outlays will be scored with the appropriation. If a discretionary appropriation is contingent on the fulfillment of some action by the Executive branch or some other event normally estimated, new budget authority will be scored with the appropriation, and outlays will be estimated based on the best information about when (or if) the contingency will be met. If direct spending legislation is contingent on the fulfillment of some action by the Executive branch or some other event normally estimated, new budget authority and outlays will be scored based on the best information about when (or if) the contingency will be met. Non-lawmaking contingencies within the control of the Congress are not scoreable events.

11. Scoring purchases, lease-purchases, capital leases, and operating leases.

When a law provides the authority for an agency to enter into a contract for the purchase, lease-purchase, capital lease, or operating lease of an asset, budget authority and outlays will be scored as follows:

For lease-purchases and capital leases, budget authority will be scored against the legislation in the year in which the budget authority is first made available in the amount of the estimated net present value of the Government's total estimated legal obligations over the life of the contract, except for imputed interest costs calculated at Treasury rates for marketable debt instruments of similar maturity to the lease period and identifiable annual operating expenses that would be paid by the Government as owner (such as utilities, maintenance, and insurance). Property taxes will not be considered to be an operating cost. Imputed interest costs will be classified as mandatory and will not be scored against the legislation or for current level but will count for other purposes.

For operating leases, budget authority will be scored against the legislation in the year in which the budget authority is first made available in the amount necessary to cover the Government's legal obligations. The amount scored will include the estimated total payments expected to arise under the full term of a lease contract or, if the contract will include a cancellation clause, an amount sufficient to cover the lease payments for the first fiscal year during which the contract is in effect, plus an amount sufficient to cover the costs associated with cancellation of the contract. For funds that are self-insuring under existing authority, only budget authority to cover the annual lease payment is required to be scored.

Outlays for a lease-purchase in which the Federal government assumes substantial risk (for example, through an explicit Government guarantee of third party financing) will be spread across the period during which the contractor constructs, manufactures, or purchases the asset. Outlays for an operating lease, a capital lease, or a lease-purchase in which the private sector retains substantial risk will be spread across the lease period. In all cases, the total amount of outlays scored over time against legislation will equal the amount of budget authority scored against that legislation.

No special rules apply to scoring purchases of assets (whether the asset is existing or is to be manufactured or constructed). Budget authority is scored in the year in which the authority to purchase is first made available in the amount of the Government's estimated legal obligations. Outlays scored will equal the estimated disbursements by the Government based on the particular purchase arrangement, and over time will equal the amount of budget authority scored against that legislation.

Existing contracts will not be rescored.

To distinguish lease purchases and capital leases from operating leases, the following criteria will be used for defining an operating lease:

- Ownership of the asset remains with the lessor during the term of the lease and is not transferred to the Government at or shortly after the end of the lease period.
- The lease does not contain a bargain-price purchase option.
- The lease term does not exceed 75 percent of the estimated economic lifetime of the asset.

- The present value of the minimum lease payments over the life of the lease does not exceed 90 percent of the fair market value of the asset at the inception of the lease.
- The asset is a general purpose asset rather than being for a special purpose of the Government and is not built to unique specification for the Government as lessee.
- There is a private-sector market for the asset.

Risks of ownership of the asset should remain with the lessor.

Risk is defined in terms of how governmental in nature the project is. If a project is less governmental in nature, the private-sector risk is considered to be higher. To evaluate the level of private-sector risk associated with a lease-purchase, legislation and lease-purchase contracts will be considered against the following type of illustrative criteria, which indicate ways in which the project is less governmental:

- There should be no provision of Government financing and no explicit Government guarantee of third party financing.
- Risks of ownership of the asset should remain with the lessor unless the Government was at fault for such losses.
- The asset should be a general purpose asset rather than for a special purpose of the Government and should not be built to unique specification for the Government as lessee.
- There should be a private-sector market for the asset.
- The project should not be constructed on Government land.

Language that attempts to waive the Anti-Deficiency Act, or to limit the amount or timing of obligations recorded, does not change the Government's obligations or obligational authority, and so will not affect the scoring of budget authority or outlays.

Unless language that authorizes a project clearly states that no obligations are allowed unless budget authority is provided specifically for that project in an appropriations bill in advance of the obligation, the legislation will be interpreted as providing obligation authority, in an amount to be estimated by the scorekeepers.

12. Write-offs of uncashed checks, unredeemed food stamps, and similar instruments.

Exceptional write-offs of uncashed checks, unredeemed food stamps, and similar instruments (i.e., write-offs of cumulative balances that have built up over several years or have been on the books for several years) shall be scored as an adjustment to the means of financing the deficit rather than as an offset. An estimate of write-offs or similar adjustments that are part of a continuing routine process shall be netted against outlays in the year in which the write-off will occur. Such write-offs shall be recorded in the account in which the outlay was originally recorded.

13. Reclassification after an agreement.

Except to the extent assumed in a budget agreement, a law that has the effect of altering the classification or scoring of spending and revenues (e.g., from discretionary to mandatory, special fund to revolving fund, on-budget to off-budget, revenue to offsetting receipt), will not be scored as reclassified for the purpose of enforcing a budget agreement.

14. Scoring of receipt increases or direct spending reductions for additional administrative or program management expenses.

No increase in receipts or decrease in direct spending will be scored as a result of provisions of a law that provides direct spending for administrative or program management activities.

15. Asset sales.

If the net financial cost to the Government of an asset sale is zero or negative (a savings), the amount scored shall be the estimated change in receipts and mandatory outlays in each fiscal year on a cash basis. If the cost to the Government is positive (a loss), the proceeds from the sale shall not be scored for purposes of the CBA or GRH.

The net financial cost to the Federal government of an asset sale shall be the net present value of the cash flows from:

- (1) Estimated proceeds from the asset sale;
- (2) The net effect on federal revenues, if any, based on special tax treatments specified in the legislation;
- (3) The loss of future offsetting receipts that would otherwise be collected under continued Government ownership (using baseline levels for the projection period and estimated levels thereafter); and
- (4) Changes in future spending, both discretionary and mandatory, from levels that would otherwise occur under continued Government ownership (using baseline levels for the projection period and at levels estimated to be necessary to operate and maintain the asset thereafter).

The discount rate used to estimate the net present value shall be the average interest rate on marketable Treasury securities of similar maturity to the expected remaining useful life of the asset for which the estimate is being made, plus 2 percentage points to reflect the economic effects of continued ownership by the Government.

16. Indefinite borrowing authority and limits on outstanding debt.

If legislation imposes or changes a limit on outstanding debt for an account financed by indefinite budget authority in the form of borrowing authority, the legislation will be scored as changing budget authority only if and to the extent the imposition of a limit or the change in the existing limit alters the estimated amount of obligations that will be incurred.

APPENDIX B -- SCORING LEASE-PURCHASES AND LEASES OF CAPITAL ASSETS

This Appendix provides instructions on scoring lease-purchases and leases of capital assets consistent with the scorekeeping rule developed by the executive and legislative branches in connection with the Budget Enforcement Act of 1990 (BEA), as revised pursuant to the Balanced Budget Act of 1997 (see Appendix A). The scorekeeping rule focuses on leases and lease-purchases specifically authorized by law. However, the scorekeeping requirements apply to all lease-purchase arrangements and capital leases, including those arrangements that agencies may enter into under existing general legal authorities and arrangements that are financed through the Federal Financing Bank. The only exception is that leases between Federal agencies generally will not be scored on this basis if the lessor recorded the full cost of the asset when it was acquired.

1. Scorekeeping rule.

When an agency is authorized to enter into a lease-purchase contract or capital lease, budget authority will be scored in the year in which the authority is first made available in the amount of the net present value of the Government's total estimated legal obligations over the life of the contract, as described in section 2 (b) below. Outlays for lease-purchases in which the Federal Government assumes substantial risk will be spread across the period during which the contractor constructs, manufactures, or purchases the asset. Outlays for a capital lease or a lease-purchase in which the private sector retains substantial risk will be spread across the lease term. The scorekeeping requirements are summarized below.

For operating leases, budget authority is required for the first year of the contract in the amount necessary to cover the Government's legal obligations, consistent with the requirements of the Antideficiency Act. This will include the estimated total payments expected to arise under the full term of the contract or, if the contract includes a cancellation clause, an amount sufficient to cover the lease payments for the first year plus an amount sufficient to cover the costs associated with cancellation of the contract. (For each subsequent year, sufficient budget authority is required to cover the annual lease payment plus any additional cancellation costs.) In a limited number of instances, where funds are self-insuring under existing authority, only the amount of budget authority needed to cover the annual lease payment is required to be scored. OMB will advise agencies if funds should be considered self-insuring for this purpose.

Unless otherwise specified by law, budget authority is available for liquidating obligations (i.e., outlays) for only five fiscal years after the authority expires. For leases financed by annual or multi-year budget authority, agencies should ensure that the appropriations language allows the budget authority to remain available for lease payments over the full term of the lease. If this period is expected to be longer than five fiscal years after the authority expires, the appropriations language should include the provision described in section 96.5.

When an agency modifies or amends an existing capital lease or lease-purchase contract, any remaining budgetary resources prior to modification should be used to offset the cost of the new contract. The amount scored will be the difference in the net present value of the Government's total estimated legal obligations between the new contract and the remaining term of the original contract. (Both net present values should be calculated using the Treasury borrowing rates published in the annual update to Appendix C of OMB Circular No. A-94 at the time the contract is amended (see section 4). There would be no remaining budgetary resources if funds equal to the lease payments or the present value of the lease payments were not scored up front at the time the lease was signed. In this case, the full cost of the new contract should be scored, consistent with the rules for scoring lease-purchases and capital leases. When the lease agreement contains an option to renew that can be exercised without additional legislation, it will be presumed that the

**APPENDIX B -- SCORING LEASE-PURCHASES
AND LEASES OF CAPITAL ASSETS**

option will be exercised for purposes of calculating the term of the lease and scoring budget authority. When the lease agreement contains an option to purchase at less than fair market value (at the time the option is to be exercised), and the option can be exercised without additional legislation, it will be presumed that the option will be exercised for purposes of classifying the type of lease and scoring budget authority.

SUMMARY OF SCOREKEEPING REQUIREMENTS

Transaction	Budget Authority	Outlays
Lease-purchase without substantial private risk	Amount equal to asset cost recorded up front; amount equal to imputed interest costs recorded on an annual basis over lease period.	Amount equal to asset cost scored over the construction period in proportion to the distribution of the contractor's costs; amount equal to imputed interest costs recorded on an annual basis over lease term.
Lease-purchase with substantial private risk	Amount equal to asset cost recorded up front; amount equal to imputed interest costs recorded on an annual basis over lease term.	Scored over lease term in an amount equal to the annual lease payments.
Capital lease	Amount equal to asset cost recorded up front; amount equal to imputed interest costs recorded on an annual basis over lease term.	Scored over lease term in an amount equal to the annual lease payments.
Operating lease	Amount equal to total payments under the full term of the lease or amount sufficient to cover first year lease payments plus cancellation costs recorded up front	Scored over lease term in an amount equal to the annual lease payments.

2. Budget presentation.

(a) General.

For the purposes of scorekeeping transactions that involve lease-purchases and capital leases, the costs are separated into the following components:

- Asset cost (which equals the present value of the lease payments).
- Imputed interest cost (which equals the financing cost Treasury would have incurred if it had financed the project by borrowing).

These concepts are defined more fully in section 3. Guidance on calculating the appropriate amounts is provided in section 4. Budget authority and outlays attributable to asset costs will be classified as investment-type activities (physical assets), and budget authority and outlays attributable to imputed interest costs will be classified as non-investment activities (see section 84.4).

(b) *Budget authority.*

- *Amounts.* The up-front budget authority required for both lease-purchases and capital leases is called the asset cost. This equals the present value of the minimum lease payments excluding payments for identifiable annual operating expenses that would be paid by the Government as owner, such as utilities, maintenance, and insurance. Property taxes will not be considered to be an operating expense and will be included in the calculation of the up-front budget authority. (See section 3 for the treatment of property taxes for purposes of distinguishing operating leases from capital leases.) The present value of the lease payments is discounted as of the date of the first payment (or the beginning of the lease term, whichever is earlier) using the appropriate interest rate (see section 4).

Additional budget authority equal to Treasury's cost of financing (i.e., the imputed interest cost) plus any annual operating expenses will be recorded on an annual basis over the lease term.

- *Type of authority.* When an agency enters into a capital lease or lease-purchase under general authorities available to the agency, it must do so within the limits of the budgetary resources available to it and the constraints of the scorekeeping requirements.

If Congress enacts legislation that enables an agency to enter into a lease-purchase or capital lease for a specific project without further congressional action (e.g., appropriations action), it will be assumed that Congress has provided the budget authority required for the transaction. If Congress does not provide the budget authority in the form of an appropriation, then authority to borrow or contract authority will be recorded as follows:

- ▶ *Authority to borrow* will be recorded if the transaction is a lease-purchase without substantial private risk, in which case outlays need to be scored up-front – in advance of appropriations for the annual lease payment (or offsetting collections). A portion of the amount subsequently appropriated (or collected, if the agency receives offsetting collections) will be applied to retire outstanding agency debt attributable to the lease-purchase. (See sections 2(c) and 2(d) for more information on how that portion is determined and presented in the Budget.)
 - ▶ *Contract authority* will be recorded if the transaction is a lease-purchase with substantial private risk or a capital lease, in which case outlays will be scored over the lease term and financed by appropriations for the annual lease payment (or offsetting collections). A portion of the amount appropriated (or collected, if the agency receives offsetting collections) will be applied to liquidate contract authority. (See sections 2(c) and 2(d) for more information on how that portion is determined and presented in the Budget.)
- *Timing.* When Congress enacts legislation that specifically enables an agency to enter into a lease-purchase or capital lease, the budget authority required for the transaction will be recorded when the authority first becomes available for obligation. Obligations will be recorded when the lease agreement is signed. When the authority stems from general authority available to the agency, obligations are recorded, and sufficient budgetary resources must be available, when the lease agreement is signed.

(c) *Outlays.*

- *Lease-purchases without substantial private risk.* Outlays are not equal to the annual lease payments.
 - ▶ Outlays are scored over the period during which the contractor constructs, manufactures, or purchases the asset, in an amount equal to the asset cost. This amount will equal the up-front budget authority. Amounts of the asset cost in excess of the contractor's actual construction or manufacturing costs should be distributed in proportion to the distribution of the construction or manufacturing costs. If the asset already exists, the outlays will be recorded in the year in which the lease-purchase contract is signed.
 - ▶ Outlays equal to the imputed interest costs are reported on an annual basis over the lease term.
- *Lease-purchases with substantial private risk and capital leases.* Outlays are scored annually equal to the annual lease payments.
 - ▶ Over the life of the lease agreement, a portion of the outlays (equivalent to the asset cost) will come from the balances obligated when the lease agreement was signed, and a portion (equivalent to the imputed interest cost) will come from new budget authority. The appropriate amounts can be determined from amortization tables developed in accordance with the instructions in section 4.

(d) *Annual appropriations for lease financed by contract authority or borrowing authority.*

The annual lease payments under a lease-purchase or capital lease can be divided into two components:

- Asset cost.
- Imputed interest cost.

These amounts can be determined from the amortization tables developed in accordance with the instructions in section 4.

Lease-purchases and capital leases that are financed by contract authority or borrowing authority (see section 2(b)) will generally require annual appropriations in an amount equal to the annual lease payment. Since budget authority equal to the asset cost is scored up front, the portion of the annual appropriation that corresponds to the amortization of the asset cost is not scored as new budget authority. If it were, total budget authority would be overstated over the life of the lease. The budget authority that is recorded on an annual basis will equal the imputed interest cost. The required adjustments are explained below.

- *For lease-purchases without substantial private risk that are financed by borrowing authority.* An amount equal to the amortization of the asset cost component of the annual lease payment will be treated as redemption of debt and deducted from the new budget authority totals. On the program and financing schedule (see section 82), this amount will be reported as a negative entry on line 4047 or 6047. (If offsetting collections are used to make the annual lease payment in lieu of an appropriation, the amount will be reported as a negative entry on line 6847 or 6947.)

- *For capital leases and lease-purchases with substantial private risk that are financed by contract authority.* An amount equal to the amortization of the asset cost component of the annual lease payment will be treated as liquidating cash and deducted from the new budget authority totals. On the program and financing schedule (see section 82), this amount will be reported as a negative entry on line 4049 or 6049. (If offsetting collections are used to make the annual lease payment in lieu of an appropriation, the amount will be reported as a negative entry on line 6849 or 6949.)

(e) *Agency debt.*

For lease-purchases without substantial private risk, agency borrowing must be recorded to finance the outlays scored for the construction, manufacture, or purchase of the asset. The agency debt that accumulates over this period is equal to the asset cost; this debt is subsequently redeemed over the lease payment period in an amount equal to a portion of the annual lease payment. The appropriate amounts of debt and debt redemption can be determined from the amortization tables developed in accordance with the instructions in section 4, Step 5. Interest on agency debt can be determined in accordance with Steps 3, 4, and 5.

If the account has a balance sheet, the amount of such agency debt should be included as a separate item (and separate from other agency debt) under liabilities and identified as having been incurred to finance lease-purchases. All other accounts should include the amount of agency debt in the narrative statement for the account (see section 97.6).

3. Definitions and concepts.

For the purposes of scoring lease-purchases and capital leases, the following definitions and concepts apply. Agencies should consult with OMB in cases where enhanced use leases and public-private partnerships are involved. Public-private partnerships should not be used solely or primarily as a vehicle for obtaining private financing of Federal construction or renovation projects. Such transactions should be used only when they are the least expensive method, in present value terms, to finance construction or repair.

Lease-purchase means a type of lease in which ownership of the asset is transferred to the Government at or shortly after the end of the lease term. Such a lease may or may not contain a bargain-price purchase option.

Capital lease means any lease other than a lease-purchase that does not meet the criteria of an operating lease.

Operating lease means a lease that meets all the criteria listed below. If the criteria are not met, the lease will be considered to be a capital lease or a lease-purchase, as appropriate. Multi-year service contracts (e.g., grounds maintenance) and multi-year purchase contracts for expendable commodities (e.g., aspirin) will be considered to be operating leases. Agencies should consult with OMB in cases where a service contract requires a private contractor to construct or acquire a capital asset solely or primarily to provide the service to the government.

- Ownership of the asset remains with the lessor during the term of the lease and is not transferred to the Government at or shortly after the end of the lease term.
- The lease does not contain a bargain-price purchase option.

**APPENDIX B -- SCORING LEASE-PURCHASES
AND LEASES OF CAPITAL ASSETS**

- The lease term does not exceed 75 percent of the estimated economic life of the asset.
- The present value of the minimum lease payments over the life of the lease does not exceed 90 percent of the fair market value of the asset at the beginning of the lease term.
- The asset is a general purpose asset rather than being for a special purpose of the Government and is not built to the unique specification of the Government as lessee.
- There is a private sector market for the asset.

The following guidelines will be used in distinguishing between operating leases, capital leases, and lease purchases. They should be used in calculating the *term of the lease* and the value of the *minimum lease payments*:

- *Estimate of fair market value.* In the case of real property, the fair market value should be based on current market appraisals. If no asset exists, the fair market value of the proposed asset should be calculated based on the Government's estimate of the cost to construct a facility equal in size and other characteristics to the amount of space to be leased. The estimate should include consideration of the Government's total direct and indirect costs of the facility, including land, design, site improvements, and management costs.
- *Projects on Government land.* If the project is constructed or located on Government land, it will be presumed to be for a special purpose of the Government.
- *Renewal and purchase options.* If the lease agreement contains an option to renew that can be exercised without additional legislation, it will be presumed that the option will be exercised. If the lease agreement contains an option to purchase at less than fair market value (at the time the option is to be exercised), and the option can be exercised without additional legislation, it will be presumed that the option will be exercised.
- *Cancellation clauses.* It will be presumed that the lease will run for the full term of the contract, and the minimum lease payments will be calculated on the basis of the lease payments that will be made over the full term of the lease (including options to renew).
- *Property taxes.* Property taxes, along with other operating expenses, will be excluded from the lease payments for purposes of comparing the present value of the minimum lease payments with the fair market value of the asset. (Note: Property taxes will be included in the calculation of the net present value of the lease payments for purposes of scoring budget authority under the BEA. See section 2 (b) above.)
- *Interest rates.* The present value of the minimum lease payments will be calculated on the basis of Treasury rates for marketable debt instruments of similar maturity to the lease term (see section 4).

Risk means the level of private-sector risk. Lease-purchase agreements are scored as with or without substantial private risk depending on the level of private-sector risk. Substantial private risk means the absence of substantial government risk. Risk is defined in terms of how governmental in nature the project is. That is, if the project is less governmental in nature, the private sector risk is considered to be higher.

The following types of illustrative criteria indicate ways in which the project is *less governmental*:

- There is no provision of Government financing and no explicit Government guarantee of third-party financing.
- Risks incident to ownership of the asset (e.g., financial responsibility for destruction or loss of the asset) remain with the lessor unless the Government was at fault for such losses.
- The asset is a general purpose asset rather than being for a special purpose of the Government and is not built to the unique specification of the Government as lessee.
- There is a private-sector market for the asset.
- The project is not constructed on Government land.

Imputed interest cost means the financing costs that Treasury would have incurred if it had sold debt to the public equal to the total project cost. The difference between the total estimated legal obligations (excluding obligations for annual operating expenses as described in section 2(b)) and their estimated net present value represents imputed interest costs. Imputed interest costs will be calculated at Treasury rates for marketable debt instruments of similar maturity to the lease term on the date the contract is signed. These costs will be considered mandatory under the BEA and will be shown in the same function as interest on agency debt, that is, in the function that provided the obligational authority to enter into the contract.

Differential cost of financing means the total annual interest payments on any debt sold to the public less the interest payments that would have been made on the same amount of debt at the Treasury rate (i.e., less the imputed interest costs). Simply stated, this corresponds to any interest above Treasury's interest rate.

Asset cost means the present value of the agency's minimum lease payments discounted from the date of the first payment (or the beginning of the lease term, whichever is earlier) using the Treasury interest rate for marketable debt instruments of similar maturity to the lease term on the date the contract is signed and excluding obligations for identifiable annual operating expenses as described in section 2(b). Asset cost corresponds to the total construction or acquisition costs, plus property taxes and any interest above Treasury's cost of financing (i.e., the differential cost of financing).

4. Guidance on calculations.

A schedule of lease payments or an amortization schedule is required to calculate budget authority, outlays, and debt. Illustrative amortization schedules and PC spreadsheets for the amortization schedules (in Lotus 1-2-3 format), are available from OMB's Budget Review and Concepts Division (telephone (202) 395-7595). The correct Treasury rate to use for discounting to present value and for calculating imputed interest costs will be based on the economic assumptions in the most recent budget, which are published in the annual update to Appendix C of OMB Circular No. A-94. Revised Treasury interest rates are released whenever economic assumptions for the budget are updated. Use Treasury rates for marketable debt instruments of similar maturity to the lease term on the date the contract is signed. Discount from the date of the first payment (or the beginning of the lease term, whichever is earlier). The term selected for the Treasury rate should be comparable to the term of the capital lease or lease-purchase.

Step 1 -- Calculate up-front BA.

For lease-purchase without substantial private risk; lease-purchase with substantial private risk; and capital lease: To determine up-front BA (i.e., asset cost), calculate the present value of the lease payments, discounting from the date of the first payment or the beginning of the lease term, whichever is earlier, using the appropriate Treasury interest rate as the discount factor and excluding obligations for identifiable annual operating expenses as described in section 2(b). This BA is scored when the authority to enter into a contract for the lease-purchase or capital lease first becomes available for obligation.

Step 2 -- Calculate outlays over the period during which the contractor constructs, manufactures, or purchases the asset.

For lease-purchase without substantial private risk: Score outlays in proportion to the distribution of the contractor's costs. For example, assume a contractor's costs on a \$50 million project are estimated to be \$7.5 million the first year, \$27.5 million the second year, and \$15 million the third year. The analyst should apply spendout rates of 15 percent, 55 percent, and 30 percent to the BA calculated in Step 1 for the first, second, and third years, respectively. Total outlays at the end of the construction, manufacture, or purchase period should equal the BA calculated in Step 1. (Note that total outlays will ordinarily exceed the contractor's costs.)

For lease-purchase with substantial private risk and capital lease: Outlays are not scored during this period. Refer to Step 4 for outlay scoring.

Step 3 -- Calculate annual BA for the lease payment period.

For lease-purchase without substantial private risk; lease-purchase with substantial private risk; and capital lease: Annual BA will equal the imputed interest costs calculated using the same Treasury interest rate used to discount the lease payments in Step 1. The interest portion of each periodic payments is the imputed interest cost. In the case of a lease-purchase without substantial private risk, the interest rate should be applied to debt that is initially equal to the up-front BA calculated in Step 1 and that is then amortized over the lease term in accordance with Step 5.

Step 4 -- Calculate outlays over the lease payment period.

For lease-purchase without substantial private risk: Annual outlays are equal to the annual BA (i.e., the imputed interest costs).

For lease-purchase with substantial private risk and capital lease: Annual outlays are equal to the lease payments.

Step 5 -- Calculate agency debt (applies only to lease-purchases without substantial private risk).

Agency debt accumulates during the period of construction, manufacture, or purchase of the asset. The increase in debt each year equals the amount of outlays calculated in Step 2. Agency debt is subsequently redeemed over the lease payment period according to an amortization schedule. The amount of debt redemption each year is equal to the lease payment less the imputed interest cost as defined in Step 3. (Debt

redemption is not scored as BA or outlays.) Imputed interest costs are scored as BA and outlays and are also scored as interest on agency debt.

5. Reporting to OMB and Treasury.

Budget execution reports and apportionment requests will reflect budget amounts in accordance with these requirements. Amounts (e.g., budget authority and outlays) will be reported to Treasury on the same basis.

APPENDIX C – LISTING OF OMB AGENCY/BUREAU AND TREASURY CODES

Under the MAX system, OMB assigns agency and bureau codes that are used to identify and access data in the budget database. The following table lists these codes in budget order. It also provides the corresponding agency codes assigned by Treasury. In certain instances, a different Treasury agency code may be used for some accounts in an agency; a complete listing can be found in the Budget Accounts Title (BAT) file. (See section 79.2 for additional information on account identification codes.)

Agency	OMB Codes		Treasury agency code

APPENDIX C -- LISTING OF OMB AGENCY/BUREAU AND TREASURY CODES

* Under Department of Defense-Military, Treasury agency codes are assigned as follows:

Agency	Code
Navy	17
Army	21
Air Force	57
Defense-wide	97

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

Development of the MAX edit checks is an ongoing process. The help messages included in the on-line MAX screens will reflect the latest edit checks and descriptions of these checks. In addition to the MAX edit checks, OMB has developed diagnostic reports to help you eliminate errors. Some of these diagnostic reports are described in Appendix E.

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
A	3490	Past year amounts cannot be coded as emergency funding.	81.4
A	3500	Subfunction does not match BAT file subfunction for this account.	81.4
A	3510	If BA is reported (lines 4300 - 6990), then outlays (lines 91xx - 98xx) must also be reported (even if amounts are zero).	81.4
A	3520	Outlays from new authority (except from offsetting collections) reported on line 9111 cannot exceed the total amount of BA reported on lines 4300-6790.	81.4
A	3550	Outlays from spending authority from offsetting collections (lines 9311, 9321) should be reported if offsetting collections (lines 6890, 6990) are reported and vice versa.	81.4
A	3580	If offsetting collections (line 8800-8845) are reported in the inyears in schedule A, then they must be reported in the outyears.	81.4
A	3590	If spending authority from offsetting collections (lines 6890, 6990) is reported in the inyears in schedule A, then it must be reported in the outyears.	81.4
A	3610	According to the BAT file, limitation data are required for this account. For changes to limitation requirements, consult OMB.	81.4
A	3630	Outlays from discretionary spending authority from offsetting collections (line 6890) must be reported on discretionary lines 9311-9321.	81.4
A	3635	Outlays from mandatory spending authority from offsetting collections (line 6990) must be reported on mandatory lines 9311-9321.	81.4
A	3640, 3645	Outlays from new spending authority from offsetting collections (line 9311) cannot exceed total new spending authority from offsetting collections (lines 6890, 6990).	81.4
A	3650	For supplementals, budget authority data (lines 4300 - 6990) are not generally reported beyond the current year.	81.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
A	3660	For rescission proposals, current year BA must be negative or zero.	81.4
A	3670	For rescission proposals, budget year BA must be negative or zero.	81.4
A	3680	For rescission proposals, there can be no budget year estimates for outlays from new authority (line 9111).	81.4
A	3690	For rescission proposals, outlays must be negative or zero in the current and budget years.	81.4
A	3940	User fee data and coding are required for offsetting collections (lines 8840 and 8845) in this account.	81.4
A, P	3945	User fee amounts reported on lines 8840 and 8845 in schedule A cannot exceed the amounts shown on lines 8840 and 8845 in schedule P.	81.4, 82.7
A, P	3720	Schedule P is required when data are reported for PY-BY in schedule A.	81.4, 82
A, P	3840	Change in uncollected customer payments from Federal sources (unexpired) (line 8895) and collections credited to expired accounts (line 8896) reported in schedule A must equal the corresponding entries in schedule P.	81.4, 82.6
A, P	3850	Offsetting collections (lines 8800-8845) reported in schedule A must equal the corresponding entries in schedule P.	81.4, 82.6
A, S	3700	For liquidating accounts, all budget authority, limitations and outlays must be coded mandatory, authorizing committee.	81.4
A, S	3710	Budget authority, outlays and limitation data (schedules A & S) are not required for direct and guaranteed loan financing accounts.	81.4
A, S	3860	Budget authority is required in schedule S (lines 4300 - 6990) if current year budget authority is reported in schedule A.	81.4
A, S	3870, 3910	Outlays are required in schedule S (lines 9111-98xx) if current year outlays are reported in schedule A.	81.4
A, S	3880	If a line entry in schedule A is coded mandatory, then the same entry must be reported in schedule S, with the same category code and amount.	81.4
A, S	3890	The budget year Presidential policy discretionary spendout rate for new BA (i.e., the percent of outlays from new budgetary resources) should be the same as the baseline spendout rate for that year (within 1%).	81.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
A, S	3900	The budget year Presidential policy discretionary spendout rate for new offsetting collections (i.e., the percent of outlays from new offsetting collections) should be the same as the baseline spendout rate for that year (within 1%).	81.4
A, S	3930	Current year outlays reported in schedule A (lines 91xx - 98xx) must equal the corresponding entries in schedule S.	81.4
C	4410	Schedule C is not required for direct and guaranteed loan financing accounts.	84
C	4420	Budget authority and outlays reported for R&D performed by colleges and universities on lines 1451-xx through 1455-xx must equal the budget authority and outlays reported for the conduct of basic and applied research on lines 1411-xx through 1422-xx.	84.4
C	4430	Subfunction does not match BAT file subfunction for this account.	84
C, A	4440	The sum of outlays in schedule C must equal the outlays reported in schedule A. (Rounding tolerance of \$2M)	81.4, 84
C, A	4450	The sum of budget authority in schedule C must equal the budget authority reported in schedule A. (Rounding tolerance of \$2M)	81.4, 84
C, A	4460	Budget authority (lines 4300 - 6990) is required in schedule A if budget authority (lines xxxx-01) is reported in schedule C.	81.4, 84
C, A	4470	Outlays (lines 9111-98xx) are required in schedule A if outlays (lines xxxx-02) are reported in schedule C.	81.4, 84
D	2230	Schedule D is not valid for this account.	86.3
D	2240	In budget plan schedules, a subtotal (line 0791) is required if multiple detail lines (0701-0789) are used and a reimbursable line exists (line 0801) and must equal the sum of detail lines (0701-0789). (Rounding tolerance of \$2M)	86.3
D	2250	A total line (line 0893) is required if multiple lines (0601-0801) are present and must equal the sum of detail lines (lines 0601-0801) reported in schedule D. (Rounding tolerance of \$2M)	86.3
D	2260	In budget plan schedules, a subtotal (line 0691) is required if multiple detail lines (0601-0689) are used and a reimbursable line exists (line 0801) and must equal the sum of detail lines (0601-0689). (Rounding tolerance of \$2M)	86.3

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
E	3090	Revenue (line 01x1), expense (line 01x2), and net income or loss (line 01x5) must be reported for each program.	86.2
E	3100	Revenue for the account as a whole (line 0191) must equal the sum of the revenue reported for each program (lines 0101 - 0181). (Rounding tolerance of \$2M)	86.2
E	3110	Expense for the account as a whole (line 0192) must equal the sum of the expense reported for each program (lines 0102 - 0182). (Rounding tolerance of \$2M)	86.2
E	3120	When information is provided for two or more programs, net income or loss (line 0195) will be reported for the account as a whole.	86.2
E	3140	Net income or loss for the account as a whole (line 0195) must equal the sum of the revenue (lines 0101 - 0181) and expense (lines 0102 - 0182) (minus entries) reported for each program. (Rounding tolerance of \$2M)	86.2
E	3145	Other comprehensive income for the account as a whole (line 0198) must equal the sum of the other comprehensive income (lines 0108 - 0188) reported for each program. (Rounding tolerance of \$2M)	86.2
E	3148	Total comprehensive income for the account as a whole (line 0199) must equal the sum of the revenue (lines 01x1), expense (lines 01x2), and the other comprehensive income (lines 01x8) reported for each program. (Rounding tolerance of \$2M)	86.2
E	3150	Net income or loss (e.g., line 0105) for each program must equal the sum of the revenue (e.g., line 0101) and expense (e.g., line 0102) (a minus entry) reported for that program.	86.2
E	3155	Total comprehensive income (e.g., line 0109) for each program must equal the sum of the revenue (e.g., line 0101), expense (e.g., line 0102), and the other comprehensive income (e.g., line 0108) reported for that program.	86.2
E	3160	Statement of operations (schedule E) should not be reported for financing accounts.	86.2
F	3180	The net present value of assets related to direct loans (line 1499) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3190	The net present value of assets related to defaulted guaranteed loans (line 1599) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
F	3200	Direct loans and interest receivable, net (line 1604) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3210	The value of assets related to direct loans (line 1699) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3220	Defaulted guaranteed loans and interest receivable, net (line 1704) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3230	The value of assets related to loan guarantees (line 1799) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3240	Total assets (line 1999) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3250	Total liabilities (line 2999) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3260	Total net position (line 3999) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F	3270	Total net position (line 3999) must equal total assets (line 1999) minus total liabilities (line 2999). (Rounding tolerance of \$2M)	86.2
F	3280	Total liabilities and net position (line 4999) must equal the sum of the corresponding detail. (Rounding tolerance of \$2M)	86.2
F, G	3290	Direct loans, gross reported on line 1601 of schedule F must equal the outstanding balances of direct loans reported on line 1290 in schedule G. (Rounding tolerance of \$2M)	85.10, 86.2
F, H	3300	Defaulted guaranteed loans receivables, gross reported on line 1501 of schedule F must equal defaulted guaranteed loans receivable reported on line 2390 in schedule H. (Rounding tolerance of \$2M)	85.10, 86.2
G	2570	For direct loans, if total direct loan obligations (line 1150) are reported, then a line for appropriations act limitation on direct loans (line 1111) is required, even if no amounts are shown.	85.10
G	2580	The end of year balance of direct loans outstanding (line 1290) must equal the sum of the direct loan outstanding entries (lines 1210 - 1264). (Rounding tolerance of \$2M)	85.10

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
G	2590	For direct loans, unobligated direct loan limitation line (1142) should only be reported in the past and current years.	85.10
G	2600	For direct loans, the start of year outstanding balance, (line 1210) must equal the preceding year's end of year balance (line 1290).	85.10
G	2620	Total direct loan obligations (line 1150) must equal the sum of the appropriations act limitation on direct loan obligations plus adjustments (lines 1111 - 1143). (Rounding tolerance of \$2M)	85.10
G	2650	Data on direct loan limitations (lines 1111 - 1150) are not required for liquidating accounts.	85.10
G	2660	Data on direct loan limitations and obligations (lines 1111 - 1150) are required for direct loan financing accounts.	85.10
G	2700	Direct loan repayments (line 1251 - 1253) in regular budget schedules (transmittal code 0) must be negative.	85.10
G, F	2770	The outstanding balances of direct loans (line 1290) in schedule G cannot be less than the balance of loans disbursed (line 1401) in schedule F.	85.10, 86.2
G, H	2550	Credit financing accounts must have either schedule G or H but not both.	85.8
G, H	2565	Credit liquidating accounts must have schedule G and/or H.	85.8
G, H	2610	If there are proceeds from loan asset sales to the public with recourse (line 1253 in schedule G), then the absolute value of that amount must be greater than or equal to the guarantees of loans sold to the public with recourse (line 2232 in schedule H).	85.10
G, H, Y	2558	Credit program accounts cannot have schedules G, H, or Y.	85.8
G, P	2630	Direct loan repayments or prepayments (line 1251) plus proceeds from loan asset sales (line 1252) in schedule G must be equal to or less than offsetting collections from non-Federal sources (line 8840) in schedule P.	85.10
G, P	2640	Direct loan disbursements (line 1231) plus purchase of loan assets (line 1232) must be equal to or less than gross outlays (line 8700) in schedule P.	85.10
G, P	2750	Data on net financing disbursements are required (line 6300) and must be equal to financing disbursements (line 9000) in schedule P for financing accounts.	85.10

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
G, Y	2780	Federal credit data, baseline estimates (schedule Y) are required if schedule G is present.	85.10
H	2790	For guaranteed loans, the start of year outstanding balance, (line 2210) must equal the preceding year's end of year balance (line 2290).	85.10
H	2800	For guaranteed loans, if total guaranteed loan commitments (line 2150) are reported, then a line for appropriations act limitation on guaranteed loans made by private lenders (line 2111) is required, even if the amounts are zero.	85.10
H	2810	The end of year outstanding balance of defaulted guaranteed loans that result in loans receivable (line 2390) must equal the sum of the detail entries (lines 2310 - 2364). (Rounding tolerance of \$2M)	85.10
H	2820	The end of year balance of guaranteed loans outstanding (line 2290) must equal the sum of the guaranteed loan outstanding entries (lines 2210 - 2264). (Rounding tolerance of \$2M)	85.10
H	2830	For defaulted guaranteed loans that result in loans receivable, the outstanding balance start of year (line 2310) must equal the outstanding balance from the end of the preceding year (line 2390).	85.10
H	2840	If an outstanding balance of guaranteed loans, end of year is reported (line 2290), then an entry for the guaranteed amount of guaranteed loans outstanding, end of year (line 2299) is required.	85.10
H	2850	For guaranteed loans, the guaranteed amount of the outstanding loans (line 2299) cannot exceed the amount of the outstanding guaranteed loans, end of year (line 2290).	85.10
H	2860	Disbursements for guaranteed loan claims (line 2331) must be equal to or greater than the absolute value of the amount reported as terminations for default that result in loans receivable (line 2261).	85.10
H	2870	Total guaranteed loan commitments (line 2150) must equal the sum of appropriations act limitations on guaranteed loans plus adjustments (lines 2111 - 2143). (Rounding tolerance of \$2M)	85.10
H	2880	For guaranteed loans, the guaranteed amount of the guaranteed loan commitments (line 2199) cannot exceed the amount of the total guaranteed loan commitment (line 2150).	85.10

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
H	2900	For guaranteed loans, the uncommitted guaranteed loan limitation data (line 2142) should only be reported in the past and current years.	85.10
H	2910	Data on guaranteed loan limitations (lines 2111 - 2150) are not required for liquidating accounts.	85.10
H	2920	Guaranteed loan repayments (line 2251 - 2263) in regular budget schedules (transmittal code 0) must be negative.	85.10
H	2940	For liquidating accounts, if terminations for default that result in loans receivable (line 2261) are reported, disbursement for guaranteed loan claims must be reported (line 2331).	85.10
H	2980	Data on guaranteed loan limitations and commitments (lines 2111 - 2150) are required for guaranteed loan financing accounts.	85.10
H	3010	Data on net financing disbursements are required (line 6300) and must be equal to financing disbursements (line 9000) in schedule P for financing accounts.	85.10
H	3020	The outstanding balances of defaulted guaranteed loans (line 2390) in schedule H cannot be less than the balance of defaulted guaranteed loans (line 1501) in schedule F.	85.10, 86.2
H, O	2930	For liquidating accounts, terminations for default that result in loans receivable (line 2261) must be equal to or less than the sum of object class entries for loans and investments (lines x330) in schedule O.	83, 85.10
H, O	2950	For liquidating accounts, terminations for default that result in acquisition of property (line 2262) must be equal to or less than the sum of object class entries for land and structures (lines x320) in schedule O.	83, 85.10
H, O	2960	For liquidating accounts, terminations for default that result in claim payments (line 2263) must be equal to or less than the sum of object class entries for insurance claims and indemnities (lines x420) in schedule O.	83, 85.10
H, P	2890	Disbursements for defaulted guaranteed loan claims (line 2331) must be equal to or less than gross outlays (line 8700) in schedule P.	82, 85.10
H, Y	3030	Federal credit data, baseline estimates (schedule Y) is required if schedule H is present.	85, 85.10
J	4660	Unexpended balances, end of year (lines 8700-8705) must equal the start of year balances plus cash income, less cash outgo, plus or minus any adjustments. (Rounding tolerance of \$2M)	86.6

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
J	4670	The 12-digit OMB account ID code of the applicable receipt account must be entered for receipts (lines 1200-1279 and 2200-2279) reported as income in schedule J.	86.6
J	4680	The 12-digit OMB account ID code of the applicable expenditure account must be entered for cash outgo (lines 4500-5589) in schedule J.	86.6
J	4690	The 12-digit OMB account ID code of the applicable expenditure account must be entered for offsetting collections (lines 1280-1289 and 2280-2289) reported as income in schedule J.	86.6
K	4770	Subfunction must match BAT file subfunction for this account.	81.4
K	4780	Character class must match BAT file character class for this account.	81.4
K	4790	Baseline data are not required for legislative proposals, later transmittals, or rescission proposals (transmittal codes 2, 3, 4, or 5) or for discretionary supplementals.	81.4
K	4800	User fee coding is required for this account.	81.4
O	3305	Detail lines that contain zeroes in all years are not required.	83
O	3310	Total obligations (line 9999) is required when more than one object class is reported and must equal the sum of the corresponding detail reported on lines 1111-3930 plus the residual line (9995). (Rounding tolerance of \$1M)	83.7
O	3330	The total limitation expenses on lines (x930) of schedule O for the account as a whole and limitation account must sum to zero. This avoids a double count because these obligations are also reported by individual object class. (+/- 4M)	83.17
O	3350	Amounts reported in object class 9995 must be positive; use of this object class to report amounts of more than \$4 million requires OMB approval.	83.7
O	3360	Total personnel compensation (x119) is required when multiple personnel compensation detail lines are used and must equal the sum of the detail lines (x111 - x118) for all categories. (Rounding tolerance of \$2M)	83.7
O	3370-3375	The obligations subtotal line (x990) must equal the sum of personnel compensation lines (x111 - x118) plus other detail lines (x121 - x930) for each object class category (e.g., direct, reimbursable). (Rounding tolerance of \$2M)	83.7

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
O	3380	For non-revolving fund accounts, a subtotal for reimbursable obligations (2990) is required whenever reimbursable detail is reported.	83.18
O	3390-3440	A subtotal (line x990) is required for a category when (1) obligations are reported for more than one of the following categories: direct, reimbursable, or allocation; and (2) two or more detail lines are reported within that category.	83.18
O, P	3480	Total obligations in schedule O must equal total obligations in schedule P (line 1000).	82, 83.5
O, P	3485	If reimbursable obligations are reported in schedule O (lines 2xxx), then reimbursable obligations must be reported in schedule P on lines (09xx) and vice versa and the amounts must be equal unless only line 1000 is used in schedule P. (Rounding tolerance of \$4M)	82, 83.5
P	0010	Detail lines that contain zeroes in all years are not required except for lines 8900 and 9000, which are required for all accounts.	82.7
P	0020	GRH reductions to unobligated balances (lines 2380 and 2385) can only occur in accounts in the national defense function.	82.4
P	0030	Only one net outlays entry (line 9000) can be reported.	82.7
P	0040	Net outlays entry (line 9000) is required for all accounts.	82.7
P	0050	Net budget authority entry (line 8900) is required for all accounts.	82.7
P	0090	New budget authority (gross) (line 2200) is required only when there is new gross budget authority. If required, line 2200 must equal the sum of the detail budget authority entries (lines 4000-4200, 4700-4785, 4900-4985, etc.). (Rounding tolerance of \$1M)	82.4
P	0100	Total new budget authority gross (line 7000) is required only when there is more than one type of budget authority. If required, line 7000 must equal the detail entries for BA (lines 40xx-69xx) and the corresponding entry on line 2200. (Rounding tolerance of \$1M)	82.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	0110	Past year amounts must equal zero for every transmittal code except zero (i.e., do not report past year amounts for proposed supplementals, rescissions, and legislative proposals).	82.8
P	0120	Net outlays (line 9000) must equal the sum of total outlays, gross (lines 8690-8698 or 8700) minus offsetting collections (lines 8800-8845). (Rounding tolerance of \$2M)	82.6, 82.7
P	0130	Net BA (line 8900) must equal the total new BA (gross) (line 2200) minus offsetting collections (lines 8800-8845); the change in uncollected customer payments from Federal sources (unexpired) (line 8895); and offsetting collections credited to expired accounts (line 8896). (Rounding tolerance of \$2M)	82.7
P	0150	A gross outlay entry (line 8700) is required only when multiple detail lines are reported (lines 8690-8698). If required, line 8700 must equal the sum of the detail outlay entries. (Rounding tolerance of \$2M)	82.6
P	0160	A new obligations entry (line 7310) is required only when total obligations are reported on line 1000. If required, the amounts on lines 1000 and 7310 must be equal.	82.3, 82.5
P	0180	Total obligations (line 1000) must be positive.	82.3
P	0190	Total outlays, gross (line 7320) must equal the sum of the detail outlay entries (lines 8690-8698 or 8700), but with the opposite sign.	82.5, 82.6
P	0200	Recoveries of prior year obligations reported on line 7345 must equal recoveries of prior year obligations reported on line 2210, but with the opposite sign.	82.4, 82.5
P	0210	A total new obligations entry (e.g., line 2395) is required only when total obligations are reported on line 1000. If required, the amount on line 2395 must equal the amount on line 1000, but with the opposite sign.	82.3, 82.4
P	0220	A total budgetary resources available for obligation entry (line 2390) is required only when multiple detail lines are reported (lines 2140 - 2385). If required, line 2390 must equal the sum of the detail entries. (Rounding tolerance of \$2M)	82.4
P	0240	The unobligated balance, end of year (lines 2440-2449) must equal the start of year balance (lines 2140-2149) plus new BA, adjustments, new obligations (a minus entry), and expiring balances (a minus entry). (Rounding tolerance of \$2M)	82.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	0245	For liquidating accounts, there should be no end of year unobligated balances; all balances should be repaid to Treasury (lines 6827, 6847, 6927, or 6947), as appropriate.	82.4
P	0260	The obligated balance, end of year (line 7440) must equal the start of year balance (line 7240) plus new obligations (line 7310), adjustments (lines 7331-7345), the change in uncollected customer payments from Federal sources (lines 7400 and 7410), and gross outlays (normally a minus entry) (line 7320). (Rounding tolerance of \$2M)	82.5
P	0270-0340	If transfers are reported for an account (lines 2221, 2222, 4100, 4200, 6100, 6200, 6661, 6662, 6861, 6862, 6961, 6962, 7331, or 7332), then the associated gaining or losing account(s) must be identified using the appropriate 6-digit Treasury account symbol.	82.4, 82.5
P	0350	Unobligated balance entries start of year (line 21xx) must equal the corresponding unobligated balance entries end of year (line 24xx) for the preceding year.	82.4
P	0380	A total unobligated balance, start of year entry (line 2199) is required only when multiple detail lines (lines 2140-2149) are reported. If required, line 2199 must equal the sum of the detail entries. (Rounding tolerance of \$2M)	82.4
P	0410	A total unobligated balance, end of year entry (line 2499) is required only when multiple detail lines (lines 2440-2449) are reported. If required, line 2499 must equal the sum of the detail entries. (Rounding tolerance of \$2M).	82.4
P	0440	If spending authority from offsetting collections (cash) is reported on line 6800 or 6900, then there must be an entry for offsetting collections (cash) (lines 8800-8845).	82.4, 82.7
P	0443	Spending authority from offsetting collections reported on lines 6800 and 6900 must equal the sum of the amounts reported on lines 8800-8845 plus 8896 (normally a minus entry).	82.4, 82.7
P	0445	If the sum of lines 8800-8845 plus 8896 is greater than zero, then there must be an entry for spending authority from offsetting collections on lines 6800 or 6900 and the total amounts must be equal.	82.4, 82.7
P	0450	Obligated balance, start of year (lines 7240) must equal the corresponding obligated balance entry, end of year (line 7440) for the preceding year.	82.5

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	0530	Change in uncollected customer payments from Federal sources (unexpired) (lines 6810, 6910) is required if change in uncollected customer payments from Federal sources is reported on line 7400 and vice versa.	82.4, 82.5
P	0577	The amount reported as a change in uncollected customer payments from Federal sources on line 7400 must equal the sum of the corresponding amounts reported on lines 6810 and 6910, but with the opposite sign.	82.4
P	0610	The change in uncollected customer payments from Federal sources reported on line 8895 must equal the sum of the corresponding amounts reported on lines 6810 and 6910.	82.4, 82.7
P	0630	If a G-R-H reduction is reported (lines 9180, 9185), then outlays prior to the reduction (line 9110) must be reported.	82.8
P	0640	Outlays prior to G-R-H reductions (line 9110) must equal the sum of net outlays (line 9000) plus G-R-H reductions (absolute value of amounts on lines 9180, 9185).	82.8
P	0650	Line 0091 (single activity or subactivity group subtotal) must equal the sum of the activity or subactivity lines 0001 - 0089. (Rounding tolerance of \$2M)	82.3
P	0660	Line 0100 (running subtotal) must equal the sum of lines 0001 - 0089. (Rounding tolerance of \$2M)	82.3
P	0670	Line 0191 (single activity or subactivity subtotal) must equal the sum of lines 0101 - 0189. (Rounding tolerance of \$2M)	82.3
P	0680	Line 0192 (subtotal of two activity or subactivity groups) must equal the sum of the activity or subactivity lines: 0001 - 0089 plus 0101 - 0189. (Rounding tolerance of \$2M)	82.3
P	0690	Line 0200 (running subtotal) must equal the sum of the activity or subactivity lines: 0001 - 0089 plus 0101 - 0189. (Rounding tolerance of \$2M)	82.3
P	0700	Line 0291 (subtotal) must equal the sum of lines 0201 - 0289. (Rounding tolerance of \$2M)	82.3
P	0710	Line 0292 (subtotal of two activity or subactivity groups) must equal the sum of the activity or subactivity lines: 0101 - 0189 plus 0201 - 0289. (Rounding tolerance of \$2M)	82.3
P	0720	Line 0293 (subtotal of three activity or subactivity groups) must equal the sum of lines: 0001 - 0089 plus 0101 - 0189 plus 0201 - 0289. (Rounding tolerance of \$2M)	82.3

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	0730	Line 0300 (running subtotal) must equal the sum of the lines: 0001 - 0089 plus 0101 - 0189 plus 0201 - 0289. (Rounding tolerance of \$2M)	82.3
P	0740	Line 0391 must equal the sum of lines 0301-0389. (Rounding tolerance of \$2M)	82.3
P	0750	Line 0392 must equal the sum of lines 0201-0389. (Rounding tolerance of \$2M)	82.3
P	0760	Line 0393 must equal the sum of lines 0101-0389. (Rounding tolerance of \$2M)	82.3
P	0770	Line 0394 must equal the sum of lines 0001-0389. (Rounding tolerance of \$2M)	82.3

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	1060	Line 0949 must equal the sum of detail lines 0940-0948. (Rounding tolerance of \$2M)	82.3
P	1065	Line 0959 must equal the sum of detail lines 0950-0958. (Rounding tolerance of \$2M)	82.3
P	1070	Line 0969 must equal the sum of detail lines 0960-0968. (Rounding tolerance of \$2M)	82.3
P	1072	Line 0979 must equal the sum of detail lines 0970-0978. (Rounding tolerance of \$2M)	82.3
P	1076	Line 0989 must equal the sum of detail lines 0980-0988. (Rounding tolerance of \$2M)	82.3
P	1080	The total obligations line (1000) must equal the sum of all the detail activity lines (0001 - 0988). (Rounding tolerance of \$2M)	82.3
P	1090	Trust fund budget authority (e.g., line 4026) should not be reported in the same account with general or special fund budget authority (e.g., lines 4000 or 4020).	82
P	1100, 1130	Transfers of balances from other accounts (lines 2222 and 7332) must be positive.	82.4, 82.5
P	1110, 1120	Transfers of balances to other accounts (lines 2221 and 7331) must be negative.	82.4, 82.5
P	1140, 1150	Transfers of BA to other accounts (lines 4100, 6100, 6661) must be negative.	82.4
P	1160	Transfers of BA from other accounts (lines 4200, 6200, 6662) must be positive.	82.4
P	1174	Transfers of offsetting collections to other accounts (lines 6861 and 6961) must be negative.	82.4
P	1175	Transfers of offsetting collections from other accounts (lines 6862 and 6962) must be positive.	82.4
P	1180-1270	A total BA entry (e.g., line 4300) is required only when multiple detail entries (e.g., lines 4000 - 4200) are reported. If required, lines 4300 must equal the sum of the detail entries. (Rounding tolerance of \$2M)	82.4
P	1280	A total entry (e.g., line 8890) is required only when multiple detail entries (e.g., lines 8800 - 8845) are reported. If required, line 8890 must equal the sum of the detail entries. (Rounding tolerance of \$2M)	82.6

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	1500	Special fund budget authority (lines 4020 and 6020) should not be reported in trust fund accounts.	82.3
P	1505	Trust fund BA (lines 4026 and 6026) should only be reported in trust fund accounts.	82.3
P	1510-1795	A BA line (e.g., 4000) and a total line (e.g., 4300) are both required when certain types of adjustments are reported (e.g., line 4035).	82.4
P	2060	Outlays (gross) detail (lines 8690 - 8698) is not required for direct and guaranteed loan financing accounts; gross outlays should be reported on line 8700.	82.6
P	2135	Unobligated balance expiring or withdrawn (line 2398) must be negative.	82.4
P, A	1950-2045	The total BA reported in schedules P and A (e.g., line 4300) must be equal for each type of BA. BA entries are required in schedule A for each type of authority reported in schedule P.	81.4, 82.4
P, A	2050	Offsetting collections entries in schedule A (e.g., lines 8840) must equal the corresponding entry in schedule P. (Rounding tolerance of \$2M)	81.4, 82.7
P, A	2070	Outlays from new discretionary authority line (line 8690) in schedule P must equal outlays from new discretionary authority in schedule A (line 9111, 9311, 970x).	81.4, 82.6
P, A	2080	Outlays from discretionary balances (line 8693) in schedule P must equal discretionary outlays from balances in schedule A (lines 9121, 9321, and 980x).	81.4, 82.6
P, A	2090	Outlays from new mandatory authority line (line 8697) in schedule P must equal outlays from new mandatory authority in schedule A (line 9111, 9311).	81.4, 82.6
P, A	2140	Outlay data (lines 9111 - 9809) are required in schedule A if gross outlay data (line 7320) are present in schedule P.	81.4, 82.5
P, A	2170	Outlays from new discretionary spending authority from offsetting collections (line 9311 of schedule A) should not exceed discretionary spending authority from offsetting collections (line 6890 in schedule P).	81.4, 82.4
P, A	2175	Outlays from new mandatory spending authority from offsetting collections (line 9311 of schedule A) should not exceed mandatory spending authority from offsetting collections (line 6990 in schedule P).	81.4, 82.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P, A	2180	Discretionary change in uncollected customer payments from Federal sources entry (line 8895) is required in schedule A if discretionary change in uncollected customer payments from Federal sources is reported in schedule P (line 6810) and the amounts should be equal.	81.4, 82.7
P, A	2185	Mandatory change in uncollected customer payments from Federal sources entry (line 8895) is required in schedule A if mandatory change in uncollected customer payments from Federal sources is reported in schedule P (line 6910) and the amounts should be equal.	81.4, 82.7
P, A	2190	Offsetting collections credited to expired accounts entry (line 8896) is required in A if it is reported in P (line 8896), and the amounts should be equal.	81.4, 82.7
P, A, C, E, F, O, S	2562	Credit liquidating accounts must have schedules A, C, E, F, O, P, and S.	85.8
P, A, O, U	2555	Credit program accounts must have schedules A, O, P, and U.	85.8
P, F	2553	Credit financing accounts must have a schedule P and schedule F.	85.10, 86.2
P, G	2195	Net financing disbursements (line 9000) reported in schedule P must equal the net financing disbursements (line 6300) reported in schedule G.	82.7, 85.10
P, H	2196	Net financing disbursements (line 9000) reported in schedule P must equal the net financing disbursements (line 6300) reported in schedule H.	82.7, 85.10
P, U	2200	In credit program accounts, net outlays (line 9000) in schedule P must be greater than or equal to the sum of schedule U administrative expenses outlays (line 3590), direct loan subsidy outlays (line 1349), and guaranteed loan subsidy outlays (line 2349).	85.9
Q, O	3454	Average salaries (which are calculated by dividing the personnel compensation reported in schedule O by the FTE reported in schedule Q) should not be less than \$15,000.	86.1
Q, O	3456	Average salaries (which are calculated by dividing the personnel compensation reported in schedule O by the FTE reported in schedule Q) should not exceed \$110,000.	86.1
Q, O	4510-4520	If full-time equivalent employment for military personnel is reported in the personnel summary, then obligations (other than allocations) for military personnel compensation (line	36.1, 83.7

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
		x117) must be reported in schedule O.	
Q, O	4530-4565	If obligations (other than allocations) for FTE employment (lines x111 or x113) are reported in schedule O, then full-time equivalent employment must be reported in schedule Q and vice versa.	36.1, 83.7
R	4730	Subfunction must match BAT file subfunction for this account.	81.4
R	4740	Character class must match BAT file character class for this account.	81.4
R	4765	User fee coding is required for this account.	81.4
R, K	4750	Current year receipts in baseline (schedule K) must equal the corresponding entries in policy (schedule R).	81.4
R, K	4760	If a line entry in policy (schedule R) is coded mandatory, then the same entry must be reported in baseline (schedule K), with the same category code and amount.	81.4
S	3970	Baseline budget authority, outlays and limitations are not required for direct and guaranteed loan financing accounts.	81.4
S	3980	Sequestrable unobligated balances (line 2199) are reported in schedule S only for accounts in the national defense function.	81.4
S	3984	For accounts in the national defense function (subfunction 05x), outlays from sequesterable unobligated balances (line 9994) must be reported if sequesterable unobligated defense balances (line 2199) are reported.	81.4
S	3985	Entries for sequestrable unobligated balances (line 2199) cannot be coded as exempt.	81.4
S	3990	Number of beneficiaries (line 9993) can only be used if approved by OMB.	81.4
S	4000-4080	If budget authority is reported for BY, then it should also be reported for the outyears.	81.4
S	4090	If spending authority from offsetting collections (lines 6890 and 6990) is reported for BY, then it should also be reported for the outyears.	81.4
S	4100	If offsetting collections (lines 8800-8845) are reported for the inyears, then they should also be reported for the outyears.	81.4
S	4120	Limitation data have been reported under an incorrect line code. For changes to limitation requirements, consult OMB.	81.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
S	4130	Data have been reported under an incorrect sequestrable/exempt code.	81.3
S	4160	Subfunction does not match BAT file subfunction for this account.	81.3
S	4170	Outlays from prior limitations (line 98xx) and from balances (line 9x21) cannot be coded as sequestrable	81.3
S	4240	Baseline data are not required for legislative proposals, later transmittals, or rescission proposals (transmittal codes 2, 3, 4, or 5) or for discretionary supplementals.	81.4
S	4395	User fee data and coding are required for offsetting collections (lines 8840 and 8845) in this account.	81.4
S	4397	Outlays from sequestrable unobligated balances (line 9994) cannot be coded as exempt.	81.4
S, A	4250	Current year baseline BA entries reported in schedule S (lines 4300-6990) must equal the corresponding entries in schedule A.	81.4
S, A	4350	Current year baseline offsetting collections (lines 8800-8845) reported in schedule S must equal the corresponding entries in schedule A.	81.4
S, A	4360	Current year change in uncollected customer payments from Federal sources (unexpired) (line 8895) reported in schedule S must equal the corresponding entry in schedule A.	81.4
S, A	4370	Current year offsetting collections (cash) credited to expired accounts (line 8896) reported in schedule S must equal the corresponding entry in schedule A.	81.4
S, A	4380	Current year baseline outlays reported in schedule S (lines 91xx - 98xx) must equal the corresponding entries in schedule A.	81.4
S, C	3975	Schedules S and schedule C are not required for government-sponsored enterprises.	81.4, 84.4
S, P	4385	Spending authority from offsetting collections (lines 6890 and 6990) should equal total offsetting collections credited to unexpired accounts (lines 8800-8845 plus 8896), unless adjustments have been reported in schedule P on detail lines 6810-6985.	81.4, 82.3
S	4390	If offsetting collections (lines 6890 or 6990) are sequestrable, then offsetting collections from non-Federal sources (lines 8840-8845) must be reported and cannot be less than the amount reported on lines 6890 and 6990.	81.4

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
T	4900	For consolidated and merged accounts, separate line entries are used to report the budget year request for each component account, and each line entry must include the 6 digit Treasury account symbol for the account involved.	82, 86.4
T, P, A	4905	Amounts in schedule T should be consistent with the BY appropriations language request and amounts reported in P and A. Transfers will be reported on a pre-transfer basis except for transfers from the violent crime reduction trust fund.	82, 86.4
U	2320	For direct loan levels supported by subsidy BA, the sum of multiple direct loan level entries (lines 1150) must equal the total direct loan levels (line 1159). (Rounding tolerance of \$2M)	85.9
U	2330	For direct loan subsidies, the sum of multiple subsidy BA entries (lines 1330) must equal the total subsidy BA (line 1339). (Rounding tolerance of \$2M)	85.9
U	2340	For direct loan subsidies, the sum of multiple subsidy outlay entries (lines 1340) must equal the total subsidy outlay (line 1349). (Rounding tolerance of \$2M)	85.9
U	2350	For guaranteed loan levels supported by subsidy BA, the sum of multiple guaranteed loan level entries (lines 2150) must equal total loan guarantee levels (line 2159). (Rounding tolerance of \$2M)	85.9
U	2360	For guaranteed loan subsidies, the sum of multiple subsidy BA entries (lines 2330) must equal the total subsidy BA (line 2339). (Rounding tolerance of \$2M)	85.9
U	2370	For guaranteed loan subsidies, the sum of multiple subsidy outlay entries (lines 2340) must equal the total subsidy outlays (line 2349). (Rounding tolerance of \$2M)	85.9
U	2380	A weighted average direct loan subsidy rate (line 1329) is required if multiple subsidy rates (lines 1320) are reported.	85.9
U	2390	A weighted average guaranteed loan subsidy rate (line 2329) is required if multiple subsidy rates (lines 2320) are reported.	85.9
U, A	2400	Total subsidy outlays for guaranteed loans (line 2349) cannot exceed policy outlays (lines 9111 - 9808) in schedule A.	81.4, 85.9
U, A	2410	The sum of total subsidy outlays for direct loans (line 1349) and guaranteed loans (line 2349) plus outlays for administrative expenses (line 3590) in schedule U cannot exceed policy outlays in schedule A (lines 9xxx).	81.4, 85.9
U, A	2420	Total direct loan levels supportable by subsidy BA (line 1159)	81.4, 85.9

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
		reported in schedule U must not exceed the corresponding limitations on direct loan activity reported in schedule A (line 7007).	
U, A	2430	Total guaranteed loan levels supportable by BA (line 2159) in schedule U must not exceed the corresponding limitations on loan guarantee commitments reported in schedule A (line 7008).	81.4, 85.9
Y	2559	Schedule Y is not required for liquidating accounts.	85.00
Y	2670-2690	Outstanding agency debt, end of year (line 3390) must equal the sum of outstanding agency debt, start of year plus adjustments (lines 3310 - 3350). (Rounding tolerance of \$2M)	85.10
Y	2740	Start of year outstanding balances for agency debt held by the FFB (line 3310) must equal the outstanding balances for the end of the preceding year (line 3390).	85.10
Y	3040	Schedule Y is only required if schedule G or H is reported.	85.10
Y	3080	Data on net financing disbursements are required (line 6300) for direct and guaranteed loan financing accounts.	85.10
<i>Informational Edit Checks</i>			
P	0247	For direct loan financing accounts, there should be no end of year unobligated balances; all balances should be repaid to Treasury (lines 6827 or 6847), as appropriate.	85.1
P	0360	When an account has unobligated balances (lines 21xx) these balances should be used for capital transfers to the general fund (line 2240) before new offsetting collections (line 6827 or 6927).	82.4
P	0370	When an account has unobligated balances, these balances should be used for redemption of debt (line 2260) before new offsetting collections (line 6847 or 6947).	82.4
P	01275	Separate repayment lines (lines 8840) should be provided for principal repayments and for interest payments.	82.7, 85.10
P	1400	Direct loan subsidy expense (line 0001) should be reported for direct loan program accounts.	82.3, 85.9
P	1402	Loan guarantee subsidy expense (line 0002) should be reported for guaranteed loan program accounts.	82.3, 85.9
P	1409	Reestimates of direct loan subsidy (line 0005) should be reported for direct loan program accounts.	82.3, 85.9

APPENDIX D -- EXPLANATION OF MAX EDIT CHECKS

MAX data section	Error code range	Description of edit check	Circ. No. A-11 reference
P	1411	Interest on reestimates of direct loan subsidy (line 0006) should be reported for direct loan program accounts.	82.3, 85.9
P	1413	Reestimates of the loan guarantees (line 0007) should be reported for guaranteed loan program accounts.	82.3, 85.9
P	1415	Interest on reestimates of loan guarantee subsidy (line 0008) should be reported for guaranteed loan program accounts.	82.3, 85.9
P	1417	Administrative expenses (line 0009) should be reported for guaranteed loan program accounts.	82.3, 85.9
S	3982	For accounts in the national defense function (subfunction 05x), line 2199 is required if the account has sequesterable unobligated defense balances.	81.4, 82.4
S	4210	Outlays from end of PY balances (line 9122) is missing.	81.4
U	2210	For credit program accounts, administrative expense budget authority (line 3510) and administrative expense outlays (line 3580 and/or line 3590) should be reported.	85.9

APPENDIX E -- DIAGNOSTIC REPORTS AND MAX CROSSWALKS

In addition to the MAX edit checks listed in Appendix D, OMB produces a number of reports to ensure that data reported in the data base are consistent both within and between schedules and that they comply with standard budget concepts.

This Appendix includes exhibits of the major diagnostic reports listed below to provide information that can be used to understand and resolve any errors in the data base highlighted by these reports. Agencies can print the reports marked with an asterisk (*) themselves, using MAX.

This Appendix also includes crosswalks that describe relationships between entries in various schedules in the MAX data base. These crosswalks may help you understand and resolve errors identified by MAX edit checks and the diagnostic reports.

The Treasury Financial Manual (TFM) provides a crosswalk between data in the agency financial systems, the program and financing schedule, FMS 2108, and SF 133. This crosswalk is available on the Internet (www.fms.treas.gov/ussgl).

Title	Description	Exhibit No.
Diagnostic Reports:		
BEA Questions and Problems Report (BEACK01)*	Identifies possible errors in BEA classification in schedules A and R (policy) and S and K (baseline).	E1
Total FTE Employment: Approved Estimates vs. Schedule Q (CKFTE)*	Compares FTE estimates approved by OMB with personnel levels in schedule Q.	E2
FTE Employment: Average Salaries (CKFTEOBS)*	Identifies potential errors by comparing personnel obligations in schedule O with FTE employment in MAX schedule Q and computing average salaries for both direct and reimbursable FTEs.	E3
Suspected Receipt Estimating Problems (CKRCPTS)*	Identifies receipt accounts in schedule R with apparent inconsistencies in the BY Budget data when compared with the previous budget and actual data.	E4
Reconciliation of Program and Financing Schedule Transfers (TRANSFER)	Compares transfers of budget authority, unobligated balances, and obligated balances reported by gaining and losing accounts in schedule P.	E5
Policy and Baseline Agency/Category Account Detail Report--Mandatory Estimates (BEACAT)*	Compares mandatory baseline estimates in schedule S with mandatory policy estimates in schedule A.	E6

APPENDIX E – DIAGNOSTIC REPORTS AND MAX CROSSWALKS

Title	Description	Exhibit No.
Crosswalks:		
Crosswalk between schedules P, N, and J	Identifies relationships between entries in the program and financing, unavailable collections, and status of funds schedules.	E7
Crosswalk among selected actuals reported on SF 133, schedule P, and Treasury Annual Report	Identifies relationships among selected actuals reported on SF 133 (Report on Budget Execution and Budgetary Resources), PY column of schedule P, and the Treasury Annual Report (TAR).	E8

BEA Questions and Problems Report (BEACK01)

This report only displays exceptions to the rules. In most cases, the BEA classification will need to be corrected in MAX. Where the classification is valid (e.g., an advance appropriation that should be classified as mandatory), contact the OMB examiner.

This report displays policy and baseline data from schedules A and R (policy) and S and K (baseline).

Indicates the apparent problem with the data (e.g., an account historically classified as mandatory has reported all resources as discretionary).

Agency: Department of Government
Bureau: Revolving and Management Funds

Classification 3: Accounts that Historically Use a Single BEA Category
Action Required: Validate Coding for BEA Cat not Previously Used for Account

Line #	BEA Cat.	BEA Sub.	Com	Policy				Baseline

"BEA Cat" and "BEA Sub" (columns 2 and 3) indicate the BEA classification of data on the specified lines of the data base.

"Com" (column4) designates committee jurisdiction. The code refers to the applicable appropriations subcommittee (e.g., "DE" is for defense). For resources under authorizing committee jurisdiction, the code "AU" is used.

This report is designed to identify new account/line number combinations where classification does not conform to the following assumptions:

1. Amounts categorized as under authorizing committee jurisdiction should be classified as mandatory;
2. Credit program accounts should be classified as discretionary;
3. Credit liquidating accounts should be classified as mandatory, authorizing committee;
4. Advance appropriations should be classified as discretionary;
5. Obligation limitations should be classified as discretionary, except for limitations on credit financing accounts, which should be classified as mandatory, authorizing committee;
6. Offsetting collections and spending authority and outlays from offsetting collections should be classified as discretionary for accounts classified as discretionary under the BEA.
7. Receipts should be classified as mandatory, authorizing committee; and;
8. GSEs should be classified as mandatory authorizing committee.

Total FTE Employment: Approved Estimates vs. Schedule Q (CKFTE)

This report is used to compare agency FTE estimates approved by OMB during the fall budget process with data reflected in MAX. Account level detail reported in schedule Q follows summary data in this report.

FTE estimates approved by OMB during the budget review process.

Actuals reported to OPM on SF 113G.

This amount must be fixed in MAX to match what was reported to OPM on SF 113G.

Actuals and approved estimates and MAX totals should equal. Where differences occur, MAX schedule Q data should be adjusted to agree with approved estimates.

The sum of account-level detail (line xxx1) in schedule Q for a year for an agency.

FTE Employment: Average Salaries (CKFTE0BS)

Suspected Receipt Estimating Problems (CKRCPTS)

This report identifies receipt accounts in schedule R with apparent inconsistencies in the data when compared with estimates in the previous budget and actual data.

Accounts with \$4 million or less in each year of the BY Budget and credit subsidy accounts are excluded from the report.

Indicates when receipt data in schedule R were last updated.

Identifies suspected errors.

Department of Government		PY-4	PY-3	PY-2	PY-1	PY	CY	BY

Last update: CY-01-09	ACTUALS/BY BUDGET	0	0	0	0	221	-221	
ERROR? The PY actual is zero and the PY estimate in the CY Budget is not zero. EXPLANATION:								

Errors in the proposed budget must be fixed in MAX. Where there is a justifiable reason for the apparent inconsistency, contact the OMB examiner and provide a written explanation.

Reconciliation of Program and Financing Schedule Transfers (TRANSFER)

This report compares transfers of budget authority and obligated and unobligated balances reported by gaining and losing accounts in schedule P. It indicates where transfers to and from accounts do not equal. Errors must be fixed in MAX before the data base locks.

The same type of line should be used to report a transfer to or from an account (e.g., discretionary BA transfers are reported on lines 4100/4200; mandatory BA transfers on lines 6100/6200; unobligated balance transfers on lines 2221/2222). The line numbers indicate whether a transfer to an account (e.g., line 4100) or from an account (e.g., line 4200) is being reported.

Net current authority transferred (4100/4200)				PY	CY	BY
Senate						
001-05-00-0110-0	Salaries, officers and employees					
001-05-00-0110-0	Salaries, officers and employees	(001-05-00-0126) 4100 02	-7	0	0	
001-05-00-0126-0	Secretary of the Senate	(001-05-00-0110) 4200 01	7	0	0

Total:	TRANSFER NOT IN BALANCE		0	1	0	
001-10-09-XXXX-0	Account transferred to or from not identified					
001-10-00-0400-0	Salaries and expenses	(MISSING) 4100 01	0	-1	0	
Total:	TRANSFER NOT IN BALANCE		0	-1	0	

Indicates the account to which the transfer is made.

Indicates the transfer lines in schedule P and amount transferred.

Indicates the account from which the amount is transferred.

For each transfer reported in an account, agencies must enter the 6-digit basic account symbol assigned by Treasury for the other account(s) involved in the transfer. This account ID is reported in the stub entry of the transfer line in schedule P.

In this case, the ID of the gaining account was not reported on line 4100 by the account from which the amount is transferred (001-10-00-0400). However, the gaining account (001-12-09-1200) identified the source of the transfer. To correct the error, include the account ID in the stub entry for line 4100.

**Policy and Baseline Agency/Category Account Detail Report
Mandatory Estimates (BEACAT)**

This report compares, by BEA category and transmittal code, baseline estimates in schedule S with policy estimates in schedule A.	Agency Category	Other Independent Agencies Total Mandatory	Indicates BEA category of data reported.												Policy changes are reported as PAYGO (transmittal code 4) when changes proposed are classified as mandatory and are scorable under the Budget Enforcement Act.
			PY	CY	BY	BY+1	BY+2	BY+3	BY+4	BY+5	BY+6	BY+7	BY+8	BY+9	
This section of the report presents data on mandatory estimates in MAX. As a general rule, there should be no differences between baseline and policy estimates for mandatory programs unless proposed policy changes have been approved by OMB. Errors must be fixed in schedules A and S before the data base locks.	440-00-1004-372-4		Payment to the Postal Service fund for nonfunded liabilities												Current law baseline estimates for mandatory programs are reported under transmittal code 0. Baseline and policy estimates for mandatory programs in transmittal code 0 should equal, except where third scorecard changes are proposed.

	Indicates the transmittal code of the MAX schedules for which data are reported. For mandatory programs, policy changes are usually reported as PAYGO (transmittal code 4), or non-PAYGO (transmittal code 2). No data should be reported for PY in transmittal codes 2 or 4.													Proposed changes that are not scored as PAYGO or non-PAYGO (i.e., level of effort and other indirect effects of appropriations language) are classified as third scorecard, appropriations committee or third scorecard, authorizing committee and are reported in transmittal code 0 in schedule A.	
	No baseline data should be reported for legislative proposals (transmittal codes 2 or 4).														

CROSSWALK BETWEEN SCHEDULES P, N, AND J

Most amounts in schedules N and J are generated overnight based on data entered in schedule P as follows:

Schedule P Program and Financing	Schedule N Unavailable Collections	Schedule J Status of Funds	Description
2140 Unobligated balance carried forward, start of year 7240 Obligated balance, start of year	0199 Balance, start of year	0199 Total balance, start of year	<p>The PY start of year balance in schedule N is automatically generated based on the previous year's budget. The CY and BY balances are automatically calculated.</p> <p>Generally, the balance reported in schedule J should equal the sum of the balances reported in schedule N plus the unobligated and obligated balances reported in schedule P.</p> <p><i>Note: Schedule J presents data on a cash basis and should not include balances of borrowing authority, contract authority, or receivables and unfilled orders without advance from Federal sources. Accounts with schedule J tend not to have unappropriated receipts that are not invested in Federal securities.</i></p>
	0200-0279 Receipts	Cash income during the year: Receipts: Current law: 1200-1279 Receipts Proposed legislation: 2200-2279 Receipts	<p>The receipts in schedule N and J are automatically generated from data reported in MAX schedule R.</p> <p>Amounts reported under transmittal codes 0 or 3 are shown as current law in schedule J. Amounts reported under transmittal codes 1, 2, 4, or 5 are shown as proposed legislation in schedule J.</p>

Schedule P Program and Financing	Schedule N Unavailable Collections	Schedule J Status of Funds	Description
8800-8845 Offsetting collections (cash)	0280-0289 Offsetting collections	Offsetting collections: Current law: 1280-1289 Proposed legislation: 2280-2289	Amounts reported under transmittal codes 0 or 3 are shown as current law in schedule J. Amounts reported under transmittal codes 1, 2, 4, or 5 are shown as proposed legislation in schedule J.
7320 Total outlays (gross)		Total cash outgo: Current law: 4500-4589 Proposed legislation: 5500-5589	Amounts reported under transmittal codes 0 or 3 are shown as current law in schedule J. Amounts reported under transmittal codes 1, 2, 4, or 5 are shown as proposed legislation in schedule J.
4020 Discretionary appropriation (special fund) 4026 Discretionary appropriation (trust fund) 6020 Mandatory appropriation (special fund) 6026 Mandatory appropriation (trust fund) 6028 Mandatory appropriation (unavailable balances) 6045 Portion precluded from obligation 6845 Discretionary portion precluded from obligation (limitation on obligations) 6945 Mandatory portion precluded from obligation (limitation on obligations) 6826 Disc. offsetting collections (unavailable balances)	0500-0589 Appropriations		In schedule P, amounts that are newly appropriated from previously unavailable collections are shown as positive amounts. In schedule N, the same amounts are shown as negatives. An exception is line P 6045, which represents new receipts that are precluded from obligation and is shown as a negative in schedule P and as a positive in schedule N.

Schedule P Program and Financing	Schedule N Unavailable Collections	Schedule J Status of Funds	Description
6926 Mandatory offsetting collections (unavailable balances)			
2398 Unobligated balance, expiring or withdrawn 7340 Adjustments in expired accounts (net)	0610 Unobligated balance returned to receipts		The unobligated balances returned to receipts entry in schedule N is automatically derived from expiring balances in schedule P.
xx35, xx36, xx74, xx75, xx76, xx77, xx78, xx79, xx85 Reductions and rescissions of discretionary and mandatory: appropriations, reappropriations, advance appropriations. Exclude rescissions and reductions of authority to borrow or contract authority.	0620 Reduction pursuant to Public Law xxx-xxx	7625 Permanently canceled balances	If the reduced amounts are not permanently canceled (most are not), then they are reported on line 0620 of schedule N and are excluded from line 7625 of schedule J. If the reduced amounts are permanently canceled and not available for subsequent appropriation, then advise OMB in order to have the amounts reported on line 7625 in schedule J and excluded from line 0620 of schedule N.
2221, 2222 Unobligated balance transferred to and from other accounts 4100, 4200 Discretionary budget authority transferred to and from other accounts 6100, 6200 Mandatory budget authority transferred to and from other accounts 6861, 6862 6961, 6962 Spending authority from offsetting collections transferred to and from other accounts 7331, 7332 Obligated balances transferred		7645 Transfers, net	

Schedule P Program and Financing	Schedule N Unavailable Collections	Schedule J Status of Funds	Description
to and from other accounts			
2240, 6827, 6927 Capital transfer to general fund		7650 Other adjustments	
2260, 4047, 6047, 6847, 6947 Portion applied to repay debt			
4050 Balance of appropriation to liquidate contract authority withdrawn			
2440 Unobligated balance, carried forward, end of year	0799 Balance, end of year	7699 Total balance, end of year	Generally, the balance reported in schedule J should equal the sum of the balances reported in schedule N plus the unobligated and obligated balances reported in schedule P.
7440 Obligated balance, end of year			<i>Note: Schedule J presents data on a cash basis and should not include balances of borrowing authority, contract authority, or uncollected customer payments from Federal sources.</i>

CROSSWALK AMONG SELECTED ACTUALS REPORTED ON SF 133, SCHEDULE P, AND TREASURY ANNUAL REPORT

For additional crosswalk relationships between the actuals of the SF 133 and the PY column of Schedule P, refer to OMB Circular No. A-34.

SF 133, Report on Budget Execution and Budgetary Resources	Schedule P Program and Financing	Treasury Annual Report (TAR)	Description
Line 2A. Unobligated balance, brought forward, October 1 (unexpired)	2140-2149 Unobligated balance carried forward, start of year	Column 1: Balances, beginning of fiscal year: Unobligated balances (unexpired)	<p>An exception to this would be an account that reported a deficiency in the prior year's budget schedule P on line 2397. In this case, the amounts reported in both the year-end SF 133 and the TAR would exceed the amount reported in schedule P by the amount of the deficiency.</p> <p>Another exception to this would be an account with unavailable start of year collections reported in schedule N. In this case, the sum of the amount reported on the year-end SF 133 for line 2A or the amount in schedule P for lines 2140-2149 plus the amount in schedule N reported as the balance, start of year, equals the amount reported in the amount in the TAR.</p>
Line 3. Spending authority from offsetting collections (gross) (unexpired): 3A2. Receivable from Federal sources (unexpired) <i>plus</i> 3B2. Change in unfilled customer orders without advance from Federal sources (unexpired)	6810 Change in uncollected customer payments from Federal sources (unexpired) 6910 Change in uncollected customer payments from Federal sources (unexpired) Also crosswalks to: 7400 Change in uncollected customer		<p>The amounts reported on the year-end SF 133 should correspond to the amount reported in schedule P for both the sum of lines 6810 and 6910, and line 8895. It also should correspond to the amount reported in schedule P for line 7400, but with the opposite sign.</p>

SF 133, Report on Budget Execution and Budgetary Resources	Schedule P Program and Financing	Treasury Annual Report (TAR)	Description
	<p>payments from Federal sources (unexpired) (with opposite sign)</p> <p>Also crosswalks to:</p> <p>8895 Change in uncollected customer payments from Federal sources (unexpired)</p>		
<p>Line 3. Spending authority from offsetting collections (gross) (expired):</p> <p>3A2. Receivable from Federal sources (expired)</p> <p><i>plus</i></p> <p>3B2. Change in unfilled customer orders without advance from Federal sources (expired)</p>	7410 Change in uncollected customer payments from Federal sources (expired) (with opposite sign)		The amounts reported on the year-end SF 133 should correspond to the amount reported in schedule P for line 7410, but with the opposite sign.
<p>Line 6. Permanently not available:</p> <p>6A. Cancellation of expired and no-year accounts (unexpired)</p> <p><i>plus</i></p> <p>Lines 9 and 10.</p> <p>Unobligated balance, end of year (unexpired)</p>	2398 Unobligated balance expiring or withdrawn		The unobligated balance expiring is the amount available for obligation that ceases to be available for obligation at the end of the fiscal year (other than amounts rescinded by law). It is part of the end of year unobligated balance (expired) reported in the TAR, but is not separately identified.
<p>Lines 9 and 10.</p> <p>Unobligated balance, end of year (unexpired)</p>	<p>2397 Deficiency</p> <p>2398 Unobligated balance expiring or withdrawn (-)</p> <p>2440-2449 Unobligated balance carried forward, end of year</p>	Column 6: Balances, end of fiscal year: Unobligated balances (unexpired)	<p>An exception to this would be an account that reports a deficiency in schedule P on line 2397. In this case, the amounts reported in both the year-end SF 133 and the TAR would exceed the amount reported in schedule P by the amount of the deficiency.</p> <p>Another exception to this</p>

SF 133, Report on Budget Execution and Budgetary Resources	Schedule P Program and Financing	Treasury Annual Report (TAR)	Description
			would be an account with unavailable start of year collections reported in schedule N. In this case, the sum of the amount reported on the year-end SF 133 for lines 9 and 10 or the amount in schedule P for lines 2397, 2398, and 2440-2449 plus the amount in schedule N reported as the balance, start of year, equals the amount reported in the amount in the TAR.
Line 12. Obligated balance, net as of October 1 (unexpired and expired)	7240 Obligated balance, start of year	Column 1: Balances, beginning of fiscal year: The sum of accounts payable, undelivered orders, accounts receivable, and unfilled customer orders (with opposite sign).	The obligated balance, start of year reported in schedule P is the net unpaid obligations brought forward from the preceding year. The amounts reported on the year-end SF 133 for the year should correspond to the amount reported in schedule P. They should also correspond to the amounts on the TAR at the end of the previous year, but with the opposite sign.
Line 14. Obligated balance, net, end of period (unexpired and expired): 14A. Accounts receivable (-) <i>plus</i> 14B. Unfilled customer orders: Federal sources without advance (-) <i>plus</i> 14C. Undelivered orders (+) <i>plus</i> 14D. Accounts payable (+)	7440 Obligated balance, end of year	Column 6: Balances, end of fiscal year: The sum of accounts payable, undelivered orders, accounts receivable, and unfilled customer orders (with opposite sign).	The obligated balance, end of year reported in schedule P is the net unpaid obligations. The amounts reported on the year-end SF 133 should correspond to the amount reported in schedule P. They should also correspond to the amounts on the TAR, but with the opposite sign.
Line 15B. Collections (-) (unexpired)	6800 Discretionary offsetting collections (cash) (with opposite sign)		The offsetting collections (cash) reported in schedule P are the cash collections received and credited to the unexpired (expenditure)

SF 133, Report on Budget Execution and Budgetary Resources	Schedule P Program and Financing	Treasury Annual Report (TAR)	Description
	6900 Mandatory offsetting collections (cash) (with opposite sign)		account. This line does not include orders from Federal sources not accompanied by cash.
Line 15B. Collections (-) (unexpired and expired)	8800-8845 Offsetting collections (with opposite sign)		The offsetting collections (cash) reported in schedule P are the cash collections received and credited to the (expenditure) account, distributed by sources. This line does not include orders from Federal sources not accompanied by cash.
Line 15B. Collections (-) (expired)	8896 Offsetting collections (cash) credited to expired accounts (-)		The offsetting collections (cash) reported in schedule P are the cash collections received and credited to the expired (expenditure) account. This line does not include orders from Federal sources not accompanied by cash.
Line 15. Outlays (unexpired and expired) 15A. Disbursements (+) <i>plus</i> 15B. Collections (-)	9000 Outlays (net)	Column 4: Outlays (net)	The amount reported on the year-end SF 133 as “Disbursements” is also known as “Outlays (gross).”

SF 133, Report on Budget Execution and Budgetary Resources	Schedule P Program and Financing	Treasury Annual Report (TAR)	Description
	9201 Total investments, start of year: Federal securities, par value	Column 1: Balances, beginning of fiscal year: Investments in public debt securities Investments in agency securities	This includes balances not available for obligation and reported in schedule N. For accounts with schedule J, start of year invested balances in that schedule should equal start of year invested balances in TAR.
	9202 Total investments, end of year: Federal securities, Par value	Column 6: Balances, end of fiscal year: Investments in public debt securities Investments in agency securities	This includes balances not available for obligation and reported in schedule N. For accounts with schedule J, end of year invested balances in that schedule should equal end of year invested balances in TAR.

PREPARATION AND SUBMISSION OF STRATEGIC PLANS, ANNUAL PERFORMANCE PLANS, AND ANNUAL PROGRAM PERFORMANCE REPORTS

**EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET**

JULY 2001

**SECTION 200 -- OVERVIEW OF STRATEGIC PLANS, ANNUAL PERFORMANCE PLANS,
AND ANNUAL PROGRAM PERFORMANCE REPORTS**

Summary Schedule

Initial FY 2002 performance plan to OMB.....	October 2000
Revised final FY 2001 performance plan completed.....	October 2000 (after final appropriations action)
FY 2000 program performance report to President and Congress.....	by March 31, 2001*
Final FY 2002 performance plan sent to Congress.....	April 2001 (schedule may be refined to correspond with the transmittal of President's budget)
Interim adjustments to strategic plans sent to Congress in 2000.....	April 2001 (with annual performance plans for FY 2002)
Initial FY 2003 performance plan to OMB.....	September 2001
FY 2001 program performance report to President and Congress.....	by March 31, 2002*
Updated and revised strategic plan sent to Congress and OMB.....	by September 2003 (within three years of the date of transmittal of the previous updated and revised strategic plan to Congress)*

* Assumes no legislative change to current schedules

200.1 Overview.

Strategic plans, annual performance plans, and annual program performance reports comprise the main elements of the Government Performance and Results Act (GPRA or the Results Act). Together, these elements create a recurring cycle of planning, program execution, and reporting.

These plans and reports are developed for use by:

- agency officials and staff in leading, managing, and carrying out Federal programs and activities;
- the President and Congress when forming programmatic and policy decisions, and for oversight;
- the public for information on the purpose and effectiveness of programs and activities, and the resources spent in conducting them.

By forging a strong link between resources and performance, these plans and reports should show what is being accomplished with the money that is being spent. Accountability for the levels of performance actually achieved is another key feature of GPRA.

The strategic plans provide the framework for implementing all other parts of this Act and set out a course of action and accomplishment over the long term.

Complementing the strategic plans are annual performance plans that set annual goals with measurable target levels of performance, and annual program performance reports that compare actual performance to the annual goals. Together, these should define a course to improve the performance of government programs and operations, and the basis for the Federal Government to manage for results.

GPRA requires that a government-wide performance plan be prepared annually by OMB as a part of the President's budget. The government-wide plan is based on the agency performance plans. The fourth government-wide plan will be issued with the FY 2002 Budget.

Agencies may receive waivers of certain, non-statutory administrative-type requirements established by other agencies. These waivers are intended to provide greater managerial flexibility in exchange for greater accountability for achieving performance goals. Requests for waivers are received and reviewed in conjunction with the annual performance plan.

200.2 Definitions.

General goal:	Included in a strategic plan, this goal defines how an agency will carry out its mission over a period of time. The goal is expressed in a manner which allows a future assessment to be made of whether the goal was or is being achieved. The goal may be of a programmatic, policy, or managerial nature. General goals are predominately outcome-type goals.
General objective:	Included in a strategic plan, the objective(s) are paired with a general goal and can be used to help assess whether a general goal was or is being achieved. An objective usually describes a more specific level of achievement than a general goal.
Outcome goal:	A description of the intended result, effect, or consequence that will occur from carrying out a program or activity.
Output goal:	A description of the level of activity or effort that will be produced or provided over a period of time or by a specified date, including a description of the characteristics and attributes (e.g., timeliness) established as standards in the course of conducting the activity or effort.
Performance goal:	Included in the annual performance plan. A target level of performance expressed as a tangible, measurable objective, against which actual achievement can be compared, including a goal expressed as a quantitative standard, value, or rate. Performance goals can be either outcome or output goals.
Performance indicator:	A particular value or characteristic used to measure output or outcome. Performance indicators are associated with performance goals in the annual performance plan.
Performance measure:	A performance goal or performance indicator.
Program activity:	A specific activity or project as listed in the program and financing schedules of the annual budget of the United States Government. (See also section 220.9 on program activity and section 82.3 on the program and financing schedule.)

Program evaluation: An assessment, through objective measurement and systematic analysis, of the manner and extent to which Federal programs achieve intended objectives.

200.3 Applicability.

For the purposes of Part 2 of this Circular, “agency” means cabinet departments and other establishments of the Federal government, including independent agencies and Government corporations. A government corporation is a corporation owned or controlled by the Federal government. The Legislative Branch and the Judiciary are not subject to GPRA requirements.

Except as noted below, agencies are required to submit strategic plans, annual performance plans, and annual program performance reports to the President, Congress, and OMB in accordance with these instructions. The Central Intelligence Agency and the Postal Rate Commission are not subject under this statute to the requirements for strategic plans, annual performance plans, or program performance reports. These instructions also do not apply to the Postal Service; preparation and submission of the Postal Service's strategic plan and performance plan are covered by Section 7 of GPRA.

OMB may exempt independent agencies with \$20 million or less in annual outlays from the requirements for a strategic plan, annual performance plan, and annual program performance report. GPRA does not authorize any exemption of a component of a department or independent agency, such as a bureau or office, that annually spends \$20 million or less.

SECTION 210 -- PREPARATION AND SUBMISSION OF STRATEGIC PLANS

210.1 Introduction.

This section provides instructions for preparing and submitting your agency's strategic plan, and outlines the relationship between strategic plans and annual performance plans.

Strategic plans center on those programs and activities that are key to carrying out an agency's mission. Although a plan's focus is programmatic, an agency may selectively supplement this with coverage of important administrative functions or initiatives that will aid in the conduct of its programs.

As an agency, you use the strategic plan to align your organization and budget structure with your missions and objectives. In matching programs and activities to your mission and objectives, the strategic plan can also be a means for re-aligning and re-engineering functions and operations. Preparation of a plan also provides an opportunity to consider programs and activities that can be terminated, reduced in scope, or transferred elsewhere.

Strategic plans should guide the formulation and execution of the budget. For agencies, these plans are a tool used in setting priorities and allocating resources consistent with these priorities. A strategic plan is not a budget request, and the projected levels of goal achievement must be commensurate with anticipated resource levels.

The basic requirements for strategic plans are set forth in Section 3 of GPRA (see Exhibit 210A). A strategic plan contains the following elements:

- A comprehensive mission statement;
- A description of general goals and objectives;
- A description of the means and strategies that will be used to achieve the goals and objectives;
- A description of the relationship between performance goals in the annual performance plan and general goals and objectives in the strategic plan;
- Identification of key factors that could affect achievement of the general goals and objectives; and
- A description of program evaluations used, and a schedule for future evaluations.

More detailed guidance on strategic plan elements is provided in sections 210.6-210.11. Requirements for the letter transmitting plans are included in Section 210.13.

210.2 Timing of strategic plan submissions.

Summary of Requirements: Agencies submit an updated and revised strategic plan to Congress within three years of submitting their initial strategic plan. Thereafter, an updated and revised strategic plan is submitted every three years. Transmittal of updated and revised strategic plans will be no later than September 30, 2003 for most agencies. Agencies are to provide OMB with an advance copy of the plan at least 45 days before transmitting the plan to Congress.

(a) Submission of an initial strategic plan.

GPRA required agencies to submit their initial strategic plan to OMB and Congress not later than September 30, 1997. In the future, newly established agencies or agencies previously exempted from GPRA requirements should use the provisions of this subpart when preparing and submitting their initial strategic plan. The date for submitting an initial plan is coordinated in advance with OMB.

(b) Requirement for submission of updated and revised plans.

As an agency, you must submit an updated and revised strategic plan (an updated plan) at least once every three years. This three-year revision cycle has the effect of updating your existing plan for its remaining years, as well as chronologically extending it by three or more years. (See section 210.3 on the period covered by a strategic plan.) The revision incorporates policy, programmatic, or other changes to any element of the agency's current plan. An updated plan will often retain, unchanged, the elements of a previous strategic plan, such as the mission statement.

(c) Submission date for updated and revised plans.

GPRA does not set a specific calendar date for these submissions. Agencies submitting plans in September 2000 would subsequently submit their second updated plan no later than September 30, 2003. Agencies transmitting an updated and revised plan other than in September 2000 would have three years from their submittal date.

For newly established agencies, the three-year cycle begins with the submittal of the initial strategic plan to Congress. For example, a new agency submitting its initial strategic plan in June 15, 1999 would submit an updated plan no later than June 15, 2002.

(d) Interim adjustments.

You may make minor adjustments to a strategic plan in advance of the three-year revision cycle. Adjustments can include changes to the general goals or objectives, the means and strategies used to achieve the goals, the key external factors, or the program evaluation schedule. Modifications may reflect altered circumstances or evaluations of program performance. Interim adjustments are selective and do not produce widespread changes in a plan.

In most instances, agencies can and should use interim adjustments to modify the September 2000 updated and revised strategic plan to reflect and incorporate the program and policy changes of the new Administration.

Append an interim adjustment to your annual performance plan (the annual plan) as a separate, easily found section. This annual plan section identifies and describes your minor adjustments to both Congress and the public. Only the adjustments are presented, not the entire strategic plan. Either a final annual plan or a revised final annual plan may be used (see subsection 220.6(d)).

You need not consult with Congress, or conduct outreach to potentially interested or affected parties when preparing interim adjustments. Adjustments do not require a formal transmittal (see section 210.13). You should distribute, or otherwise make publicly available, the interim adjustments so readers can reference or review the most current strategic plan content.

Significant changes to your strategic plan are made using the more extensive update process, even if this accelerates the three-year revision cycle. Consultation requirements apply in these instances (see section 210.12). Interim adjustments do not alter the three-year revision cycle for strategic plans.

(e) Advance copies of submissions.

Consistent with current policy and practice regarding interagency clearance of certain material being sent to Congress, you provide OMB with an advance copy of an updated strategic plan at least 45 days prior to the date for transmitting the plan to Congress and making it available to the public (see section 210.12 on recurring consultation with OMB during plan development.)

210.3 Time period covered by strategic plans.

Summary of Requirement: A strategic plan must cover a minimum of six years.

A strategic plan spans a minimum six-year period: the fiscal year it is submitted and at least five years forward of that fiscal year. (For example, a plan submitted in FY 2002 would cover FY 2002 through FY 2007.) A plan may be for a period longer than six years; for example, containing a project completion goal ten years in the future. A strategic plan, while covering a minimum six year period, is only current for three years (see section 210.4 and Exhibit 210B).

The extent of strategic plan coverage for the current fiscal year depends on the transmittal date. A strategic plan submitted at the end of a fiscal year need only briefly cover that fiscal year; a paragraph or two should suffice.

210.4 Relationship to submission of annual performance plans.

Summary of requirements: An annual performance plan, when submitted, must be covered by a current strategic plan.

You should note the specific linkage between strategic plans and annual plans. Your strategic plan's goals and objectives set the framework for developing your annual plans. Consequently, GPRA states that an annual plan may not be submitted for a fiscal year not covered by a current strategic plan. (See also section 210.9 on the relationship between general goals in a strategic plan and performance goals in an annual plan.)

Although an annual plan must be covered by a current strategic plan, the strategic plan need not be current during the actual fiscal year for which the annual plan was prepared. A subsequent strategic plan (updated and revised) could be current during the actual fiscal year. The submission of an updated plan supersedes the fiscal year coverage of the previous strategic plan.

Strategic plans submitted in September 1997 were current for the fiscal year 1999 through 2001 performance plans, including the transmittal of the 2001 performance plan to Congress. An updated strategic plan submitted in September 2000 superseded coverage for the fiscal year 2001 performance plan. This updated strategic plan would also be current for annual performance plans for fiscal years 2002 through 2004. Exhibit 210B illustrates the fiscal year annual plan coverage of strategic plans. Interim adjustments to a strategic plan do not extend the period when a strategic plan is considered to be current (see subsection 210.2(d)).

210.5 Strategic plan features.

Summary of requirements: A strategic plan must cover the major functions and operations of the agency.

(a) Major functions and operations.

A strategic plan must cover the major functions and operations of your agency. You have discretion to omit support-type activities and operations. Strategic plans prepared primarily for your agency's internal use (such as those prepared at a program or component-unique level) may cover a greater range of functions and operations. You should note that annual plans are required to cover every program activity in the Program and Financing Schedules in the Budget Appendix for your agency. Thus, annual plans often have greater programmatic and organizational scope than strategic plans (see section 220.8).

(b) The single strategic plan.

You should strive to submit a single agency-wide plan. By 2003, the strategic planning process should be sufficiently mature in all agencies to support preparation of a single agency-wide plan. However, GPRA allows an agency with widely disparate functions to prepare several strategic plans for its major components

or programs. The number of separate plans for major components or programs shall be kept to a minimum. Separate plans should center on the major functions for an agency and group related programs or components within any plan. The several plans should collectively cover all major functions and operations of the agency.

An agency-wide strategic overview is prepared when more than one plan is submitted by an agency. The overview links separate strategic plans by giving an overall statement of the agency's mission and goals. The overview should accompany the submission of the separate strategic plans. When submission dates for an agency's separate strategic plans vary significantly, the overview is modified to reflect the content of the plan being submitted at a particular time. An overview is subject to consultation requirements, if appropriate consultation did not occur during development of the several strategic plans.

If an agency prepares numerous site- or organization-specific strategic plans for component units or sub-programs, these should not be merely packaged together and submitted as a single strategic plan. The ensuing size and detail of such a compilation will reduce the plan's usefulness. Instead, the information from individual strategic plans should be integrated into a single agency-wide strategic plan, or into the several, separate strategic plans that the agency chooses to submit for its major programs or components.

(c) Integration with management and other reforms.

Because of their scope and importance, strategic plans can be used in developing a comprehensive and integrated approach to performance management. When preparing an updated strategic plan, you should incorporate and apply the products and processes resulting from other ongoing performance-related efforts.

These initiatives include customer service standards, performance partnerships, activities introducing a more precise cumulation and allocation of cost, performance-based contracting, analyses of tax expenditures, training and skill improvement of agency staff, and your previous strategic plans. Other processes and products related to regulatory reform, agency restructuring, re-invention, re-engineering, and personnel appraisals tied to program or organizational performance should, as appropriate, be reflected in a strategic plan.

(d) Cross-cutting programs.

Cross-cutting programs and activities are undertaken by several agencies to achieve a common purpose or objective. This is often a mutual effort by the agencies. In preparing an updated strategic plan, agencies should review the strategic plans of other agencies that participate with the agency in a cross-cutting program. This will complement the inter-agency coordination that should occur during plan preparation (see also section 210.12).

An agency formally assigned lead responsibility for a cross-cutting program should include any agreed-on goals and objectives for the program in its plan. Other agencies having principal responsibility for particular goals should be identified.

Agencies participating in a cross-cutting program should each describe in their strategic plan, the interface between their related programs, and outline how individual agency efforts synergistically support common endeavors.

(e) Perspective and outlook.

Updated plans transmitted after 2000 should include a perspective, or scan, of current economic, social, demographic, environmental, international, or other conditions that are relevant to the major functions and operations of the agency. The plan should also include a forward-looking description of prospective changes in the conditions over the timeperiod covered by the plan. Agencies are encouraged to cover a longer timeperiod if data are available.

The description may reflect observed trends, anticipated shifts, and the effect of agency actions. This perspective and outlook should provide programmatic context to the reader. Agencies wishing to develop scenarios when preparing future updated strategic plans should coordinate this in advance with the appropriate OMB representative.

While the perspective and outlook and external factors section may cover similar conditions, the scope and nature of the descriptions often differ. The following hypothetical example illustrates these differences: In government health care services for an aging veteran population, the Department of Veterans Affairs could provide data on its current patient population (the current perspective), and how that population is expected to change over the next 5-10 years, as many of the World War II veterans die (the outlook). None of this information should nominally appear as such in the external factors section. What the Department might identify and include as an external factor would be (unanticipated) breakthroughs in treatment modalities that significantly prolonged life, and increased both the number of living veterans and the cost of medical care.

(f) Format of strategic plans.

No specific format is prescribed for your strategic plan. An updated strategic plan is a complete plan, containing all required plan elements.

A plan that brings related elements together often aids plan review. For example, such a plan would tie the relevant means and strategies, external factors, etc., to the appropriate general goal(s) or objective(s). This contrasts to a format where each plan element has its own separate section, thus compelling readers to jump back and forth between the sections.

You should consider the prospective readership of your strategic plan when determining length, style, and understandability. Brevity and conciseness will likely characterize plans that are useful and widely read. The plan's design should provide for easy and quick access through the WorldWideWeb. (See section 210.13 on public availability of strategic plans.)

(g) Classified appendix.

A classified appendix covers any material specifically authorized under criteria established by an Executive order, to be kept secret in the interest of national defense or foreign policy. An agency may include a classified appendix in a strategic plan where appropriate.

210.6 Comprehensive mission statement.

Summary of requirement: An agency strategic plan must include a mission statement.

The mission statement should be brief, defining the basic purpose of your agency, with particular focus on your core programs and activities. In addition, you may supplement the mission statement with a concise discussion of enabling or authorizing statutes, as well as identification of issues that Congress specifically charged your agency to address. An agency may include a summary list of those laws and directives relevant to the conduct of its core programs and activities as a plan appendix.

Vision statements, which often enunciate agency values or principles, may be included in a strategic plan. A vision statement should be proximately placed with the agency mission statement.

210.7 General goals and objectives.

Summary of requirements: An agency strategic plan must include one or more general goals (or objectives). The goal(s) must be defined in a manner that allows a future assessment to be made on whether the goal was or is being achieved.

(a) Purpose of the goals.

Strategic plans set out the long-term programmatic, policy, and management goals of your agency, outlining planned accomplishments and the schedule for their implementation. The general goals and objectives should elaborate on how your agency is carrying out its mission and will often be outcome-type goals. (See section 210.9 for a discussion of the relationship between general goals in strategic plans and performance goals in annual performance plans.)

The general goals and objectives should be sufficiently precise to direct and guide agency staff toward actions that fulfill the agency's mission. An agency may rely on the actions of others in achieving a general goal or objective (see section 210.10).

General goals and objectives should not go beyond an agency's span of influence. An agency's span of influence may extend beyond its span of control. For example, an agency may directly provide services. The actual delivery of these services is within its span of control. The same agency may fund others to provide similar services. The delivery of these services are within an agency's span of influence (and, depending on the specifications for service delivery, might be within its span of control as well). However, when delivery of these services by all parties has a very small economic impact, an assertion in a strategic plan that delivery of these services significantly affected national economic growth would go beyond the agency's influence on the overall economy.

(b) Defining the goals and objectives.

General goals and objectives should be stated in a manner that allows a future assessment to be made on whether the goals were or are being achieved. A general goal that is defined quantitatively facilitates such a determination. However, a measurable goal need not be quantitative (e.g., it can describe the achievement of a single event, such as astronauts landing on the moon).

When general goals and objectives are defined in a way that precludes a direct future determination of achievement, the performance goals and indicators in the annual plan should be used to provide the basis for the assessment. In defining general goals and objectives, agencies should avoid platitudes or rhetoric that is inherently unmeasurable, either directly or through the use of performance goals and indicators.

210.8 Description of how the general goals and objectives will be achieved.

Summary of requirements: The agency strategic plan must describe the processes, skills, technologies, and various resources that will be used to achieve the general goals and objectives. (These are often called the means and strategies.)

This element describes the means and strategies your agency will use to achieve its general goals and objectives. These can include:

- Operational processes;
- Skills and technologies; and
- Human, capital, information, and other resources.

Descriptions of the processes, technologies, and resources should be brief. You should provide additional detail only when goal achievement is predicated on a significant change in either the resource levels, the technological or other capacities, or the mode or functioning of the operating processes.

Your agency should use reasonable projections of the funding and staff that will be available over the time period covered by the plan. You include schedules for initiating or completing significant actions, and any underlying assumptions or projections.

As appropriate, achievement of goals and objectives may rely on tax expenditures, user fees, other types of collections, regulation, or activities and products of other Federal agencies, States, local governments, or non-governmental entities. Reliance on other governments or parties should be addressed in key external factors (see section 210.10).

You should include a brief description of steps being taken to resolve mission-critical management problems. A mission-critical problem poses a realistic and prospective impediment to carrying out the agency's mission or achieving the general goals and objectives during the strategic plan timeframe (see also subsection 220.11(e)).

The strategic plan should briefly describe your agency's efforts to provide high quality and efficient training opportunities for employees.

The means and strategies section of the plan should outline the process for communicating goals and objectives throughout the agency, and for assigning accountability to managers and staff for achievement of objectives.

210.9 Relationship between goals in the annual performance plan and a strategic plan.

Summary of requirement: A strategic plan must describe the relationship between the general goals and objectives in the strategic plan and the performance goals (and indicators) in the annual performance plan.

Performance goals and performance indicators in your agency's annual performance plan should be based on the general goals and objectives in your strategic plan.

The updated strategic plan should briefly outline:

- The type, nature, and scope of the performance goals being included in annual plans;
- The relation between the performance goals and the general goals and objectives; and
- The relevance and use of performance goals in helping determine the achievement of general goals and objectives.

To a great extent, the performance goals indicate the progress in a fiscal year toward achieving the strategic plan's general goals and objectives. As such, performance goals that represent milestones in achieving the general goals and objectives of a strategic plan may be appropriate. General goals in strategic plans and performance goals in annual plans may be identical in some cases, especially when outcome goals are to be achieved in a particular year.

210.10 Key factors affecting achievement of general goals and objectives.

Summary of requirement: A strategic plan should identify those key factors, external to the agency, that could significantly affect the achievement of general goals and objectives. If key factors cannot be identified, a statement of such should be included in the plan.

(a) In general.

Achievement of general goals and objectives can be affected by certain previously prospective conditions or circumstances actually occurring during the time period covered by the plan. These conditions or circumstances are identified in the plan as key factors, and provide insight on the presumptions an agency used when defining its goals and objectives. Key factors may enhance or nullify these assumptions and the likelihood of goal achievement.

These factors are often called external factors, as they are introduced by external forces or parties, and are not of the agency's own making. The factors may be economic, demographic, social, or environmental, and they may remain stable, change within predicted rates, or vary to an unexpected degree. Goal achievement may also be predicated on certain conditions (events) not happening. Achievement of goals can also depend on the action of Congress, other Federal agencies, States, local governments, or other non-Federal entities.

(b) Identifying key factors in the strategic plan.

Each key external factor should be described in a strategic plan, indicating its link with a particular goal(s) and describing how achievement of the goal could be directly and significantly affected by the factor.

Factors that are unlikely to occur, or have only tangential influence on the general goals and objectives, should be omitted from a strategic plan. Factors that simply restate basic presumptions, e.g., 'goal achievement depends on future agency budgets being at requested levels', usually have little informational value and should also be omitted. If key factors cannot be identified, the agency should include a statement to this effect in the strategic plan.

(c) Mitigating actions.

In its strategic plan, an agency should not detail mitigating actions, contingent steps, or alternative courses to be taken in the event a key factor actually begins affecting goal achievement. To do so will likely complicate the plan with speculative scenarios, arrays of what-to-do-ifs, or demonstrations of how little real effect any agency attempt at intervention might have. For example, the appearance of global climate phenomena, such as El Nino, can affect environmental quality, agricultural production, the location, severity, and cost of natural disasters, and economic growth. As agencies are incapable of ameliorating such phenomena, a strategic plan that included mitigating actions might consequentially be replete with goals for strong El Nino years, 'normal' years, and strong La Nina years.

Rather than including lists of potential mitigating actions in a strategic plan, an agency should modify the plan through an interim adjustment (see subsection 210.2(d)) if an external factor begins affecting goal achievement. The agency may need to prepare an updated and revised plan if dictated by the magnitude of the factor's effect.

210.11 Program evaluations and strategic plans.

Summary of requirements: A strategic plan should contain a schedule for future program evaluations, including the methodology to be used. The plan should also describe the use of completed evaluations in preparing the plan. If program evaluations are not scheduled during the timeperiod covered by the plan, a statement of such should be included.

(a) Program evaluations.

Program evaluations cover assessments, through objective measurement and systematic analysis, of the manner and extent to which Federal programs achieve intended objectives.

Under GPRA, program evaluations also encompass assessments of program implementation processes and operating policies and practices when the primary concern is about implementation rather than program outcomes. This form of program evaluation is often called a ‘process’ evaluation.

(b) Future program evaluations.

A schedule for future program evaluations is included in the strategic plan. The schedule should outline the general methodology to be used (e.g., a longitudinal study), the timetable, and the general scope of the evaluation, as well as particular issues to be addressed. At a minimum, schedules for future evaluations should cover the fiscal years prior to the next update of the strategic plan.

The need for, and appropriateness of, doing a program evaluation may depend on the nature of an agency’s programs and how the general goals and objectives in the strategic plan are defined. If an agency will not be conducting program evaluations during the time period covered by the plan, a statement to this effect should be included in the plan. (See also subsection 220.5(f) on including information on analyses and studies, other than program evaluations, in the annual performance plan.)

(c) Completed program evaluations.

The program evaluations that were used in preparing the updated strategic plan should be briefly described. The effect of program evaluations on the definition of goals and objectives in the plan should be highlighted.

210.12 Consultation.

Summary of requirements: When preparing a strategic plan, agencies must consult with Congress and solicit and consider the views of interested and potentially affected parties. This consultation and outreach may result in contrary views being expressed (see section 210.13).

In developing a strategic plan, your agency must consult with Congress, and also solicit and consider the

SECTION 210 -- PREPARATION AND SUBMISSION OF STRATEGIC PLANS

views and suggestions of entities--such as customers and other stakeholders--potentially affected by or interested in the plan.

You have discretion in how this consultation and outreach is conducted. An agency's existing consultation processes may be used. The development of strategic plans is not subject to the Administrative Procedures Act.

Some general goals and objectives may relate to cross-agency functions, programs, or activities. In such instances, agencies may have a shared responsibility for defining and achieving general goals or objectives in these cross-cutting areas. Agencies should ensure that appropriate and timely consultation occurs with other agencies during development of strategic plans with cross-cutting goals and objectives.

To help ensure that an updated strategic plan conforms with statutory requirements and is consistent with national policy, continuing interaction should occur between OMB and agency staff over the full course of plan preparation.

210.13 Transmittal of plans to Congress and OMB.

Summary of requirements: The plan is transmitted to Congress by the agency head. Transmittal letters are addressed to the Speaker of the House of Representatives, the President and the President pro tempore of the Senate, and the Director of OMB. Distribution is also made to relevant committees of the Congress. The letter transmitting the agency strategic plan to Congress includes a summary of the consultation and outreach processes, and any contrary views. Strategic plans are made available to the public.

(a) The transmittal letter.

A letter from your agency head formally transmits the strategic plan. A transmittal letter is also prepared for a strategic overview containing only a summary presentation of overall mission and goals (see section 210.5). A transmittal letter will include:

- A summary of the general scope and nature of the consultation and outreach, and the types of entities consulted (see section 210.12); and
- A summary of contrary views received.

Transmittal letters are addressed to the Speaker of the House of Representatives, the President and the President pro tempore of the Senate, and the Director of OMB. Copies will be provided to the chairmen and ranking minority members of the relevant authorization, oversight, or budget committees and appropriation subcommittees, and the chairman and ranking minority members of the Senate Committee on Governmental Affairs and the House Government Reform Committee. Copies may also be distributed to other members of Congress or committees.

(b) Contrary views.

A strategic plan will often reflect hard choices, with a plan's usefulness often corresponding to the difficult policy and programmatic decisions that were made during its development. In many instances, there may be disagreement about particular goals and objectives, or the means by which the goals will be achieved. The transmittal letter should summarize those views received from entities outside the Executive Branch of the Government that disagree, in a substantive and germane way, with the programmatic, policy, or management courses-of-action presented in the plan. The summary should generalize the degree of disagreement and the source(s). Contrary views should not be individually attributed or listed.

An agency may wish to concentrate principally on summarizing those contrary views offered as the proposals in the plan became more specific, and less on those generated during its initial, more formative stage.

(c) Use of non-Federal entities.

GPRA states that the preparation of a strategic plan is an inherently governmental function, and the plan is to be drafted only by Federal employees. However, when preparing a plan, agencies may be assisted by non-Federal parties, such as consultants or contractors. Their role may include collecting information, conducting studies, analyses, or evaluations, facilitating outreach, or aiding in the presentational aspects of the plan. The transmittal should include an acknowledgment of the role and a brief description of any significant contribution made by a non-Federal entity in preparing the plan.

(d) Public availability of plans.

Strategic plans are a matter of public record; the public should be afforded the opportunity to access the completed plan. Your agency should place the strategic plan on its WorldWideWeb site, or make it available through other electronic media. Upon request, a paper copy should be provided. Generally, a strategic plan should become publicly available when the plan is transmitted to Congress.

Section 3 of the Government Performance and Results Act**SEC.3. STRATEGIC PLANNING**

Chapter 3 of title 5, United States Code, is amended by adding after section 305 the following new sections:

“§ 306. Strategic Plans

“(a) No later than September 30, 1997, the head of each agency shall submit to the Director of the Office of Management and Budget and to the Congress a strategic plan for program activities. Such plan shall contain---

“(1) a comprehensive mission statement covering the major functions and operations of the agency;

“(2) general goals and objectives, including outcomes-related goals and objectives, for the major functions and operations of the agency;

“(3) a description of how the goals and objectives are to be achieved, including a description of the operational processes, skills and technology, and the human, capital, information, and other resources required to meet those goals and objectives;

“(4) a description of how the performance goals included in the plan required by section 1115(a) of title 31 shall be related to the general goals and objectives in the strategic plan;

“(5) an identification of those key factors external to the agency and beyond its control that could significantly affect the achievement of the general goals and objectives; and

“(6) a description of the program evaluation used in establishing or revising general goals and objectives, with a schedule for future program evaluations.

“(b) The strategic plan shall cover a period of not less than five years forward from the fiscal year in which it is submitted, and shall be updated and revised at least every three years.

“(c) The performance plan required by section 115 of title 31 shall be consistent with the agency’s strategic plan. A performance plan may not be submitted for a fiscal year not covered by a current strategic plan under this section.

“(d) When developing a strategic plan, the agency shall consult with the Congress, and shall solicit and consider the views and suggestions of those entities potentially affected by or interested in such a plan.

“(e) The functions and activities of this section shall be considered to be inherently Governmental functions. The drafting of strategic plans under this section shall be performed only by Federal employees.

“(f) For purposes of this section, the term “agency” means an Executive agency defined under section 105, but does not include the Central Intelligence Agency, the General Accounting Office, the Panama Canal Commission, the United States Postal Service, and the Postal Rate Commission.”

**Various Submission Dates for Strategic Plans
and Years Covered**

Strategic Plan Submission Date	Minimum Years Covered in Strategic Plan	Strategic plan is current# for annual performance plans for:	Next Update/Revision Submission Date by:
September 15, 2000*	FY 2000-2005	FY 2001-2004	September 14, 2003
September 30, 2001*	FY 2001-2006	FY 2002-2005	September 29, 2004
June 30, 2002*	FY 2002-2007	FY 2003-2006	June 29, 2005

Based on annual plan transmittal to Congress and current fiscal years covered.

SECTION 220 -- PREPARATION AND SUBMISSION OF ANNUAL PERFORMANCE PLANS

220.1 Introduction.

The Government Performance and Results Act (GPRA, or the Results Act) requires that OMB have agencies prepare annual performance plans (the annual plan). The first annual plans covered FY 1999. (See sections 200 for an overview of GPRA requirements, related definitions, and applicability of these requirements to agencies.)

The annual plan sets out measurable goals that define what will be accomplished during a fiscal year. The goals should represent a level of accomplishment commensurate with the resources requested and subsequently funded. By identifying how much an agency will spend to achieve its performance goals, the annual plan forms the integral link between budget and program results.

For a fiscal year, at least two iterations of an agency's annual plan are prepared:

- An initial plan, consistent with the agency's budget request to OMB; and
- A final plan that reflects budget, policy, and programmatic decisions on the budget request, and is consistent with the President's budget.

An agency may also prepare a third iteration, which is called a revised final plan. A revised final plan reflects Congressional action on the agency's budget request. (The revised final plan is often referred to as an operating plan.) Preparation of a revised final plan is voluntary.

Initial plans are submitted only to OMB, and are used during OMB's review of the agency budget request. Final plans are sent to Congress soon after transmittal of the President's budget, and made available to the public. There is no mandated submission of a revised final plan to Congress or OMB.

The FY 2003 performance plan includes performance information for fiscal years 1999, 2000, 2001, 2002, and 2003. Beginning with the FY 2004 plan, the annual plan will contain a standard six-year set of performance goals, covering four prior years, the current year, and the budget year. This multi-year display will present baseline and trend information in a single document. The requirement to include FY 2001 actual performance information in the FY 2003 plan does not mean that other statutory elements of the annual program performance report (the annual report) are included in the annual plan, unless the annual plan and annual report are combined. (See section 230 on the preparation of the annual report.)

An agency may choose to combine its annual plan with its annual report (see section 233.1). The final plan iteration is used for this purpose. Agencies should note that combining the annual plan and the annual report may affect who in the agency transmits this combined document, its distribution, and the transmittal date (see section 231).

Section 220 applies to annual plans generally, with occasional specific references to individual years. Section 221 provides instructions for performance plans for a particular year.

220.2 Timing of plan submissions and submitting official.

Summary of requirements: Initial annual performance plans are due to OMB with the agency budget request. Final annual performance plans are sent to Congress following transmittal of the President's budget.

(a) The initial plan.

The agency head (or his or her designee) sends the initial annual plan to OMB at the same time as the agency's initial budget submission. (See section 27.1 of Part 1 of this Circular for information on the timing of budget submissions. See section 221 regarding submission of the initial FY 2003 performance plan.)

(b) The final plan.

There is no set date for sending the final annual plan to Congress. Submission will follow, not precede, transmittal to Congress of the President's Budget. Sending the plan to Congress simultaneously with the agency Congressional justification (justification of estimates) is appropriate and useful. (Agencies may merge their annual plan with their Congressional justification; see subsection 220.8(e)). Timely submission will aid various Congressional committees in reviewing the plans and in deciding budget, authorization, and appropriation levels for the fiscal year. Agencies should note Congressional timelines in this regard.

A copy of the final annual plan should be provided to the chairmen and ranking minority members of the budget committees, relevant authorization and oversight committees, appropriations subcommittees, and the chairman and ranking minority member of the Senate Committee on Governmental Affairs and the House Government Reform Committee. Copies may also be distributed to other members of Congress or committees.

The transmitting official for the final annual plan is either the agency head or the official who sends the agency Congressional justification to Congress.

(c) The revised final plan.

There is no required distribution of a revised final plan. Agencies should coordinate any distribution of this plan iteration with the appropriate Congressional committees, including the timing of any distribution.

If a revised final plan is prepared, it should be finished as soon as practicable following completion of Congressional action on the agency's budget request. Generally, revised final plans should be completed within 30 days of the start of the fiscal year covered by the annual plan, and no later than by the end of the first quarter of the fiscal year. If Congressional action has not concluded by December 1, a revised final plan should be based on the agency's best judgment of its fiscal year funding level. Prolonging completion of a revised final plan until the fiscal year is well underway limits its usefulness as a management document. (See section 220.18 on having a copy of the revised final plan available for reference if it is not sent to Congress or OMB.)

220.3 General rules governing development of annual performance plans.

In developing annual plans, agencies should be guided by the following general rules and principles:

- A single plan covering an entire agency should be prepared, rather than a number of plans covering different agency component or program areas;
- A current strategic plan should be in effect for the fiscal year covered by the annual plan;
- The specific linkage with the strategic plan should be reflected in the annual plan (e.g., performance goals and indicators in an annual plan should be based on the general goals and objectives in the agency's strategic plan);
- Budget resources should align with performance goals;
- While the basic elements of the plan are prescribed by these instructions, agencies have flexibility in determining the scope, level of detail, and format of the plan within this framework;
- Agencies should include performance information covering several fiscal years; and
- The initial plan is considered privileged material and can not be released outside the Executive branch.

More detailed guidance on these aspects of annual plans is provided in sections 220.4-220.7, 220.17, and 221.2. (See Exhibit 220 for the GPRA language on annual performance plans.)

220.4 Single annual performance plan.

Summary of requirement: The annual performance plan is a single plan covering the entire agency.

The annual plan should present a comprehensive picture of performance across the agency. A single plan, covering the agency as a whole, allows an agency's performance goals to be reviewed in their totality.

Within the single plan, an agency has flexibility in organizing the plan's content. For example, a plan could be organized into parts, which conform to the structure of its budget request (e.g., by major functions, organizations, or program), or match with the different jurisdictional responsibilities of various Congressional committees. A single plan is formed by joining the various parts together.

220.5 Relationship to strategic plans.

Summary of requirement: An annual performance plan must be covered by a current strategic plan.

(a) Required coverage.

GPRA requires that a current strategic plan (meeting GPRA requirements) be in effect for the fiscal year covered by an annual plan. (See section 210.4 on current strategic plans.)

(b) In general.

A close correspondence should exist between the strategic plan and the annual plan. This correspondence allows the more general and long-term focus of the strategic plan to be linked with the more detailed and year-specific content of the annual plan. Several elements of the strategic plan parallel those in the annual plan and underscore this linkage.

(c) General goals and objectives.

The strategic plan sets forth the general goals and objectives of the agency, and describes the relationship between these goals and objectives and the performance goals and indicators in the annual plan. Often, the performance goals and indicators will define the progress being made during a fiscal year toward achieving the general goals and objectives in a strategic plan. This progress is incremental if a general goal or objective is not fully achieved until a future year. (See subsections 220.7 on including mission and general goal information from the strategic plan in the annual plan.)

(d) Means and strategies.

The strategic plan describes the means and strategies being used in achieving the general goals and objectives. A similar element in the annual plan describes in greater detail the specific processes, technologies, and types of resources that are needed to achieve the performance goals. The annual plan description should also cover other means, such as regulation and tax expenditures, when an agency will rely on these to achieve specific performance goals.

(e) External factors.

The identification of key external factors (see section 210.10) is not a specified element in an annual plan. Agencies may choose to include information on external factors in their annual plan when these bear directly on goal achievement for the fiscal year covered by the plan. This information should be consistent with the identification of external factors in the strategic plan.

(f) Program evaluations and other analyses.

The process for making interim adjustments to a strategic plan should be used to change the number and schedule for program evaluations during the fiscal year covered by the annual plan. (See subsection 210.2(d) on interim adjustments, and section 210.11 on program evaluations.) Interim adjustments are publicly identified by being appended to an annual plan (see subsection 220.6(d)). An agency may include information on program evaluations in the annual plan itself; other analyses and studies related to performance goals can be referenced in the annual plan (see subsection 220.6(e)).

220.6 Elements of the annual performance plan.

(a) Required elements.

As defined by GPRA, an annual plan features three elements:

- The performance goals and indicators for the fiscal year;
- A description of the operational processes, skills, and technology, and the human, capital, information, or other resources that will be needed to meet the performance goals; and
- A description of the means that will be used to verify and validate measured values.

The performance goals and indicators are the primary element of the annual plan. The two other elements provide information related to achievement of the performance goals. More detailed guidance on these elements is provided in sections 220.9, 220.11, and 220.12.

(b) Other elements.

An annual plan includes several other elements, as appropriate. These are:

- A description of any interim adjustments to the agency's strategic plan;
- A description of actions the agency is taking to resolve inadequacies in the completeness and reliability of performance data (see also section 220.12 on verification and validation, and subsection 232.10 on the assessment of performance data);
- A description of the timeperiod and resources needed to carry out an agency-wide information security program (see also subsection 220.11(f));
- Information on performance-related studies and analyses; and
- Requests for waivers of administrative requirements to provide managerial flexibility.

(c) Use of non-Federal parties.

GPRA states that the preparation of an annual plan is an inherently governmental function, and the plan is to be drafted only by Federal employees. When preparing a plan, agencies may be assisted by non-Federal parties (e.g., consultants, contractors, or States) whose role may include collecting information; conducting studies, analyses, or evaluations; or providing opinions or ideas. Such assistance should supplement, not supplant, the agency's in-house plan preparation effort. The plan should acknowledge and indicate any significant contribution by non-Federal parties in its preparation.

(d) Identifying interim adjustments to a strategic plan.

An annual plan may be used to identify and describe interim adjustments being made to a strategic plan. These interim adjustments are an opportunity for agencies to modify the updated and revised strategic plans transmitted in September, 2000 to reflect program and policy changes of the new Administration. The initial annual plan sent to OMB should include these adjustments. The final annual plan is used to transmit these adjustments to the Congress. If a revised final plan is prepared and distributed to Congress, it may also be used to transmit these adjustments. (See subsection 210.2(d) on making interim adjustments to a strategic plan, and the nature of these minor adjustments.)

(e) Program evaluations and other analyses.

Although agencies may replicate relevant strategic plan information on program evaluations in their annual plan, this is not a specified element of the annual plan. Either a strategic plan or an interim adjustment to the strategic plan is used to provide information on program evaluations (see section 210.11). This information typically includes the schedules for, and summarize the types of, program evaluations to be done during the year.

For informational purposes in an annual plan, agencies may reference other analyses or studies that will be undertaken during the fiscal year, and which directly relate to performance goals and indicators in the plan. These studies and analyses can include policy, program, or management analyses, compliance reviews, cost-benefit studies, research to provide baseline data, or demonstration research. This reference is not a specified element in the annual plan. This reference provides early information on the analyses and studies that the agency intends to cover in its annual report (see subsection 232.2(a)).

(f) Waivers of administrative requirements.

Waivers of administrative requirements are intended to provide managers with more flexibility in managing, in the expectation this added discretion and authority will lead to improvements in program or organizational performance. These administrative requirements are established by a central management agency such as the General Services Administration, OMB, or the Office of Personnel Management, and generally apply to Executive branch agencies. OMB is responsible for reviewing and approving requested waivers. For waivers of requirements established by an agency other than OMB, the requesting agency must secure an endorsement from the establishing agency prior to OMB review.

The managerial flexibility provisions of GPRA were to be first tested in a set of pilot projects. While OMB initiated a pilot selection process, none of prospective candidates were ever designated. A main reason for the lack of designations was that the waivers being sought would have had no demonstrable effect on

program performance. When proposing a waiver, an agency must describe the anticipated effects on performance if the waiver is approved. After a waiver is approved, the agency must subsequently describe the effectiveness of the waiver in achieving performance goals in its annual performance report. The continuing lack of interest in waivers has led to OMB deferring specifying a process in Circular No. A-11 for requesting, endorsing, and approving them.

220.7 Format and additional content.

Summary of requirements: The annual performance plan will include performance goals covering a several-year period. General goals and objectives from the strategic plan should be aligned with their performance goal counterparts in the annual plan.

No specific format is prescribed for an annual plan. Some format-related features of the plan may be specified by Congressional committees, particularly if the plan and Congressional justification are merged. Agencies should ensure that information is presented clearly and concisely. Plans should be informative, useful, and avoid minutiae. The format should allow the public to easily and quickly access the annual plan using the WorldWideWeb.

The FY 2003 performance plan should include the following content, which may affect how information is presented in the plan.

- Performance goals for fiscal years 2002 and 2003, and actual performance information for fiscal years 1999, 2000, and 2001. The FY 2003 performance plan should include target values for fiscal year 2002 for any performance goal included in both plans. Agencies should include information on actual performance for any fiscal year 1999, 2000, and 2001 performance goals that are also included in the FY 2003 plan. The value of including current and prior year performance information is to show trends. Thus, agencies can omit information for performance goals and indicators not being continued in the FY 2003 plan. (See also section 221.2)
- The agency mission statement. To provide a ready reference for the reader, an agency should include the mission statement (or a summary) from its current strategic plan
- The general goals and objectives. To show the linkage between the general goals and objectives in the strategic plan and the annual performance goals, the general goals (or a summary) should be displayed and aligned with the associated annual goals. Most agencies prepared an updated and revised strategic plan by September, 2000. The FY 2003 performance plan should incorporate the general goals and objectives from this updated strategic plan, or any interim adjustments subsequently made to the September 2000 updated strategic plan.
- Goals for cross-cutting programs. To assist in plan review, agencies should indicate those goals and indicators being undertaken in support of programs or activities of an interagency, cross-cutting nature. (See subsection 220.9(f) on cross-cutting programs.)

220.8 Relationship with the budget.

Summary of requirement: Each program activity in an agency's Program and Financing Schedules in the Budget Appendix must be covered by a performance goal or indicator in the annual performance plan. (A performance goal or indicator may cover more than one program activity, and program activity may have more than one performance goal.)

(a) In general.

The annual plan should directly link to the agency's budget. The performance goals, particularly the performance target levels, are set based on the funding expected to be available to achieve the goals. Funding levels reflected in the initial annual plan must be consistent with the agency's budget request to OMB. In a final plan, these funding totals are modified, as necessary, to conform with the President's Budget. The changes in funding levels may dictate corresponding changes to performance goals and indicators in the final plan. In a revised final plan, the performance goals are modified, as necessary, to reflect Congressional action on the agency's budget request.

The linkage between the annual plan and the budget is based on the program activities in the program and financing (P&F) schedules in the President's Budget. Most agencies have more than one P&F schedule, and many of these schedules list specific program activities financed by that budget account. The program activity structure is the foundation for defining and presenting performance goals and indicators.

(b) Link between program activities in the Budget and in the annual plan.

An agency has discretion on how program activities are arrayed in the annual plan, provided that:

- Each program activity in its P&F schedule(s) in the Budget for that fiscal year is covered; and
- Every major program, function, or operation of the agency is reflected in the plan.

If the program activities in the annual plan are identical to those in the P&F schedules, the array will be based on these P&F program activities. However, an agency may choose to substitute a GPRA program activities structure if this would enhance the plan's informative value through a cohesive and thematic display of the performance goals. A GPRA program activity structure is developed by consolidating, aggregating, or disaggregating the program activities included in the P&F schedules.

Specifically, an agency may:

- Aggregate program activities within a single P&F schedule by applying the same performance goals and indicators to several or all of the program activities;

- Consolidate program activities by applying a single set of performance goals and indicators to program activities in two or more P&F schedules; or
- Disaggregate individual program activities in a P&F schedule into component parts and apply performance goals and indicators to these parts.

It is through aggregation or consolidation that an annual plan can cover every program activity in the P&F schedules, while allowing an agency to omit goals for its non-major program activities.

An agency may neither exclude nor minimize the significance of any major program, function, or operation of the agency when creating a set of GPRA program activities.

Any aggregation, disaggregation, or consolidation does not automatically produce a corresponding change in an agency's budget account structure, or to the projects and activities presented in a P&F schedule. Any such changes must be made separately in accordance with the provisions of section 25.3 of Part 1.

(c) Changes in the budget account structure.

Agencies are encouraged to consider changes to their budget account structure that would lead to more thematic or functional presentations of both budget and performance information, thereby enhancing the understanding of programs and measures of performance. (See sections 25.3, 71.2, and 71.3 of Part 1 on alignment of budget accounts and establishment of new accounts.) Current differences between the program activities structure in the Budget and the GPRA program activity array in the performance plan should diminish, as agencies modify either their present set of budget program activities or accounts, or the GPRA program activity structure.

(d) Associating budgetary resources with goals in the annual plan.

OMB intends that the annual plan be integral with the agency's budget request. In moving toward such integration, the annual plan should display, generally by GPRA program activity, the amount of funding being applied to achieve the performance goals and indicators for that activity. Funding need not be displayed for individual performance goals and indicators grouped under a GPRA program activity.

This display would be more straightforward if the annual plan's program activities paralleled the program activity structure in the P&F schedules. However, if a GPRA program activity structure has been developed through consolidation, aggregation, or disaggregation of program activities in P&F schedules, identifying and aligning funding amounts with the GPRA structure may be more difficult.

A performance goal may be funded from several budget accounts. When determining funding for a performance goal, salary and expense accounts may present a particularly difficult linkage. Agencies should make a best effort to distribute costs to the relevant goals by attributing support services and direct salary and expense monies, as well as other resources (e.g., funding grants, contracts, or other activities), to the appropriate GPRA program activities. A free-standing program activity for overhead costs may be established where attribution of costs is not feasible. Agencies should coordinate closely with their program division at OMB when developing these estimates. Agencies should anticipate that the FY 2003 and subsequent year budgets will move toward fully charging the costs of certain retirement and health benefits, support services, capital acquisition, and hazardous waste cleanup directly to an agency and its programs.

SECTION 220 -- PREPARATION AND SUBMISSION OF ANNUAL PERFORMANCE PLANS

A major Administration initiative is to fully integrate performance and budget information. Over the past several years, agencies have made progress in aligning funding with GPRA program activities. For agencies still working on this alignment, the FY 2003 performance plans should describe the culminating steps and schedule for completing a full alignment of resources with performance. The steps and schedule should be included in the initial plan sent to OMB. After coordinating with OMB, this description may be included in the final FY 2003 performance plan (see also subsection 221.1(e)).

Building the budget-performance linkage in phases can be considered, such as initially including budget information for each general goal or objective that appears in the plan. (A set of general goals and objectives (from the strategic plan) is often used to structure the annual plan, with annual performance goals grouped under each of the objectives. Performance goals that cannot be paired with a general goal or objective can be grouped separately.) Subsequent annual plans would provide greater detail, until a budget amount can be shown for each GPRA program activity.

Usually, the funding displayed will be stated in terms of obligations. (See generally section 82.2 in Part 1 for further information on reporting obligations in P&F schedules.) If an agency wishes to use other budget measures (e.g., budget authority or outlays), it should consult in advance with its OMB representative. For the initial plan, OMB may also request additional information separately, such as a crosswalk between performance goals and the specific budget account(s) funding those goals.

(e) Merging the final annual plan with the agency Congressional justification.

Merging the annual plan with the agency Congressional justification may aid in integrating budget resources and performance. The final plan may be a separate document from the agency budget justification or an integral part of the justification. Agencies should coordinate with the appropriate Congressional committees on the format for such a document; coordination with the appropriation subcommittees could be particularly important.

An agency merging the final plan with its Congressional justification should indicate which parts of the merged document constitute the annual performance plan. Merging the annual plan with the Congressional justification can produce a document of significant length. As an agency's Congressional justification typically includes additional and more detailed information than required for the annual plan, review of the plan as well as its public availability will be aided by such a demarcation.

If an agency is proposing changes to its budget account structure (see sections 25.3, 71.2, and 71.3 of Part 1 of this Circular, and subsection (c) above), agencies should anticipate the potential need for a transitional crosswalk showing performance information related to both the existing structure and the new structure.

220.9 General guidelines on developing performance goals and indicators.

Summary of requirement: An annual performance plan must include performance goals. Performance goals shall be defined either in an objective and quantifiable manner, or as sufficiently precise descriptive statements that allow an accurate, independent determination to be made of actual performance (for the latter, see section 220.15).

(a) Principles.

When choosing the performance goals and indicators to be included in an annual plan, agencies should be guided by the following principles. The goals and indicators should:

- Be expressed in an objective and quantifiable manner unless OMB approves otherwise (see sections 220.15-200.16);
- Inform the President, Congress, other interested parties, and the public of the expected level of achievement for the program or activity;
- Be mainly those used by managers as they direct and oversee how a program is carried out. (Measures that inadequately inform managers about program performance will not help managers respond when problems arise);
- Be centered on a program or activity's core purpose, and its key attributes and characteristics; and
- Cover the 12 month period of the Federal government's fiscal year (October 1-September 30). (In those cases where an agency operates on a different fiscal year, the annual plan should correspond to the agency's fiscal year.)

Performance goals and indicators usually have a numerical target level or other measurable value. This facilitates the future assessment of whether the goals and indicators were actually achieved. When defining goals, agencies should anticipate their future ability to measure and report actual performance against them. (The comparison between projected and actual performance is the primary feature of the annual program performance report that agencies are required to prepare under GPRA.)

Annual plans should strike a balance between too few and too many measures. Agencies should include enough measures to show, in a substantive way, how well the agency is doing in carrying out its programs. Plans should neither capture the complete array of measures likely to be used in managing programs, nor skimp on what is measured, resulting in a narrowly-drawn or fragmented picture of performance.

The set of performance goals included in an annual plan should be periodically modified as necessary to reflect changes in programs, agency capability to collect and report information, the importance and usefulness of any goal, and other circumstances.

(b) Types of program performance goals.

An annual plan generally contains both outcome and output goals.

In a strategic plan, general goals and objectives are commonly outcome-type goals. However, outcome goals may only be achieved at certain points during the timespan of a strategic plan. An annual plan should include outcome goals when their achievement is scheduled for the fiscal year covered by the plan.

When outcome goals are defined as achieving a broad standard, rate, or level, such as a national incidence rate, the plan should indicate the agency's role in goal achievement. This can be done either in the goal description or by identifying the means the agency will use to accomplish the goal. Without an association

being shown between such outcomes and what an agency is doing to achieve them, agency funding can be difficult to justify.

Most plans will supplement outcome goals with measures of output. Measures of output can be the predominant goals and indicators in an annual plan for several reasons:

- Outcome goals, other than those being accomplished at a continuing, sustained level, may not be scheduled for achievement in the fiscal year covered by the annual plan;
- An agency is likely to have more output goals than outcome goals; and
- As the frequency and nature of performance data for outputs allows for periodic assessment and intervention, managers often manage to outputs.

GPRA also allows an agency to define a performance goal in a way that is not self-measuring, i.e., one could not determine whether the goal was achieved by simply and objectively comparing actual performance to the performance goal as it was defined. If an annual plan includes a performance goal that is not self-measuring, the agency must include in its plan one or more performance indicators for that goal. The performance indicators shall set out specific, measurable values or characteristics related to the performance goal, and which will aid in determining goal achievement. An example of a goal that is not self-measuring would be 'to improve maternal and child health on tribal reservations.' Performance indicators for such a goal could include morbidity and mortality rates, median infant birth weights, percentage of children immunized, and frequency of pediatric checkups.

While there are no requirements to include a specific category or type of measures in every plan, agencies are strongly encouraged to include, as appropriate, measures of customer service and program efficiency. Agencies should strive to include goals or indicators for unit cost, even if only approximate costs can be estimated. In time, as operational cost accounting systems become prevalent, agencies will be expected to include selected unit cost measures.

For a program activity, agencies may have a single or several measures of performance. Agencies should carefully select measures to avoid depicting programs as one-dimensional, or masking program distinctiveness by using the same performance parameter(s) across all programs.

(c) Goals related to credit programs.

Agencies having performance goals specific to their credit programs should include a brief description of how changes in the subsidy cost for these programs may affect the target values for these goals.

(d) Goals for internal agency functions and operations.

In addition to performance goals and indicators related to programs or specific organizational units, annual plans may include agency-wide goals (including those for internal functions) and means-type goals.

Agency-wide goals and indicators typically involve the agency workforce or the workplace environment. Examples include workforce diversity, downsizing, streamlining, and family-friendly programs. Administrative or program support components, such as procurement and information management, may also

be included as agency-wide goals. Where procurement is significant to the accomplishment of the mission, the annual plan should include measures of procurement performance.

Agencies with major grant programs are encouraged to include performance goals for streamlining and simplifying the administration of these programs. These goals should address the agency's efforts to reduce administrative and regulatory burdens, and provide electronic processing options for grantees.

The annual plan should include a performance goal(s) covering the major human resources strategies, such as recruitment, retention, skill development and training, and appraisals linked to program performance, that help support the agency's programs. Any training goal(s) included in the plan should address the quality and availability of training opportunities. (For further information, see the Office of Personnel Management publication, "A Guide to Strategically Planning Training and Measuring Results".)

The President's Budget asks agencies to identify several agency-specific management reforms, and undertake these reforms in the near term. The FY 2003 performance plan should include performance goals for any agency-specific reforms that will be completed in FY 2003. The FY 2003 plan should also include a brief summary of any agency-specific reforms being completed in FY 2001 or 2002.

Means-type goals and indicators describe the means or strategies that an agency will use to achieve its performance goals and indicators. Means or strategies typically cover processes, technologies, or certain types of resources that will be applied to help achieve a program or operational goal. Policy, programmatic, managerial, regulatory, or legislative initiatives can also be a means-type goal. Replacement of an agency's major computer systems, and redistribution or devolution of agency workload, are examples of means-type goals.

When included, means-type goals should be few in number, key to program accomplishment, and not a substitute for goals and indicators covering core programs and activities. Agencies should note that a significant investment in systems, equipment, or facilities, may warrant categorizing the goal as a program goal. (See also subsection 220.11(d) on capital investments.) A means-type goal associated with a particular program or activity should be grouped with that program in the annual plan. For example, a recruitment goal to double the number of staff working on a particular project should be grouped with other goals for that project, and not presented with other agency-wide human resources goals. An agency may include means and strategies for a means-type goal. For example, an agency may describe its reliance on having other agencies or entities provide sufficient training opportunities to help meet its staff training goal.

Agencies have discretion regarding placement of agency-wide and means-type goals and indicators within the annual plan. An annual plan should not include any goals for inputs (budget resources, number of FTEs, etc); agencies are required to provide information on inputs in that section of the annual plan describing required resources (see section 220.11). (Note that a human resources goal may include a numerical target for the number of FTEs covered by the goal.)

(e) Goals for management problems and for government-wide management reforms.

Performance goals for management problems should be included in the annual plan, particularly for problems whose resolution is mission-critical, or which could potentially impede achievement of program goals (see

SECTION 220 -- PREPARATION AND SUBMISSION OF ANNUAL PERFORMANCE PLANS

also subsection 220.11(e)). Often, such performance goals will be expressed as milestone events for specific remedial steps.

The President's FY 2002 Budget and the President's Management and Performance Plan (scheduled to be issued in the Summer, 2001) identify a set of government-wide reforms that agencies are expected to carry out over the next several years. These reforms include:

- Strategically managing agency human resources, including reducing the number of layers in the upper echelon of government, and re-distributing positions to more front-line, citizen-contact activities and operations;
- Reducing erroneous payments to beneficiaries and other recipients of government funds;
- Making greater use of performance-based contracts;
- Expanding the application of on-line procurement and other E-Government services and information; and,
- Expanding competition by opening to competition with the private sector one half of the commercial positions listed in the agency inventories of activities performed by Federal employees that are not inherently governmental in nature (as specified by the Federal Activities Inventory Reform Act), and developing more accurate inventories.

The FY 2003 performance plan should include a performance goal(s) for every reform that will significantly enhance the administration and operation of your agency's programs and activities. Agencies unable to complete goal definition in the final FY 2002 performance plan for these areas should include the goals in a revised final FY 2002 performance plan that is prepared between October and December, 2001.

Agencies should include a summary of the planned or proposed organizational changes that would be made in restructuring their workforce and streamlining their organization. Agencies should refer to OMB Bulletin 01-07 for guidelines in this effort.

OMB intends that financial information be increasingly used with program performance data to inform budget and management decisions. In the future, this may entail an accelerated delivery of financial information data, with the information becoming more available during the period when the President's budget is being prepared.

(f) Cross-cutting programs.

At a minimum, the annual plan should indicate those programs or activities that are being undertaken with other agencies to achieve a common purpose or objective; i.e., interagency and cross-cutting programs (see section 220.7). This identification need cover only programs and activities which represent a significant agency effort. An index displaying agencies and the relevant programs or activities may be a useful format.

An agency should also review the fiscal year 2002 performance plans of other agencies participating with it in a cross-cutting program or activity. This review should focus on assuring that related performance goals and indicators for a crosscutting program are consistent and harmonious. As appropriate, agencies should

modify performance goals to bring about greater synergy and inter-agency support in achieving mutual goals. These reviews may also identify goals-in-common that agencies may each choose to include in their annual plan.

As the annual plan is based on the program activity listings in the Appendix volume of the Budget, these listings -- which typically cover but do not individually identify numerous sub-programs, projects, and sub-activities -- may not be sufficiently detailed to identify every cross-cutting program or activity in an agency.

For some agencies, identifying all their cross-cutting programs and activities could substantially expand the size of the annual plan, and introduce a very finite and disproportionate level of detail for these programs (see section 220.13).

220.10 Reflecting performance occurring in future years or funded by prior year monies.

Summary of requirement: The annual performance plan should cover all performance related to the resources available or expended during the fiscal year. This includes fiscal year performance funded by prior year monies, and future year performance that would be funded by the agency's budget request for the fiscal year.

(a) Coverage.

Performance goals and indicators in an annual plan should present a complete picture of the performance related to the resources available for the fiscal year covered by the annual plan. Goals and indicators should cover all resources available for implementing the annual plan, specifically:

- Performance occurring in the fiscal year that is funded by spending prior year monies (i.e., spending from balances of budgetary resources provided in previous years);
- Performance occurring in the fiscal year that is funded by new resources becoming available in that year; and
- Performance occurring in a future fiscal year that is to be funded by new resources requested in the fiscal year covered by the annual plan.

An agency should also include performance goals and indicators in its plan even though actual performance against these goals is not fully and contemporaneously measured during the fiscal year covered by the annual plan.

Agencies should not confuse performance occurring in a future fiscal year with situations in which measured performance data will not be available at the time the program performance report is prepared. There often can be a significant lag in obtaining actual performance data for a particular period. The lag could be several years or more. GPRA makes allowance for this situation by requiring that the annual program performance report include results only when data becomes available (see also section 232.5).

(b) Performance goals that reflect prior year funding.

The annual plan should present the full level of performance for goals and indicators. In some instances, this performance level will reflect the spending of prior year monies during the fiscal year covered by the plan. The plan should specifically denote which goals or indicators are funded by a significant amount of prior year monies. A performance level need not be stratified to show how much performance is funded by any particular year. (Information on total funding by fiscal year associated with performance goals may be requested separately by OMB.)

(c) Goals for performance occurring in a future fiscal year.

When program performance in a fiscal year is funded by prior year monies, this circumstance often parallels a fiscal year budget which contains requests for funds that will not be spent until a future fiscal year(s). This is common practice in some grant programs and major procurements, and is a statement of long-range investment priorities.

Goals and indicators covering future-year performance should be included in the annual plan. The plan should include a description of the projected level of performance to be achieved; a brief summary is sufficient. The plan should also identify the fiscal year(s) when performance will occur.

The prospective effect on projected performance goals and indicators for future years, from agency rulemaking or a tax expenditure initiative being undertaken in the fiscal year covered by the annual plan, should also be described.

Agencies may revise these projected levels of performance in a subsequent annual plan (i.e., the plan for the fiscal year in which the performance will actually occur). (See subsection (b) above on establishing goals reflecting prior year funding.) When one or more years intervene before the fiscal year of actual performance, goals and indicators covering the interim period are not required.

220.11 Description of means and strategies, and identifying required resources, processes, and technologies.

Summary of requirements: The annual performance plan must describe how an agency expects to achieve its goals, and identify the various resources, skills, technologies, and processes that will be needed.

(a) In general.

The annual plan includes a description of the resources, processes, and technologies required to achieve the performance goals and indicators. These are the means (in many instances, inputs) the agency will employ, and can span operational processes, skills and technology, and human, capital, information, funding or other resources. The descriptions of these needs should be brief, focusing on the resources, processes, and technologies reflected in the budget request, with more detailed elaboration provided when a significant change (increase or decrease) from the previous year's levels or operating modes is proposed. This

description is separate from, and in addition to, any description of means-type performance goals or indicators that an agency may establish (see subsection 220.9(d)).

The particular strategies an agency intends to apply in achieving its performance goals should be highlighted. These strategies include program, policy, managerial, regulatory, and legislative initiatives and approaches.

Agencies should note the increasing emphasis on the use of workforce planning and other specific strategies that align human resources with the fulfillment of an agency's mission and objectives, and the need to secure a diverse Federal workforce that is skilled, flexible, and performance-oriented with a customer focus.

An agency should consider using its Congressional justification to provide information on sub-programs and activities not included in the annual plan. (An agency's Congressional justification often presents program and project information at a more detailed level than appears in the program activity listings in the Appendix volume of the Budget.) The level of detail in the Congressional justification may also allow an agency to present information on the complementing, supportive, or synergistic nature of related programs or activities, either within the agency or between agencies. (See subsection 220.8(e) on merging the annual plan with the Congressional justification.)

The description need not be confined to initiatives or changes that are newly funded in the fiscal year. Initiatives or investments started in prior years, but which become operational or will be completed during the fiscal year, can be included. Some changes can carryover and affect performance in future years as well.

(b) Regulation and tax expenditures.

Descriptions should be provided for specific regulations and for use of tax expenditures when achievement of program or policy goals is dependant upon these governmental actions. For economically significant rules -- as defined in Section 3(f)(1) of Executive Order 12866, "Regulatory Planning and Review" (September 30, 1993) -- that the agency intends to propose or promulgate during the fiscal year, the annual plan should include a quantified estimate of the regulation's cost to Federal, State, local, and tribal governments, and the private sector, and an estimate of the regulation's anticipated benefits.

Estimates may not be available when the initial version of a performance plan is prepared. If quantified estimates do not yet exist or cannot be developed, the costs and benefits should be described qualitatively.

(c) Proposed legislation.

If achievement of a performance goal is contingent on enactment of legislation during the fiscal year covered by the annual plan, a brief description of this legislation, as proposed in the agency's legislative program, should be included. (Section 6 of OMB Circular No. A-19 provides additional information on an agency legislative program.)

(d) Capital assets/capital programming.

Part 3 of this Circular requires agencies to prepare a capital asset plan and justification for certain major acquisitions. These include acquisitions of importance to an agency's mission, or having a significant role in the administration of agency programs. The annual plan should reference the capital asset plan, and

include a brief description of any major acquisition contained in the capital asset plan that will bear significantly on the achievement of a performance goal.

The capital asset plan should also satisfy requirements in the Information Technology Management Reform Act of 1996 (ITMRA) for performance and results-based management. This may include goals for improving agency operations through the use of information technology; benchmarking of agency processes; descriptions of how information technology will be used to help achieve program goals; and assessments of the staffing, skill, and training needs of agency employees in the information resources management area. ITMRA requirements can be met by including these goals in the annual plan.

The performance goal in the annual plan and the performance goal(s) for any major acquisition should be consistent. (See also explanatory table for Exhibit 300B in Part 3.) Further guidance on including and referencing capital asset information in the annual performance plan is provided in the Capital Programming Guide.

(e) Management problems.

Agencies may choose to describe actions being taken to address and resolve significant management problems. Including this description is particularly important for those problems of a mission-critical nature, or which prospectively and realistically threaten achievement of major program goals. Agencies may establish performance goals covering priority actions on key problems (see subsection 220.9(e)).

The Reports Consolidation Act of 2000 allows agencies to prepare an annual consolidated report covering financial and program performance information. (A consolidated report may be either an accountability report (which combines several financial reports) or a performance and accountability report (which combines the annual performance report and the accountability report); it is not a stand-alone audited financial statement. See also section 233.) The Reports Consolidation Act also requires that a consolidated report include the Inspector General's summary of the agency's most serious management and performance challenges, and an assessment of the agency's progress in meeting those challenges. In an annual plan, agencies should identify particular actions being taken in areas cited as performance-related challenges by the Inspector General in a consolidated report.

The annual plan is principally a plan covering programs and program accomplishment. Agencies should avoid distorting this focus and not clutter the annual plan with an extensive inventory of virtually every management or administrative problem facing the agency.

(f) Information security program.

The Fiscal Year 2001 Defense Authorization Act amended the Paperwork Reduction Act of 1995 by adding a new subchapter on "Information Security". As required by this subchapter, a description of the time periods and resources, including budget, staffing, and training, needed to implement an information security program is to be included in the annual plan. Agencies should consult with the Chief Information Officer when developing the description.

Among the key features of an information security program are periodic risk assessments, policies and procedures to reduce risks, security awareness training, periodic testing and evaluation of policies, and reporting and responding to security incidents. For additional information on these information security

provisions, see 44 U.S.C. 3534(b) and (d)(1), and OMB Memorandum M-01-08, "Guidance on Implementing the Government Information Security Act", January 16, 2001.

220.12 Verification and validation.

Summary of Requirement: The annual performance plan must include an identification of the means the agency will use to verify and validate the measured performance values.

(a) In general.

The annual plan should include a description of how an agency intends to verify and validate the measured values of actual performance. The means used should be sufficiently credible and specific to support the general accuracy and reliability of the performance information that is recorded, collected, and reported. Agencies have discretion in determining the method of verification and validation to be used. Although GPRA does not prescribe use of any particular method, technique, or organizational entity, agencies may continue to rely on established procedures, such as an audit, for certain goals or indicators.

Agencies are not required to develop an independent capacity for verifying or validating performance data received from, or based on, sources outside the agency. Data sources outside the agency should be identified in the plan. Available information from an outside source regarding the accuracy and reliability of its data should be collected, but need not be included in the plan.

(b) Information on data sources.

In the description, an agency should, as appropriate, indicate:

- The current existence of relevant baseline data, including the time-span covered by trend data;
- The expected use of existing agency systems in the collection and reporting of data;
- The source of the measured data; and
- Any expected reliance on an external source(s) for data, and identification of the source(s).

(c) Actions to improve completeness and reliability of performance data.

The Reports Consolidation Act of 2000 requires agencies to report annually on both the completeness and reliability of performance data, and on actions being taken to resolve inadequacies in this data. If material inadequacies are identified in the annual report, the verification and validation part of the annual plan should be used to describe any remedial steps being taken. These can include:

- Enhancing existing data collection and reporting systems or processes to modify, improve, or expand their capability;
- Adding new data sources, or replacing current sources; or

- Discontinuing a performance goal(s) if current data collection and reporting inadequacies are substantial, persistent, and difficult to remedy.

Material inadequacies are those that significantly impede the use of program performance data by agency managers and government decision-makers. A material inadequacy may not always warrant a remedy. In determining whether a material inadequacy should be remedied, an agency should compare the cost of securing better performance data with the total cost of the program or activity covered by the data. The remedy cost should be proportionate and reasonable. Agencies may also consider whether remedies are needed or appropriate when the data source is outside the agency.

An agency may summarize these remedial steps in the annual report assessment, and refer the reader to the verification and validation part of the annual plan for more information.

(d) Unavailability of information.

Agencies may also choose to identify, in advance, any performance goal for which actual performance data will likely be unavailable at the time the program performance report is prepared for the fiscal year covered by the plan. GPRA specifies that an agency program performance report note the incomplete status of the performance data, and requires agencies to include the actual performance information in a subsequent program performance report.

220.13 Availability of detailed performance information.

For many agencies, the annual plan will describe performance on a large or macro scale. The annual plan will synthesize and summarize from more detailed plans specific to a program or component, or from performance information prepared and used at different levels of the agency.

In these instances, agencies will have available, and be responsive to, any appropriate inquiries for the underlying detail that exists in their lower-level plans. To ensure this capability, the more detailed plans should use consistent and mutually supportive performance measures that provide the ability to access or "drill down" to more refined levels of performance information.

220.14 Classified or other appendices not available to the public.

An agency may attach a classified appendix to its annual plan. The appendix includes any material authorized under criteria established by Executive order to be kept secret in the interest of national defense or foreign policy. The material should be properly classified in accordance with the Executive order. Only the minimum amount of information necessary for the classified appendix should be included.

With OMB approval, agencies may prepare a non-public appendix covering certain law enforcement or revenue collection activities. Agencies should consult with, and receive the approval of, their OMB representative before preparing this type of appendix.

Performance goals or indicators included in a non-public appendix should be sufficiently specific in scope or focus that revealing the goal publicly would likely impede achievement of the goal. While certain performance goals and indicators for these activities may not be in a public portion of the plan, the program performance report will usually publicly record actual performance--in a post-facto manner--against such goals and indicators, and compare this to the target or performance levels in the non-public annex.

To avoid classifying the entire plan, a classified or non-public appendix to a plan should be detachable from the other parts of the plan.

220.15 Agency requests for use of alternative form(s) of measurement.

Summary of requirements: An agency's use of an alternative form of measurement in defining performance goals in the annual performance plan is subject to OMB approval. The performance goal must be defined in a manner that allows an accurate, independent determination to be made of how actual performance compares to the goal as stated.

Agencies not able to define performance goals for a particular program or activity in an objective, quantifiable form may propose an alternative form of measurement. The alternative form may be either:

- Separate, descriptive statements of a minimally effective program and a successful program, expressed with sufficient precision and in such terms that would allow for an accurate, independent determination of whether the actual performance meets the criteria of the description; or,
- Some other alternative that allows an accurate, independent determination to be made of how actual performance compares to the goal as stated.

Agency requests for use of an alternative form should be submitted to the appropriate OMB representative when the initial annual plan is sent to OMB. The request should contain the exact proposed language of the goal(s) as these would be expressed in the alternative form, and a brief statement of why it is not feasible to use an objective, quantifiable form of goal-setting and measurement for the particular program activity. The request may be for more than one fiscal year.

After reviewing the request, OMB will inform the agency whether the alternative form is approved, and if approved, may specify the fiscal year(s) that the alternative form can be used. The appearance of an alternative form in the final annual plan, shall be deemed to be authorized by OMB and the plan need not document the authorization process.

220.16 Agency requests to waive the requirement for performance goals.

Summary of requirements: An agency's omission of any performance goal for a program activity in its annual performance plan is subject to OMB approval. As a performance goal can cover, through consolidation and aggregation, more than one program activity, any approval will usually be for an entire Program and Financing Schedule. An agency receiving a waiver must reference the waiver in its annual plan, and include an explanation of why it is infeasible or impractical to establish any performance goal for the program activity.

An agency may propose that no performance goal(s) be established for a particular program activity. Requests should be for a program or activity that would otherwise be included in a performance plan (i.e., agencies need not request authorization to omit coverage of program activities stemming from a consolidation or aggregation). As with requests for an alternative form of measurement, requests to waive the requirement for performance goals must be approved by OMB.

Requests should be submitted to the appropriate OMB representative in advance of the submittal of its annual performance plan. The agency request must explain why it is infeasible or impractical to have any goal(s) for the program activity, and whether the infeasibility or impracticability is short-term or remediable with time. The request may be for more than one fiscal year.

After reviewing the request, OMB will inform the agency whether having no goals established for the program activity is authorized, and the fiscal year(s) covered by the authorization. Authorizations will usually be given for an entire program and financing schedule, rather than for a particular program activity in a schedule. The scope of an authorization stems from agencies being allowed to have a performance goal cover several or more program activities; a span that can obviate the need for an authorization covering only a single program activity among several in a program and financing schedule. (See also subsection 220.8(b) on aggregation and consolidation.)

The agency's annual performance plan shall include a reference to any authorization received for this purpose, and the explanation of why it is infeasible or impractical to establish a performance goal(s) for the particular program activity.

220.17 Clearance and public availability of the annual performance plan.

Summary of requirements: The initial annual plan may not be released outside the Executive branch. Final annual plans and revised final annual plans must be cleared through OMB prior to transmittal or release to the public.

(a) Privileged nature of the initial plan.

In an annual plan, specific target levels of performance and measures are proposed for the performance goals and indicators. In contrast to a description of what will be measured (for example, an error rate), the target levels define what the proposed performance level will be (for example, an error rate of 1.3 percent). As the proposed target levels for many performance goals in the initial plan reflect specific funding levels in an agency's budget request, the initial plan is considered to be pre-decisional. As privileged material, the initial plan may not be released outside the Executive branch. (See also section 36.1 in Part 1 of OMB Circular No. A-11 on the prohibition on releasing certain budget information prior to its official transmittal to Congress.)

For any new program or activity proposed to be initiated and funded as part of the President's budget, both the descriptions of the performance goals, as well as target levels for these goals are pre-decisional and privileged.

Descriptions of performance goals or indicators appearing in a transmitted strategic plan (see section 210.8) or in a previous year's annual plan, are already public and are not privileged. In addition, for programs involving a partnership or similar arrangement between an agency and States or local governments, the specific program target levels are not privileged if they have been negotiated and are public knowledge prior to transmittal of the initial plan to OMB.

(b) Clearance of the final plan and revised final plan.

The final plan, as well as any revised final plan are considered budget-related materials. The provisions of section 36.3 of Part 1 regarding OMB clearance of such materials prior to their transmittal or release applies to these iterations of the annual plan.

(c) Public availability of the final plan.

As soon as practicable after it is sent to Congress, the revised annual plan should be made available to the public. Agencies should use electronic means, such as the WorldWideWeb, to make the plan available. The ease of retrieving and reading the plan from an electronic site should be factored in the design and format of the plan.

A final plan should be written in a concise informative manner. Readability should be paramount. As a public document, its content -- in style, length, and structure -- should be such that it promotes a reader's interest in and understanding of the agency and its programs.

When a revised final annual plan is provided to Congress, it also should be made publicly available.

(d) Receiving comments on the final plan.

Unlike for strategic plans, GPRA does not require that an agency consult with Congress on its annual plan prior to transmittal, or provide an opportunity for potentially interested or affected parties to give their views. (See sections 210.12 and 210.13 on strategic plan consultation and contrary views.) Congressional views on the final plan are obtained in the course of the legislative session, and Congressional action can be based on the performance information contained in the plans. Both a revised final plan and future fiscal year plans

can reflect these Congressional views and actions. Agencies are encouraged to ask the public for their views on the final plan, particularly its readability and informativeness.

220.18 Revised final annual plan.

Summary of requirement: Changes made to a final plan through a revised final plan are limited to those resulting from Congressional action, the occurrence of unanticipated exigencies, or actual performance from the previous fiscal year.

(a) In general.

GPRA allows, but does not require, an agency to prepare a revised final plan. If an agency chooses to prepare a revised final plan, this plan primarily reflects Congressional action on the agency's budget request. In a revised final plan, an agency may:

- Change target levels for performance goals or indicators, where the target levels are materially affected by Congressional action;
- Introduce new goals or indicators, or modify existing goal descriptions, in response to Congress;
- Modify goals or indicators because unanticipated exigencies have occurred since submission of the final annual plan to Congress; or,
- Adjust goals based on actual performance data contained in the program performance report for the previous fiscal year (see section 232.8).

Only necessary changes should be made in a revised final plan. Performance goals and indicators unaffected by the above circumstances should not be altered. The President's budget and Congressional review of the agency budget requests are based on the projected levels of performance in the final annual plan. These levels reflect the agency's commitment to achieve these goals with the funds requested. A refinement of goals or indicators in the revised final plan resulting from additional data and analysis, further agency consideration or evolving judgments, could undercut the relevance of earlier iterations of the annual plan in supporting the agency's budget request.

As agencies collect and report program performance information for the prior fiscal year, this actual information may show a need to modify performance goals set out in the final annual performance plan. An agency may include such modified goals in its revised final plan for a fiscal year. The revised final plan must be completed by the end of the first quarter of the fiscal year covered by the plan. Agencies should not modify performance goals based on actual performance data that becomes newly available in the second quarter of fiscal year or later. (See section 232.8 requiring that the annual program performance report assess the effect of past year performance on current year performance.)

While performance goals and indicators are the annual plan element most likely to be altered, changes may be made to means and strategies or other elements of the annual plan.

(b) Displaying changes from the final plan.

A revised final plan should clearly indicate the changes in performance goals and indicators, means and strategies, or other elements being made to the final plan. The revised final plan should not simply substitute the modified values or descriptions. Showing only the changes would force readers to search separate documents before they could understand the extent of the changes.

(c) Reference copy of a revised final plan.

A revised final plan is a source document for the annual report. An agency not sending a revised final plan to Congress or OMB must prepare and have available for reference at the agency, a copy of the revised final plan.

As a document, a revised final plan may be limited in size and scope to cover only the changes to the final plan. However, many agencies may prefer to use a complete annual plan for management and operating purposes. This revised final plan would meld the modified performance goals and other elements with the content of the final plan.

(d) Updated general goals and objectives in a revised final plan.

Often, an agency's strategic plan will be updated and sent to Congress and OMB after the final annual plan for a fiscal year was submitted to Congress. For example, a strategic plan updated in September 2003 would be sent six or more months after transmittal of the final FY 2004 performance plan to Congress. A revised final FY 2004 plan is prepared near the time of strategic plan submittal. (See section 220.7(d) on including general goals and objectives in an annual plan.)

Agencies may modify the general goals and objectives in the revised final plan to reflect changes in phrasing or wording that were made to these goals and objectives in the updated strategic plan. These modifications should be limited to general goals and objectives similar to those included in the strategic plan as submitted. A revised final plan should not include a general goal or objective either newly established in the updated strategic plan, or which does not incorporate the substance of a previous goal or objective.

Section 4(b) of the Government Performance and Results Act

(This excerpt from Section 4(b) covers 31 U.S.C. 1115(a)-(e) on annual performance plans.)

SEC. 4. (b) PERFORMANCE PLANS AND REPORTS.—Chapter 11 of title 31, United States Code, is amended by adding after section 1114 the following new sections:

"§1115. Performance plans

"(a) In carrying out the provisions of section 1105(a) (29), the Director of the Office of Management and Budget shall require each agency to prepare an annual performance plan covering each program activity set forth in the budget of such agency. Such plan shall—

"(1) establish performance goals to define the level of performance to be achieved by a program activity;

"(2) express such goals in an objective, quantifiable, and measurable form, unless authorized to be in an alternative form under subsection (b);

"(3) briefly describe the operational processes, skills and technology, and the human, capital, information, or other resources required to meet the performance goals;

"(4) establish performance indicators to be used in measuring or assessing the relevant outputs, service levels, and outcomes of each program activity;

"(5) provide a basis for comparing actual program results with the established performance goals; and

"(6) describe the means to be used to verify and validate measured values.

"(b) If an agency, in consultation with the Director of the Office of Management and Budget, determines that it is not feasible to express the performance goals for a particular program activity in an objective, quantifiable, and measurable form, the Director of the Office of Management and Budget may authorize an alternative form. Such alternative form shall —

"(1) include separate descriptive statements of---

"(A) (i) a minimally effective program, and

"(ii) a successful program, or

"(B) such alternative as authorized by the Director of the Office of Management and Budget, with sufficient precision and in such terms that would allow for an accurate, independent determination of whether the program activity's performance meets the criteria of the description; or

"(2) state why it is infeasible or impractical to express a performance goal in any form for the program activity.

"(c) For the purpose of complying with this section, an agency may aggregate, disaggregate, or consolidate program activities, except that any aggregation or consolidation may not omit or minimize the significance of any program activity constituting a major function or operation for the agency.

"(d) An agency may submit with its annual performance plan an appendix covering any portion of the plan that--

"(1) is specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy; and

"(2) is properly classified pursuant to such Executive order.

"(e) The functions and activities of this section shall be considered to be inherently Governmental functions. The drafting of performance plans under this section shall be performed only by Federal employees.

SECTION 221 -- THE FY 2003 ANNUAL PERFORMANCE PLAN**221.1 Annual performance plan for fiscal year 2003.***(a) Introduction.*

The FY 2003 performance plan should continue expanding the quality and scope of performance information included in previous annual plans. The FY 2003 performance plan adds a fifth year of performance information. These five years of information span fiscal years 1999 through 2003.

(b) Schedule.

The initial FY 2003 performance plan is to be sent to OMB by September 10, 2001. An agency's final FY 2003 performance plan is sent to Congress no earlier than the date for the transmittal of the President's FY 2003 Budget.

(c) Performance content of the initial FY 2003 plan.

A major initiative is underway to make the Federal government more results-oriented. The initiative encompasses:

- an emphasis on fully integrating budget and performance information;
- calculating the full cost of programs and activities; and
- increasing the quality, usefulness, and amount of performance information in the President's budget.

As part of this initiative, Cabinet departments and selected major independent agencies have received Spring Guidance letters from OMB, which include a list of several outcomes with related outputs. In their initial FY 2003 performance plan, these departments and agencies should provide integrated budget and performance information for the listed outcomes and outputs in sufficient detail to allow OMB to 'passback' both budget and performance levels. Prospectively, the number of agencies and programs covered by this process will substantially increase for the FY 2004 budget. (See also section 51.7)

(d) Performance content of the final FY 2003 plan.

An agency's performance goal targets for its final performance plan should reflect the President's budget for FY 2003. The target levels should be consistent with program, policy, and resource decisions made by the President.

(e) Integrating budget and performance.

An annual plan should display the amount budgeted either for a GPRA program activity or a set of related GPRA activities. Currently, some agencies may have difficulty in preparing such a display. An agency unable to display such information in its FY 2003 performance plan should describe the action steps it intends taking in 2002 and 2003 to develop the capability for aligning budget amounts with GPRA program activities. A timetable for the specific steps should be included. The descriptions and schedules are included in the initial FY 2003 plan sent to OMB. Following OMB review, the agency may include the steps and timetables, as modified following the review, in its final FY 2003 performance plan.

(f) Fiscal year 1999, 2000, 2001, and 2002 budget information.

Agencies displaying budget information for FY 2003 performance goals or sets of goals should also include this information, if available, for current and past fiscal years. Plans including performance goals for fiscal years 2002 (estimated performance) and 2001 (actual performance) should include the corresponding budget amounts for these goals. Agencies may include the corresponding budget amounts for performance goals for fiscal years 1999 and 2000. The budget amounts should be at the same aggregate level, such as the GPRA program activity level, as displayed for FY 2003 in the annual plan. The agency should note if a budget amount covered goals within GPRA program activities that were discontinued.

(g) Incorporating improvements arising from reviews of the FY 2000, 2001, and 2002 performance plans, and the FY 1999 and 2000 program performance reports.

These first sets of annual plans and reports were reviewed extensively by OMB, Congress, and other parties. These reviews have produced numerous suggested improvements to individual agency plans. Agencies are expected to reflect and incorporate appropriate suggestions and comments for improving their annual plans in the fiscal year 2003 plan. (See also subsection 220.18).

221.2 Fiscal year coverage of the FY 2003 annual plan.

Summary of requirement: The FY 2003 annual plan should include performance goals for both FY 2002 and 2003, and actual performance information for FY 1999, 2000, and 2001. Agencies are encouraged to include actual performance information for FY 1998, if it is available.

(a) Fiscal year 2003.

Performance goals and indicators for fiscal year 2003 set out projected levels of performance. These performance goals are a statutorily-required element of the plan.

(b) Fiscal year 2002.

For performance goals and indicators included in both the FY 2003 and 2002 plans, the target levels of performance for fiscal year 2002 should be displayed. While target values for a performance goal can differ

by fiscal year, the goal description should be similar. The target values for FY 2002 represent estimated performance levels.

The FY 2002 target levels are those contained in either the final plan or the revised final plan for this fiscal year, whichever is most current. Although FY 2002 target levels are included in an agency's final FY 2003 plan, the FY 2003 plan is not used to further revise target levels for performance goals in the FY 2002 plan. Any such revision must first be made through a revised final plan for FY 2002.

Fiscal year 2002 performance goals or indicators that are not continued in the FY 2003 plan need not be included in this plan. Information on now-discontinued FY 2002 performance goals and indicators is found in either the final or revised final FY 2002 performance plan.

(c) Fiscal years 1999, 2000, and 2001.

Agencies should include actual performance data for FY 1999, 2000, and 2001 for those performance goals and indicators included in both these and the 2003 plans.

Actual performance information for FY 2001 often will not be available when the initial FY 2003 plan is sent to OMB in September 2001. Data availability should increase by the time that the final plan is sent to Congress. Agencies including actual performance data in their FY 2003 plan but lacking information for specific goals or indicators should note that the information is not available. Data may also be characterized as preliminary.

An agency need not compare actual performance with fiscal year 2001 target levels for performance goals and indicators. (See also section 232.1 on other elements of a program performance report which an agency need not include in its annual plan.)

(d) Fiscal year 1998.

Agencies having actual performance data for 1998 corresponding to performance data for FY 1999 that is being included in the FY 2003 performance plan are encouraged to include this information as well. This data can be useful in showing trends or in establishing a baseline. Agencies need not include performance data for FY 1997 in their FY 2003 performance plan. Agencies should note that the FY 2003 plan marks the last appearance of FY 1998 data in performance plans. The FY 2004 plan will be the first plan to include four years of actual performance data (fiscal years 1999-2002) developed under GPRA provisions.

(e) Future fiscal years.

Agencies should include the projected level of performance in a future fiscal year; i.e., post fiscal year 2003, where such performance will be funded by the FY 2003 budget request. (See subsection 220.10(c) on goals for performance occurring in a future fiscal year.) In the initial plan submitted to OMB, agencies may include projections of future performance that would be funded by future year budgets, i.e., post FY 2003 budgets. Performance projections tied to future year budgets are usually not included in a final or revised final performance plan.

221.3 Display of performance goals in the FY 2003 annual plan.

Performance information for fiscal years 1999, 2000, 2001, 2002, and 2003 for a program activity should be grouped as a single array. Agencies should avoid dividing the annual plan into separate sections by fiscal year.

Agencies have flexibility in designing the array, e.g., whether to present the information as a multi-column table or vertically. The design may be influenced by how the performance goals are expressed, e.g., as quantitative values or descriptive statements. Fiscal year 2003 target levels should be defined as projected performance, FY 2002 target levels as estimated performance, and FY 2001, 2000, and 1999 (or prior year) levels as actual performance.

An agency defining a significant number of performance goals using the alternative form of measurement may truncate the descriptive reporting of actual prior year performance in its annual plan. (Performance goals not defined in a quantifiable manner use the alternative form of measurement. See section 220.15 on the alternative form of measurement.) Performance reporting may be truncated for years two, three, and four of actual performance, but not for the most immediate prior year. For example, a performance plan for 2004 includes actual performance for 1999, 2000, 2001, and 2002, with actual performance being truncated for years 1999-2001. A truncated description of performance briefly summarizes in a phrase or two what was achieved in a particular fiscal year. An agency may not truncate the reporting of prior year performance in its annual report.

Performance goals or indicators newly established for the FY 2003 plan may not have counterpart goals in the FY 2002 plan. The plan should indicate that these are new goals.

SECTION 230 -- PREPARATION AND SUBMISSION OF THE ANNUAL PROGRAM PERFORMANCE REPORT

230.1 The purpose of the annual program performance report.

As an agency, you submit an annual program performance report (the annual report, the annual performance report) to the President and Congress. Your report is submitted within 150 days of the end of a fiscal year. (See section 231 on transmittal dates for the fiscal year 2000 and 2001 annual reports.) The report covers your program and operational activities during that year. The submission is timed to provide Congress with information on past performance as it considers an agency's budget request and annual performance plan.

The Government Performance and Results Act (GPRA or the Results Act) specifies the basic content of your annual report. The annual report provides information on your actual performance and your progress in achieving the goals and objectives in your strategic plan and annual performance plan (the annual plan). Actual performance is compared to the projected performance levels in your annual plan. Where target levels were not achieved, you explain why and describe the steps you are taking to accomplish such goals in the future. Your annual report also assesses the reliability and completeness of the performance data contained within it.

These annual reports introduce a greater emphasis on organizational and managerial accountability for program execution and results throughout the Executive branch. The GPRA provisions related to the program performance report are set out in Exhibit 230 .

You prepare only one annual report for a fiscal year. Missing or incomplete performance data is included, as it becomes available, in a subsequent year's annual report.

230.2 Relationships between the annual performance report and the strategic plan, the annual performance plan, and the accountability report.

(a) The general relationship between the strategic plan, the annual plan and the annual report.

You base your annual report on the performance goals and indicators in your annual plan. Your annual report must cover all performance goals in your annual plan. In certain instances, the annual report need not cover every performance indicator in the annual plan. (See subsection 232.4(b) on omitting reporting on certain performance indicators. See section 200.2 for definitions of performance goals and performance indicators.)

Your agency's annual report can also record achievement of the general goals and objectives in your strategic plan. This is done as follows: when an annual plan for a particular fiscal year states a general goal or objective as a performance goal, the annual report for that year will cover achievement of that general goal or objective.

SECTION 230 -- PREPARATION AND SUBMISSION OF THE ANNUAL PROGRAM PERFORMANCE REPORT

An agency must also describe aspects of data collection and reporting that are specific to the fiscal year covered by the annual report (see subsection 232.2(d)).

Coverage of other annual plan elements in your annual report is not mandated. An agency may also briefly narrate how the means and strategies described in the annual plan related to performance goal achievement.

(b) Including actual performance information in the annual plan.

In your FY 2003 annual plan, you include at least five years of performance information (see sections 220.7 and 221.2). This includes actual performance information for the fiscal year (FY 2001) covered by the annual report, as well as actual performance information for FY 1999 and 2000. Information on actual performance, as it appears in the annual plan, should substantively mirror what is presented in the annual report. An annual plan omits comparisons between projected and actual performance levels and provides no explanation for why performance goal target levels were not met.

Actual performance information usually first appears in the final annual plan, which is generally sent to Congress in February. The initial annual plan is sent to OMB in September. This latter date is before the end of the fiscal year for which actual performance is reported. Thus, the initial plan will likely contain little actual performance information when sent. Agencies may add actual performance information to the initial plan during the Fall.

Agencies may also add actual performance information to a revised final plan. (Only actual performance information that became available after the final annual plan was sent to Congress can be added.) Revised final plans are prepared in the Fall, and are completed by the end of the first quarter of the fiscal year covered by the plan. Information is added only for those goals that are being revised. An agency does not add actual performance information for unrevised goals. Rather, this latter information is included in next year's final performance plan. For example, an agency does not obtain actual FY 2001 performance information for a program until May 2002. The performance goals for this program are not changed in the revised final plan for FY 2003. The agency would include this actual performance information in its FY 2004 final plan (this plan will include performance information for FY 2001). (See section 220.2 on the three iterations of an annual plan.)

The appearance of actual performance information in the annual plan does not relieve an agency of its responsibility to include the same information in an annual report. If newly obtained performance information appears in a revised final plan, this information must also be included in the subsequent year's annual report. This will ensure that actual performance information is presented along with other required elements of an annual report.

(c) Combining the annual performance report with the annual plan or the annual accountability report.

Your agency may choose to merge your annual performance report with your final annual plan. Agencies may not merge the annual report with the revised final plan, as this plan is not usually formally sent to Congress and the President.

Some agencies also prepare an annual accountability report. Accountability reports are prepared consistent with requirements set out in the Reports Consolidation Act of 2000.

**SECTION 230 -- PREPARATION AND SUBMISSION OF THE
ANNUAL PROGRAM PERFORMANCE REPORT**

The Reports Consolidation Act allows an agency to combine the annual performance report with its accountability report. This legislation also requires that certain performance information be included in any agency accountability report that is not combined with a performance report. (See section 233.1 on combining an annual performance report with the annual plan or the accountability report.)

An agency that annually prepares an audited financial statement but does not prepare an accountability report may not combine the performance report with the statement. However, the management discussion and analysis portion of the statement includes relevant performance information extracted from the annual performance report.

Section 4(b) of the Government Performance and Results Act

(This excerpt from Section 4(b) covers 31 U.S.C. 1116 (a)-(f) on annual program performance reports, as amended by the Reports Consolidation Act of 2000.)

“§1116. Program performance reports

“(a) Not later than 150 days after the end of an agency’s fiscal year, the head of each agency shall prepare and submit to the President and the Congress, a report on program performance for the previous fiscal year.

“(b)(1) Each program performance report shall set forth the performance indicators established in the agency performance plan under section 1115, along with the actual program performance achieved compared with the performance goals expressed in the plan for that fiscal year.

“(2) If performance goals are specified in an alternative form under section 1115(b), the results of such program shall be described in relation to such specifications, including whether the performance failed to meet the criteria of a minimally effective or successful program.

“(c) The report for fiscal year 2000 shall include actual results for the preceding fiscal year, the report for fiscal year 2001 shall include actual results for the two preceding fiscal years, and the report for fiscal year 2002 and all subsequent reports shall include actual results for the three preceding fiscal years.

“(d) Each report shall--

“(1) review the success of achieving the performance goals of the fiscal year;

“(2) evaluate the performance plan for the current fiscal year relative to the performance achieved toward the performance goals in the fiscal year covered by the report;

“(3) explain and describe, where a performance goal has not been met (including when a program activity's performance is determined not to have met the criteria of a successful program activity under section 1115(b)(1)(A)(ii) or a corresponding level of achievement if another alternative form is used)--

“(A) why the goal was not met;

“(B) those plans and schedules for achieving the established performance goal; and

“(C) if the performance goal is impractical or infeasible, why that is the case and what action is recommended;

“(4) describe the use and assess the effectiveness in achieving performance goals of any waiver under section 9703 of this title; and

“(5) include the summary findings of those program evaluations completed during the fiscal year covered by the report.

“(e)(1) Except as provided in paragraph (2), each program performance report shall contain an assessment by the agency head of the completeness and reliability of the performance data included in the report. The assessment shall describe any material inadequacies in the completeness and reliability of the performance data, and the actions the agency can take and is taking to resolve such inadequacies.

“(2) If a program performance report is incorporated into a report submitted under section 3516, the requirements of section 3516(e) shall apply in lieu of paragraph (1).

“(f) The functions and activities of this section shall be considered to be inherently Governmental functions. The drafting of program performance reports under this section shall be performed only by Federal employees.

Notwithstanding subsection (a) of section 1116 of title 31, United States Code as amended, an agency head may submit a report under such subsection not later than 180 days after the end of that agency’s fiscal year with respect to fiscal years 2000 and 2001.

**SECTION 231 -- SENDING THE ANNUAL PROGRAM PERFORMANCE REPORT TO THE
PRESIDENT AND CONGRESS.**

231 Sending the annual program performance report to the President and Congress.

Summary of Requirement: The agency head must send the annual report to the President and Congress no later than 150 days after the end of the fiscal year covered by the report. An agency is allowed to submit the FY 2000 and 2001 annual reports no later than 180 days after the end of the respective fiscal year.

Every agency submitting an annual plan to Congress must prepare and transmit an annual report for the fiscal year covered by the plan. An annual report need not be prepared if an agency ceases operations prior to the transmittal date.

Your annual report must be transmitted no later than 150 days following the end of the fiscal year covered by the report. The Reports Consolidation Act of 2000 requires your agency to submit the annual reports for fiscal year 2000 and 2001 no later than 180 days from the end of the fiscal year. For most agencies, the fiscal year 2000 report is due by March 29, 2001, and the fiscal year 2001 report is due by March 29, 2002. Subsequent year reports will be due by February 27 of the year following the end of the fiscal year. An annual performance report combined with an annual performance plan or combined with an accountability report must be transmitted within the time specified by the Reports Consolidation Act.

Agencies having a fiscal year period other than October 1 through September 30 submit their annual reports within 150 days (or 180 days for the fiscal year 2000 and 2001 reports). (GPRA required all agencies to submit reports by March 31 of the following year.) These agencies are encouraged to transmit their reports earlier, allowing the report information to be used by Congress in reviewing agency programs and resource requests.

Your annual report is sent to the President and Congress. GPRA requires that the report be transmitted by the head of your agency.

A copy of your annual report should now also be sent directly to the Director of OMB. This will provide a distribution for a stand-alone annual report similar to that for a performance and accountability report. An advance copy of the annual report is sent to the appropriate Resource Management Office in OMB at least ten days before its transmittal to Congress and the President.

Please note that in preparing the President's budget for FY 2003, OMB will use actual performance information for FY 2001, as it appears in your annual plan. The data on actual FY 2001 performance must be consistent between the annual report and annual plan, and both annual plan and report data must be consistent with the President's budget.

Your transmittal letters to Congress are addressed to the Speaker of the House of Representatives and the President and President pro tempore of the Senate. Copies of the Congressional transmittal are sent to the chairmen and ranking minority members of the budget committees, relevant authorization and oversight

**SECTION 231 -- SENDING THE ANNUAL PROGRAM PERFORMANCE
REPORT TO THE PRESIDENT AND CONGRESS**

committees, appropriation subcommittees, and the chairman and ranking minority member of the Senate Committee on Governmental Affairs and the House Government Reform Committee. At a minimum, you should provide a copy of the annual report to all those in Congress receiving a copy of your agency's annual plan.

Following its transmittal to the President and Congress, your agency's annual report should be made available to the public. You should use electronic means, such as by posting it on your agency's website, to make the report quickly and readily accessible.

The Reports Consolidation Act of 2000 requires that an agency merging the annual report with its accountability report send the combined document to the President, Congress, and the Director of OMB. The combined document is titled the Performance and Accountability Report. A performance and accountability report is sent by the agency head. An agency may add other signatories, such as the Chief Financial Officer, to the transmittal of a performance and accountability report, thus recognizing a shared responsibility within the agency for the performance reported and any future performance commitments.

If you choose to combine your annual report with your annual plan, changes to your customary distribution for the annual plan may be needed. A combined plan and report must be sent to the Speaker of the House and the President and President pro tempore of the Senate. (Annual plans need not be sent to these officials.) A combined plan and report must also be officially sent to the President. The transmitting official for the combined plan and report must be the agency head. (Annual plans may be sent to Congress by an official other than the agency head; see section 220.2(a).) Agencies should coordinate with the appropriate OMB Resource Management Office on a schedule for providing an advance copy of the combined annual plan and report.

**SECTION 232 -- WHAT DOES THE ANNUAL PROGRAM PERFORMANCE REPORT
CONTAIN?**

232.1 The required elements of an annual program performance report.

Summary of Requirement: An annual report must compare actual performance with the projected levels of performance set out in an annual performance plan. When a projected performance level is not met, the report includes an explanation for not achieving a goal(s), and describes steps for meeting the goal(s) in the future. The report also assesses the effect of past year performance on current year performance levels, and the completeness and reliability of performance data. Annual reports for fiscal year 2000 and subsequent years will progressively cover additional years until the annual report contains at least four years of actual performance information.

Your annual report must include the following elements:

- A comparison of your actual performance with the projected levels of performance as set out in the performance goals in your annual performance plan (see section 232.4);
- An explanation, where a performance goal was not achieved, for why the goal was not met (see section 232.6);
- A description of the plans and schedules to meet an unmet goal in the future, or alternatively, your recommended action regarding an unmet goal where you have concluded it is impractical or infeasible to achieve that goal (see section 232.7);
- An evaluation of your performance plan for the current fiscal year, taking into account the actual performance achieved in the fiscal year covered by your report (see section 232.8);
- Eventually, actual performance information for at least four fiscal years (see section 232.9); and
- An assessment of the reliability and completeness of the performance data included in the report (see section 232.10).

232.2 Other features of the annual program performance report.

Summary of Requirements: When applicable, the annual report summarizes the findings of any program evaluations completed during the fiscal year and describes the contribution of non-Federal parties in the preparation of the report.

Some of the following elements and features of an annual report may selectively apply to your agency. Any that do not apply are omitted from your annual report.

SECTION 232 -- WHAT DOES THE ANNUAL PROGRAM PERFORMANCE REPORT CONTAIN?

(a) Program evaluations.

Include a summary of the findings and recommendations of the program evaluations completed during the fiscal year. If no evaluations were completed, the report should note such.

At a minimum, an annual report covers two types of program evaluation: assessments of the manner and extent to which programs achieve intended objectives, and assessments of program implementation policies, practices, and processes. An agency's strategic plan sets out its schedule for doing program evaluations. Changes to this schedule are shown in the interim adjustment to the strategic plan. An interim adjustment may be prepared annually and is a separate part of the annual plan. (See section 210.11 on program evaluations generally, and also see subsection 210.2(d) regarding interim adjustments to a strategic plan.)

An annual report may also summarize findings and recommendations from other analyses or studies completed during the fiscal year. These studies and analyses can include policy, program, or management analyses, comprehensive reviews, cost-benefit studies, research to provide baseline data, or demonstration research. These studies and analyses supplement program evaluations and are described in the annual plan (see also subsection 220.5(f)).

The annual report should note the availability of a complete copy of a program evaluation and how this might be obtained by an interested party.

(b) Information on use of non-Federal parties.

GPRA states that preparation of an annual report is an inherently government function. Your agency's employees are solely responsible for the transmitted copy of an annual report. However, when preparing your report, your employees may be aided by non-Federal parties, such as consultants, grantees, contractors, States, and local governments. Assistance by non-Federal parties can include the collection and reporting of performance data. The report should include an acknowledgment of the role and a brief description of any significant contribution made by a non-Federal entity in preparing report.

(c) Classified appendices not available to the public.

An agency with a classified appendix for its annual plan may also prepare a similar classified appendix for its annual report. (See section 220.14 for a description of material that may be included in a classified appendix.)

With OMB approval, an agency may also prepare a non-public appendix for its annual plan. In the annual plan, a non-public appendix contains certain goals for law enforcement or revenue collection activities, where revealing these goals publicly would likely impede their achievement. Generally, agencies should not need to prepare a similar non-public appendix to their annual report. Retrospective reporting of actual performance for these particular goals should not interfere with achieving current or future goals for these activities. However, if an agency believes that reporting of actual performance will impede current or future goal achievement, a non-public appendix may be prepared. The agency should contact its OMB representative for approval prior to preparing such an appendix.

(d) Budget information.

In your annual report, you should include relevant budget information, consistent with the obligation amounts shown in the Budget Appendix for the fiscal year covered by the report. As resource amounts are generally covered in the means and strategies part of the annual plan, the annual report does not present comparisons between the amounts originally requested for a fiscal year and the amounts actually obligated.

(e) Analysis of tax expenditures.

Tax expenditures are attributable to provisions of the Federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or that provide a special credit, rate of tax, or deferral of tax (2 U.S.C. 622). An annual report must include the results of any tax expenditures analysis the agency completed during the fiscal year. These analyses assess the effect of specific tax expenditures in achieving performance goals. Nearly every agency preparing an annual report for FY 2001 is unaffected by this reporting requirement, as current responsibility for preparing these analyses is very limited.

(f) Waivers of administrative requirements.

Section 5 of the Results Act allows agencies to receive waivers from administrative requirements and controls. These waivers are intended to provide managers and organizations with greater flexibility, discretion, and authority, in the expectation this will lead to improved performance. An agency receiving such a waiver must describe, in its annual report, the use of this waiver and assess its effectiveness in achieving performance goals. No waivers were authorized for FY 2001, and no agency annual report for FY 2001 will include this description and assessment.

232.3 Format

There is no prescribed format for the annual report. Your agency is encouraged to include, from your strategic plan, a summary of your mission statement and your general goals and objectives.

The annual report is your opportunity to communicate the results of your programs and activities to the American public, legislators, and Executive branch officials. Your agency should produce a report that is easily read and understood, and direct and concise in the information it conveys. While an annual report is not a matter of style substituting for substance, the mode of presentation can be critical to an informative report. Agencies are encouraged to write their report using plain language; for information, see <http://www.plainlanguage.gov>

The report's design should provide for easy and quick access through the WorldWideWeb.

232.4 Comparing actual performance to the performance goal target levels.

Summary of Requirement: The annual program performance report states the actual level of performance for every performance goal, and compares it to the target performance levels for these goals in the annual performance plan.

(a) In general.

Your agency's annual report compares the target level of performance for each goal as set out in your annual plan with the actual level of performance. The target levels are those shown in either the final plan or the revised final plan; whichever is the most current.

Your agency's annual report must state the actual performance for every performance goal in your annual performance plan. (See section 232.5 if actual performance information is not available when the annual report is submitted.)

Actual performance is reported as it occurred during the fiscal year covered by the report. For some programs, this performance may have resulted from spending prior year monies during the fiscal year. (See section 220.10 on performance goals funded by prior year monies.) If the annual plan contains a goal(s) set on a calendar year basis, actual performance is also reported on a calendar year basis.

The annual report includes actual performance for any goals that were discontinued after the fiscal year covered by the report. Discontinued goals should be noted.

For some performance goals, the target levels will differ between the final plan and the revised final plan. An agency may choose to compare its actual performance to both target levels, but this is not encouraged.

Such a presentation may complicate how information appears in the annual report and likely necessitate an explanation for why at least one of the two target levels was not met.

(b) Omitting reporting on certain performance indicators.

An agency need not include actual performance information for a performance indicator if the performance goal(s) associated with the indicator(s) is directly measurable. If performance indicators are critical to determining whether a performance goal was achieved, the actual performance for these indicators must be presented. (See subsection 220.9(b) for a further description on the use of performance indicators.) Reporting may be omitted only if a performance indicator was so identified in the annual plan. If an agency collectively categorized its performance goals and indicators as performance measures, or did not separately list performance goals and performance indicators, then such entries are treated as performance goals and must be covered in the annual report.

(c) Reporting on performance goals that were defined using the alternative form.

If the alternative form (i.e., a non-quantified measure) is used to define a performance goal in the annual plan, the annual report matches actual performance to the corresponding performance criteria set out in the form. The description of actual performance must allow an accurate, independent determination to be made of whether such performance met the criteria specified in the form, or how it otherwise compared to the goal as stated. (See section 220.15 on the alternative form of measurement.)

For some performance goals expressed in the alternative form, agencies should include illustrative examples of achievements occurring during the fiscal year. Examples can highlight, in a tangible way, what results were produced. Examples may be particularly appropriate for research and development goals, where criteria may be generalized and results cannot be predicted beforehand. For these and other programs, the examples can also indicate the nature of the results considered by evaluators when gauging whether the criteria for a certain level of performance were met. Examples can reflect major accomplishments or a representative set of achievements.

232.5 Unavailability of actual performance information.

Summary of Requirement: When performance data are unavailable at the time an annual report is prepared, the performance information, the comparison to performance goal target levels, and any appropriate explanation, is included in a subsequent year's annual report.

(a) In general.

At the time a performance report is sent to the President and Congress, actual performance information may not be available, or the available information may be incomplete or preliminary. The annual report should identify those performance goals where actual performance information is missing, incomplete, or preliminary. For such goals, the annual report should indicate the approximate date when actual performance information, sufficient to make an accurate comparison with performance goal target levels, will be available.

Once available, the actual performance information is included in a subsequent annual report.

If actual performance information for the fiscal year is unavailable for a performance goal, agencies are encouraged to include, for reference purposes, performance information from an earlier fiscal year. This information can be helpful in defining baselines or showing trends. For the annual report for FY 2001, relevant performance information for fiscal years 1997 and 1998 may be included. Actual performance information for FY 1999 and 2000, if available, must be included in the FY 2001 annual report (see section 232.9). (See also section 221.2 on including actual performance information for these fiscal years in the annual plan.)

When actual performance information is available, but analyses of this data, such as the explanation for an unmet goal or a description of steps being taken to meet an unmet goal in the future, cannot substantively be completed by the time of transmittal, the data are included in the report as preliminary, and the analyses are omitted. The following year's annual report will include the data and the deferred analyses.

SECTION 232 -- WHAT DOES THE ANNUAL PROGRAM PERFORMANCE REPORT CONTAIN?

If the actual performance information included in the annual report is characterized as preliminary (see subsection 232.6(d)), the comparison between actual and target performance is deferred until a future year's report. You should note that your annual plan includes this actual performance information, but omits comparisons between actual and target performance, or any associated analysis.

(b) Displaying previously omitted prior year performance information in a subsequent annual report.

Annual reports include performance goals for a prior fiscal year where the comparison between actual performance and target levels was deferred from a prior report because of missing or limited performance data, or the analysis could not be completed in time. For these performance goals, the presentation in the future year annual report must meet all applicable requirements, including an explanation for why a goal was not met.

The annual report should present this information in a separate section, with the section subdivided, as necessary, by fiscal year. For example, the prior year section in an agency's FY 2003 performance report is subdivided into separate sections for FY 2000 and 2002 to cover deferred coverage of performance goals in the annual reports for these two years. Particular care should be taken when presenting a prior year section in a combined program performance report and accountability report.

232.6 Providing an explanation for non-achievement of a performance goal.

Summary of Requirement: The annual program performance report must include an explanation for why a performance goal was not met.

(a) In general.

If a performance goal or indicator was not achieved, your annual report must explain why the target level was not met. The extent of your explanation may vary, depending on how non-achievement affected the program or activity.

You need not explain why the target level for a performance goal was exceeded. However, you are encouraged to include an explanation in your annual report if the target level was exceeded by a significant extent. This information can be useful in understanding a program or your management of that program.

(b) The specific explanation.

A specific explanation is included if goal non-achievement is significant and material. A specific explanation should show an understanding of why a performance shortfall occurred, and the consequences. The specific explanation should also support actions you are taking to eliminate or reduce future shortfalls for this goal. A specific explanation should not cover more than one unmet goal.

No hard and fast rule or threshold exists for when non-achievement of a goal warrants a specific explanation. The need for a specific explanation may depend on how precisely the performance target was set, the variance from previous year performance trends, and the relative effect of any shortfall. For example, a one percent deviation between actual and planned performance might be trivial or critical depending on the program.

Agencies may apply the following criteria when determining if a specific explanation is required. A specific explanation should always be provided if:

- The manager(s) of the program, activity, or component experiencing a performance shortfall alerts or informs senior agency officials about actual performance levels, and the implications of these levels on overall program accomplishment; or
- The manager(s) took or is taking substantive action to address the shortfall in performance; or
- Performance levels for future years are being adjusted downward to reflect actual performance levels; or
- Outside parties will likely conclude that the non-achievement was significant and material.

(c) The generic explanation.

You must provide an explanation even if the difference between the goal target level and actual performance is slight. This explanation may be generic and used for several or more unmet goals. A generic explanation may not be used if an agency is changing the target levels for an underachieved goal, or is taking additional or modified steps to assure future goal achievement.

In most instances, minimal differences result from goals being set months in advance and to an approximate level of precision. An agency may use the following language for its generic explanation: the performance goal was set at an approximate target level, and the deviation from that level is slight. There was no effect on overall program or activity performance.

(d) Deferring an explanation.

An agency may defer providing an explanation where the performance data are preliminary, and, based on the experience of previous years, subject to significant correction. The deferral should be noted in the annual report. An explanation, if still needed, is provided in a future year performance report that includes the performance goal for which only preliminary data was initially available.

232.7 Agency plans and schedules for achieving an unmet goal in the future

Summary of Requirement: The annual program performance report describes the actions an agency will take to meet an unmet goal in the future, and a schedule for these actions. An agency may recommend that an unmet goal be modified or discontinued.

SECTION 232 -- WHAT DOES THE ANNUAL PROGRAM PERFORMANCE REPORT CONTAIN?

For every performance goal whose target level was not achieved, an agency includes a description of the actions it is taking to achieve the goal in the future. A schedule for these actions is also included. The actions and schedule may span both the current fiscal year and future fiscal years.

The actions and schedule should also be included in the means and strategies section of the agency's annual plan (see section 220.11). If an annual report is completed after the final plan, agencies may find it appropriate to use the means and strategies section of a revised final plan for this purpose. The description of these actions is not required for any unmet performance goal for which the agency provided a generic explanation (see subsection 232.6(c)).

A description of the actions being taken, and the accompanying schedule, may be omitted for an unachieved goal where external factors (such as a natural disaster) or entities (such as another country) were the sole cause for non-achievement, and the agency lacks the capacity or authority to affect these factors or entities. The effect of these external factors or entities on non-achievement should be noted in the annual report.

An agency may conclude, based on actual performance, that a performance goal cannot be achieved in the future. For such goals, the annual report explains why a particular goal is no longer practical or feasible, and recommends a course of action for the goal. These actions may include discontinuing or adjusting the goal. Changes to a performance goal may also need to be reflected in the agency's strategic plan (see section 210.9).

232.8 Evaluating performance goal levels in the current year performance plan relative to actual performance during the past fiscal year.

Summary of Requirement: An assessment of the effect of actual performance on expected performance levels in the current fiscal year is included in the annual program performance report.

Your annual report includes an assessment of the effect of actual performance levels in the fiscal year covered by the report on the estimated levels of performance in the current fiscal year. A simple conclusive statement may suffice for this assessment.

As you prepare your annual report, the performance information you collect may be used to make further adjustments to your annual plan for the current fiscal year. You may modify the performance goals or the means and strategies in a revised final plan. You may do so if actual performance information is available near the end of the fiscal year covered by the annual report. These adjustments are made at the time a revised final plan is prepared, which is usually several months in advance of the transmittal of an annual report. The annual report should identify every change to performance goals in the performance plan for the current fiscal year that primarily stem from this assessment of effects. (See section 220.18 on the revised final plan.)

The annual report may be used as a basis for revising the performance goals, the means and strategies, or verification and validation elements in either the final plan or the revised final plan for the budget year. (While the annual report appears midway through the current fiscal year, this date may be close to the

completion of a final plan, and is about six months prior to when a revised final plan for the budget year is prepared.)

232.9 Including trend data in the annual program performance report.

Summary of Requirement: Over time, agencies are required to include additional years of actual performance information until the annual report covers a minimum of four fiscal years. Three years of actual performance information are required for the FY2001 report, and four years of information will be included in the reports for FY 2002 and future years.

Your annual report will eventually include actual performance information for at least four fiscal years. Beginning with the annual report for fiscal year 2000, more than one year of actual performance information will be presented until four years of information -- the fiscal year covered by the report plus the three preceding fiscal years -- are included. The fiscal year 2001 report will include actual performance information for fiscal years 1999, 2000, and 2001; and the fiscal year 2002 report will include actual performance information for fiscal years 1999, 2000, 2001, and 2002.

Agencies may cease reporting actual performance information for prior years for any goal that is discontinued. However, at least one annual report must contain actual performance information for a discontinued goal (see subsection 232.4(a)). Agencies should not change actual performance information for prior year performance goals from what was presented in the annual reports for these prior years.

Comparisons between actual performance and performance goal target levels are not included for prior fiscal years, unless the comparison was deferred because of the unavailability or inadequacy of the performance data in a prior year's annual report, or the analysis of actual performance was not completed.

Agencies having actual performance information for fiscal year 1998 are encouraged to include this information in their annual report for fiscal year 2001. (See also section 232.5 on unavailability of actual performance information and section 221.2 on including prior year actual performance information in the FY 2003 annual plan.) Agencies are encouraged to include actual performance information from an earlier fiscal year if this would be useful in showing long-term trends; for example, data from fiscal years 1990 and 1995 could provide a long-term perspective.

232.10 Assessing the completeness and reliability of performance data.

Summary of Requirement: Agencies are required to assess the completeness and reliability of performance data included in the annual report. Any material inadequacies in the completeness and reliability of performance data are described, as well as actions being taken to remedy the inadequacies.

SECTION 232 -- WHAT DOES THE ANNUAL PROGRAM PERFORMANCE REPORT CONTAIN?

(a) In general.

The Reports Consolidation Act of 2000 specifies that your annual report contain an assessment of the completeness and reliability of the performance data included in it. The assessment describes any material inadequacies in the completeness and reliability of the data, and any actions the agency can take and is taking to resolve the inadequacies.

Your annual plan is the principal document for describing how an agency intends to verify and validate the performance data it collects and reports (see section 220.12). This description also covers those specific actions being taken by an agency during the current or a future fiscal year to improve the quality and value of the data, including its completeness and reliability. The annual report -- rather than the annual plan -- should summarize any completed steps to improve the quality and value of performance data during the fiscal year covered by the report.

(b) Assessment of data completeness.

The performance data in an annual report is considered complete if:

- Actual performance is reported for every performance goal and indicator in the annual plan, including preliminary data if that is the only data available when the annual report is sent to the President and Congress (see section 232.5 on unavailability of performance information); and
- The agency identifies, in the report, any performance goals and indicators for which actual performance data are not available at the time the annual report is transmitted, and notes that the performance data will be included in a subsequent annual report. (Agencies are encouraged to pre-announce expected lags in the reporting of performance data in their annual plan (see also subsection 220.12(d)).

An agency should describe the performance data as being incomplete when the data are not available for including in the transmitted report, and there is either a certainty or likelihood that the data will not be available in the future. The performance goals and indicators for which performance data are missing, both currently and in the future, should be identified.

(c) Assessment of data reliability.

Performance data are acceptably reliable when there is neither a refusal nor a marked reluctance by agency managers or government decisionmakers to use the data in carrying out their responsibilities. Performance data need not be perfect to be reliable, and the cost and effort to secure the best performance data possible can exceed the value of any data so obtained.

Performance data that is not acceptably reliable is characterized as being materially inadequate. The annual report should identify any performance goals and indicators for which the available performance data are materially inadequate, along with a brief reason for why the data are inadequate.

The annual report should briefly cite any actions being taken by the agency to remedy a material inadequacy, and refer the reader to the annual plan for a fuller description of these steps (see section 220.12(c)).

d. Quality of the reported performance information.

An agency may also include a brief commentary on the general, overall quality of the actual performance information contained in the annual report. This can describe particular characteristics, issues, or problems related to collection and reporting of actual performance information for the fiscal year covered by that report. Accuracy and validity of the data can also be covered. The description can include the time available to collect and analyze the actual performance data prior to transmittal of the report, and the effect of the reporting schedule on data collection, analysis, and presentation. The annual report description may cover data sources. (See also section 220.12 on verification and validation.)

**SECTION 233 -- MAY AN ANNUAL PROGRAM PERFORMANCE REPORT BE COMBINED
WITH OTHER DOCUMENTS?**

**233.1 Merging the annual program performance report with the annual performance plan
or with the annual accountability report.**

a. In general.

An agency may choose to prepare its annual performance report as a stand-alone document, or combine it with other documents. The principal options available to an agency for combining documents are:

- Merging the annual performance report with the annual performance plan; or
- Merging the annual performance report with the annual accountability report. When these two reports are combined, the ensuing document is titled a Performance and Accountability Report.

Additionally, an agency may combine its annual plan, annual performance report, and Congressional justification into a single document. Before doing so, agencies should carefully consider the practicality of producing such a document. Coordination beforehand with appropriate Congressional committees and OMB is essential before attempting to combine the Congressional justification, annual plan, and annual performance report.

GPRA prescribes that the agency head transmit a combined annual plan and annual performance report. The Reports Consolidation Act of 2000 requires that a performance and accountability report be transmitted by the agency head. (See section 231.)

The annual performance report may not be split among several documents, such as including several elements in the annual plan and placing others in an accountability report. All required elements of the annual performance report must exist in a single document, even when combined with other another plan or report. In a merged document, agencies may adjust the placement of the required report elements to enhance their presentation.

An agency wishing to combine its annual performance report with another statutory report (other than an accountability report) should discuss this proposed combination with its OMB Resource Management Office before proceeding. The timing, transmittal, and distribution requirements of section 231 apply to any such combined report.

b. The Accountability Report.

The Reports Consolidation Act of 2000 allows agencies to consolidate the following reports into an accountability report after approval by OMB:

SECTION 233 -- MAY AN ANNUAL PROGRAM PERFORMANCE REPORT BE COMBINED WITH OTHER DOCUMENTS?

- The Chief Financial Officers Act annual report, including the audited financial statement; and
- The annual Integrity Act report (as required by the Federal Managers' Financial Integrity Act).

The Department of Defense may include the biennial financial management improvement plan (10 U.S.C. 2222), and the Department of Justice may include the annual report of the Attorney General (28 U.S.C. 522). Prior approval by OMB is also required if an accountability report is to be combined with an annual performance report.

Consultation with Congress is required prior to combining any other statutory reports not listed above into an accountability report or a performance and accountability report. Congressional consultation is not required prior to combining an agency-specific report with a stand-alone annual performance report.

An accountability report also includes the following assessments:

- A statement prepared by the agency's Inspector General that summarizes the most serious management and performance challenges facing the agency, and assesses the agency's progress in addressing the challenges. Comments by the agency head may be appended to the Inspector General's statement.
- A summary of actual performance for key program performance goals during the fiscal year covered by the accountability report; and
- An assessment of the completeness and reliability of the performance and financial data used in the report, a description of any material inadequacies of the data, and actions being taken by the agency to resolve inadequacies..

c. Combining the annual performance report with the accountability report to form the performance and accountability report.

An agency may combine the annual performance report with the accountability report. Any such combined report is titled a Performance and Accountability Report. An agency must include the CFO's Act Annual Report, with its audited financial statement, in a performance and accountability report.

In a performance and accountability report, the assessment of the completeness and reliability of program performance data is included in the annual performance report section of the document (see section 232.10). Incorporating this assessment within the annual performance report will provide for consistent content presentation between a stand-alone annual performance report and a performance and accountability report. The assessment of the completeness and reliability of financial data should be included in the accountability report part of a combined report.

The Inspector General's statement of agency challenges is also included in a performance and accountability report.

In a performance and accountability report, an agency may use the annual performance report to provide basic summary information on program performance, and avoid unnecessary repetition of program performance goals in the Management's Discussion and Analysis section of the audited financial statement.

233.2 Including program performance information in the accountability report.

Agencies not combining their annual performance report with their accountability report must include a summary of the most significant portions of the annual performance report. This summary should be part of the Management's Discussion and Analysis (MD&A) section of the agency financial statement. Agencies preparing a stand-alone financial statement should also include program performance information in the MD&A portion of the statement. (The Statement of Federal Financial Accounting Standards, No. 15, defines the content of an MD&A and its placement in the agency's financial statement.)

The summary is not a replication of the annual performance report, and every goal in the annual performance report should not appear in a MD&A.

The program performance information included in an MD&A for key performance goals must be taken from the annual performance report. This should ensure that all program performance information appearing in different documents is consistent.

The program performance information included in a MD&A may be supplemented by other performance information existing within the agency, and which is not included in the annual performance report. This can include workload or transaction data.

In the program performance section of an MD&A, agencies should not include forward-looking information for program performance goals, including anticipated future performance levels, unless such levels were previously published in a strategic plan or annual performance plan. This will avoid having the MD&A identify prospective performance goals prior to transmittal of the President's budget or the agency Congressional justification.

Program performance information derived from the annual performance report is not subject to new or additional audit requirements as a consequence of its being included in the accountability report or the financial statement.

Principal Contents of the Annual Accountability Report

An Annual Accountability Report generally includes:

- A concise overview or executive summary of the reporting entity, sometimes called called a management discussion and analysis, or MD&A, that summarizes the content of the report and briefly addresses critical program and financial performance.
- Program performance information for the fiscal year covered by the accountability report. Agencies may also include prior year program performance information. (A combined accountability report and annual program performance report would automatically include this information.)
- The Federal Managers' Financial Integrity Act (FMFIA) signed assurance statements; information on management controls; and management's audit follow-up report as required by the Inspector General Act.
- Principal financial statements and accompanying footnotes; the auditor's report(s) thereon; and if applicable, required supplementary stewardship information, required supplementary information, and other accompanying financial information.

CIRCULAR NO. A-11
PART 3

**PLANNING, BUDGETING, AND
ACQUISITION OF CAPITAL ASSETS**

**EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
JULY 2001**

**SECTION 300 -- PLANNING, BUDGETING, ACQUISITION AND MANAGEMENT OF
CAPITAL ASSETS**

Ex-300 Capital asset plan

Appendix 300A: Principles of Budgeting for Capital Asset Acquisitions

Appendix 300B: Selected OMB Guidance and Other References Regarding Capital Assets

Summary of Changes

Summarizes OMB's policy for planning, acquisition and management of capital assets (sections 300.3 and 300.5).

Provides instructions for electronic submission of exhibit 300 (section 300.9).

Deletes exhibit 300A and incorporates funding information (full or incremental) into the new exhibit 300, Capital Asset Plan.

Adds a new section to exhibit 300 part I, "Project Description" and expands part II to add privacy and the requirements of the Government Information Security Reform Act.

300.1 What is the purpose of this section?

Part 3 of this Circular establishes policy for planning, budgeting, acquisition and management of Federal capital assets, and instructs you on budget justification and reporting requirements for major acquisitions. OMB provides procedural and analytic guidelines for implementing specific aspects of these policies as appendices and supplements to this Circular and in other OMB Circulars.

300.2 Does this section apply to me?

The policy and budget justification and reporting requirements in this section apply to all agencies of the Executive Branch of the government that are subject to Executive Branch review (see section 27.1).

300.3 What background information must I know?

The Federal Government must effectively manage its portfolio of capital assets to ensure that scarce public resources are wisely invested. Capital programming integrates the planning, acquisition and management of capital assets into the budget-decision-making process, and is intended to assist agencies improve asset management and to comply with the results-oriented requirements of:

- The Government Performance and Results Act of 1993, which establishes the foundation for budget decision-making to achieve strategic goals in order to meet agency mission objectives. Instructions for preparing strategic plans, annual performance plans and annual program performance reports are provided in Part 2 of this Circular (see section 220.11(d));
- The Federal Managers Financial Integrity Act of 1982, Chief Financial Officers Act of 1990 and Federal Financial Management Improvement Act of 1996, which require accountability of financial and program managers for financial results of actions taken, control over the Federal government's financial resources, and protection of Federal assets. OMB policies and standards for developing, operating, evaluating, and reporting on financial management systems are contained in Circular A-127, *Financial Management Systems* and Section 52 of this Circular;
- The Paperwork Reduction Act of 1995, which requires that agencies perform their information resource management activities in an efficient, effective and economical manner, while the Clinger-Cohen Act of 1996 requires agencies to use a disciplined capital planning and investment control process to acquire, use, maintain and dispose of information technology. OMB policy for management of Federal information resources is contained in Circular A-130, *Management of Federal Information Resources*, and Section 53 of this Circular; and
- The Federal Acquisition Streamlining Act of 1994, Title V (FASA V), which requires agencies to establish cost, schedule and measurable performance goals for all major acquisition programs, and achieve on average 90 percent of those goals. OMB policy for performance-based acquisition management of major acquisition programs is provided in this section.

300.4 What special terms must I know?

Capital assets are land, structures, equipment, intellectual property (e.g., software), and information technology that are used by the Federal government and have an estimated useful life of two years or more. Capital assets do not include items acquired for resale in the ordinary course of operations or items that are acquired for physical consumption, such as operating materials and supplies. Capital assets may be acquired in different ways: through purchase, construction, or manufacture; through a lease-purchase or other capital lease (regardless of whether title has passed to the Federal Government); through an operating lease for an asset with an estimated useful life of two years or more; or through exchange. Capital assets may or may not be capitalized (i.e., recorded in an entity's balance sheet) under Federal accounting standards. Capital assets do not include grants to State and local governments or other entities for acquiring capital assets (such as

National Science Foundation grants to universities or Department of Transportation grants to AMTRAK) or intangible assets, such as the knowledge resulting from research and development or the human capital resulting from education and training. For more discussion on capital assets, you should consult the *Capital Programming Guide* (June 1997), a Supplement to this Circular.

Capital planning and investment control are the same as capital programming. The term comes from the Clinger-Cohen Act of 1996 and generally is used by Chief Information Officers and information resource managers.

Capital project means the acquisition of a capital asset. Capital projects may consist of several useful segments.

Full acquisition means the procurement and implementation of a capital project or useful segment of a capital project. Full acquisition occurs after all planning activities are complete and the agency's Executive Review Committee or Investment Review Board selects and approves the proposed technical approach and project plan, and establishes the baseline cost, schedule and performance goals for the investment.

Full funding means that appropriations -- regular annual appropriations or advance appropriations -- are enacted that are sufficient in total to complete a useful segment of a capital project before any obligations may be incurred for that segment. When capital projects or useful segments are incrementally funded, without certainty if or when future funding will be available, it can result in poor planning, acquisition of assets not fully justified, higher acquisition costs, project delays, cancellation of major projects, the loss of sunk costs, or inadequate funding to maintain and operate the assets. Budget requests for full acquisition of capital assets must propose full funding (see section 31.4).

Information technology (IT) is defined in section 53.2.

Major acquisition means a capital project that requires special management attention because of its: (1) importance to an agency's mission; (2) high development, operating, or maintenance costs; (3) high risk; (4) high return; or (5) significant role in the administration of an agency's programs, finances, property, or other resources. The agency's documented capital programming process should include the criteria for determining when a project is classified as major. **Major IT system** is defined in section 53.2.

Performance-based acquisition management means a documented, systematic, and integrated method for establishing, monitoring, measuring, and reporting planned and actual project or contract cost, and schedule and performance outcomes or benefits. Earned Value is a method of performance-based acquisition management. A performance-based management system must be used in order to comply with the requirements of FASA, Title V.

Planning means preparing, developing or acquiring the information you will use to design the project; assess the benefits, risks, and risk-adjusted life-cycle costs of alternative solutions; and establish realistic cost, schedule, and performance goals before either proceeding to full acquisition of the capital project or useful segment or terminating the project. Planning must progress to the point where you are ready to commit to achieving specific goals for the completion of the acquisition. Information gathering activities may include market research of available solutions, architectural drawings, geological studies, engineering and design studies; and prototypes. Planning is a useful segment of a capital project. Depending on the nature of the project, one or more planning segments may be necessary.

Useful segment means an economically and programmatically separate component of a capital project that provides a measurable performance outcome for which the benefits exceed the costs, even if no further funding is appropriated.

Additional terms and definitions are included in the Glossary in Appendix 300A, “Principles of Budgeting for Capital Asset Acquisitions.”

300.5 How will agencies manage capital assets?

Agencies must establish and maintain a capital programming process that links mission needs and capital assets in an effective and efficient manner. Effective capital programming requires long-range planning and a disciplined budget decision-making process as the bases for managing a portfolio of assets to achieve performance goals and objectives with minimal risk, lowest life-cycle costs, and greatest benefits to the agency's business. The process will integrate the agency's capital investments; strategic and performance plans prepared pursuant to the Government Performance and Results Act of 1993; financial management plans prepared pursuant to the Chief Financial Officer Act of 1990 (31 U.S.C. 902a5); information resource management plans prepared pursuant to the Clinger-Cohen Act (Pub. L. 104-106, Division E); method for performance-based acquisition management under the Federal Acquisition Streamlining Act of 1994, Title V; and budget formulation and execution processes.

The documented capital programming process defines how an agency will select capital projects included in the agency's capital asset portfolio; how capital projects, once initiated, will be controlled to achieve intended cost, schedule, and performance outcomes; and how the agency will continue to evaluate asset performance to maintain a positive return on investment. A cross-functional executive review committee acting for or with the Agency Head must be responsible for managing the agency's entire capital asset portfolio, making decisions on the best allocation of assets to achieve strategic goals and objectives within budget limits.

The *Capital Programming Guide* provides guidance on the principles and techniques for effective capital programming. Appendix 300A of this Part explains the principles of financing capital asset acquisitions. Section 8b of OMB Circular A-130 establishes additional requirements for enterprise architectures, planning and control of information systems and technology investments and performance management. Agencies must develop, implement and use a capital programming process to develop their capital asset portfolio, and must:

- Evaluate and select capital asset investments that will support core mission functions that must be performed by the Federal government and demonstrate projected returns on investment that are clearly equal to or better than alternative uses of available public resources;
- Initiate improvements to existing assets or acquisitions of new assets only when no alternative private sector or governmental source can more efficiently meet the need;
- Simplify or otherwise redesign work processes to reduce costs, improve effectiveness, and make maximum use of commercial services and off-the-shelf technology;

- Reduce project risk by avoiding or isolating custom designed components, using components that can be fully tested or prototyped prior to full implementation or production, ensuring involvement and support of users;
- Structure major acquisitions into useful segments with a narrow scope and brief duration, make adequate use of competition and appropriately allocate risk between government and contractor. The agency head must approve or define the cost, schedule and performance goals for major acquisitions, and the agency's Chief Financial Officer must evaluate the proposed cost goals;
- Institute performance measures and management processes that monitor and compare actual performance to expected results. Agencies must use a performance-based acquisition management system to obtain timely information regarding the progress of capital investments. The system must also measure progress towards milestones in an independently verifiable basis, in terms of cost, capability of the investment to meet specified requirements, timeliness, and quality. Agencies must achieve, on average, 90 percent of the cost, schedule and performance goals for major acquisitions. Agency heads must review major acquisitions that are behind schedule, over budget, or not in compliance with performance or capability requirements to determine whether there is a continuing need and what corrective action, including termination, should be taken;
- Ensure that information technology systems conform to the requirements of OMB Circular No. A-130, "Management of Federal Information Resources;"
- Ensure that financial management systems conform to the requirements of OMB Circular No. A-127, "Financial Management Systems;"
- Conduct post-implementation reviews of capital programming and acquisition processes to validate estimated benefits and costs, and document effective management practices, i.e., lessons learned, for broader use; and
- Establish oversight mechanisms that require periodic review of capital assets to determine how mission requirements might have changed, and whether the asset continues to fulfill ongoing and anticipated mission requirements, deliver intended benefits to the agency and customers, and meet user requirements.

300.6 How are capital asset acquisitions funded?

(a) Background.

Good budgeting requires that appropriations for the full costs of asset acquisition be enacted in advance to help ensure that all costs and benefits are fully taken into account when decisions are made about providing resources. For most spending on acquisitions, this rule is followed throughout the Government. When capital assets are funded in increments, without certainty if or when future funding will be available, it can and occasionally does result in poor planning, acquisition of assets not fully justified, higher acquisition costs, project delays, cancellation of major projects, the loss of sunk costs, or inadequate funding to maintain and operate the assets.

(b) Full funding policy.

The full funding policy (see section 31.4) requires that each useful segment (or module) of a capital project be fully funded with either regular annual appropriations or advance appropriations. For definitions of these terms, see section 300.4 or the Glossary to Appendix 300A. Appendix 300A elaborates on the full funding concept (see the Principles of Financing section).

For the initial budget submissions, you are required to request full budget authority for all ongoing and new proposals for capital assets covered in (c) below, or at least for each useful segment of a capital project.

Identify in the initial budget submission any additional budget authority required to implement full funding for existing projects. Adjustments to your planning guidance levels will be considered based on your budget submissions.

(c) Coverage of full funding policy.

The full funding policy applies to all capital assets as defined in section 300.4.

300.7 What is exhibit 300 and how is it organized?

The information you report on exhibit 300 helps OMB:

- Understand your agency's capital programming and investment decision-making processes;
- Ensure that spending on capital assets directly supports your agency's mission and will provide a return on investment equal to or better than alternate uses of funding;
- Identify poorly performing projects, i.e. projects that are behind schedule, over budget, or lacking in capability; and
- Identify capital assets that no longer fulfill ongoing or anticipated mission requirements or do not deliver intended benefits to the agency or its customers.

Exhibit 300 consists of three parts, each of which is designed to collect information that will assist OMB during budget review. Agencies must review their portfolio of capital assets each year to determine whether it continues to meet agency mission needs reconciled with existing capabilities, priorities and resources. Capital asset investments should be compared against one another, rated and ranked using decision criteria (such as investment size, complexity, technical risk, expected performance benefits or improvement) to create a prioritized portfolio. You should request funding only for priority capital asset investments that demonstrate compliance with the requirements for managing capital assets described in this section and the agency's capital programming process. As a general presumption, OMB will only consider recommending for funding in the President's budget, priority capital asset investments that comply with the policies for good capital programming described in section 300.5.

New projects must be well justified and provide risk-adjusted cost and schedule goals and measurable performance benefits. On-going projects that are still in the planning or full acquisition stages must demonstrate satisfactory progress toward achieving baseline cost, schedule and performance goals. Projects

that are in operation and use must demonstrate that actual annual operating and maintenance costs are consistent with life-cycle estimates, and that level or quality of performance/capability continues to meet agency and user needs.

300.8 What other requirements does exhibit 300 fulfill?

Exhibit 300 is designed to coordinate OMB's collection of agency information for its reports to the Congress required by the Federal Acquisition Streamlining Act of 1994 (FASA) (Title V) and the Clinger-Cohen Act of 1996; to ensure that your acquisition plans support the mission statements, long-term goals and objectives, and annual performance plans that you developed pursuant to the Government Performance and Results Act of 1993 (GPRA); and for IT, to ensure that security, privacy and electronic transactions policies are fully implemented.

300.9 What must I report on exhibit 300 and when?

Capital asset plans are products of your capital programming process and should be developed for all capital asset acquisitions. Capital asset plans for major acquisitions are reported to OMB. You must submit a capital asset plan for each new and on-going major acquisition included in your agency's capital asset portfolio. A major acquisition requires special management attention because of its: (1) importance to an agency's mission; (2) high development, operating, or maintenance costs; (3) high risk; (4) high return; or (5) significant role in the administration of an agency's programs, finances, property, or other resources. Major IT projects must have the concurrence of the Chief Information Officer (see section 53.3 for more information about major acquisitions for information technology or major IT projects). You should consult with your OMB representative to decide which projects should be reported.

Exhibit 300 requires information that demonstrates compliance with the capital programming and capital planning and investment control policies of this section and, for IT, OMB Circular A-130, and justifies new or continued funding for major acquisitions by demonstrating: a direct connection to your agency's strategic plan; a positive return on investment for the selected alternative; sound acquisition (program and procurement) planning; comprehensive risk mitigation and management planning; and realistic cost and schedule goals and measurable performance benefits. Detailed information to substantiate the portfolio of major acquisitions included in your justification will be documented in accordance with your agency's capital programming process. An electronic version of exhibit 300 is available at www.cio.gov.

Data on information technology, a subset of data reported in exhibit 300, are also required. (See reporting requirements in section 53.) For information technology, the funding stages for "Planning" plus "Full acquisition" are the same as the "Development/modernization/enhancement" entry described in exhibit 53, and "Maintenance" is the same as "Steady state" in exhibit 53. Detail on information technology reported in exhibit 300 should be aggregated and used to prepare exhibit 53.

The information you must report will depend on whether you are reporting a new capital project or an ongoing project (see the exhibit heading in part I).

If you are reporting a new project, i.e., proposed for BY or later, or are reporting to OMB for the first time, you must complete part I; part II, sections A through D, and, if IT, sections E through G; and part III, sections A and B.

**SECTION 300 --PLANNING, BUDGETING, AND
ACQUISITION OF CAPITAL ASSETS**

If you are reporting an ongoing project, i.e., funded in CY or earlier, that is in Planning, Full Acquisition or Maintenance (or, if IT, Development/Modernization/Enhancement or Steady State), you must complete part I; and part III, sections A, B, and D; and sections C and E, if applicable. Submit a revised justification (part II A) only if changed circumstances would affect justification for the project.

Exhibit 300 must be submitted with your initial budget submission, which is due by September 10, 2001 (see section 27.1). For IT projects, you must submit exhibit 300 in electronic format either by e-mailing an electronic version of the exhibit 300 or, if your agency uses I-TIPS, by submitting it directly from I-TIPS. If you choose to e-mail exhibit 300, use the form provided at www.cio.gov and send the completed exhibit to exhibit300@omb.eop.gov. The subject line of the e-mail must include the three-digit OMB agency code (see Appendix C in part 1 of this Circular) and the full agency name.

For capital projects other than IT, agencies are encouraged to submit the exhibit 300 electronically, following the same instructions provided above.

You should submit the information requested in part I of the exhibit 300 in the format provided and explained below. The format for parts II and III of the exhibit 300 is illustrative. You may provide the information in a different format, if that is acceptable to your OMB representative and there are no substantive differences in the content.

EXPLANATION OF EXHIBIT 300: CAPITAL ASSET PLAN

PART I: A. SUMMARY OF PROJECT INFORMATION

Entry	Description
Heading	Identify your agency, bureau, account title and identification code (using the OMB agency/bureau code and basic Treasury account symbol), the program activity from the most recent budget Appendix, the name of the project, and the unique project identifier if the acquisition is information technology. Indicate whether it is a new project proposed in your budget request for BY or later, or whether it is an ongoing project funded in CY or earlier. Indicate whether the project, or useful segment, is incrementally or fully funded. (If the project is incrementally funded, your OMB representative may request your recommendation for distributing expected future incremental budget authority on a fully-funded basis.) Indicate whether it was approved by your Executive Review Committee or Investment Review Board; whether the CFO reviewed the cost goals; and whether the Procurement Executive reviewed the acquisition strategy.

**SECTION 300 --PLANNING, BUDGETING, AND
ACQUISITION OF CAPITAL ASSETS**

Entry	Description
	<p>Indicate whether it is an information technology (IT) project, as defined in section 53.2. If it is, the following information must be provided by the CIO:</p> <ul style="list-style-type: none">• Indicate whether it is a financial management system, as defined in section 53.2; whether it addresses a Federal Financial Management Improvement Act (FFMIA) compliance area; and, if so, which one.• Indicate whether it is covered by the Government Paperwork Elimination Act (GPEA), i.e., supports electronic transactions or recordkeeping, and whether it is included in the agency's GPEA implementation plan or whether it already provides an electronic option.• Indicate whether a Privacy Impact Assessment was performed.• Indicate whether the security of this project meets the requirements of the Government Information Security Reform Act (GISRA).• Indicate whether any weaknesses were identified for this project in the annual program review or independent evaluation.

B. SUMMARY OF SPENDING

Summary of spending for project by phases	<p>Provide amounts of budget authority and outlays (in millions of dollars) for the table.</p> <p>For information technology, project phases "Planning" plus "Full acquisition" are the same as the "Development/modernization/enhancement" entry described in exhibit 53, and "Maintenance" is the same as "Steady state" in exhibit 53.</p>
---	---

C. PROJECT DESCRIPTION

	<p>Briefly describe (less than ½ page) the general purpose of the project and the expected performance outcome at project completion.</p>
--	---

PART II. JUSTIFICATION AND OTHER INFORMATION

A. Justification	<p>Provide a full justification for the capital asset. This should include a clear statement of how the asset will help you meet your agency's mission, accomplish its long term strategic goals and objectives, and adhere to the annual performance plan required by GPRA. The justification should also include other information requested by the OMB representative or important to you, based on the "Principles of Budgeting for Capital Asset Acquisitions" in Appendix 300A.</p>
------------------	---

**SECTION 300 --PLANNING, BUDGETING, AND
ACQUISITION OF CAPITAL ASSETS**

Entry	Description
	Additional information requested by the OMB representative may include asset-specific information. For buildings, for example, this could include cost per square foot estimates for comparable Federal and private sector facilities.
B. Program management	Identify whether there is a program manager and contracting officer devoted to the project and provide their names.
C. Acquisition strategy	Specify whether the acquisition will be accomplished via a single contract or several contracts. If several contracts will be used, explain the role of each toward achieving the overall acquisition cost, schedule, and performance goals. What type of contract will you use (e.g., firm fixed-price, fixed-price incentive fee, cost-plus fixed fee) to mitigate or manage program risk? What financial incentives will you use to motivate contractor performance? Specify whether the contract statement of work is performance-based. How will you effectively use competition? If you conducted market research, what were the results? Will you use commercial off-the-shelf (COTS) products, or is custom-developed work necessary?
D. Alternatives analysis and risk management	<p>Summarize the analysis of full life-cycle costs/total costs of ownership (including operations and maintenance); results of cost/benefit analyses, including return on investment; analysis of alternative options and underlying assumptions; and any tangible returns that benefit your agency but are difficult to quantify.</p> <p>Summarize your risk assessment and describe your plans to mitigate or manage project risks.</p> <p>For information technology, address replaced system savings and savings recovery schedule.</p>
E. Enterprise architecture (IT projects only)	<p>Identify whether this project is identified in your agency's enterprise architecture, and if not, why.</p> <p>Explain how this project conforms to your agency's enterprise architecture; technology infrastructure; and the Federal Enterprise Architecture Framework (FEAF). If you do not follow the FEAF, discuss which framework you use.</p>
F. Security and privacy (IT projects only)	Discuss the security plan for the project and: 1) demonstrate that the costs of security controls are understood and are explicitly incorporated in the life-cycle planning of the overall system, including the additional costs of employing standards and guidance more stringent than those issued by NIST; 2) demonstrate how the agency ensures that risks are understood and continually assessed; 3) demonstrate how the agency ensures that the security controls are commensurate with the risk and magnitude of harm; 4) identify additional security controls for systems that promote or permit public access, other externally accessible systems, and those that are

Entry	Description
	interconnected with systems over which program officials have little or no control; 5) demonstrate how the agency ensures the effective use of security controls and authentication tools to protect privacy for those systems that promote or permit public access; and 6) demonstrate how the agency ensures that the handling of personal information is consistent with relevant government-wide and agency policies.
G. Government Paperwork Elimination Act (GPEA) (IT projects only)	If the project will support electronic transactions or recordkeeping that is covered by GPEA, briefly describe those functions, and how this project relates to your agency's GPEA plan. Also identify any OMB Paperwork Reduction Act (PRA) control numbers from information collections that are tied to this project.
PART III: COST, SCHEDULE, AND PERFORMANCE GOALS	
A. Description of performance-based management system (PBMS)	Identify the performance-based management system you will use to monitor the achievement of, or deviation from, baseline goals during the life-cycle of the acquisition and the operation, use, and maintenance of the asset.
B. Original baseline	This is the baseline as first approved by your OMB representative. Even if OMB approves a revised project baseline at a later date, always display the original baseline in this section.
1. Original cost and schedule goals	Show the original baseline cost and schedule goals. The cost and schedule goals should include total costs for the project, important components of the project, and important interim cost projections. It should also show how many months it will take to complete the project and important milestones within that schedule.
2. Original performance goals	List or describe the original baseline measurable performance benefits or goals.
C. Current baseline	If your OMB representative approves any changes or revisions to the original project baseline goals, show the cost, schedule, and performance goals that are now in effect.
1. Cost and schedule goals	The cost and schedule goals should include total costs for the project, important components of the project, and important interim cost projections. It should also show how many months it will take to complete the project and important milestones within that schedule.
2. Performance goals	List or describe the current measurable performance benefits or goals, and indicate whether they are described in the contract statement of work.
D. Actual performance and variance from OMB-approved baseline	Monitoring actual work performed against baseline goals is a year-round activity. Using the information provided by your

**SECTION 300 --PLANNING, BUDGETING, AND
ACQUISITION OF CAPITAL ASSETS**

Entry	Description
(original or current)	selected performance-based management system, you should compare the actual work accomplished and costs incurred to the planned work and budget and report on the variance. If you are establishing goals for the first time this year, leave this section blank.
1. Actual cost and schedule performance	Report on the planned and budgeted work that was accomplished and the actual cost of the work completed.
2. Cost and schedule variance	Report on whether the actual work completed is behind the baseline schedule by 10 percent or more or actual costs incurred exceed your planned budget by 10 percent or more. If so, explain the reasons for the variance.
3. Performance variance	Based on actual work accomplished and costs incurred, report on whether you still expect to achieve your baseline performance goals. If not, and you now expect to achieve less than 90 percent of your performance goals, explain the reasons for the variance.
E. Corrective actions	If the current cost, schedule or performance estimates vary from the baseline by 10 percent or more, explain what corrective actions have been or will be taken. Describe the effect the actions will have on cost, schedule, and performance. Explain how the project will be brought back within baseline goals or, if not, how and why the goals should be revised, and whether the project is still cost beneficial and should continue. If you are establishing goals for the first time this year or are reporting no baseline variances, leave this section blank.

300.10 What additional information should I know?

You are encouraged, but not required, to provide additional information on the following or other topics related to improving planning, budgeting, and acquisition of capital assets. These topics may be included in the OMB budget review process on capital assets, which may affect policy decisions on asset acquisition. You are encouraged to raise any issues you consider relevant.

(a) Lumpiness or spikes.

Lumpiness or spikes (i.e., large, one-time increases in year-to-year appropriations) may create bias against acquiring assets. Give special attention to these spikes for justified, cost-beneficial acquisitions, keeping in mind that the budget authority and outlay limits under the government-wide discretionary caps will continue to constrain resources. This issue is addressed in Appendix 300A, "C. Principles of Financing."

(b) Account structure.

Certain types of accounts may be preferred to help ensure there is no bias against the acquisition of capital assets. You are encouraged to review the account structure to ensure that the most appropriate accounts are

being used for the acquisition of capital assets. This issue also is addressed in Appendix 300A, "C. Principles of Financing."

(1) *Mixed accounts.* Mixed accounts have spending for both operating and capital asset acquisition in the same account, allowing for competition between the two. Demands for one may "crowd out" the other.

(2) *Asset acquisition accounts.* These accounts are devoted exclusively to the acquisition of capital assets. This type of account may be one way of avoiding lumpiness, if there is a roughly similar level of fully-funded budget authority for asset acquisition each year.

(3) *Revolving funds.* These accounts can also avoid lumpiness, depending on how they are structured. They purchase assets that are "rented" to other accounts, so that the accounts and programs using the assets have a roughly steady year-to-year payment.

(c) *Multi-year availability of appropriations.*

You should ensure that the availability of the requested appropriation allows enough time to complete the acquisition process. If the acquisition process requires more than one year, the appropriations should be made available for the number of years necessary (see part 1, section 31.7).

(d) *Other observations.*

You are invited to suggest other methods to improve planning, budgeting, and acquisition of capital assets.

Capital Asset Plan

PART I

A. SUMMARY OF PROJECT INFORMATION

Agency: Department of Government
 Bureau: Bureau of Capital Assets
 Account Title: Asset Acquisition
 Account identification code: xxx-xx-xxxx
 Program Activity:
 Name of Project:
 Unique Project Identifier: (IT only) (see section 53.7)
 This project is: New____ Ongoing____
 Project/useful segment is funded: Incrementally____ Fully____
 Did the Executive/Investment Review Committee approve funding for this project this year? Yes____ No____
 Did the CFO review the cost goal? Yes____ No____
 Did the Procurement Executive review the acquisition strategy? Yes____ No____
 Is this project information technology (see section 53.2 for a definition)? Yes____ No____
 For information technology projects *only*: (the CIO must review)
 a. Is this project a financial management system (see section 53.2 for a definition)? Yes____ No____
 If so, does this project address a FFMIA compliance area? Yes____ No____
 If so, which compliance area?
 b. Does this project implement electronic transactions or recordkeeping? Yes____ No____
 If so, is it included in your GPEA plan? Yes____ No____
 c. Was a privacy impact assessment performed for this project? Yes____ No____
 d. Does the security of this project meet the requirements of the Government Information Security Reform Act (GISRA)? Yes____ No____
 e. Were any weaknesses identified for this project in the annual program review or independent evaluation?
 Yes____ No____

Note: The information requested in part I of the exhibit 300 should be submitted in the format provided. Parts II and III of the exhibit 300 are illustrative formats. This information may be provided in a different format, if it is acceptable to your OMB representative and there are no substantive differences in the content.

B. SUMMARY OF SPENDING

(In millions)

	PY-1 and earlier years	PY	CY	BY	BY+1	BY+2	BY+3	BY+4 and beyond	Total
Planning:									
Budget authority.....				10	0	0	0	0	10
Outlays.....				7	3				10
Full acquisition: ^{1,2}									
Budget authority.....						250	0	0	250
Outlays.....						25	75	150	250
Subtotal:									
Budget authority.....				10	0	250	0	0	260
Outlays.....				7	3	25	75	150	260
Maintenance ²									
Budget authority.....							3	na	na
Outlays.....							3	na	na

¹ Specify whether the data are for a single useful segment or phase of this project, or for several or all segments and phases of this project.

² For information technology, the funding stages for "Planning" plus "Full acquisition" are the same as the Development/modernization/enhancement" entry described in exhibit 53, and "Maintenance" is the same as "Steady state" in exhibit 53.

"na" indicates not applicable.

C. PROJECT DESCRIPTION

Briefly describe (less than 1/2 page) the general purpose of the project and the expected performance

Capital Asset Plan--Continued

PART II: JUSTIFICATION AND OTHER INFORMATION

A. Justification

The need for this capital project should be demonstrated by answering the following questions:

1. How does this investment support your agency's mission and strategic goals and objectives?
2. Is this investment included in your agency's annual performance plan?
3. How does this investment support a core or priority function of your agency?
4. Are there any alternative sources, in the public or private sectors, that could perform this function? If so, explain why your agency did not select one of these alternatives.
5. How will this investment reduce costs or improve efficiencies?

Your OMB representative may request additional asset-specific information. For buildings, for example, this could include cost per square foot estimates for comparable Federal and private sector facilities.

B. Program management

Have you assigned a program manager and contracting officer to this project? If so, what are their names?

C. Acquisition strategy

Explain how your acquisition strategy will manage or mitigate projects risks:

1. Will you use a single contract or several contracts to accomplish this project? If multiple contracts are planned, explain how they are related to each other, and how each supports the project performance goals.
2. What type(s) of contract will you use (e.g. cost reimbursement, fixed-price, etc.)?
3. Will you use financial incentives to motivate contractor performance (e.g. incentive fee, award fee, etc.)?
4. Will you use competition to select suppliers?
5. Will you use commercially available or COTS products, or custom-designed products?

D. Alternatives analysis and risk management

1. Summarize the results of any life-cycle cost analysis performed for this investment, and describe what alternatives you considered and the underlying assumptions.
2. Summarize the results of any benefit/cost or return on investment analysis of alternatives.
(Describe any tangible returns that will benefit your agency even if they are difficult to quantify.)
3. Describe the results of your risk assessment for this project and discuss your plans to eliminate, mitigate or manage identified risks, e.g. financial, acquisition, technical.
4. For IT, explain replaced system savings and savings recovery schedule.

E. Enterprise architecture (IT projects only)

1. Does this project support your agency's current architecture or is it part of a modernization initiative?
2. Explain how this project conforms to:
 - a. your agency's technology infrastructure; and
 - b. the Federal Enterprise Architecture Framework (FEAF), if used for this project. If you are not following the FEAF, explain why and describe which framework you are using.

F. Security and privacy (IT projects only)

NOTE: Referring to security plans or other documents is not adequate.

Discuss the security plan for this project and:

1. demonstrate that the costs of security controls are understood and are explicitly incorporated in the life-cycle planning of the overall system, including the additional costs of employing standards and guidance more stringent than those issued by NIST;
2. demonstrate how the agency ensures that risks are understood and continually assessed;
3. demonstrate how the agency ensures that the security controls are commensurate with the risk and magnitude of harm;
4. identify additional security controls for systems that promote or permit public access, other externally accessible systems, and those that are interconnected with systems over which program officials have little or no control;
5. demonstrate how the agency ensures the effective use of security controls and authentication tools to protect privacy for those systems that promote or permit public access; and
6. demonstrate how the agency ensures that the handling of personal information is consistent with relevant government-wide and agency policies.

G. Government Paperwork Elimination Act (GPEA) (IT projects only)

If this project supports electronic transactions or recordkeeping, briefly describe the transaction or recordkeeping functions and how this investment relates to your agency's GPEA plan. Identify any OMB Paperwork Reduction Act control numbers from information collections that are tied to this investment.

Capital Asset Plan--Continued**PART III: COST, SCHEDULE, AND PERFORMANCE GOALS****A. Performance-based management system (PBMS):**

Which performance-based management system will you use to monitor and manage contract or project progress?

B. Original baseline (OMB-approved at project outset):

Using the format of your selected PBMS, provide the following:

1. What are the cost and schedule goals for this segment or phase of the project?
[i.e., what are the major project milestones or events; when will each occur; and what is the estimated cost to accomplish each one?]
2. What are the measurable performance benefits or goals for this segment or phase of this project?
[What are the measurable performance improvements or efficiencies that you expect to achieve with this project?]

C. Current baseline (applicable *only* if OMB approved the changes):

Using the format of your selected PBMS, provide the following:

1. What are the cost and schedule goals for this segment or phase of the project?
2. What are the measurable performance benefits or goals for this segment or phase of this project?

D. Actual Performance and Variance from OMB-approved baseline:

1. Actual cost and schedule performance. Using the information from your PBMS, explain:
 - a. What work you planned (scheduled) to accomplish and how much you budgeted to complete the work.
 - b. What work you actually accomplished and how much you actually spent.
2. Cost and schedule variance. If either the actual work accomplished or costs incurred vary from your baseline goals by 10 percent or more, explain:
 - a. The variance between planned and actual costs or planned and actual schedule, expressed as a percentage of the baseline goal.
 - b. The reason for the variance.
3. Performance variance. Explain whether, based on work accomplished to date, you still expect to achieve your performance goals. If not, explain the reasons for the variance.

E. Corrective actions:

If actual work accomplished or costs incurred to date vary from the planned baseline goals by 10 percent or more, explain:

- a. What you plan to do, if anything, to correct project performance.
- b. What effect your action will have on overall project cost, schedule and performance benefits.

APPENDIX 300A -- PRINCIPLES OF BUDGETING FOR CAPITAL ASSET ACQUISITIONS

Introduction and Summary

The Administration plans to use the following principles in budgeting for capital asset acquisitions. These principles address planning, costs and benefits, financing, and risk management requirements that should be satisfied before a proposal for the acquisition of capital assets can be included in the Administration's budget. A Glossary describes key terms. OMB has also published the *Capital Programming Guide* (June 1997), a Supplement to this Circular. The *Guide* is a basic reference on principles and techniques for planning, budgeting, acquisition, and management of capital assets. Agencies should consult the *Guide* when preparing their capital plans and developing their budget requests from their capital plans.

The principles are organized in the following four sections:

- A. *Planning*. This section focuses on the need to ensure that capital assets support core/priority missions of the agency; the assets have demonstrated a projected return on investment that is clearly equal to or better than alternative uses of available public resources; the risk associated with the assets is understood and managed at all stages; and the acquisition is implemented in phased, successive segments, unless it can be demonstrated there are significant economies of scale at acceptable risk from funding more than one segment or there are multiple units that need to be acquired at the same time.
- B. *Costs and Benefits*. This section emphasizes that the asset should be justified primarily by benefit-cost analysis, including life-cycle costs; that all costs are understood in advance; and that cost, schedule, and performance goals are identified that can be measured using an earned value management system or similar system.
- C. *Principles of Financing*. This section stresses that useful segments are to be fully funded with regular or advance appropriations, or both; that as a general rule, planning segments should be financed separately from procurement of the asset; and that agencies are encouraged to aggregate assets in capital acquisition accounts and take other steps to accommodate lumpiness or "spikes" in funding for justified acquisitions.
- D. *Risk Management*. This section is to help ensure that risk is analyzed and managed carefully in the acquisition of the asset. Strategies can include separate accounts for capital asset acquisitions, the use of apportionment to encourage sound management, and the selection of efficient types of contracts and pricing mechanisms in order to allocate risk appropriately between the contractor and the Government. In addition, cost, schedule, and performance goals are to be controlled and monitored by using an earned value management system or a similar system; and if progress toward these goals is not met, there is a formal review process to evaluate whether the acquisition should continue or be terminated.

As defined here, capital assets are generally land, structures, equipment, and intellectual property (including software) that are used by the Federal Government, including weapon systems. Not included are grants to States or others for their acquisition of capital assets. A complete definition is provided in section 300.4.

A. Planning

Investments in major capital assets proposed for funding in the Administration's budget should:

1. Support core/priority mission functions that need to be performed by the Federal Government;
2. Be undertaken by the requesting agency because no alternative private sector or governmental source can support the function more efficiently;
3. Support work processes that have been simplified or otherwise redesigned to reduce costs, improve effectiveness, and make maximum use of commercial, off-the-shelf technology;
4. Demonstrate a projected return on the investment that is clearly equal to or better than alternative uses of available public resources. Return may include: improved mission performance in accordance with measures developed pursuant to the Government Performance and Results Act; reduced cost; increased quality, speed, or flexibility; and increased customer and employee satisfaction. Return should be adjusted for such risk factors as the project's technical complexity, the agency's management capacity, the likelihood of cost overruns, and the consequences of under- or non-performance.
5. For information technology investments, be consistent with Federal, agency, and bureau information architectures, which: integrate agency work processes and information flows with technology to achieve the agency's strategic goals; reflect the agency's technology vision; specify standards that enable information exchange and resource sharing, while retaining flexibility in the choice of suppliers and in the design of local work processes; and ensure that security is built into and funded as part of the system architecture in accordance with OMB Memorandum M-00-07: "Incorporating and Funding Security in Information Systems Investments (February 28, 2000)."
6. Reduce risk by: avoiding or isolating custom-designed components to minimize the potential adverse consequences on the overall project; using fully tested pilots, simulations, or prototype implementations when necessary before going to production; establishing clear measures and accountability for project progress; and, securing substantial involvement and buy-in throughout the project from the program officials who will use the system;
7. Be implemented in phased, successive segments as narrow in scope and brief in duration as practicable, each of which solves a specific part of an overall mission problem and delivers a measurable net benefit independent of future segments, unless it can be demonstrated that there are significant economies of scale at acceptable risk from funding more than one segment or there are multiple units that need to be acquired at the same time; and
8. Employ an acquisition strategy that appropriately allocates risk between the Government and the contractor, effectively uses competition, ties contract payments to accomplishments, and takes maximum advantage of commercial technology.

Prototypes require the same justification as other capital assets.

As a general presumption, OMB will recommend new or continued funding only for those capital asset investments that satisfy these criteria. Funding for those projects will be recommended on a phased basis by segment, unless it can be demonstrated that there are significant economies of scale at acceptable risk from funding more than one segment or there are multiple units that need to be acquired at the same time.

OMB recognizes that many agencies are in the middle of ongoing projects, and they may not be able immediately to satisfy the criteria. For those projects that do not satisfy the criteria, OMB will consider requests to use FY 2001 and FY 2002 funds to finance additional planning, as necessary, to support the establishment of realistic cost, schedule, and performance goals for the completion of the project. This planning could include: the redesign of work processes, the evaluation of alternative solutions, the development of information system architectures, and, if necessary, the purchase and evaluation of prototypes. Realistic goals are necessary for agency portfolio analysis to determine the viability of the project, to provide the basis for fully funding the project to completion, and setting the baseline for management accountability to deliver the project within goals.

Because OMB considers this information essential to agencies' long-term success, OMB will use this information both in preparing the Administration's budget and, in conjunction with cost, schedule, and performance data, as apportionments are made. Agencies are encouraged to work with their OMB representative to arrive at a mutually satisfactory process, format, and timetable for providing the requested information.

B. Costs and Benefits

The justification of the project should evaluate and discuss the extent to which the project meets the above criteria and should also include:

1. An analysis of the project's total life-cycle costs and benefits, including the total budget authority required for the asset, consistent with policies described in OMB Circular A-94: *Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs* (October 1992);
2. An analysis of the risk of the project including how risks will be isolated, minimized, monitored, and controlled, and, for major programs, an evaluation and estimate by the Chief Financial Officer of the probability of achieving the proposed goals;
3. If, after the planning phase, the procurement is proposed for funding in segments, an analysis showing that the proposed segment is economically and programmatically justified--that is, it is programmatically useful if no further investments are funded, and in this application its benefits exceed its costs; and
4. Cost, schedule, and performance goals for the project (or the planning segment or useful asset being proposed) that can be measured throughout the acquisition process using a performance-based management system, e.g., Earned Value Management.

C. Principles of Financing

Principle 1: Full Funding

Budget authority sufficient to complete a useful segment of a capital project (or the entire capital project, if it is not divisible into useful segments) must be appropriated before any obligations for the useful segment (or project) may be incurred.

Explanation: Good budgeting requires that appropriations for the full costs of asset acquisition be enacted in advance to help ensure that all costs and benefits are fully taken into account at the time decisions are made to provide resources. Full funding with regular appropriations in the budget year also leads to tradeoffs within the budget year with spending for other capital assets and with spending for purposes other than capital assets. Full funding increases the opportunity to use performance-based fixed price contracts, allows for more efficient work planning and management of the capital project, and increases the accountability for the achievement of the baseline goals.

When full funding is not followed and capital projects or useful segments are funded in increments, without certainty if or when future funding will be available, the result is sometimes poor planning, acquisition of assets not fully justified, higher acquisition costs, cancellation of major projects, the loss of sunk costs, or inadequate funding to maintain and operate the assets.

Principle 2: Regular and Advance Appropriations

Regular appropriations for the full funding of a capital project or a useful segment of a capital project in the budget year are preferred. If this results in spikes that, in the judgment of OMB, cannot be accommodated by the agency or the Congress, a combination of regular and advance appropriations that together provide full funding for a capital project or a useful segment should be proposed in the budget.

Explanation: Principle 1 (Full Funding) is met as long as a combination of regular and advance appropriations provide budget authority sufficient to complete the capital project or useful segment. Full funding in the budget year with regular appropriations alone is preferred because it leads to tradeoffs within the budget year with spending for other capital assets and with spending for purposes other than capital assets. In contrast, full funding for a capital project over several years with regular appropriations for the first year and advance appropriations for subsequent years may bias tradeoffs in the budget year in favor of the proposed asset because with advance appropriations the full cost of the asset is not included in the budget year. Advance appropriations, because they are scored in the year they become available for obligation, may constrain the budget authority and outlays available for regular appropriations of that year.

If, however, the lumpiness caused by regular appropriations cannot be accommodated within an agency or Appropriations Subcommittee, advance appropriations can ameliorate that problem while still providing that all of the budget authority is enacted in advance for the capital project or useful segment. The latter helps ensure that agencies develop appropriate plans and budgets and that all costs and benefits are identified prior to providing resources. In addition, amounts of advance appropriations can be matched to funding requirements for completing natural components of the useful segment. Advance appropriations have the same benefits as regular appropriations for improved planning, management, and accountability of the project.

Principle 3: Separate Funding of Planning Segments

As a general rule, planning segments of a capital project should be financed separately from the procurement of a useful asset.

Explanation: The agency must have information that allows it to plan the capital project, develop the design, and assess the benefits, costs, and risks before proceeding to procurement of the useful asset. This is especially important for high risk acquisitions. This information comes from activities, or planning segments, that include but are not limited to market research of available solutions, architectural drawings, geological studies, engineering and design studies, and prototypes. The construction of a prototype that is a capital asset, because of its cost and risk, should be justified and planned as carefully as the project itself. The process of gathering information for a capital project may consist of one or more planning segments, depending on the nature of the asset. Funding these segments separately will help ensure that the necessary information is available to establish cost, schedule, and performance goals before proceeding to procurement.

If budget authority for planning segments and procurement of the useful asset are enacted together, OMB may wish to apportion budget authority for one or several planning segments separately from procurement of the useful asset.

Principle 4: Accommodation of Lumpiness or "Spikes" and Separate Capital Acquisition Accounts

To accommodate lumpiness or "spikes" in funding justified capital acquisitions, agencies, working with OMB, are encouraged to aggregate financing for capital asset acquisitions in one or several separate capital acquisition budget accounts within the agency, to the extent possible within the agency's total budget request.

Explanation: Large, temporary, year-to-year increases in budget authority, sometimes called lumps or spikes, may create a bias against the acquisition of justified capital assets. Agencies, working with OMB, should seek ways to avoid this bias and accommodate such spikes for justified acquisitions. Aggregation of capital acquisitions in separate accounts may:

- Reduce spikes within an agency or bureau by providing roughly the same level of spending for acquisitions each year;
- Help to identify the source of spikes and to explain them. Capital acquisitions are more lumpy than operating expenses; and with a capital acquisition account, it can be seen that an increase in operating expenses is not being hidden and attributed to one-time asset purchases;
- Reduce the pressure for capital spikes to crowd out operating expenses; and
- Improve justification and make proposals easier to evaluate, since capital acquisitions are generally analyzed in a different manner than operating expenses (e.g., capital acquisitions have a longer time horizon of benefits and life-cycle costs).

D. Risk Management

Risk management should be central to the planning, budgeting, and acquisition process. Failure to analyze and manage the inherent risk in all capital asset acquisitions may contribute to cost overruns, schedule shortfalls, and acquisitions that fail to perform as expected. For each major capital project, a risk analysis that includes how risks will be isolated, minimized, monitored, and controlled may help prevent these problems.

The project cost, schedule and performance goals established through the planning phase of the project are the basis for approval to procure the asset and the basis for assessing risk. During the procurement phase, performance-based management systems (earned value or similar system) must be used to provide contractor and Government management visibility on the achievement of, or deviation from, goals until the asset is accepted and operational. If goals are not being met, performance-based management systems allow for early identification of problems, potential corrective actions, and changes to the original goals needed to complete the project and necessary for agency portfolio analysis decisions. These systems also allow for Administration decisions to recommend meaningful modifications for increased funding to the Congress, or termination of the project, based on its revised expected return on investment in comparison to alternative uses of the funds. Agencies must ensure that the necessary acquisition strategies are implemented to reduce the risk of cost escalation and the risk of failure to achieve schedule and performance goals. These strategies may include:

1. Having budget authority appropriated in separate capital asset acquisition accounts;
2. Apportioning budget authority for a useful segment;
3. Establishing thresholds for cost, schedule, and performance goals of the acquisition, including return on investment, which if not met may result in cancellation of the acquisition;
4. Selecting types of contracts and pricing mechanisms that are efficient and that provide incentives to contractors in order to allocate risk appropriately between the contractor and the Government;
5. Monitoring cost, schedule, and performance goals for the project (or the planning segment or useful asset being proposed) using a performance-based management system, e.g., Earned Value Management System.
6. If progress is not within 90 percent of goals, or if new information is available that would indicate a greater return on investment from alternative uses of funds, instituting senior management review of the project through portfolio analysis to determine the continued viability of the project with modifications, or the termination of the project, and the start of exploration for alternative solutions if it is necessary to fill a gap in agency strategic goals and objectives.

E. Glossary

Appropriations, regular annual or advance, provide budget authority that permits Government officials to incur obligations that result in immediate or future outlays of Government funds.

Regular annual appropriations are:

- Enacted normally in the current year;
- Scored entirely in the budget year; and
- Available for obligation in the budget year and subsequent years if specified in the language. (See "***Availability***," below)

Advance appropriations may be accompanied by regular annual appropriations to provide funds available for obligation in the budget year as well as subsequent years. Advance appropriations are:

- Enacted normally in the current year;
- Scored after the budget year (e.g., in each of one, two, or more later years, depending on the language); and
- Available for obligation in the year scored and subsequent years if specified in the language. (See "***Availability***," below.)

Availability refers to the period during which appropriations may be legally obligated. Appropriations made in appropriations acts are available for obligation only in the budget year, unless the language specifies that an appropriation is available for a longer period. If the language specifies that the funds are to remain available until the end of a certain year beyond the budget year, the availability is said to be "multi-year." If the language specifies that the funds are to remain available until expended, the availability is said to be "no-year." Appropriations for major procurements and construction projects are typically made available for multiple years or until expended.

Earned Value Management (EVM) is a project management tool that effectively integrates the project scope of work with schedule and cost elements for optimum project planning and control. The qualities and operating characteristics of earned value management systems are described in *EIA STANDARD: Earned Value Management Systems*, American National Standards Institute (ANSI) ANSI/EIA-748-1998, approved May 19, 1998 (see Appendix 300B).

Funding (full funding and incremental (partial) funding) is defined in section 300.4.

Risk Management is an organized method of identifying and measuring risk and developing, selecting, and managing options for handling these risks. Before beginning any procurement, managers should review and revise as needed the acquisition plan to ensure that risk management techniques considered in the planning phase are still appropriate.

There are three key principles for managing risk when procuring capital assets: (1) avoiding or limiting the amount of development work (i.e., use off-the-shelf technology, if feasible); (2) making effective use of competition and financial incentives; and (3) establishing a performance-based acquisition management system that provides for accountability for program successes and failures, such as an earned value system or similar system.

There are several types of risk an agency should consider as part of risk management. The types of risk include:

- Schedule risk;
- Cost risk;
- Technical feasibility;
- Risk of technical obsolescence;
- Dependencies between a new project and other projects or systems (e.g., closed architectures); and
- Risk of creating a monopoly for future procurement.

REGARDING CAPITAL ASSETS**

EXECUTIVE ORDERS

Executive Order No. 12893, "Principles for Federal Infrastructure Investments," provides principles for the systematic economic analysis of infrastructure investments and their management. OMB Bulletin No. 94-16, Guidance on Executive Order No. 12893, "Principles for Federal Infrastructure Investments" (March 7, 1994), provides guidance for implementing this Order and appends the Order itself.

OMB CIRCULARS AND MEMORANDA

OMB Circular No. A-11, *Preparing and Submitting Budget Estimates* (July 2001):

Part 1: Preparation and Submission of Budget Estimates

- Section 31.4, Full funding, requires that the agency request include full funding for procurement and construction. See section 300.6 for more discussion of this policy.
- Section 33.22, Systems acquisitions, states that agencies should develop their estimates of major systems acquisitions, including information technology systems, consistent with guidance in the *Capital Programming Guide*, the requirements of Title V of the Federal Acquisition Streamlining Act of 1994 (FASA), and the Clinger-Cohen Act of 1996 (ITMRA)
- Section 52, Information on Financial Management, requires agencies to submit data on financial management plans, systems and resources.
- Section 53, Information technology, requires agencies to submit data on information technology projects.
- Section 84, Character classification, requires information on different kinds of investment and grants to State and local governments.

Part 2: Preparation and Submission of Annual Performance Plans

- Section 220.11, Description of means and strategies, and identifying required resources, processes and technologies, requires information on the various resources, skills, technologies and processes that agencies will need to achieve their annual performance goals.

Part 3: Planning, Budgeting, and Acquisition of Capital Assets

Capital Programming Guide (June 1997). The *Guide* is a Supplement to this Circular.

OMB Circular No. A-94, *Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs* (October 1992, with periodic revisions of the discount rate benefit-cost, cost-effectiveness, and lease-purchase analysis for you to use in evaluating Federal activities including capital asset acquisition. It includes guidelines on the discount rate to use in calculating the present value of future benefits and costs,

the measurement of benefits and costs, the treatment of uncertainty, and other issues. This guidance must be followed in all analyses you submit to OMB in support of legislative and budget programs.

OMB Circular No. A-127, *Financial Management Systems* (revised July 23, 1993), prescribes policies and standards for you to follow in developing, operating, evaluating, and reporting on financial management systems. Revised further in Transmittal Memorandum #2 (June 10, 1999).

OMB Circular No. A-130, *Management of Federal Information Resources* (revised November 20, 2000), provides principles for internal management and planning practices of information systems and technology.

OMB Memorandum M-00-10, *OMB Procedures and Guidance on Implementing the Government Paperwork Elimination Act* (April 25, 2000). This memorandum provides guidance implementing on the Government Paperwork Elimination Act (GPEA), which requires agencies, by October 21, 2003, to provide for the (1) option of electronic maintenance, submission, or disclosure of information, when practicable as a substitute for paper; and (2) use and acceptance of electronic signatures, when practicable.

OMB Memorandum M-00-13, *Privacy Policies and Data Collection on Federal Websites* (June 22, 2000). This memorandum reminds agencies that they are required by law and policy to establish clear privacy policies for its web activities and to comply with those policies.

OMB Memorandum M-01-08, *Guidance on Implementing the Government Information Security Reform Act* (January 16, 2001). This memorandum provides guidance on the management and evaluation aspects of security for unclassified and national security systems.

OMB Memorandum M-01-14, *2001 Discount Rates for OMB Circular A-94* (March 7, 2001). This memorandum provides the annual update of discount rates in Appendix C of OMB Circular A-94. These rates will be in effect from March 2001 through the end of January 2002.
